Zhongguancun service wing + Xiaoyuehe scenario wing

Land-use concept ledger

27 source features - six present codes - 100.0% total

EN

RULE

- Aggregate only land_use_code values present in land_use.geojson.
- 0802 stays scientific research; absent 0801 education and other are not invented.
- green_space.geojson is a separate overlay metric, not added to 1401.
- Shares are concept values from provisional geometry, not official statistics.

Metric contract and evidence

Known finite values - low confidence - formula and use limit shown

EN

site_area_sqm

11,412,825.386

`polygon_area(provisional boundary, EPSG:4548)`

confidence: low / provisional

green_ratio

0.110044

`green_space_area_sqm / site_area_sqm`

confidence: low / provisional

public_space_ratio

0.003167

`public_space_area_sqm / site_area_sqm`

confidence: low / provisional

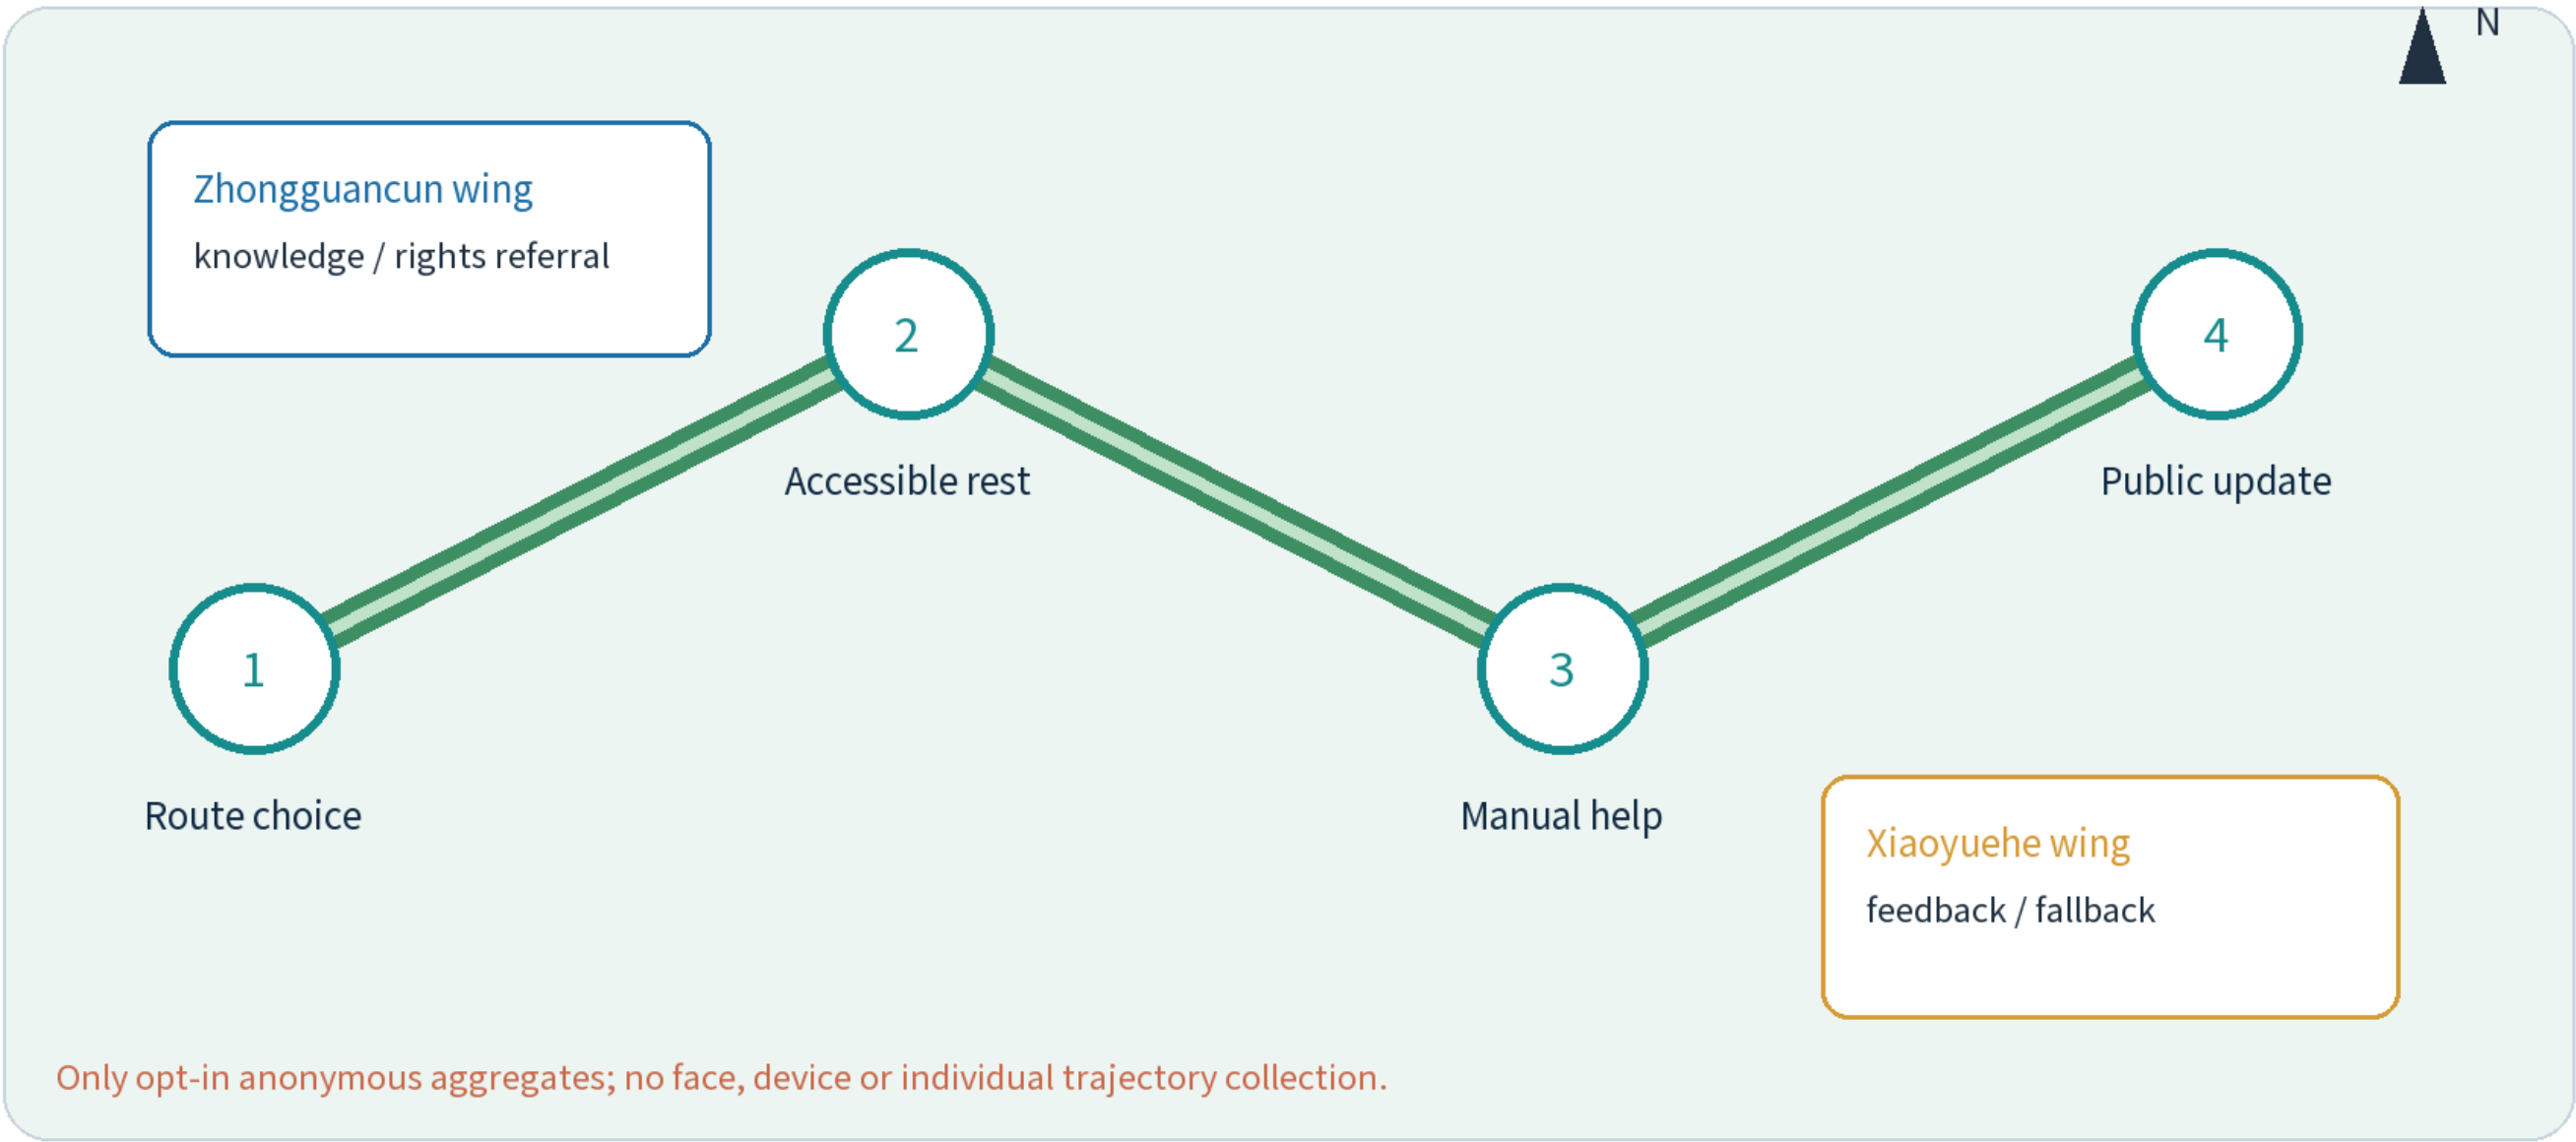

USE LIMIT

All three values are geometry-derived concept values for package recomputation and visual consistency only. They are not statutory area, FAR, height, capacity, engineering or investment evidence. Recompute after official boundary, green-space, public-space and land-use data are released.

Slow corridor and public-experience wing

Route choice - accessible experience - human assistance - public update

EN

PROVISIONAL - CONCEPT ONLY
