initial AI scenarios

Cover Board

Jing-Zhang AI Innovation Belt

Conceptual design proposal for the Jing-Zhang AI Innovation Belt

AI grows from local problems, is tested in public space, and returns value to the city.

Overall Aerial View

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

The Jing-Zhang corridor connects communities, parks and urban gateways into a city validation corridor for mobility, open R&D, public AI services and commercial return.

Rail / Transit Axis

Metro, bus and cycling interchange

Blue-Green Slow Mobility Belt

Walking, cycling and waterfront open space

AI Origin Community

Community-level public AI service entry

Zhongzhiyuan

AI technology validation and governance

Dazhongsi Renewal Gateway

Industry display, consumption and urban living room

Figure Note

Concept-stage aerial view showing the Jing-Zhang corridor, three AI node types, transit access and public open-space organization. Specific boundaries, metrics and implementation scopes must follow the formal data ledger and later design development.

Sources And Evidence Chain

Public sources, provisional geometry, explanatory figures and recomputable metrics

SOURCE GOVERNANCE

EVIDENCE FLOW

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Support Figure S02 | Existing Resources and Problem Logic v2

From land, resources, mobility, and spatial conditions to a public framework and AI scenario value chain.

Existing Conditions and Problem Logic

The site is not short of resources. It lacks an operating interface.

Narrative

The area already concentrates universities, labs, AI firms, communities, rail access, Jing-Zhang Heritage Park, and the Xiaoyue River. These assets remain scattered and weakly connected. The proposal reorganizes them into a working interface that links real demand, technical capacity, public validation, governance, and operational transformation.

Problem Summary

- 01

Dense resources, weak integration
Universities, labs, firms, communities, and parks are present, but there is no shared demand gateway, capacity matching, or accountable operating mechanism.
- 02

Linear potential, insufficient stitching
The Jing-Zhang corridor and Xiaoyue River provide a linear base, while stations, communities, parks, and enterprise edges still need walkable and service-oriented stitching.
- 03

AI needs real city scenarios, not boundaryless deployment
Public-space testing needs scenario passports, entry review, human takeover, data boundaries, and exit rules.
- 04

Public value and commercial return are misaligned
Accessibility, environment, heritage, and community service should not be screened out by single-ROI logic or pure branding demands.

Missing-Link Logic and Design Response

Therefore, the proposal is not a new isolated plot or a single exhibition belt

It is a dual system: a public-space framework plus an AI scenario value chain.

Evidence boundary: public data supports problem diagnosis only; provisional scopes, routes, and nodes are not statutory boundaries, approvals, or engineering design.

Heritage Assets	Innovation Resources	Industrial Resources	Living Resources	Mobility Resources
Jing-Zhang Park + Xiaoyue River	Universities + research institutions	AI firms and renewal districts	Communities, offices, public services	Rail stations + cycling/walking links

Integrated Resource Basemap

Land, open space, innovation resources, everyday services, industrial edges, mobility breaks, public corridors, and three key nodes are overlaid on one base

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Site Overview + Overall Concept v3

Growing AI from macro observation to micro public-space validation, transfer and continuous renewal.

Three-Layer Scope Map

Park-management scope + merged polygon

Continuous Public Spine

One continuous public framework: two river-side slow-life experiences, three difference nodes are

Dazhong Temple Mixed-Use Gateway

Conceptual Framework

AI Origin Community: public scenario validation + commercial feedback loop

Demand Strength

Multi-subject regional public demand; weaker public-service linkage but clear unmet experience needs.

Capability Strength

Youth and innovation capacity; research, enterprises and organizations can provide external capability interfaces.

