

One heritage base, three relay fields, twelve reversible interfaces

Re-layer railway heritage, public life, innovation collaboration, and trustworthy intelligence into a city interface that can be calibrated, questioned, corrected, and withdrawn.

PROVISIONAL / HUMAN GATE / HumanDecision PENDING

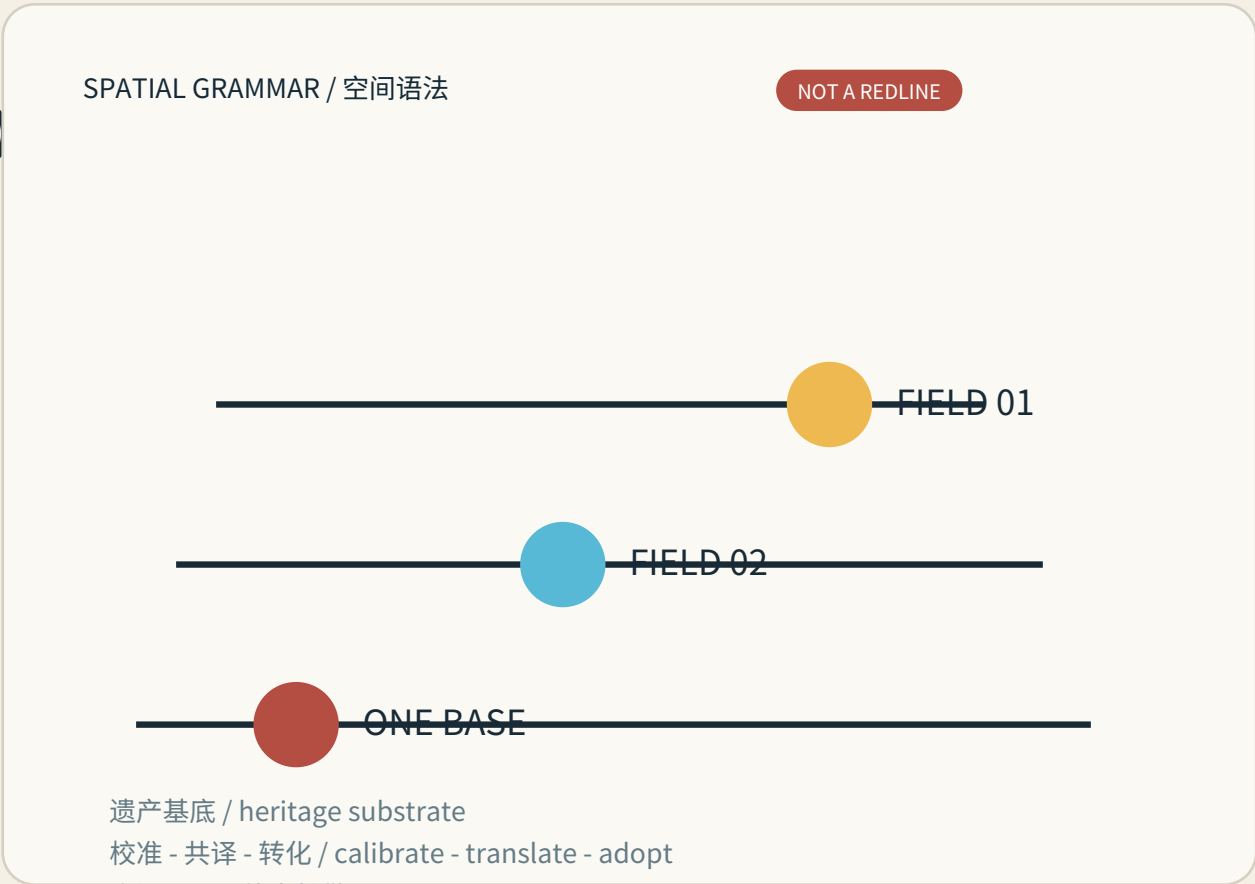

A CENTENNIAL BASE. A CITY RE-LAYERED

FROM RAILWAY HERITAGE TO CIVIC INTELLIGENCE INFRASTRUCTURE

Re-layer railway heritage, public life, innovation collaboration, and trustworthy intelligence into a city interface that can be calibrated, questioned, corrected, and withdrawn.

