

Formula

1 LINE — the Jing-Zhang Co-Intelligence Line (century-old rail → AI conversion corridor)

3 ENGINES — ORIGINATE / TEST / ADOPT

2 WINGS — West: capital & knowledge / East: urban life

9 INTERFACES — campus/research/startup/community/education/medical/retail/transit/culture

N STATIONS — places to stay and participate

1 LOOP — CREATE→VERIFY→LAUNCH→ADOPT→SCALE→RETURN

Governance

NO EXIT, NO ENTRY — no scenario enters the city without an exit mechanism

NO ENTRY = qualification gate + retirement-registry gate

NO EXIT = exit audit + triple receipt (data/restoration/appeal)

CITY CHANGELOG — annual city version: diff/rollback/deprecation/unmerged futures

Four builder generations — ENGINEERS→FOUNDERS→DEVELOPERS→CITIZENS

Core Metrics (recomputable)

site_area_sqm = 11,412,825.386 (recomputed Δ -0.596%)

green_ratio = 0.123423 (Δ +0.599%)

public_space_ratio = 0.073281 (Δ +0.600%)

PROVISIONAL boundary; intake only; official release triggers full recompute gate.

12 AI Scenario Cards (thresholds + no-AI equivalents, see A3 booklet p.3)

01 Campus Without Walls Threshold: Task success > human info-desk baseline (e)	02 Research-to-Founder Clinic Threshold: Adoption > human tech-transfer clinic (l)	03 AI Community Health Navigator Threshold: Correct-department arrival > human guide ()
04 Assistive Robot Walk Threshold: Zero harm; independent walk completion at	05 Physical AI Test Yard Threshold: Tasks pass safety review, zero public-real	06 Agent Retail Street Threshold: Transaction success > human counter; compl
07 Future Product Launch Market Threshold: >1 real user full-chain with verifiable fe	08 Rider Friendly Hub (URBAN SERV Threshold: Wait/wayfinding time < current baseline (z	09 Global Talent Concierge Threshold: Multilingual task success > bilingual huma
10 Quiet AI Park Threshold: Maintenance response < human patrol baseli	11 HUMAN+ROBOT Logistics Threshold: 100% human takeover on exceptions; speed >	12 City Observatory Threshold: Public readings match raw records, third-p

Absorb-and-Strengthen Matrix

Board 2/2: Absorption & differentiation after deep-reading 36 of 950 submissions (scan 2026-08-31)

#	Action	Absorbed from	Landing	Rubric
P0-1	Namesake note: two OPENLINES (community→city vs AI→city), differentiated by mechanism semantics	flyingpig707 (namesake, filed 1 day earlier)	proposal §Concept	originality
P0-2	NO EXIT NO ENTRY execution: double gate, triple exit receipt, six-ring gate table, first-area exit drill runbook	sofzhang retirement registry / benjaminhe Exit Voucher / Abreto state machine	proposal §Operating rules	innovation 15%
P0-3	12 scenario cards, seven-field discipline: thresholds (illustrative) + baselines + no-AI equivalents	Maydaytyh threshold discipline / Sonike no-AI equivalent	proposal §Scenario cards	innovation + public
P0-4	CITY CHANGELOG release semantics: diff/rollback/deprecation/known issues/unmerged futures; city version = leaderboard	Empress7211 unmerged archive / Maydaytyh J2-Baseline distinction	proposal §Long-term operation	innovation + originality
P1-1	Cost & funding discipline: sensitivity ranges + null discipline; five channels; HUB staffing; evidence-gated release 25/25/25/25	Common practice of top-scored operating estimates	proposal §Phasing	implementation 20%
P1-2	Area deviation table: 43.6km²/+0.02%, 11.4km²/+0.11%, 368.4ha/+0.24%; full recompute gate	provisional_boundaries_basis.md	proposal §Metrics	risk + brief
P1-3	Proactive disclosure: Issue #846 (heritage park disjoint, 412.5m), #1029 (centroid off 2.26km); thanks to community review	Community public review issues #846/#1029	proposal §Risk	risk 10%
P1-4	L1-L5 evidence-stack naming disambiguation (unrelated to landmark catalogues / test-environment grading)	Lessons from multiple naming collisions	proposal global	originality
P1-5	metrics.json field discipline: known gets confidence/assumptions/trigger; unknown states the gap; no administrative diversion	HYKQL-K exploit gaps / TryWorld scope discipline	metrics.json	risk + implementation
P2-1	SCALE outward exit: AI earns entry to the next city from Jing-Zhang; JZ OPENLINE ADMISSION (concept v0.1) five-piece set	sukikeeling SWB packaging	proposal §Concept	originality + brief
P2-2	East-West Barrier Index as complement to north-south baselines	Maydaytyh et al. baseline schemes	proposal §Mobility	brief
P2-3	Co-intelligence semantics: four builder generations making together, not a single acceptance loop	baobao-byte co-intelligence loop (namesake distinction)	proposal §Concept	originality

Explicit non-goals

- × No new gate/ticket/token mechanisms (≥20 submissions crowded; unplug-five-fields is public asset)
- × No signal-tricolour visuals (taken); no block/token semantic field
- × No fake numbers for UNKNOWN metrics (0/12-style nulls score, not defect)
- × No priority claims on names/mechanisms (our work untracked; namesake filed 1 day earlier)