AI Origin Community | Problem Collection and Co-Creation Hub

1 Generative understanding

2 Community co-creation

3 Intensive practice

4 Cultural innovation

5 Industrial co-creation

6 Operability

People classification -> question collection -> scenario diagnosis -> ability matching -> progressive services -> civic renewal

Crowd Intelligence Garden | Tech Validated Engine + Scenario Governance Interface

R&D co-creation

Integrated management

Validation protocol

Xiaoyue River | Resilient Slow-Life Community Park + Continuous Public Corridor

Micro community renewal

Urban public direction

Four service validations

Dazhong Temple | Commercial Transformation and Economic Node

- 6

Service / access points

Four-Layer Mobility Organization

- A

Rapid Transfer Loop
Build a city-level quick-transfer framework.
- B

Continuous Walking Experience
Link the park, slow line and daily pedestrian paths.
- C

East-West Slow-Link System
Use east-west lanes to connect neighborhoods, hotels, travel and industry.
- D

Service / Access Points
Configure transit, commerce, communities and visitor entries.

Blue-Green Public-Space Validation

- X

Xiaoyue River
Eco corridor, slow walking and daily slow-life.
- H

Heritage Park
Culture, history, public activity and slow-mobility support.
- S

Shared Transformation
Cross-river, rail transfer and daily access.

Initial Activation Sequence

Note: Letter / number annotations are schematic. Final route, node, and implementation conclusions require continuous verification.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Map 02 | Functional Zoning + Overall Spatial Structure v2

A continuous public framework links the two riverside communities, three differentiated nodes and multiple east-west

Continuous Public Framework

North-south + river-park corridor + three nodes + east-west linkage

- F1 Continuous Public Spine
- F2 Riverfront Public Slow-Mobility Corridor
- F3 Community / Business / Industry Ring
- F4 Three AI Priority Areas
- F5 Zhongguancun Tech-Service Network

Three Key Areas | Scenario + Carrier Selection

Choose nodes by spatial potential rather than visual balance alone.

Dazhong Temple

Scenario + carrier candidate

Temporary transit triage, traffic-side service extension and productized operations.

Related cards: SC series, OSM reference only.

AI Origin Community

Scenario + carrier candidate

Real residential-community data, problem collection and low-disturbance AI service prototypes.

Related cards: SC series, OSM reference only.

Crowd Intelligence Garden

Scenario + carrier candidate

R&D, governance, exhibition, ecology and public-space testing can be colocated.

Related cards: SC series, OSM reference only.

Scope Guidance + System Strategy

Use scope hierarchy and five functional systems to control implementation.

43.6 km2 Integrated research scope
Industrial ecology and linear corridor control

11.4 km2 Overall design scope
Station + function organization

368.4 ha Key-node total
Crowd Intelligence Garden + AI Origin + Dazhong Temple

F1 Continuous Public Spine
Shared route linking transport, slow mobility and public AI.

F2 Riverfront Slow-Mobility Corridor
Low-disturbance ecological corridor and neighborhood walking loop.

F3 Community / Business / Industry Ring
Daily life, consumption, IP and R&D link into one operational belt.

F4 Three AI Key Areas
Clear differentiated tasks for north, middle and south nodes.

F5 Tech-Service Network
Data, review, IP, legal, talent and service support.

Retain and Intensify
Keep culture and site memory while improving usability.

Reduce Internal Friction
Use low-impact and modular facilities.

Activate Existing Scenarios
Use station-front and corridor scenes first.

Flexible Control
Allow small tests before larger deployment.

Source: OSM open data, project assumptions and scenario interpretation. Boundaries and metrics require official verification.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Map 03 | Three Key Areas Spatial Evaluation v2

From Xiaoyue River to Dazhong Temple, form three urban AI nodes with different scene missions and operating logic.

K1 | Crowd Intelligence Garden

North side | R&D governance

Technology engine + scenario governance entrance

Spatial Carrier

industry / public node / open interface

Digital / AI

index guidance / simulation / operation diary / safety baseline

Receive

Original community task briefs; R&D and platform capacity.

Work

Prototype development, integrated simulation and AI intelligent output.

Deliver

Test courtyard, scenario reference, access and governance transformation.

Release Conditions

Can operate, replicate, explain and pause.