CONCEPT FREEZE / V3

STRATA: make each layer's source, relation, and responsibility visible.
RE-LAYER: make each intervention verifiable, correctable, and withdrawable.

01 / THE PROPOSITION

Input: official brief + public sources + provisional geometry + structured metrics.
Output: a comparable concept family, not a single machine answer.

From a line to a reversible civic interface

Acknowledge evidence gaps before drawing relationships; all boundaries shown are provisional concept geometry.

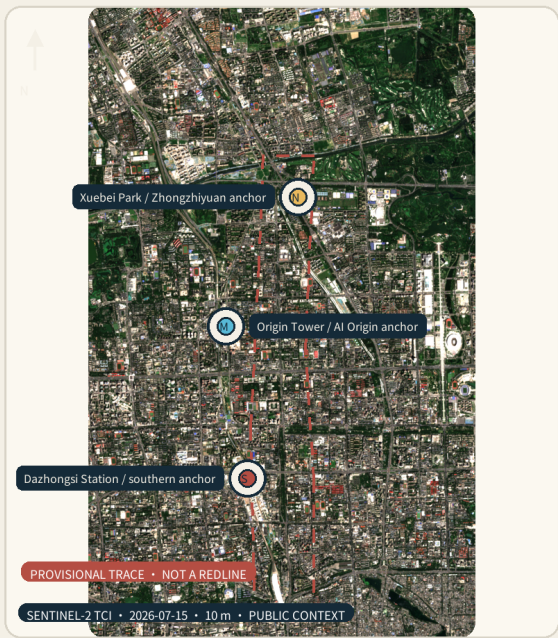

PROVISIONAL / HUMAN GATE / HumanDecision PENDING

JINGZHANG STRATA

FIGURE 01
OPEN CONCEPT / HUMAN GATE

Site overview / broad context base

Read the full urban context first, then use railway heritage as a relational substrate; the three anchors are dispersed city nodes, not adjacent parcels.

REAL CONTEXT

11.4 km² is the current provisional discussion scope; Sentinel-2 checks urban fabric, water form, and node spacing, not an official boundary.

Approx. from public coordinates: north-middle 3.1 km, middle-south 3.3 km, north-south 6.0 km.

NORTH → MIDDLE → SOUTH

Xuebei Park / Zhongzhiyuan anchor
40.018696 N • 116.351380 E

Origin Tower / AI Origin anchor
39.994249 N • 116.333645 E

Dazhongsi Station / southern anchor
39.965273 N • 116.339014 E

ONE BASE / THREE FIELDS

Railway heritage and public life form a traceable version base; three fields sit in different urban fragments, and field relationships are not parcel boundaries.

TWO WINGS / TWELVE PROTOTYPES

Zhongguancun Technology Services Wing × Xiaoyuehe Scenario Enablement Wing

S01–S12 replaceable, pausable, reversible scenario interfaces

Source: Sentinel-2 TCI + imagery-manifest.json + public anchor coordinates + provisional site trace | water and boundary interpretation remains non-official

PROVISIONAL • HUMAN GATE

Evidence gap

Official polygons, measured air baselines, ownership, and accountable operators are not complete; unknowns remain pending rather than being silently filled by a model.

Spatial gap

The linear heritage needs readable, accessible, human-switchable interfaces to neighborhoods, stations, campuses, and daily services.

Service gap

AI may generate constrained candidate families; release, pause, rollback, and withdrawal remain HumanDecision responsibilities.

Source: proposal.md / site_boundary.geojson / constraints.geojson

PROVISIONAL / NOT A REDLINE

One Base, Three Fields, Two Wings, Twelve Prototypes

The grammar expresses adjacency and relay relationships only; it creates no redlines, parcels, engineering works, or operating commitments.

