

Overall spatial structure and key nodes

Drawn from submitted GeoJSON coordinates · all nodes and corridors are conceptual

一带 / spine

heritage public-time spine

三核 / nodes

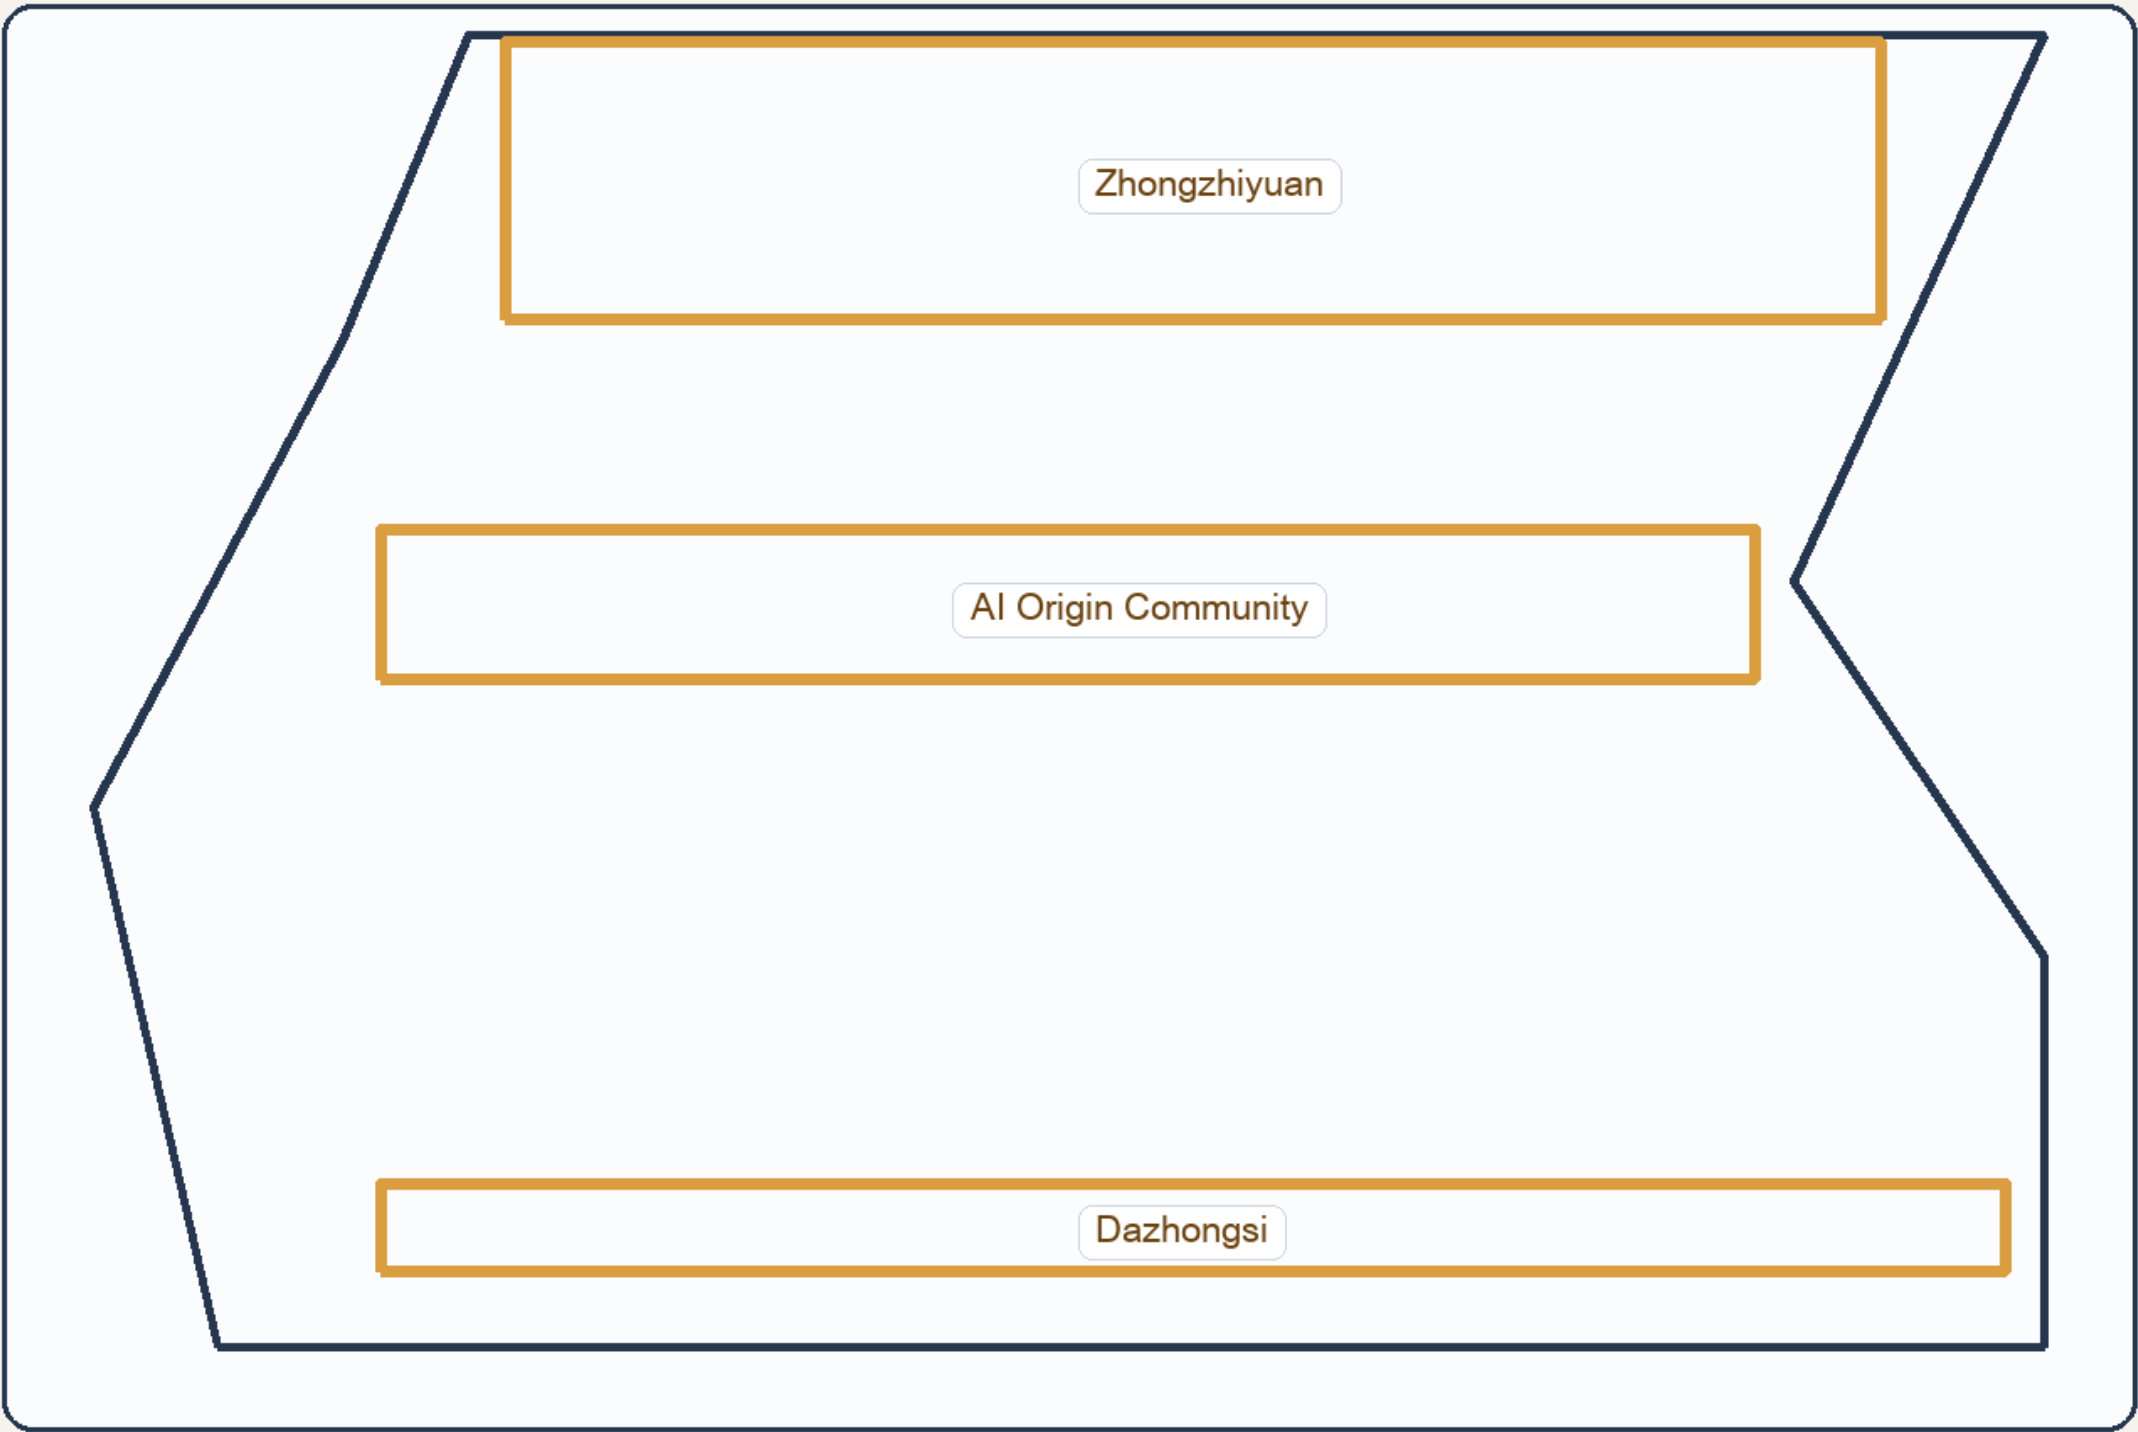

Zhongzhiyuan · Origin · Dazhongsi

Data: geometry/*.geojson; conceptual spatial plan, not a survey or construction commitment.

Provisional design model; not an official boundary. Recalculate when official polygons are released.