K2 | AI Origin Community

Middle side | demand path

Original demand + prototype co-creation hub

Spatial Carrier

industry / public node / open interface

Digital / AI

index guidance / simulation / operation diary / safety baseline

Receive

Real public-life problems and youth co-creation tasks.

Work

Classify issues, set priorities and match capability.

Deliver

Issue list, priority path and feedback records.

Release Conditions

Clear demand, explicit scene and human-in-the-loop boundary.

K3 | Dazhong Temple

South side | conversion operation

Product + operation economic node

Spatial Carrier

industry / public node / open interface

Digital / AI

index guidance / simulation / operation diary / safety baseline

Receive

Projects with transit and commercial value after the corridor passes through.

Work

Productize IP, market validation and operation scaling.

Deliver

Replication point and new station-front service path.

Release Conditions

Real assets, responsible party and standardized public interface.

Data source: OSM open data, GeoJSON and scenario interpretation. The three areas are evaluation carriers, not final land-control boundaries.

Zhongzhiyuan

AI Technology Validation And Governance Admission Node

Shared R&D, controlled testing, public test galleries and human takeover mechanisms are embedded in the existing park fabric.

Public Test Gallery

Public experience, third-party tests

Bus And Cycling Access

Interchange, stops and slow entry

Key Legend

● Transit access

● Walking access

● Controlled testing

● Human takeover

Figure Note

Zhongzhiyuan is not a closed lab. It acts as the northern technology gateway where shared R&D, governance review, controlled yards and public test galleries form an open but controlled admission node.

North-South Fast Access

Connects to Origin and Dazhongsi

Human Takeover Point

On-duty support and incident review

Continuous Walking Line

Wayfinding, shade and accessibility

Recommended Caption

Zhongzhiyuan brings enterprise testing, third-party review and public experience into one scenario-passport system.

Access note: this conceptual aerial uses existing transit, walking, cycling and public interfaces as the primary access logic.

Boundary note: conceptual figure only; it is not a statutory red line, approved construction boundary, secured site or implementation commitment.

AI Origin Community

Real Problem Entry And Youth Co-Creation Node

Community living rooms, problem walls, prototype workshops and staffed service windows let urban demand enter the AI scenario-passport system.

Community Problem Wall

Mobility, lighting, accessibility

Youth Co-Creation Workshop

Students, residents and companies

Public AI Service Window

Consultation, feedback, takeover

Figure Note

The AI Origin Community gathers real problems, supports youth co-creation, offers low-threshold prototype trials and keeps offline staffed access for equitable participation.

Prototype Trial Loop

Wayfinding and feedback terminals

Bus And Cycling Access

Station transfer and slow entry

Age-Friendly Crossing

Rest, shade and accessibility

Key Legend

● Problem entry

● Youth prototypes

● Staffed access

● Community review

Recommended Caption

AI Origin Community is the civic living room where real urban problems enter the AI system and residents can review the results.

Access note: this conceptual aerial uses existing transit, walking, cycling and public interfaces as the primary access logic.

Boundary note: conceptual figure only; it is not a statutory red line, approved construction boundary, secured site or implementation commitment.

Dazhongsi

AI Productization And Operational Scaling Node

Station-city stitching, stock commercial renewal and shared enterprise services turn validated AI scenarios into purchasable, subscribable and operable services.

Station-City Gateway

Metro, bus and walking access

AI Product Validation Hall

Trials, demos and public review

2+1 Mobile Service Points

Route validation and product use

Figure Note

Dazhongsi handles product validation, enterprise services, launch exchange and public/commercial classification through station interfaces and stock commercial renewal.

Enterprise Service Desk

Investment, API and compliance

Public / Commercial Sorting

Scale only validated value

Launch And Exchange Window

Release, methods and partners

Key Legend

Station-city stitching

Product validation

Enterprise services

Return loop

Recommended Caption

Dazhongsi is not an ordinary commercial endpoint; it is the productization, operations and classification outlet for validated scenarios.

Access note: this conceptual aerial uses existing transit, walking, cycling and public interfaces as the primary access logic.

Boundary note: conceptual figure only; it is not a statutory red line, approved construction boundary, secured site or implementation commitment.