PROVISIONAL / HUMAN GATE / HumanDecision PENDING

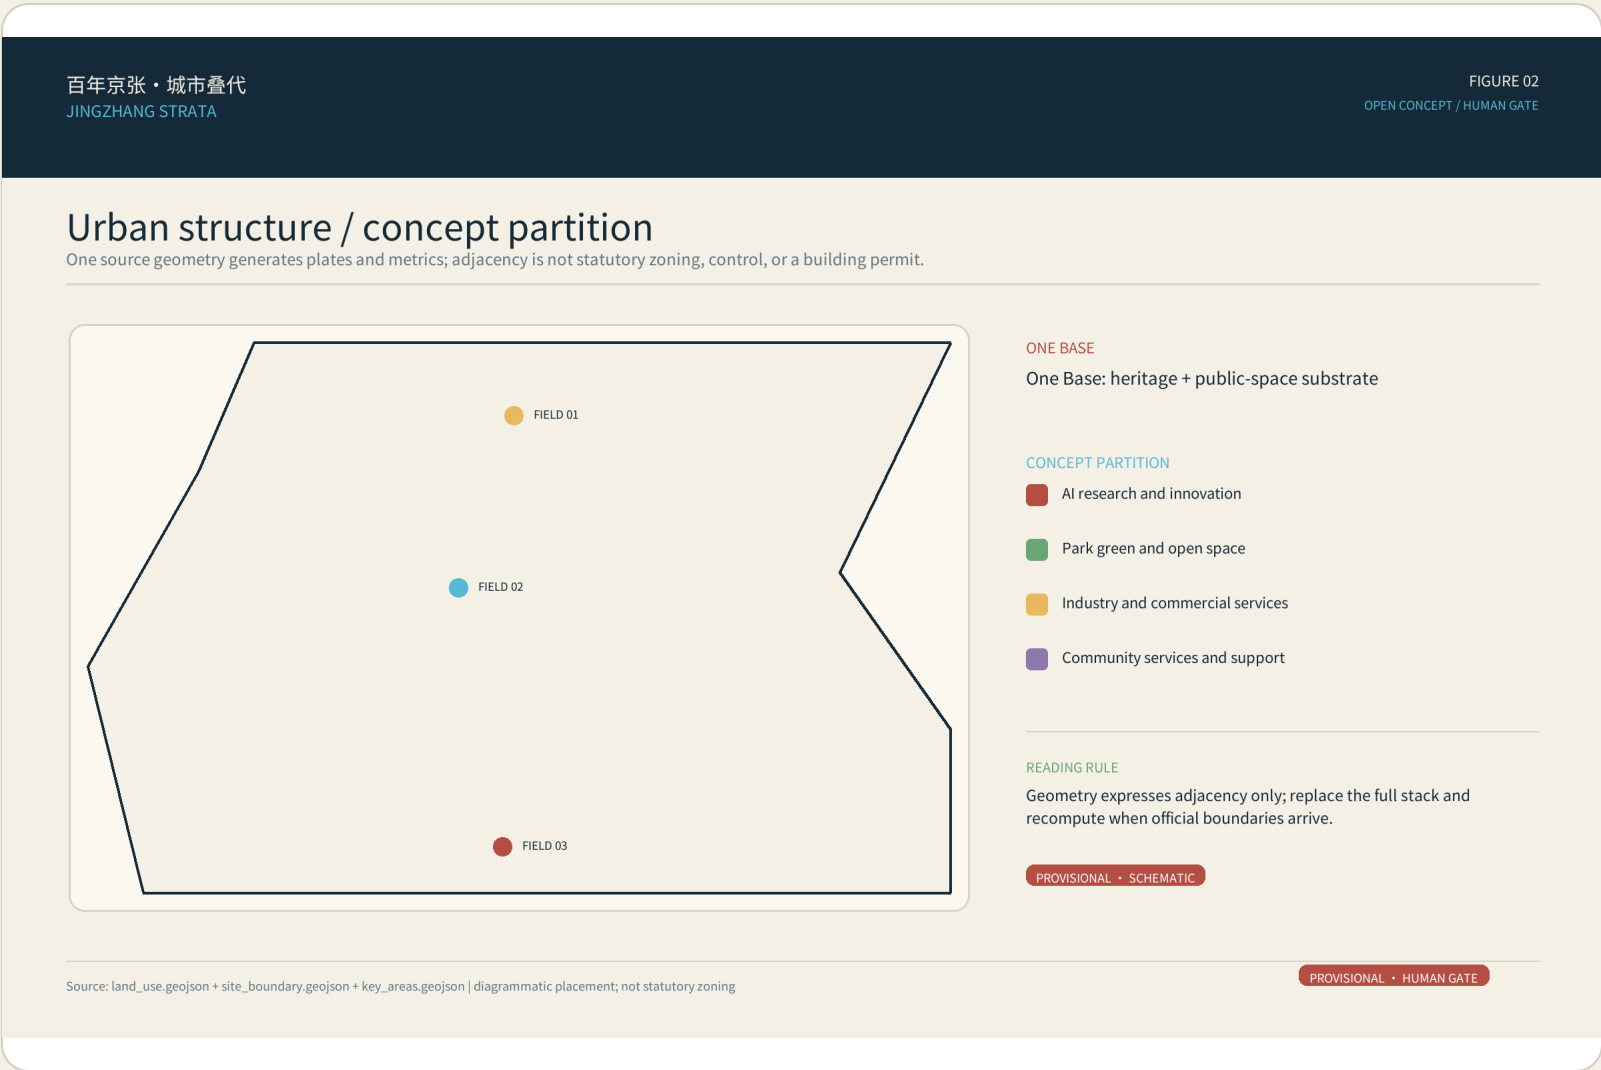

Figure 02 / concept partition / same-source geometry and metrics

一基 / ONE BASE

The heritage substrate carries time, memory, existing public life, and responsibility boundaries; it is a version base, not a heritage finding or construction area.

三场 / THREE FIELDS

Zhongzhiyuan Calibration Field - AI Origin Community Civic Translation Field - Dazhongsi Adoption Field: calibrate, translate, adopt through a question-ready relay.