Location-based index of the three key areas

Drawn from submitted GeoJSON coordinates · all nodes and corridors are conceptual

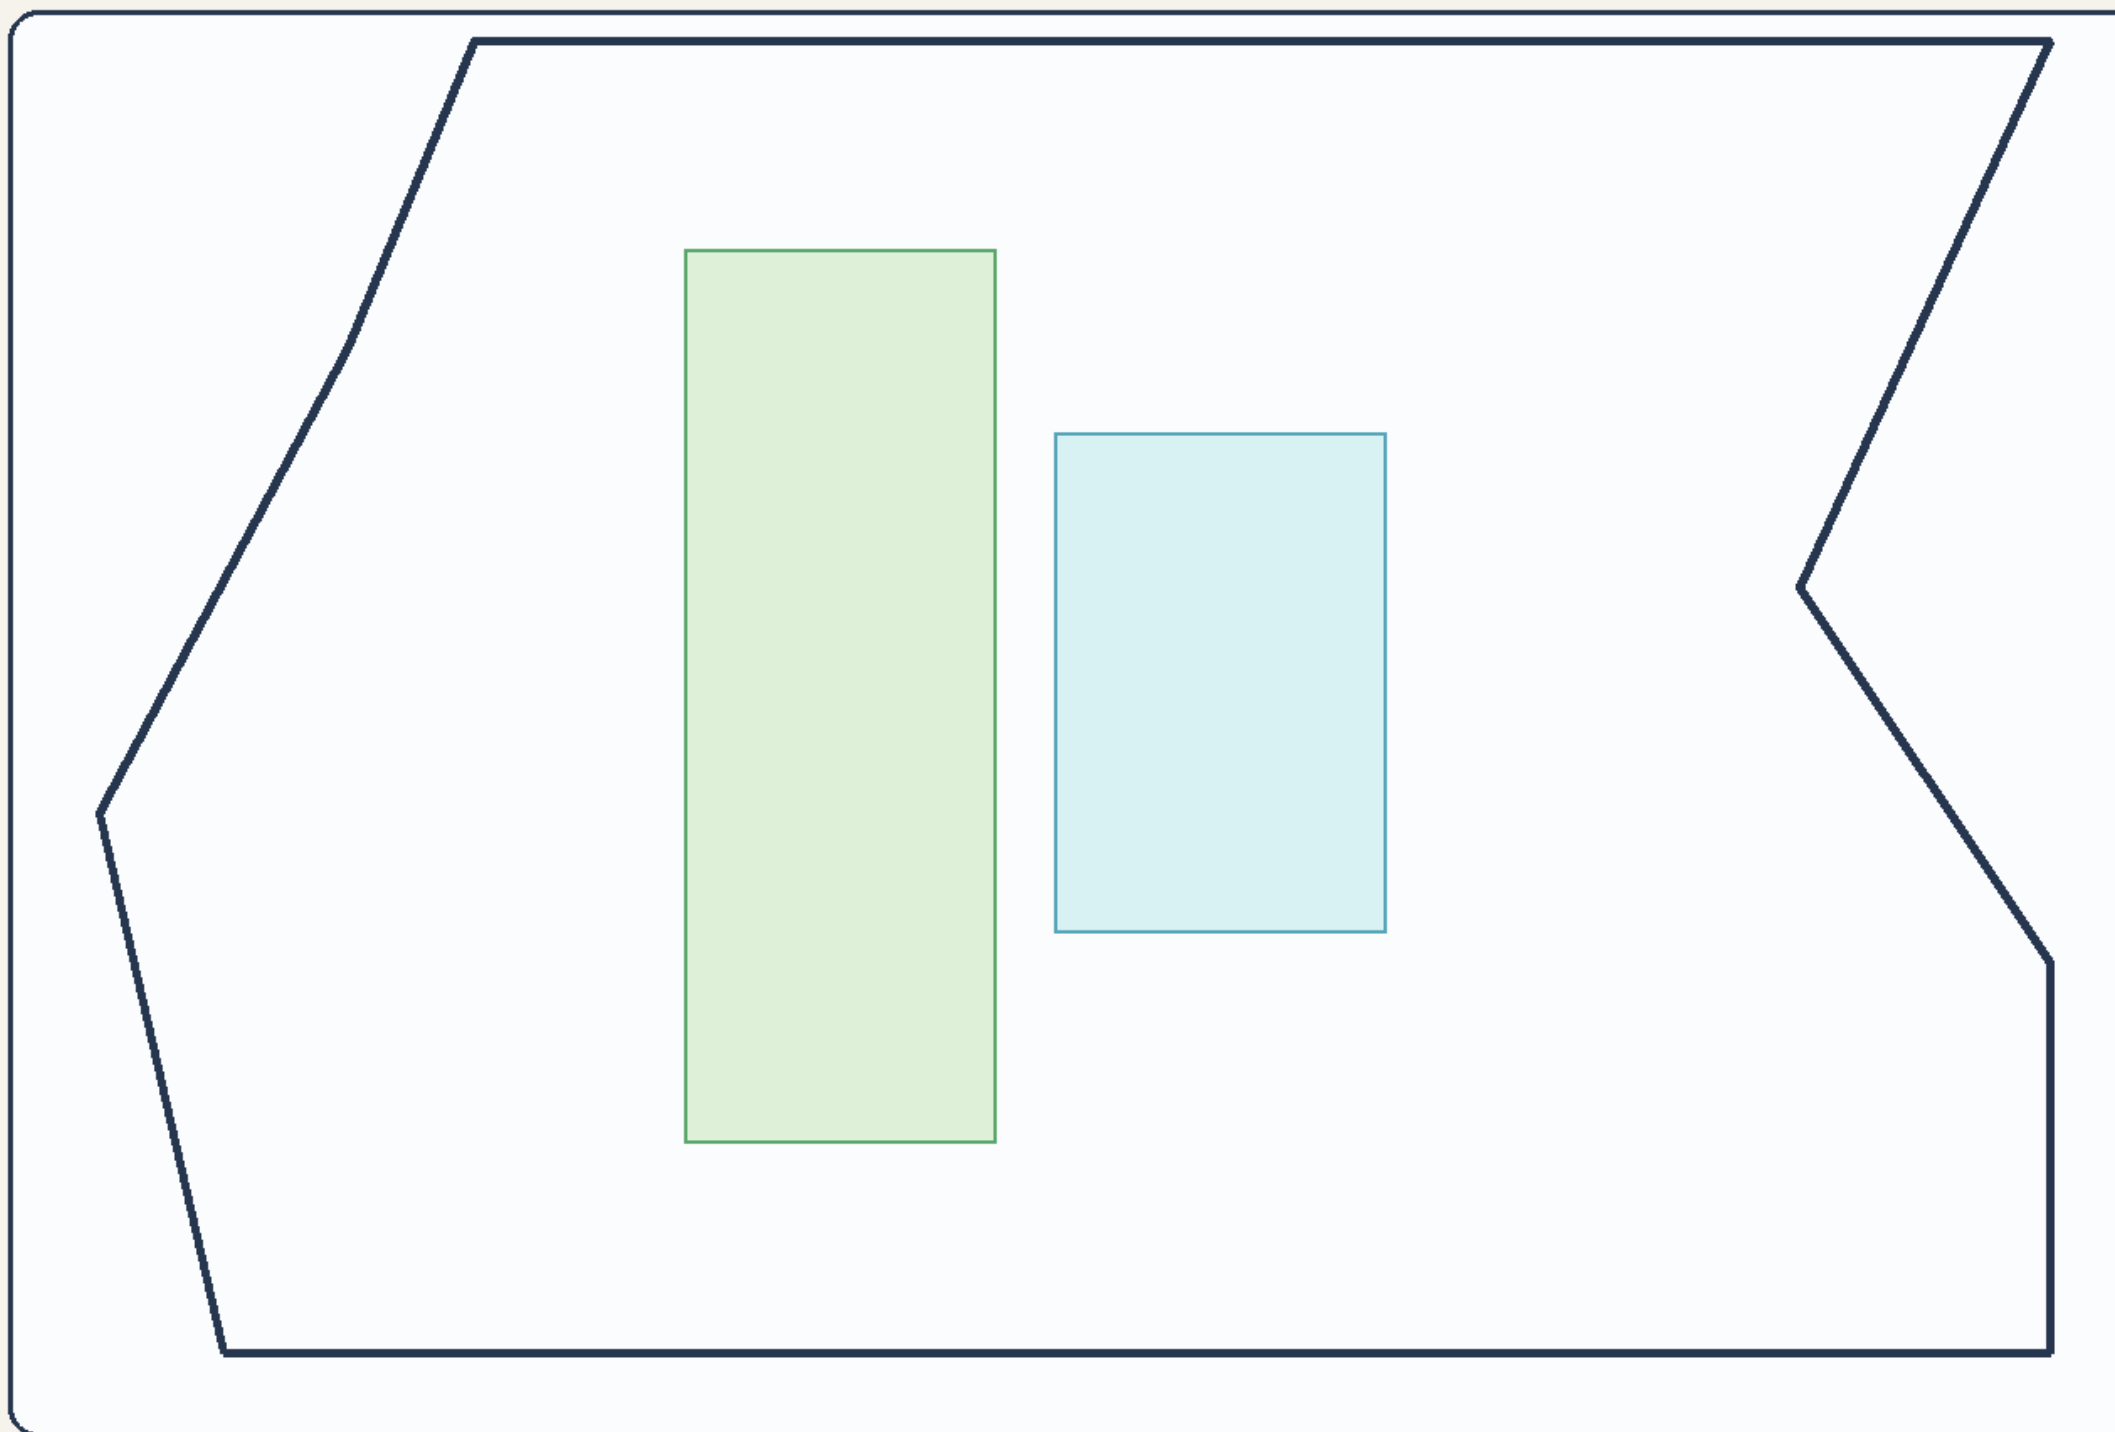

- 重点区边界
three provisional constraints
- 节点
location-based anchors

Provisional design model; not an official boundary. Recalculate when official polygons are released.

Data: geometry/*.geojson; conceptual spatial plan, not a survey or construction commitment.

