

Overall structure: Qinghuayuan Station cultural anchor

coordinated research → overall design → key areas; Three Districts–Two Wings and three nodes are concepts

PROVISIONAL
not an official redline

coordinated research

3 positions • 5 functions • 6 domains • external queue

overall design

memory axis • two public interfaces • 3 districts + 2 wings

key areas

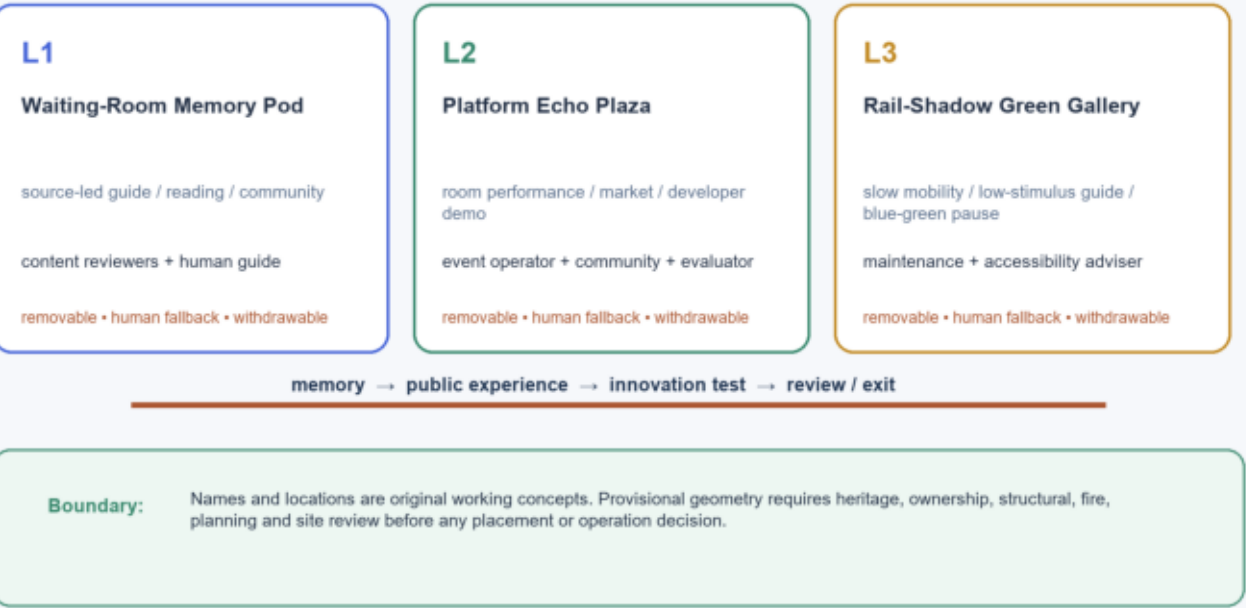

L1 / L2 / L3 • 3 landmarks • 12 cards • T1–T3

All boundaries, nodes and metrics are provisional; replace/recompute the package after official data arrives

Key areas: three reversible nodes

L1/L2/L3 • 3 concept landmarks • no construction or heritage-status conclusion

PROVISIONAL
not an official redline

Concept review edition • for discussion, review and revision only

v2.1-review-5061474033 • 2026-08-31

Land-use and function structure (concept layer)

Function directions and overlaps • unsupported 30%/16%/14% ratios removed

PROVISIONAL
not an official redline

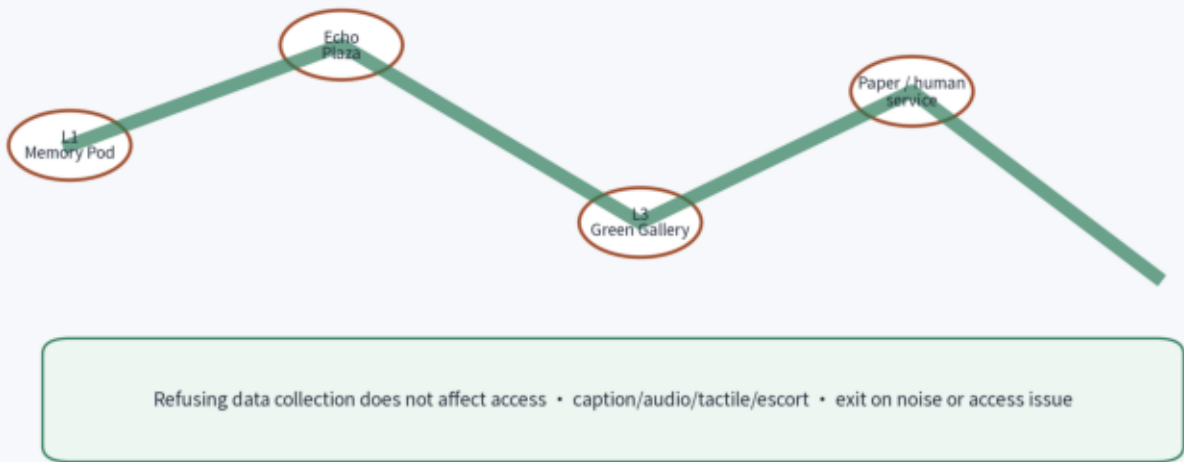

Concept review edition • for discussion, review and revision only

v2.1-review-5061474033 • 2026-08-31

Slow mobility, blue-green and public-service interface

low-stimulus, paper-first, human fallback, no road/municipal engineering conclusion

PROVISIONAL
not an official redline

Concept review edition • for discussion, review and revision only

v2.1-review-5061474033 • 2026-08-31

Metric evidence and recalculation chain

Core areas come from provisional GeoJSON; concept counts are not outcomes, pilots or approvals

PROVISIONAL
not an official redline

building envelope 111,600 sqm • public space 36,150.000 sqm • green space 1,393,756.159 sqm

Concept review edition • for discussion, review and revision only

v2.1-review-5061474033 • 2026-08-31