两翼 + 十二原型

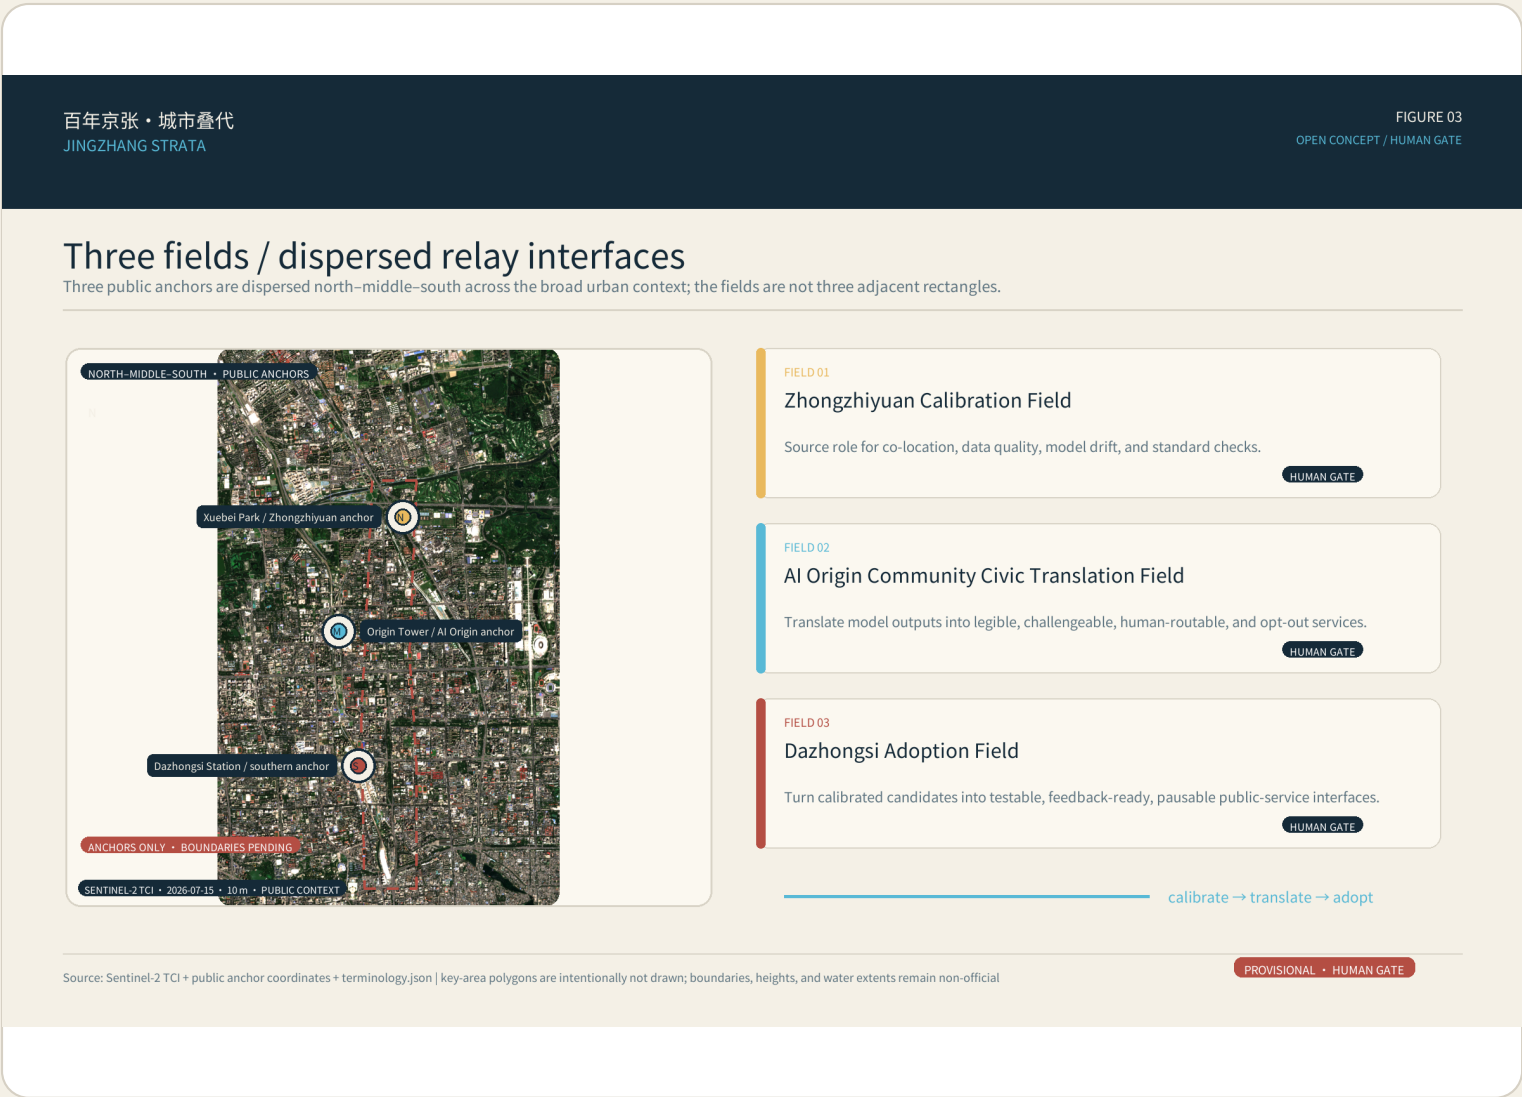

The Zhongguancun Technology Services Wing and Xiaoyuehe Scenario Enablement Wing import and diffuse capability; S01-S12 are replaceable, pausable, withdrawable interfaces.

CONCEPT PARTITION / SCHEMATIC

Three fields are relay interfaces, not three new districts

Each field must answer: who calibrates, who explains, who releases, who pauses, and who reviews.