Technical & Investment Indicators

A lightweight start-up framework based on three nodes, two public scenario belts and verifiable AI pilots

Deliverable Board 01

Place-Grown Intelligence
Centennial Jing-Zhang Urban AI Growth System

Overall Design Area

11.4 km²

Official text basis; final boundary to be reviewed

Key Area Total

368.4 ha

Zhongzhiyuan, AI Origin Community, Dazhongsi

Concept Route Coverage

~51.9 km

Mobility, walking, river-park and stitch routes

First-Wave AI Scenarios

12

Including 4 industry validation scenarios

1. Technical Indicators

A spatial framework, measurable scenarios, technical admission and operational review

Spatial Nodes
3 nodes: Zhongzhiyuan / AI Origin / Dazhongsi

Public Scenario Belts
Xiaoyue River eco-health + Jing-Zhang heritage exchange

Service Points
Dazhongsi: 2 required + 1 conditional mobile AI service points

Technical Admission
100% scene passport coverage for first-wave scenarios

Governance O&M
Data minimization, third-party testing, annual review

Mobility Framework
2 north-south systems: rapid connection + continuous walk

East-West Stitches
5 cross links, approx. 9.3 km

Scenario Validation
12 first-wave AI scenarios, including 4 industry pilots

Public Safeguard
100% human takeover + offline access for public AI scenes

Exit Mechanism
Pause or exit low-value, high-risk, or low-acceptance scenarios

2. Investment Indicators

Four ledgers separate committed scope, annual operation, enterprise input and conditional works

One-Time Project Investment

RMB 117-405M

Annual Operations

RMB 35-125M / yr

Four Financial Ledgers

01 One-time investment

Public framework, shared nodes, AI base, pilots and governance start-up

02 Annual operation

Human service, platform maintenance, device patrol, events and audit

03 Enterprise input

Enterprise R&D, compute, proprietary devices, fit-out and marketing

04 Conditional works

Bridges, roads, underground space, utilities and major retrofits

One-Time Investment Breakdown

C1 Studies RMB 5-15M

C2 Mobility RMB 25-70M

C3 Blue-green RMB 12-50M

C4 Node retrofit RMB 25-90M

C5 AI base RMB 30-100M

C6 Pilots RMB 15-60M

C9 Governance RMB 5-20M

Boundary note: concept-stage order-of-magnitude estimate only; not a formal budget, engineering cost, government investment commitment or enterprise investment commitment.
Green space ratio, public space ratio and other area-based indicators shall be recalculated after final boundaries are confirmed. Route length is coverage, not construction length.

Commercial AI Revenue Ledger + Public AI Feedback Loop

Commercial AI creates incremental income; public AI gains continuous renewal capacity.

0-18 Months Launch Revenue 1.25-10m CNY Feedback 0.4-2.5m CNY	18-36 Months Network Revenue 5-38m CNY / year Feedback 1.5-9m CNY / year	After 3 Years Stable Annualized Revenue 15-120m CNY / year Feedback 5-30m CNY / year
---	--	--

Crowd Intelligence Garden

AI Technical Validation + Governance Access Node

Connect rail / public transit / cycling transfers; carry shared R&D, controlled testing, public observation and human-takeover mechanisms into the park district.

Scene Notes

The garden connects transit access, flexible slow mobility, shared laboratories, controlled tests and public observation. Governance, traceability, protocol review and human takeover are embedded before AI enters urban public scenes.

连续步行和东西向缝合接入周边社区、学校与企业，形成可验证的 AI 准入节点。

South-North Fast Connection

Clear access and low-interference transfer

Human Takeover Point

Temporary pause and incident response

Continuous Walking Axis

Navigation, inquiry, rest and node linkage

体验线

休息与无障碍

Design Note

Crowd Intelligence Garden is not a sealed experimental box. It should become a reliable technical gateway before AI scenes enter real public life.

