

Let the future grow.
Let the city continue.

Technology belongs to an era; the city belongs to generations.

The city is not a container for technology. It is the **continuity of intergenerational life**. Protect shade, walking, learning, service, maintenance and small daily commerce first; then cautiously ask whether technology deserves a temporary stay.

Long-lived city

Streets, trees, walking, public service and shared memory do not yield to short-cycle equipment.

Adaptable city

Rooms, thresholds and operations can be repaired without crossing rights, accessibility or public boundaries.

Temporary intelligence

It appears only when needed, accountable, stoppable and fully resettable.

Three key areas: return technology to daily life

Not three in rooms, but three ways of caring for an existing city.

Zhongzhiyuan

VALIDATE / NOT SPECTACLE

ROUTE → HOSIERY → RENEWABLE TEST → RESET
A small-scale urban intervention cannot replace a large-scale urban intervention. Only when urban intervention cannot replace a large-scale urban intervention, it can be a small-scale urban intervention.

water's route S01 P0 reference

AI Origin

CO-EXIST / NOT CAPTURE

LEARNING → CONSENT → PEOPLE CLEAN → RESET
Learn to co-exist and not capture. Only when urban intervention cannot replace a large-scale urban intervention, it can be a small-scale urban intervention.

ordinary learning S01 conditional

Dazhongsi

JUDGE / NOT AUTOMATE

SURFACE → HUMAN DECISION → PAPER FALLBACK → SERVICE
Daily life, walking, service and street. Common sense, human decision, paper fallback and a contact route.

surface continuity S01 conditional

One shared floor, three different spatial questions

LONG-LIVED CITY

Streets, walking, service and memory do not yield to short cycle equipment.

ADAPTABLE CITY

Rooms, thresholds and operations may be repaired without crossing public or rights boundaries.

TEMPORARY INTELLIGENCE

Appears only when needed, accountable, stoppable and fully resettable.

One cautious spatial decision

S01 may only pause briefly when ordinary city, rights, professional and field conditions all hold together.

Zhongzhiyuan validates | AI Origin co-exists | Dazhongsi judges

These are not repeatable AI rooms: Zhongzhiyuan considers validation only within a future confirmed carrier; AI Origin protects public learning and human handover; Dazhongsi retains inquiry, paper fallback and contest.

One P0 only: S01

1 task/device · 5 role positions · 4 booked observers · concept cap 9. **All 11 external conditions are HOLD_EXTERNAL; P0_GO=false.**