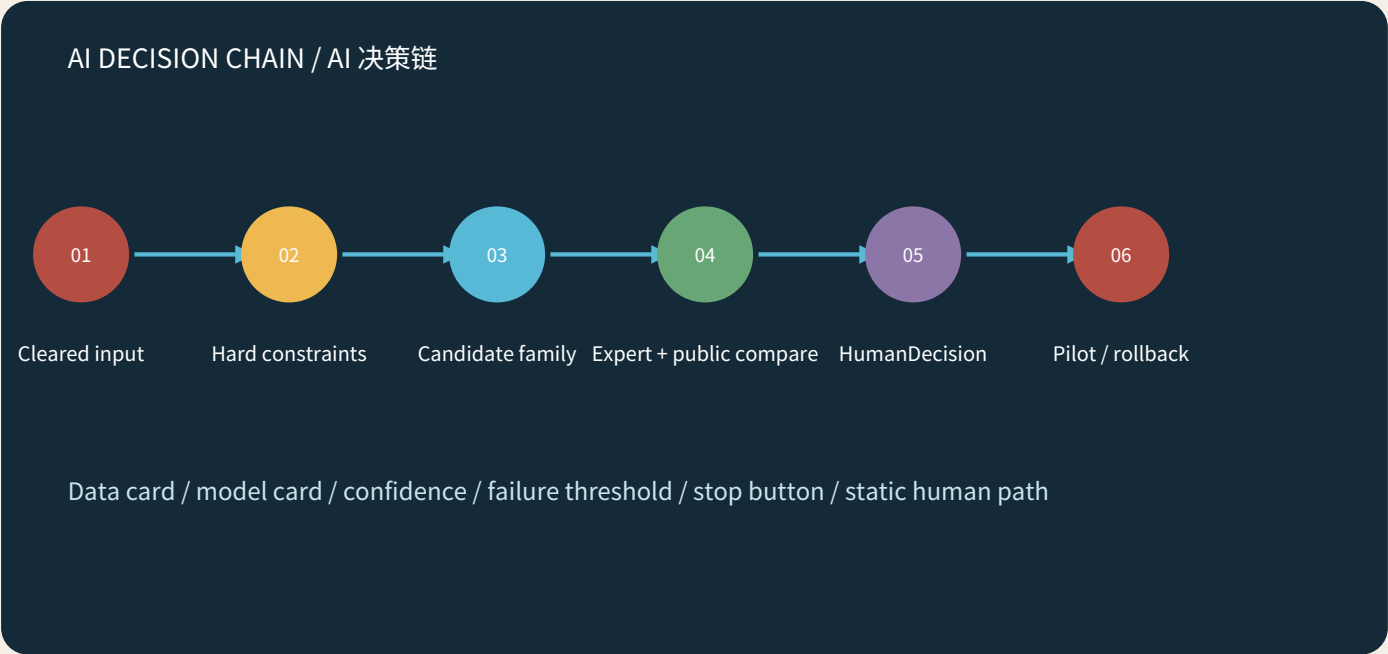

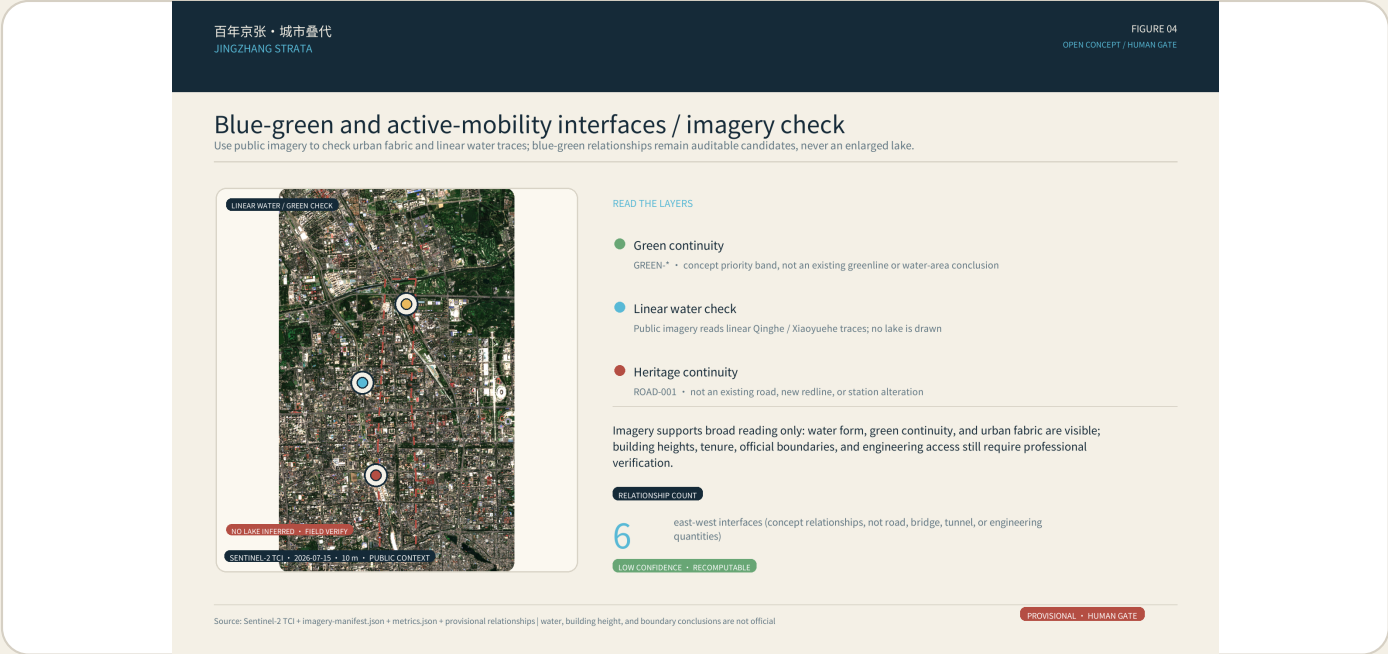

PROVISIONAL / HUMAN GATE / HumanDecision PENDING

Trustworthy intelligence: candidate families, not a single answer

Figures, metrics, and evidence derive from the same structured inputs; a model cannot approve, release, or represent the public.

PROVISIONAL / HUMAN GATE / HumanDecision PENDING

S01-S12 / twelve reversible scenario interfaces

- S01 Co-location

S02 Drift red-team