Public Test Courtyard

Public trial, third-party testing and scenario review

公开测试廊

公众体验、第三方测试、场景护照

公交与骑行接驳

换乘、停靠、

Public + Cycling Transfer

Transfer, waiting and slow-mobility entry

受控测试庭院

AI Origin Community

Real Problems + Youth Co-Creation Node

Use community life, issues, co-creation and human-assisted service windows to organize the real demand entrance of the city AI system.

Neighborhood Issue Wall
Travel, lighting, barrier-free access and safety

社区问题墙
出行、照明、无障碍、养老、儿童安全

Youth Prototype Workshop
Students, residents and enterprises co-create AI prototypes

公共 AI 服务窗口
咨询、代办、反馈、人工接管

Public AI Service Window
Consultation, proxy service and human takeover

Scene Notes

The community turns everyday issues into collectable and reviewable AI scenarios. Residents, youth co-creators, public-service windows and feedback rooms shape a low-disturbance first entrance.

再把问题送入众智园和河园场景验证。

Prototype Test Ring
School, elderly care and low-disturbance testing

安全、环境反馈终端

公交与骑行接驳
站点换乘、骑行停靠、慢行入口

Public + Cycling Transfer
Station connection, cycling stop and slow entry

老人儿童友好过街
连续过街、遮阴休息、无障碍坡道

Elder / Child Friendly Loop
Slow walking, lighting, barrier-free and safe route

核心标注

● 真实问题进入 ● 青年共创与原型 ● 人工窗口与线下入口 ● 社区复核与反馈

Key Marks

● Real issue entry ● Youth co-creation prototype ● Human-assisted digital entrance ● Community voting and feedback

建议图注

AI 原点社区不是技术展示场，而是让真实城市问题进入 AI 系统

Design Note

The AI Origin Community is not a display hall; it is where real residential issues first enter the AI growth system.

注：本图为概念阶段鸟瞰表达，不等于新增工程红线、法定建设边界或已确定实施范围。

Dazhong Temple

AI Productization + Operation Scaling Node

Use station traffic, validated products and enterprise services to make public-AI scenarios purchasable, testable and operational.

Dazhong Temple Station Gateway
Metro entry, bus transfer and walking service

大钟寺站城门户
地铁入口、公交换乘、步行接驳

AI 产品验证厂
试用、演示、

AI Product Validation Hall
Trial, demo, user testing and public observation

站城换乘与步行缝合

产品验证与场景发布

企业共享服务

公共/商业分类回流

Key Marks

Station conversion + walking integration

Product validation + scenario publishing

Enterprise shared services

Public / commercial routing

建议图注

大钟寺不是普通商业终点，而是验证成果的产品化。

Design Note

Dazhong Temple is not an ordinary commercial endpoint; it scales products only after validation and public-value screening.

注：蓝景丽家类型载体、企业入驻、空间取得和招商结果均为条件性表达，不构成实施承诺。

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Six Personas, Not Population Labels

Each persona answers: demand, why they exist, AI role, human response and failure boundary.

P-01 Nearby Daily Residents

Role Daily life, public services and facility feedback.

Links SC-01 / SC-04 / SC-06 / SC-12

Space AI Origin Community + Xiaoyue River + public space

Boundary Design assumptions only; not personal-data profiling.

P-02 Commuting / Cycling Youth

Role Continuous walking, night safety and station arrival.

Links SC-01 / SC-04 / SC-09

Space Transit corridor + Crowd Garden + Dazhong Temple

Boundary Design assumptions only; not personal-data profiling.

P-03 University / Open Co-Creators

Role Real problems, low-cost prototypes and controlled testing.

Links SC-02 / SC-07 / SC-08

Space AI Origin Community + Crowd Intelligence Garden

Boundary Design assumptions only; not personal-data profiling.

P-04 Cultural Slow-Travel Public Users

Role Jing-Zhang memory, Xiaoyue River content and rights boundary.

Links SC-05 / SC-11

Space River-park heritage line + Dazhong Temple

Boundary Design assumptions only; not personal-data profiling.

