

Place-Grown Intelligence

Centennial Jing-Zhang Nighttime AI Growth Belt

Nighttime public services, scene validation and urban renewal grow together. Along the centennial Jing-Zhang corridor, AI continuously senses, serves, validates and renews the public realm at night.

百年京张夜间 AI 生长带

夜间公共服务、场景验证与城市更新共同成长

沿百年京张，让 AI 在夜间公共空间中持续感知、服务、验证与更新。

Crowd Intelligence Garden
technical validation and governance access

技术验证与治理准入

Night Operation Logic
historical light belt = ecological service belt
= three public nodes

以京张铁路遗址线作为历史光带，小月河作为生态服务光带，串联三节点夜间安全、公共服务、场景验证和持续运营。

AI Origin Community
real issues and youth co-creation

真实问题与青年共创

Dazhong Temple
product transfer and operational scaling

大神堂

产品转化与运营放大

Drawing Boundary

conceptual scene only, not engineering or regional boundary

画面边界

Overall Overview

Centennial Jing-Zhang Urban AI Growth System

A corridor view connecting Jing-Zhang railway, communities, parks and gateways with transit transfer, public AI service and industrial display.

因地而智：百年京张城市AI生长系统

沿京张轨道廊道串联社区、园区与城市门户，形成交通接驳、开放研发、公共AI服务与商业回流并行

Rail / Transit Transfer Axis

metro, bus and cycling transfer overlap

Blue-Green Slow Mobility Belt

walking, cycling, waterfront green corridor and open space

Drawing Notes

Conceptual overview, final boundary and metrics follow official data register.

AI Origin Community

community-level public AI service entry

Crowd Intelligence Garden

AI validation and governance access node

Dazhong Temple Gateway

industrial display, consumption and reception hall

AI原社区

众智AI核

大神堂产业

画面说明

本图为概念阶段总体鸟瞰表达，重点呈现京张廊道、三类AI节点、交通接驳与公共开放空间的组织关系；具体边界、指标与实施范围以正式数据台账和后续深化成

Core Translation

Current condition analysis and concept overview are treated as one chain: resources are not simply missing; the problem is that existing resources are not yet organized into an open system. Starting from land use, resources, mobility and public space, the proposal links Zhangjia Kou, Xiaoyue River, Crowd Intelligence Garden, AI Origin Community and Dazhong Temple into a staged system for validation, conversion and renewal.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Support Sheet 002 | Existing Resources + Problem Logic v2

Existing Condition + Problem Logic

The chain is not a lack of resources, but a weak system that connects them.

Text Note

Starting from current urban resources and city problems, this sheet treats Zhangjia Kou as a value anchor on the Jing-Zhang corridor. A technology incubator, a brand conversion node and a potential public service incubator. The core problem is that research resources, living communities, mobility nodes and IP-oriented scenarios have not yet formed a stable public network.

Problem Summary

- 01 **Resource Exist, But Are Not Linked**
Innovation, research, technology, universities, historical relics and old city / living community and IP are highly mixed points.
- 02 **Weak Connective Capacity**
Existing resources are not from education nodes, industry, community, parks and public service landscapes and difficult to connect.
- 03 **AI Origin Experiment Not Grounded**
Research resources are close but not formed, AI facts embedded operations and are isolated.
- 04 **Public Value + Commercial Loop Missing**
High, innovative culture and community demand are not realized with supply and embedded operations.

Gap Reasoning + Scheme Logic

The scheme is a dual system: Two linking logic, five closed loop paths and an industry chain center.

Position chain: experimental public supply + vertical on condition and external growth. Research can enter business, local business operation, development and expansion.

Note: All the processes are closed loop that going on continuous cycle. Maps and drawings are only for design purpose (not real).

Current Resource Base Map

A synthesized base map containing sites, corridors, industries, public services and problem logic.

JZ.AI | EXISTING CONDITIONS | PROBLEM LOGIC v2

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Site Overview + Overall Concept v3

Opening AI from macro observation to more public-space validation, transfer and continuous renewal.

Three-Layer Scope Map

The development scale + thought stages.

Continuous Public Space

Site definition public landscape from macro observation to more public-space validation, transfer and continuous renewal.

Conceptual Framework

A design strategy, public participation, innovation, feedback loop.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Map 04 | Transit Slow Mobility + Blue-Green Public Space v1

Rapid validation and progressive iteration toward a shared public network for all users

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Map 02 | Functional Zoning + Overall Spatial Structure v2

A continuous public framework links the four functional components, three differentiated nodes and multiple nodes

Combined Logic

The mobility sheet validates walkable, rideable and visible public-network foundations. The land-use sheet translates this network into three key nodes, five functional systems and Key point: A0 portait keeps the same composite logic as the Chinese version: top for transit/blue-green verification, bottom for land-use structure and implementation system.