S03 Terminal UX

S04 Active mobility
- S05 Accessibility

S06 Ventilation

S07 Pollen/dust

S08 Blue-green
- S09 Event/construction

S10 Shift work

S12 Multilingual guide

MACHINE-GENERATED CANDIDATE / HUMAN GATE

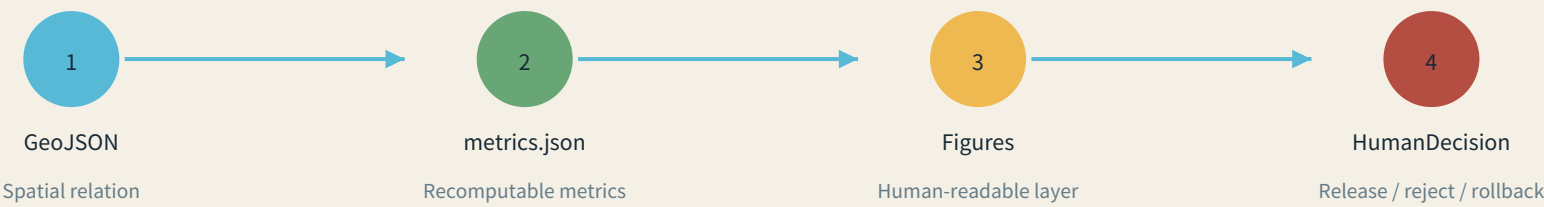

Metrics and evidence: recomputable knowns, explicit unknowns

Low-confidence concept values support comparison and review only; official polygons require replacement, clipping, recomputation, and re-rendering.