P-05 AI Enterprise Product Validators

Role Technical review, limited validation and productization.

Links SC-07 / SC-08 / SC-09 / SC-10 / SC-11

Space Crowd Garden + Xiaoyue test area + Dazhong Temple

Boundary Design assumptions only; not personal-data profiling.

P-06 Public Operators + Human Takeover S

Role Access, review, complaints, pause and exit.

Links SC-01 / SC-04 / SC-05 / SC-10 / SC-12

Space Full operations platform + service entrances

Boundary Design assumptions only; not personal-data profiling.

Scenario - Space - Operation Positioning

Scenario chain and spatial response are positioned twice: by spatial place and by action path.

	AI Origin Community SC-01	Crowd Garden	Xiaoyue River + Heritage Park SC-05	Dazhong Temple	Full Operation Platform
P-01 Nearby Daily Residents	SC-01,12		SC-04,06		feedback
P-02 Commuting / Cycling Youth			SC-04,06	SC-09	help
P-03 Co-Creators	SC-02	SC-07,08			passport
P-04 Cultural Public Users			SC-05	SC-11	rights
P-05 Enterprise Validators		SC-07,08	trial	SC-09,10,11	audit
P-06 Operators + Human Takeover	SC-01,12	SC-08	SC-06	SC-10	owner

Formal Expression Boundary

1. This is an operation-index and route diagram, not a policy boundary or face-recognition boundary.
2. Xiaoyue River is not closed by IP or enclosure; its inner belt remains open and co-built.
3. Personas only constrain AI-side permissions and data minimization; no unauthorized manual profiling.
4. Enterprise testing and system validation represent staged ecosystem cooperation, not the whole AI growth system.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Persona-Scene Matching Map v1

Use six personas to explain the real users, spatial entrances and human-operation boundary of 12 scenario cards.

Six Persona Entries Into One Urban AI Growth Chain

Personas are not labels; they connect real problems, innovation capacity, public experience, industry validation and human operations into one loop.

Formal Expression Boundary

1. Design assumptions, not on-site visitor statistics.
2. Public space remains rejectable and may request human assistance.
3. Industry validation must pass Crowd Garden review.
4. Dazhong Temple only accepts projects with clear commercial potential after corridor validation.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Urban Problem Collection Desk | AI Origin Community

Real problems are heard and human-confirmed before entering the AI co-creation and validation chain

SCENARIO TASK

Urban Problem Collection Desk

A human window, co-creation table, and public terminal turn a vague concern into a reviewable, traceable scenario passport.

NODE K2 AI Origin Community CHAIN STAGE The first entry of real needs into the system

POSITION IN THE FULL PROCESS

LOCATION INDEX

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

One-Day Youth Prototype Workshop | AI Origin Community

Turn scenario passports into discussable, testable and reversible low-cost prototypes.

Scene Task

One-Day Youth Prototype Workshop

Open desks, light tools and review areas convert scenario passports into service flows, low-fidelity models and test plans.

Node	Stage	Adjacent
K2 AI Origin	Demand Translation	SC-01 -> Zhongzhiyuan

Scene Note

Youth co-creators use scenario passports as input, prepare service flows, low-fidelity models and test plans, and submit them for community review before real deployment.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Walking Companion And Accessible Detour | Continuous Walking Line

Provide explainable, rejectable and staff-supported mobility assistance.

Scene Task

Walking Companion And Accessible Detour

Wayfinding, low-height terminals, help points and staffed service stations provide explainable routes, detours, rest and manual help.

Node	Stage	Adjacent
Walking Line	Public Validation	Zhongzhiyuan -> River-Park

System Process

Location

Scene Note

Users can anonymously receive route explanation, detour and rest information. Manual help remains available; face recognition and continuous tracking are not default functions.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Xiaoyue River Ecological Co-Management | Xiaoyue River Line

Convert environmental anomalies into traceable, reviewable and closed-loop maintenance tickets.

Scene Task

Xiaoyue River Ecological Co-Management

Low-power sensing, observation decks and maintenance interfaces help identify water, planting, heat and facility anomalies.