04 | Three Key Areas + Crowd Intelligence Garden

Map 03 | Three Key Areas Spatial Evaluation v2

From Xingyue River to Daohong Temple, Sam chose urban AI nodes with different scene models and operating logic.

AI Technical Validation + Governance Access Node

The garden is not a sealed experimental box; it becomes a reliable technical gateway before AI scenarios enter public life.

AI 技术验证与治理准入节点

连接轨道/公交/慢行接驳，将共享研发、受控测试、公开测试廊和人工接管机制嵌入存试园区

Public Test Courtyard

公开测试廊

Public + Cycling Transfer
waiting, transfer and slow-mobility entry

公交与骑行接驳
换乘、停靠、慢行

Scene Notes

shared R&D, controlled tests, pub-
observation and human takeover

Fast Connection
clear access and low-interference transfer

Human Takeover

受控测试庭院

件: 设备、智能

Design Note

not an engineering boundary or approval result

核心标注

AI Origin Community

Real Problems + Youth Co-Creation Node

Use community life scene collection, co-creation and human-assisted service windows to organize the real demand entrance of the city AI system.

真实问题进入与青年共创节点

以社区公共客厅、问题墙、共创工坊和人工服务窗口，让城市需求进入 AI 场景护照体系

Neighborhood Issue Wall

issue, lighting, barrier-free access and safety

青年共创节点

Youth Prototype Workshop
Students, residents and enterprises co-create AI prototypes

公共 AI 服务窗口

咨询、代办、反馈、人工接管

Public AI Service Window

consultation, proxy service and human takeover

Scene Notes

everyday issues become collectable and reusable AI scenarios

Prototype Ring

School, elderly care and low-disturbance testing

Slow Mobility Loop

station connection, cycling stop and slow entry

核心标注

真实问题进入

青年共创与原型

人工窗口与线下入口

社区复核与反馈

建议图注

AI 原点社区不是技术展示场，而是让居民和青年共同参与验证的社区

交通链接口径：以最后 500 米生活圈为主，通过公交、骑行、连续步行，无缝衔接融入周边社区、学校、商业和公园场景。

JZ AI / AI ORIGIN COMMUNITY 05 在 AI 原点社区用符号与图则表达，不等同类新增工程红线，法定建设边界或已确定实施范围。

Dazhong Temple

AI Productization + Operation Scaling Node

Use station traffic, validated products and enterprise services to make public AI scenarios purchasable, testable and up-scalable

AI 产品化与运营放大节点

以站城缝合、存量商业更新和企业共享服务，把验证成果转化为可采购、可订阅、可运营的 AI 服务

Station Gateway

metro entry, bus transfer and walking service

AI Product Validation Hall

trial demo, user testing and public observation

2+1 移动服务点

2+1 Mobile Service Points

validation route and conditional action

Enterprise Service Desk

investment, API, compliance and operation authorization

Sorting Hub

public benefit validation and commercial-value classification

Exchange Gateway

product review, method output and cooperation forecast

核心标注

站城缝合与步行缝合

产品验证与场景发布

企业共享服务

公共/商业分类回流

建议图注

大钟寺不是普通商业终点，而是验证运营放大和公共/商业分类出口。

交通链接口径：以站城缝合和四象漫步行组织为主，叠加公交换乘、骑行停靠、落客接驳和 2+1 移动 AI 服务点。

JZ AI / DAZHONG TEMPLE 06 注：存量商业更新、企业入驻、空间取得和招商结果为条件性表达，不构成实施承诺。

Twelve AI Scenario Maps

The twelve scenario cards translate abstract AI concepts into public-space scenes, users, boundaries and human operation.

Formal Expression Boundary

Six personas are not demographic labels. They bind scenario tasks, spatial entry points, chain cards and human-operation boundaries.

1. Operation-index diagram, not policy or facial-recognition boundary.
2. Public space remains open, rejectable and available for human assistance.
3. Personas constrain Al-oxide permissions and data minimization only.
4. Enterprise validation represents staged cooperation, not the whole system.

Technical indicators test whether the system is credible; the economic loop tests whether it can operate over time. Every figure keeps its source, status, and recalculation boundary.