Blue-green slow mobility and public-space network

Drawn from submitted GeoJSON coordinates · all nodes and corridors are conceptual

绿地

continuous blue-green network

公共空间

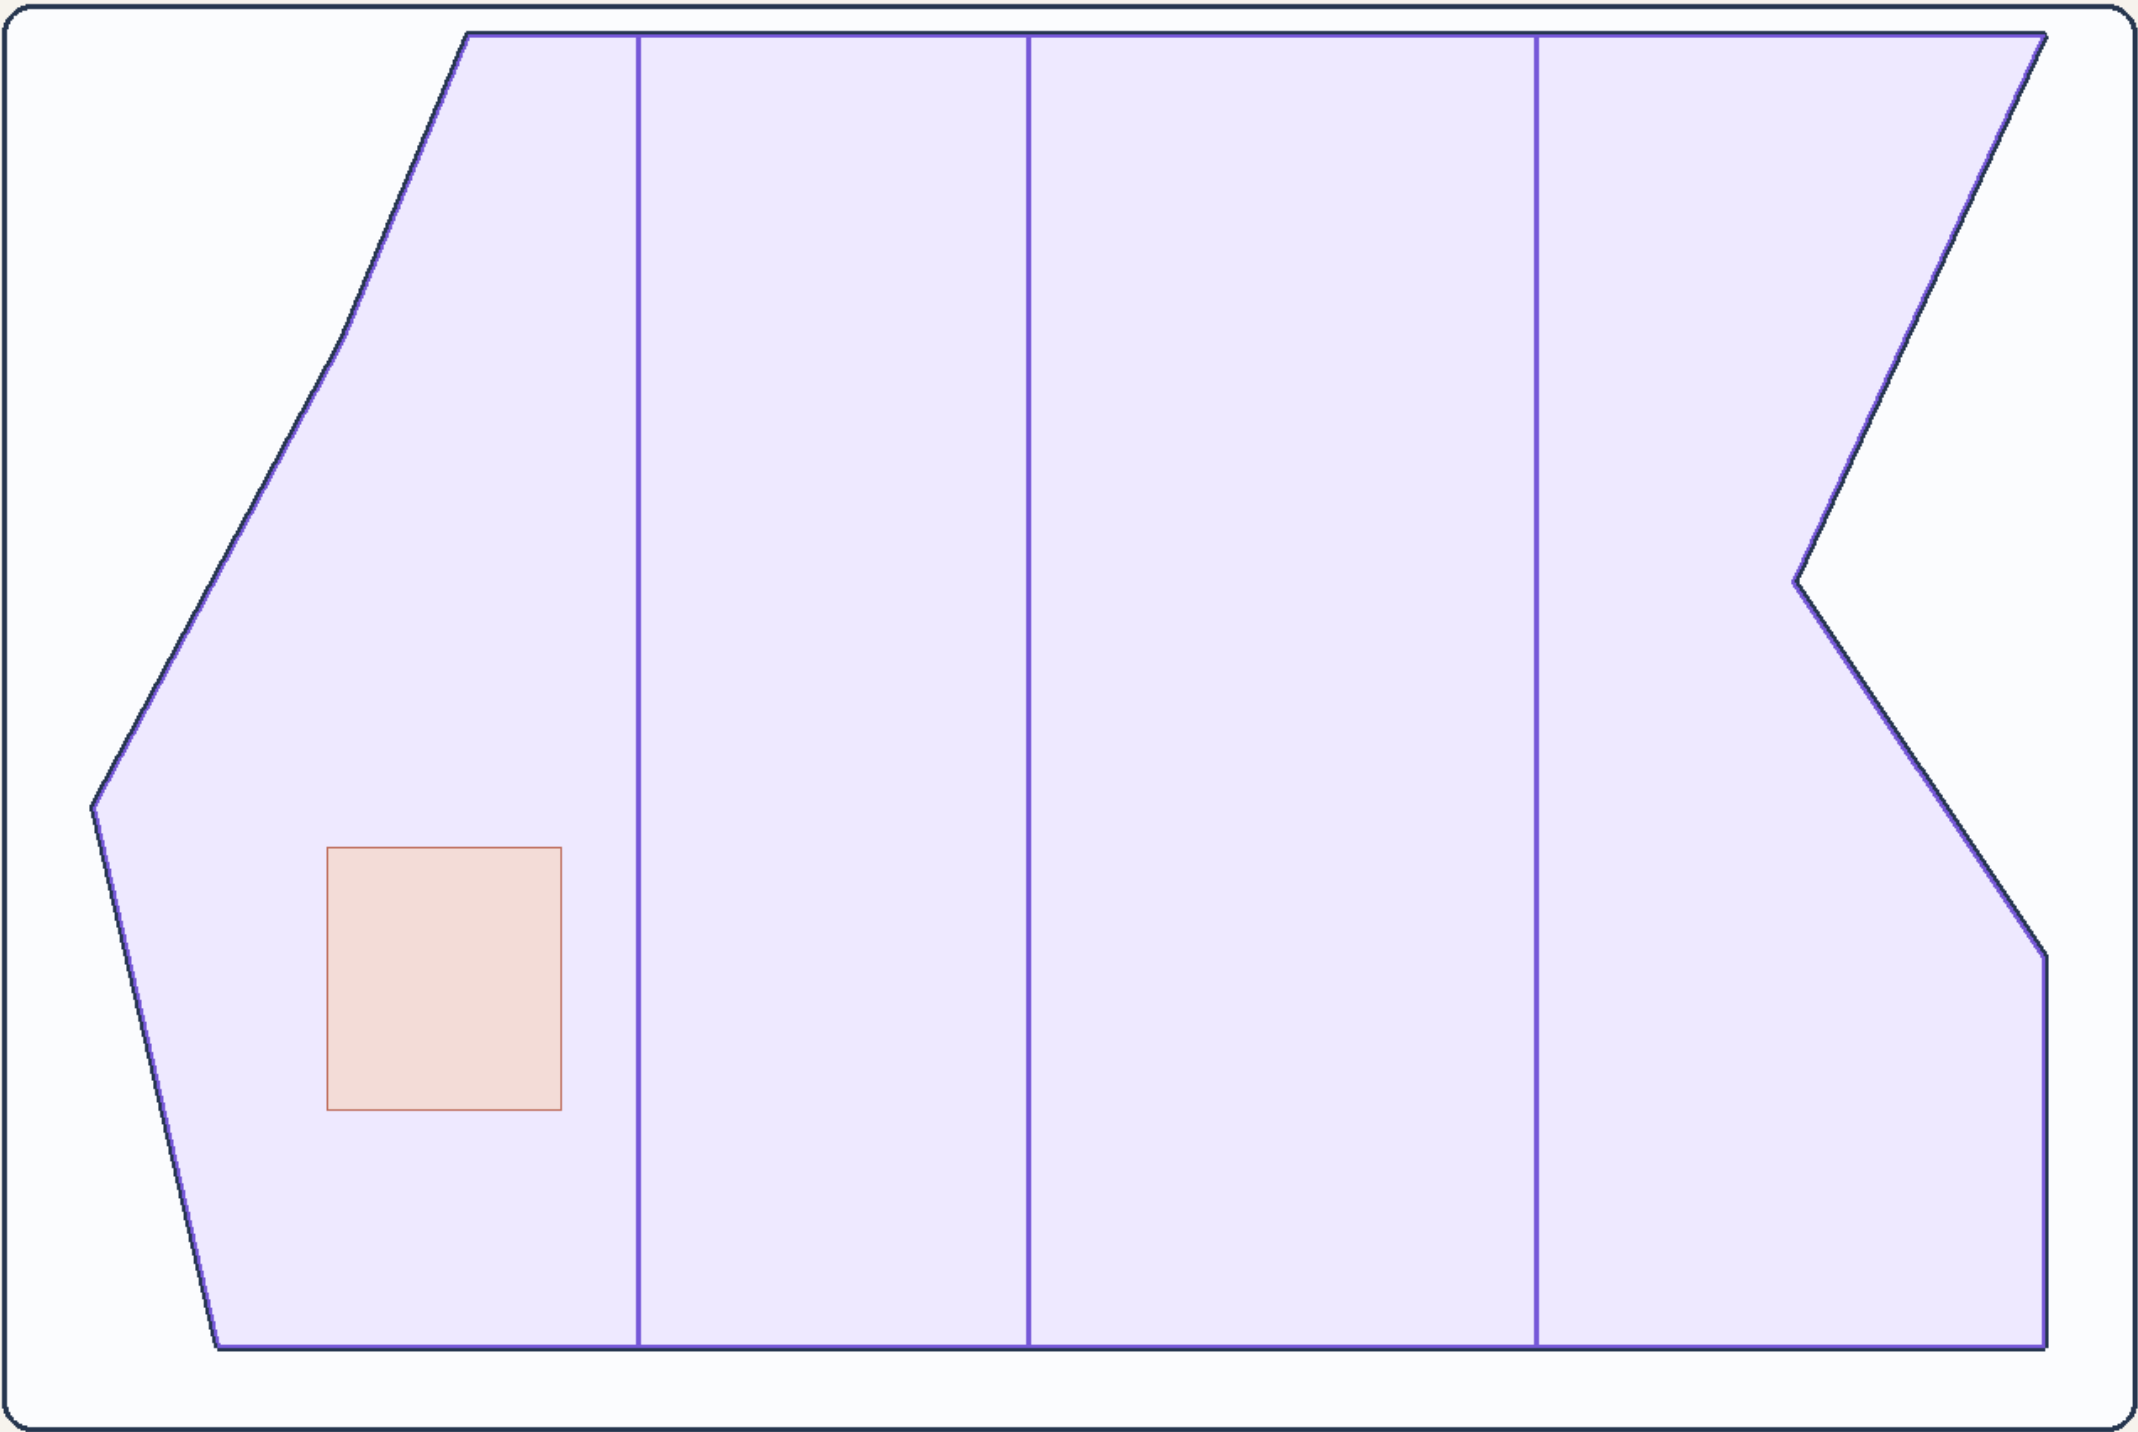

slow-mobility and dwell interface

Data: geometry/*.geojson; conceptual spatial plan, not a survey or construction commitment.

Provisional design model; not an official boundary. Recalculate when official polygons are released.

