

Shared Study Loop • STU • JZ

One hall • one valley • one night room • one learning route

PROVISIONAL • concept evidence only • pending official data and site checks

01 STU-HALL

Zhongzhiyuan side • SC-01/02/06

Canonical SC table + human fallback + exit

02 STU-VALLEY

AI Origin Community side • SC-03/05/09

Canonical SC table + human fallback + exit

03 STU-NIGHT

Dazhongsi side • SC-04/07/08/10

Canonical SC table + human fallback + exit

Three textual tiers / three key areas / two formal wings / five candidate interfaces

Shared Study Loop • Spatial Relationship Diagram

Three textual tiers → three key areas → three learning nodes → two formal wings → candidate regional interfaces

PROVISIONAL • concept anchors only • no statutory redline, measured distance, device location or cooperation claim

TEXTUAL THREE-TIER CALIBER

43.6 km² coordination research text caliber → 11.4 km² overall design text caliber → 368.4 ha key-area text caliber. These are announcement text, not polygons.

THREE KEY AREAS / CANONICAL SC MAPPING

North: Zhongzhiyuan / STU-HALL / SC-01 • 02 • 06
Middle: AI Origin Community / STU-VALLEY / SC-03 • 05 • 09
South: Dazhongsi / STU-NIGHT / SC-04 • 07 • 08 • 10

TWO FORMAL WINGS

Formal wings: Zhongguancun technology-service wing (learning resources, mentors, capital interface) + Xiaoyue River scenario-empowerment wing (public learning route).

CANDIDATE REGIONAL INTERFACES

Candidate interfaces only: North Latitude Community • Future Science City • Huairou Science City • Economic-Technological Development Area • Beijing-Tianjin-Hebei. Entry requires consent, professional checks and accountable owner.

Key Areas • Canonical Scenario Mapping

Three differentiated learning nodes, one canonical SC registry, no false location precision

PROVISIONAL • concept anchors only • no statutory redline, measured distance, device location or cooperation claim

01 Zhongzhiyuan AI Autonomous-Innovation Acceleration Area STU-HALL • SC-01/02/06 Integrated shared-study centre: quiet reading, study/seminar pods, timed service Space type: concept envelope / reusable public components. Operator: public or community operator, pending appointment. Human fallback: service desk, paper/phone route, safety/accessibility review. Exit: unresolved safety, accessibility, privacy or repeated service failure.	02 Beijing AI Origin Community STU-VALLEY • SC-03/05/09 Youth study community & workshop: shared desks, notice wall, group booking Space type: concept envelope / reusable public components. Operator: public or community operator, pending appointment. Human fallback: service desk, paper/phone route, safety/accessibility review. Exit: unresolved safety, accessibility, privacy or repeated service failure.	03 Dazhongsi AI Industry Cluster STU-NIGHT • SC-04/07/08/10 Evening study & lifelong-learning point: classes, senior digital learning, safe night route Space type: concept envelope / reusable public components. Operator: public or community operator, pending appointment. Human fallback: service desk, paper/phone route, safety/accessibility review. Exit: unresolved safety, accessibility, privacy or repeated service failure.
--	--	---

SC-01—SC-10 is the only scenario vocabulary. Each card in proposal.md/en carries user, problem, space, data boundary, AI role, owner, human review, privacy, metric, IT mapping and exit condition.

Canonical geometry bridge: public_space.geojson → scenario_ids / node_role / location_precision=concept_anchor; all polygons remain provisional.

Mobility + Blue-Green Learning Route

Directional concept route only; no surveyed distance, fixed device point or statutory line

PROVISIONAL • concept anchors only • no statutory redline, measured distance, device location or cooperation claim

01 • ARRIVE

Rail / university / community arrival → service desk. Verify crossings, gradients, lighting and accessible continuity before any siting.

02 • LEARN

STU-HALL → STU-VALLEY → STU-NIGHT is a directional learning sequence; the line is not a measured route or traffic-control proposal.

03 • EXTEND

Shaded study corner, waterfront reading strip and slow-rest loop are reversible public components. Blue-line, green-line and heritage controls prevail.

SERVICE RULE

SC-10 offers non-binding off-peak guidance from aggregate brackets; no personal location, no precise drop point, human/safety review before release.

Land-Use Structure • Single Concept Caliber

Concept shares sum to 100%; they are not current-land statistics or statutory land-use decisions

PROVISIONAL • concept anchors only • no statutory redline, measured distance, device location or cooperation claim

One independent green-space metric is 11.64% from green_space / site_boundary; it is not the 1401 concept share. Formal ratios remain low-confidence provisional values and are recomputed after official geometry.

Source: geometry/land_use.geojson • formula: class share of the concept land-use table • no supply or approval claim

AI Learning Ecosystem • Seven Factors

Capability map, not an engineering or investment list

PROVISIONAL • CONCEPT ONLY

Source: package geometry / proposal canonical registry • not an official redline

Brand Working Codename

No trademark clearance or external registration is claimed

PROVISIONAL • CONCEPT ONLY

STU • JZ / 织学智环

Source: package geometry / proposal canonical registry • not an official redline

Metrics Evidence • Units + Recompute

Area, ratio and count panels; provisional geometry stays provisional

PROVISIONAL • concept anchors only • no statutory redline, measured distance, device location or cooperation claim

AREA / sqm

site_area_sqm	11,412,825.386
polygon_area(site_boundary) • geometry/site_boundary.geojson • medium	
green_space_area_sqm	1,328,645.003
union(green_space) • geometry/green_space.geojson • low	
public_space_area_sqm	50,950
union(public_space) • geometry/public_space.geojson • low	

RATIO / %

green_ratio	11.6417%
green_area / site_area • provisional geometry • low	
public_space_ratio	0.4464%
public_area / site_area • provisional geometry • low	
land-use shares	25+9+13+14+13+26=100%
single concept caliber • not current-land statistics	

COUNT / items

key_area_count	3
count(key_areas) • geometry/key_areas.geojson • high	
scenario_node_count	9
count(public_space nodes) • geometry/public_space.geojson • high	
scenario_card_count	10
count(SC-01..SC-10) • proposal.md/en • high	
IT protocols	3
count(IT-01..IT-03) • proposal.md/en • high	
personas / cases	6 / 6
canonical tables • proposal.md/en + sources.json	

Recompute trigger: replace provisional site_boundary/green_space/public_space with official, versioned geometry; rerun formulas and regenerate figures, HTML and PDFs. No area, ratio or count is an approval, capacity, demand or investment conclusion.