Technical & Investment Indicators

A lightweight start-up framework based on three nodes, two public scenario belts and verifiable AI pilots

Deliverable Board 01

Place-Grown Intelligence
Centennial Jing-Zhang Urban AI Growth System

Overall Design Area

11.4 km²

Official land basis, final boundary to be reviewed

Key Area Total

368.4 ha

Zhongzhijuan, AI Origin Community, Dazhongsi

Concept Route Coverage

~51.9 km

Mobility, walking, river-park and stich routes

First-Wave AI Scenarios

12

Including 4 industry validation scenarios

1. Technical Indicators

A spatial framework, measurable scenarios, technical admission and operational review

Spatial Nodes

3 nodes: Zhongzhijuan / AI Origin / Dazhongsi

Public Scenario Belts

Xiaoque River eco-health + Jing-Zhang heritage exchange

Service Points

Dazhongsi: 2 required + 1 conditional mobile AI service points

Technical Admission

100% scene passport coverage for first-wave scenarios

Governance O&M

Data minimization, third-party testing, annual review

Mobility Framework

2 north-south systems: rapid connection + continuous walk

East-West Stitches

5 cross links, approx. 9.3 km

Scenario Validation

12 first-wave AI scenarios, including 4 industry pilots

Public Safeguard

100% human takeover + offline access for public AI scenes

Exit Mechanism

Pause or exit low-value, high-risk, or low-acceptance scenarios

2. Investment Indicators

Four ledgers separate committed scope, annual operation, enterprise input and conditional works

One-Time Project Investment

RMB 117-405M

Annual Operations

RMB 35-125M / yr

Four Financial Ledgers

01 One-time investment Public framework, shared nodes, AI base, pilots and governance start-up

02 Annual operation Human service, platform maintenance, device patrol, events and audit

03 Enterprise input Enterprise R&D, compute, proprietary devices, fit-out and marketing

04 Conditional works Bridges, roads, underground space, utilities and major retrofits

One-Time Investment Breakdown

C1 Studies RMB 5-13M

C2 Mobility RMB 25-70M

C3 Blue-green RMB 12-50M

C4 Node retrofit RMB 25-90M

C5 AI base RMB 30-100M

C6 Pilots RMB 15-60M

C9 Governance RMB 5-20M

Boundary note: concept-stage order-of-magnitude estimate only, not a formal budget, engineering cost, government investment commitment or enterprise investment commitment. Green space ratio, public space ratio and other area-based indicators shall be recalculated after final boundaries are confirmed. Route length is coverage, not construction length.

01 Technical And Investment Indicators

Commercial AI Revenue & Public AI Return Loop

Commercial AI creates incremental revenue; public AI gains long-term renewal capacity

Deliverable Board 02

Place-Grown Intelligence
Conditional revenue estimate

Start-up Phase, 0-18 months

Revenue RMB 1.25-10M

Return RMB 0.4-2.5M

Network Phase, 18-36 months

Revenue RMB 5-38M / yr

Return RMB 1.5-9M / yr

Steady State, after Year 3

Revenue RMB 15-120M / yr

Return RMB 5-30M / yr

1. Spatial Loop: Problem Intake - Technical Validation - Public Testing - Product Conversion - Public Renewal

Only qualified incremental revenue from public scenarios, shared facilities, platform services, public brand and governance testing enters the return base

AI Origin Community

Real urban issues
Co-creation and user tests

Zhongzhijuan

Technical evaluation
Compliance and certification

River + Heritage Park

Bounded public-space tests
Scenario access and events

Dazhongsi

Subscription and licensing
Procurement and service fees

Public AI Renewal Account

Terminals, accessibility, human service, devices, data governance, third-party audit and scenario renewal

2. Five Commercial AI Revenue Items

Board-level formulas; final ratios and contract accounts must be confirmed during implementation

Scenario Access

Projects × RMB 50-300k

Compliance Testing

Projects × RMB 100-500k

Platform Access

Projects × RMB 50-500k / yr

User Test & Launch

Batches × RMB 100k-1M

Licensing / Procurement

Projects × RMB 100k-3M or 1%-5%

Return amount is not total revenue; legacy enterprise revenue and unrelated business income are excluded from the return base. Conditional estimate only; it does not imply signed contracts, established funds, realized income or fixed return ratios.

Submission wording: commercial AI revenue is a supplementary renewal pool for public AI, working with public investment; annual O&M and social contribution rather than replacing required operations funding.

02 Commercial AI Revenue And Public AI Return Loop

Response To The Official Brief

Responds to the three positions, five functions, three areas and two wings, Agent 2/3/6 tasks, and multimodal presentation requirements. The board explains the industry ecosystem, scenario operations, long-term activities, and conversion mechanism rather than adding an AI label to conventional renewal.

Core Metric Recalculation

site_area, open_space_ratio, and public_space_ratio must be recomputed from submitted geometry and match visualIndex.html data-values. Provisional geometry must keep sources, formulas, status, and recalculation triggers.

Boundary Statement

All outputs are open co-creation recommendations. They do not replace statutory planning and do not constitute an approved government conclusion. Investment, operation, return flow, spatial renewal, and node carries remain concept-stage order-of-magnitude estimates or mechanism proposals.

Pre-Submission Gate

After signing the latest official main branch, rerun render, finalize, self_check, and participant_preflight. A passing self-check is not a selection, approval, or implementation result.