Node	Stage	Adjacent
Xiaoyue River	Ecological Validation	Zhongzhiyuan -> River-Park

System Process

Dual Input

AI Origin

Zhongzhiyuan

River-Park

Dazhongsi

Public Return

Upstream | Scenario passport + Zhongzhiyuan review

Downstream | Maintenance ticket -> SC-12

Location

Zhongzhiyuan

AI Origin

Xiaoyue River Line

Dazhongsi

Scene Note

Residents and maintenance staff review anomalies together. AI supports traceable tickets and does not turn public-space monitoring into crowd profiling.

Basis: scene-cards-v0.1.md, PROJECT-STATE.md and node diagrams. Main image is conceptual AI visualization, not site photography or an implementation commitment.

JZ-AI / SCENE / SC-04

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Jing-Zhang Memory Co-Creation Station | Heritage Park Line

Keep railway memory co-created with clear sources, authorization and update rules.

Scene Note

Community stories and railway archives enter guidance only with source and authorization records. Projection and labels remain removable and updatable.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Night Safety And Staffed Help | Station Loops And River-Park

Route nighttime help to staffed response first, without equating safety with identity tracking.

Scene Task

Night Safety And Staffed Help

Lighting nodes, help buttons and staffed seats identify facility faults and help events, then connect to human response first.

Node	Stage	Adjacent
Station Loops	Night Safety	SC-03 -> SC-12

System Process

Location

Scene Note

Facility faults and help events are routed to staffed response. The route and help service can be used anonymously; face recognition is not a default capability.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Embodied Device Shared-Path Test Yard | Zhongzhiyuan

Let devices learn yielding, stopping and human takeover inside a limited test yard first.

Scene Task

Embodied Device Shared-Path Test Yard

Limited test yards, observation galleries and repair bays test delivery, cleaning and inspection devices around pedestrians.

Node	Stage	Adjacent
K1 Zhongzhiyuan	Embodied Device Test	SC-08 -> Pilot

System Process

Location

Scene Note

Devices are tested only in clearly marked limited yards. Pedestrians have priority; staff can stop and take over. Failed tests return to R&D or leave the site.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Trusted Agent Governance Sandbox | Zhongzhiyuan

Review permissions, logs and safety before agents enter real scenarios.

Scene Task

Trusted Agent Governance Sandbox

Isolated data spaces, review rooms and consoles check permissions, tool calls, logs, bias, safety and human takeover.

Node	Stage	Adjacent
K1 Zhongzhiyuan	Permission And Safety Review	Prototype -> Real Test

Scene Note

Permissions, tool calls, logs, bias and safety are reviewed before field testing. Responsible humans confirm key decisions; failed agents lose tool access and return for repair.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Public Smart-Terminal Test Street | Dazhongsi

Test usability, accessibility and maintenance cost in real pedestrian flows.

Scene Task

Public Smart-Terminal Test Street

Mobile booths, test positions and staffed service counters test usability, accessibility, stability and maintenance cost.

Node	Stage	Adjacent
K3 Dazhongsi	Public Terminal Test	River-Park -> SC-10

System Process

Location

Scene Note

Real flows are used to test usability, accessibility and stability. Staffed service and maintenance interfaces stay on site; failed terminals are adjusted or removed.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Enterprise Agent Deployment And Service Desk | Dazhongsi

Connect validated products to enterprise service while keeping scale-down and exit paths.

Scene Task

Enterprise Agent Deployment And Service Desk

Shared test rooms, service desks and operations back offices support deployment, API integration, compliance review, user testing and O&M handover.

Node	Stage	Adjacent
K3 Dazhongsi	Enterprise Deployment	SC-09 -> Commercial Scaling

System Process

Location

Scene Note

The service desk supports deployment, integration, compliance and O&M handover. Critical permissions and launch decisions remain human-confirmed.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

AI Content Consumption And Copyright Test Field | Dazhongsi

Make content consumption pass source, copyright and youth-protection checks.