Land-use structure and renewal framework

Drawn from submitted GeoJSON coordinates · all nodes and corridors are conceptual

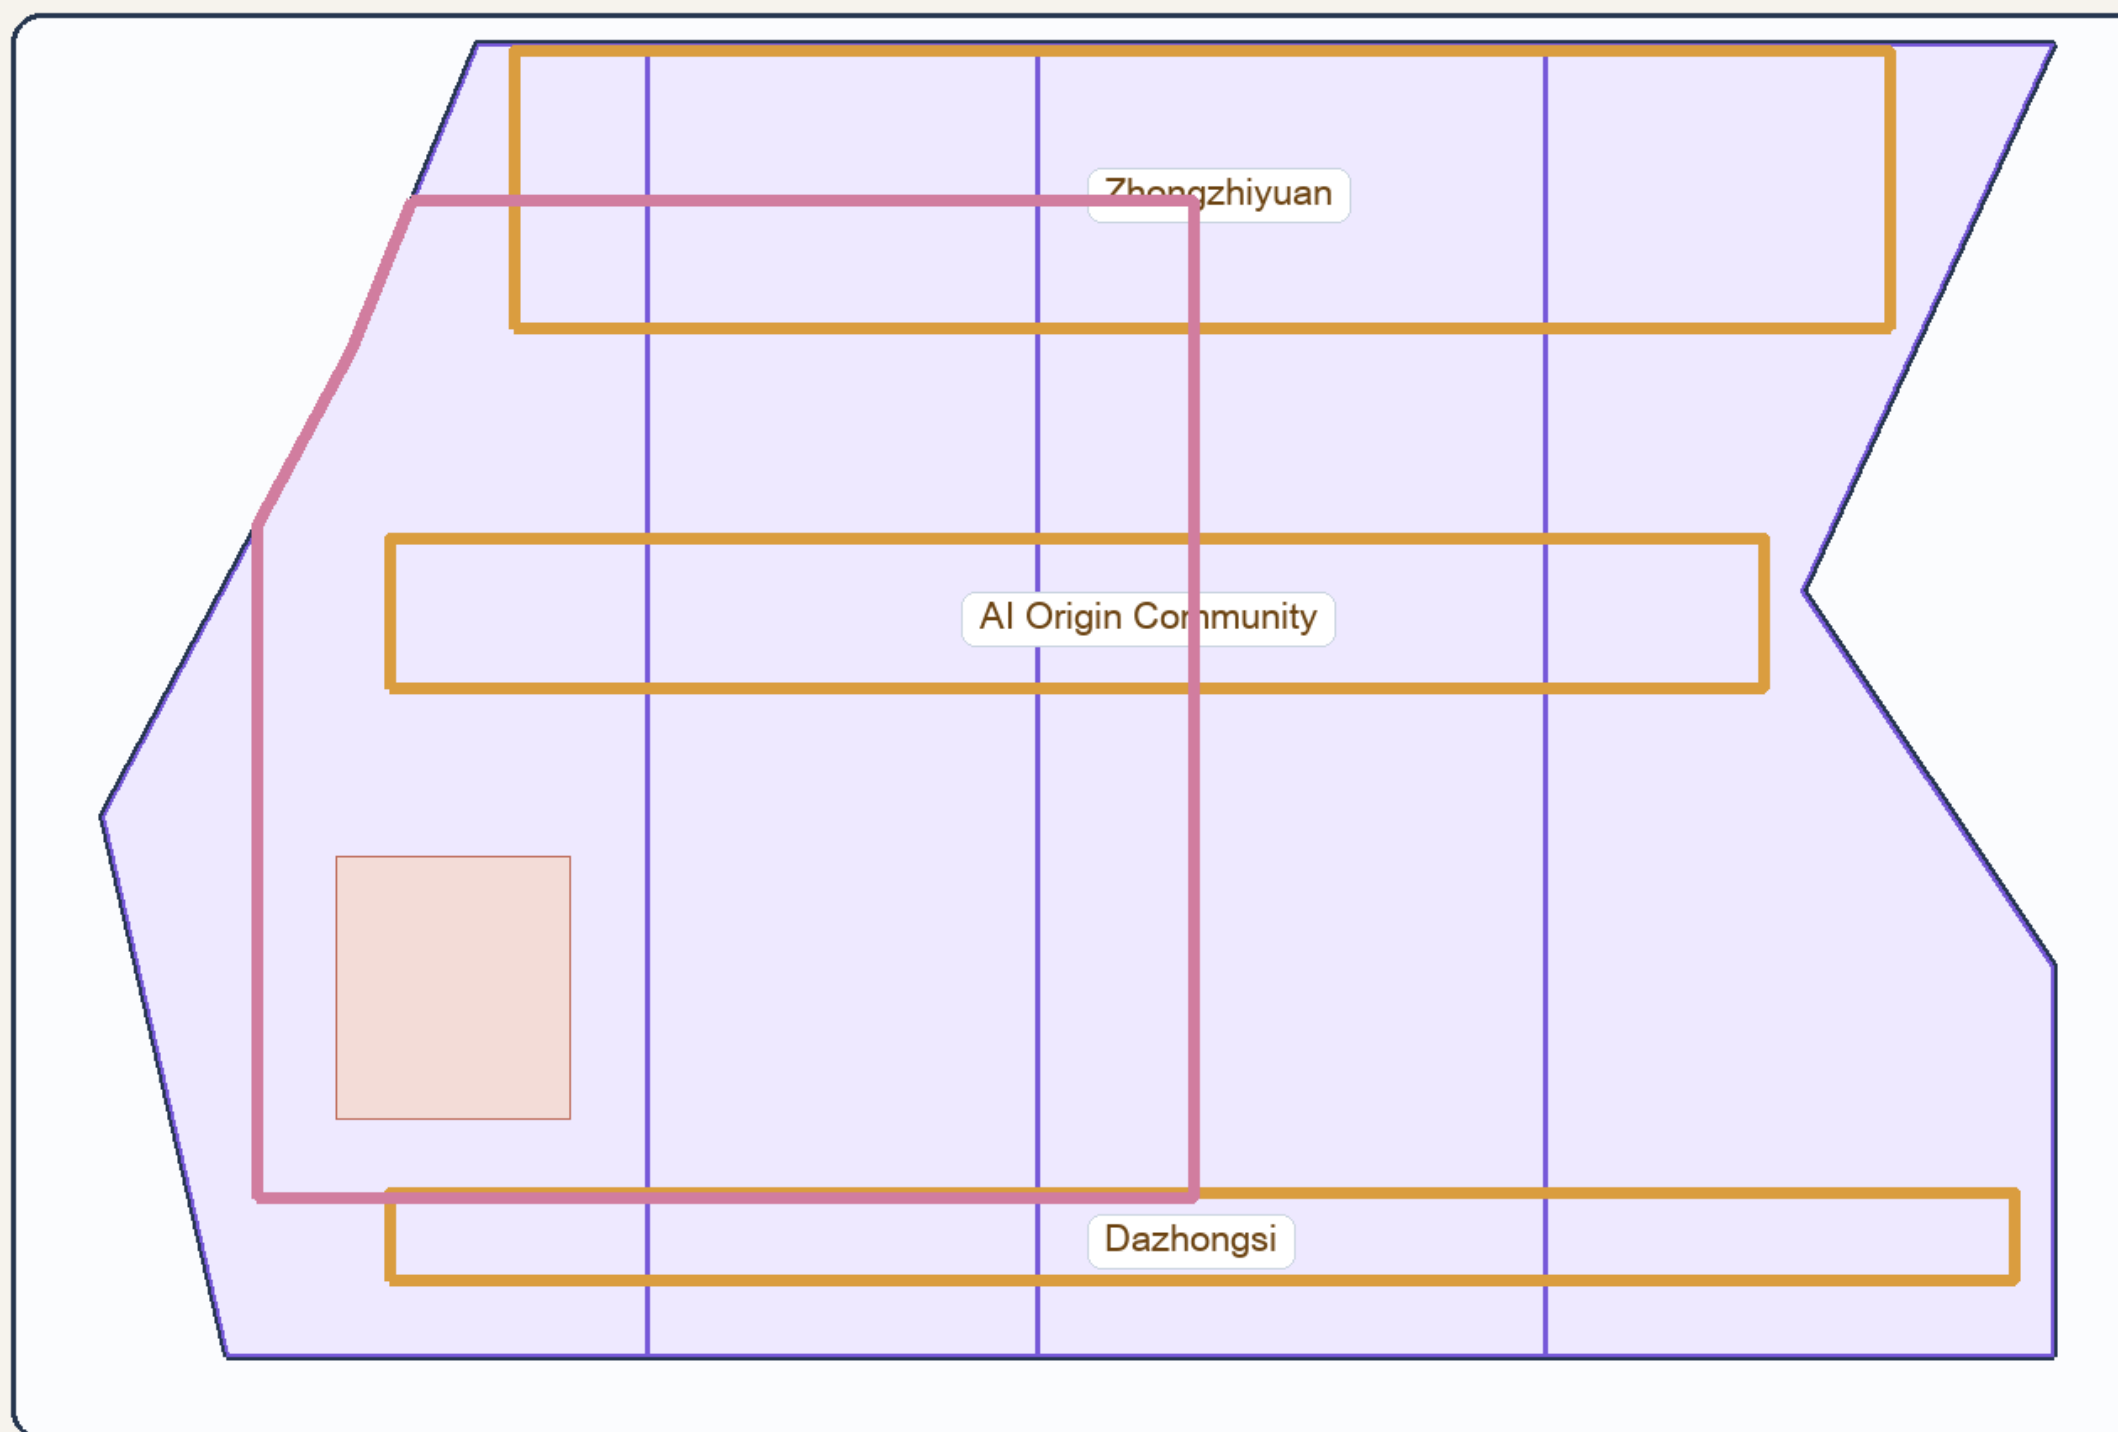

- 研发创新
concept land-use layer
- 更新建筑
pending survey and tenure check

Provisional design model; not an official boundary. Recalculate when official polygons are released.

Data: geometry/*.geojson; conceptual spatial plan, not a survey or construction commitment.

Metrics, phasing, and evidence relationship

Drawn from submitted GeoJSON coordinates · all nodes and corridors are conceptual

~11.41 km²
provisional model value

12.34%
绿地比例 / green ratio

7.33%
公共空间比例 / public-space ratio

3
重点区 / key areas

Data: geometry/*.geojson; conceptual spatial plan, not a survey or construction commitment.
