

ZERO • JZ • 无废智环

(A3 concept booklet cover)

ZERO • JZ: Zero-Waste Loop — Zero-Waste City Practice Belt & Resource Circularity System (Concept)

Centennial Jingzhang AI Innovation Belt • concept for the low-carbon green innovation environment | Official scopes: coordinated research ~43.6 km² / overall design ~11.4 km² / key areas ~368.4 ha

概念建议 • provisional 边界 • 官方数据发布后复算

临时概念边界 • 非官方红线 • 官方数据发布后复算 | Provisional concept boundary • not an official redline • recalculate after official data

Three-Level Scope & Official Caliber

p2 • ZERO • JZ A3

Coordinated research area ~43.6 km² (industry & future-city research); overall design area ~11.4 km² (one corridor, two belts, three nodes; this package's geometry is a concept sub-scope at this level, provisional polygon ~11.41 km²); key areas ~368.4 ha (three concept envelopes, not official redlines). Regional interface partners: Beiwai Community, Future Science City, Huairou Science City, Economic-Technological Development Area, Beijing-Tianjin-Hebei direction (concept protocols).

Three Nodes & AI Landmarks

p3 • ZERO • JZ A3

Regeneration Workshop (Zhongzhiyuan): CDW recovery/sorting/recycled-material display; gallery • sample wall • prototyping; Material Gate landmark. Circular Market (AI Origin Community): exchange/repair/second life; reversible • time-shared; Exchange Ring landmark. Zero-Waste Station (Dazhongsi): sorting/on-site food waste/education; human counter • offline-ready; Compost Blossom landmark. Honor display system and eight-family public-space component library (concept).

Land Use — Single Caliber (Concept Shares)

p4 • ZERO • JZ A3

Research ~30.4% • Park green ~27.1% • Business/Finance ~15.6% • Commercial ~13.4% • Residential ~11.1% • Cultural ~2.3%; caliber: geometry/land_use.geojson (EPSG:4548, class area ÷ provisional overall area). Not current or statutory land use; re-cut after official regulatory plan release.

Ecosystem Atlas & Scenario Placement

p5 • ZERO • JZ A3

Five AI scenario families (sorting/dispatch/tracing/compost/carbon) expanded to 12 scenario cards, each bound to spatial placement, human-review points and decommissioning conditions; industry–space mapping is one-to-one across workshop, market and station.

Implementation & Operation (Concept)

p6 • ZERO • JZ A3

RACI role matrix, siting thresholds, stage gates, professional verification checklists, public participation, NIMBY control, maintenance frequencies, decommissioning conditions and annual review metrics; costs as qualitative tiers only (low/medium/high); phased delivery (pilot → network closure → Beijing–Tianjin–Hebei synergy); developer community, scenario-opening flow, talent/enterprise conversion paths (concept).