PROVISIONAL / HUMAN GATE / HumanDecision PENDING

Evidence chain / 证据链

WAIT FOR OFFICIAL DATA

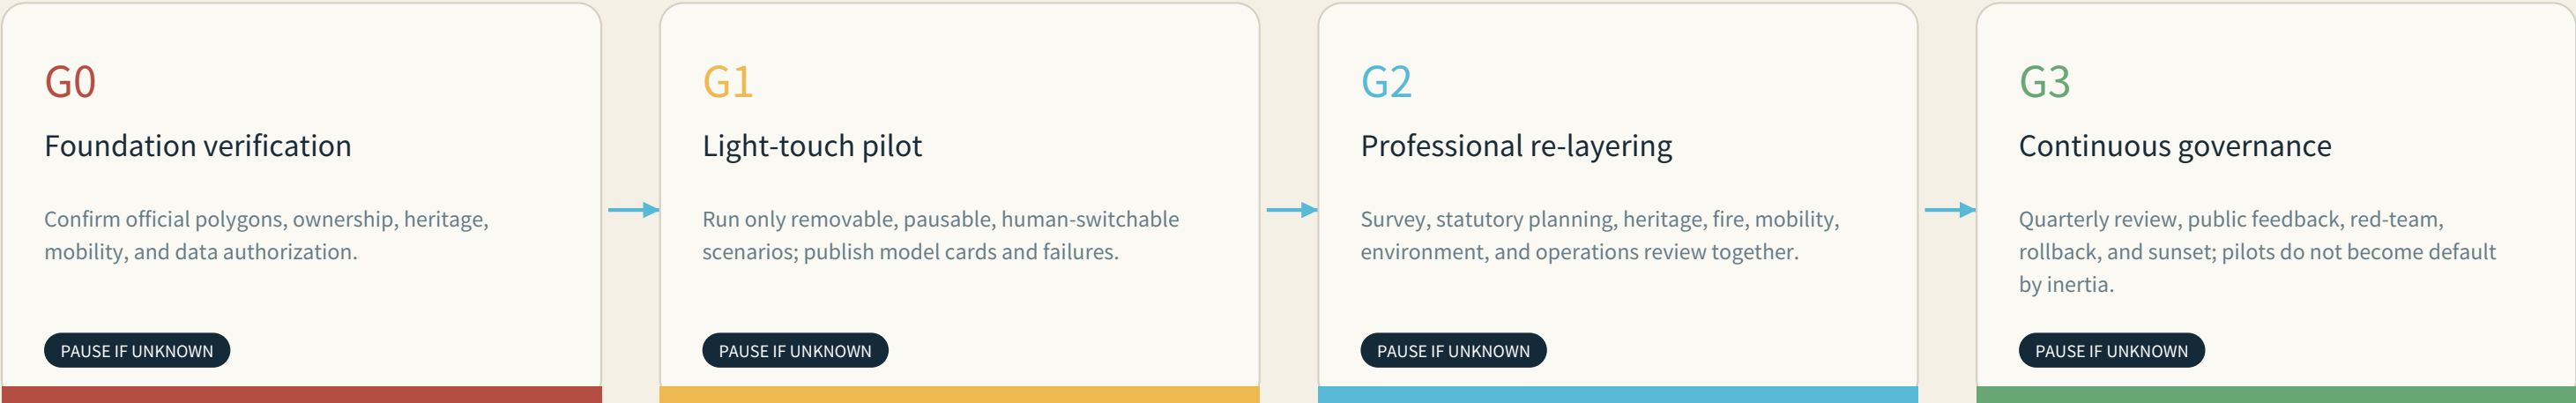

- FAR / height
- regulatory air baseline
- sensor co-location accuracy
- official SITE / KEY_AREA polygons

RECOMPUTE ALL DERIVED LAYERS

From concept freeze to an auditable implementation sequence

Light-touch and reversible first; evidence precedes release, with pause conditions and named accountability at every stage.

PROVISIONAL / HUMAN GATE / HumanDecision PENDING

Acceptance gates / 验收闸

- 01 Evidence status** Facts, assumptions, suggestions, model results, and unknowns are separated.
- 02 Geometry authority** Provisional geometry supports discussion only; no redline or performance claim before official polygons.
- 03 Human release** HumanDecision records release, modify, reject, pause, rollback, or withdrawal.

GATES ARE NOT APPROVALS

Submission boundary: open concept, human right to exit

The package makes the next professional round start from one evidence set and one vocabulary; it does not disguise provisional lines as completion.

PROVISIONAL / HUMAN GATE / HumanDecision PENDING

PUBLIC INTEREST CHARTER / 公共利益章程

- Human, paper, static, or voice-equivalent paths
- Data minimization; no biometric or personal-trace requirement
- Public sources, confidence, limits, failures, and rollback logs
- Release gate, stop button, complaint, withdrawal, and sunset

What this handoff contains

Bilingual narrative, structured GeoJSON / JSON, five figures, offline HTML, A3 booklet, A0 boards, and source, assumption, compliance, and design-depth matrices.

Next step

When authoritative material arrives: replace boundaries -> reclip all layers -> recompute metrics -> regenerate figures, HTML, and PDFs -> independent professional review -> HumanDecision.

READ BEFORE USE / 使用前必读

PROVISIONAL / NOT A REDLINE / NO FORMAL GEOMETRY / NO ENGINEERING OR HEALTH PERFORMANCE CLAIM / HumanDecision PENDING

OPEN CONCEPT / COMMUNITY DISPLAY ONLY
