

ZHANGHEN • JINGZHANG NARRATIVE WAYFINDING BELT

WAYMARK • JZ - Cultural Storytelling Sign System (Concept)

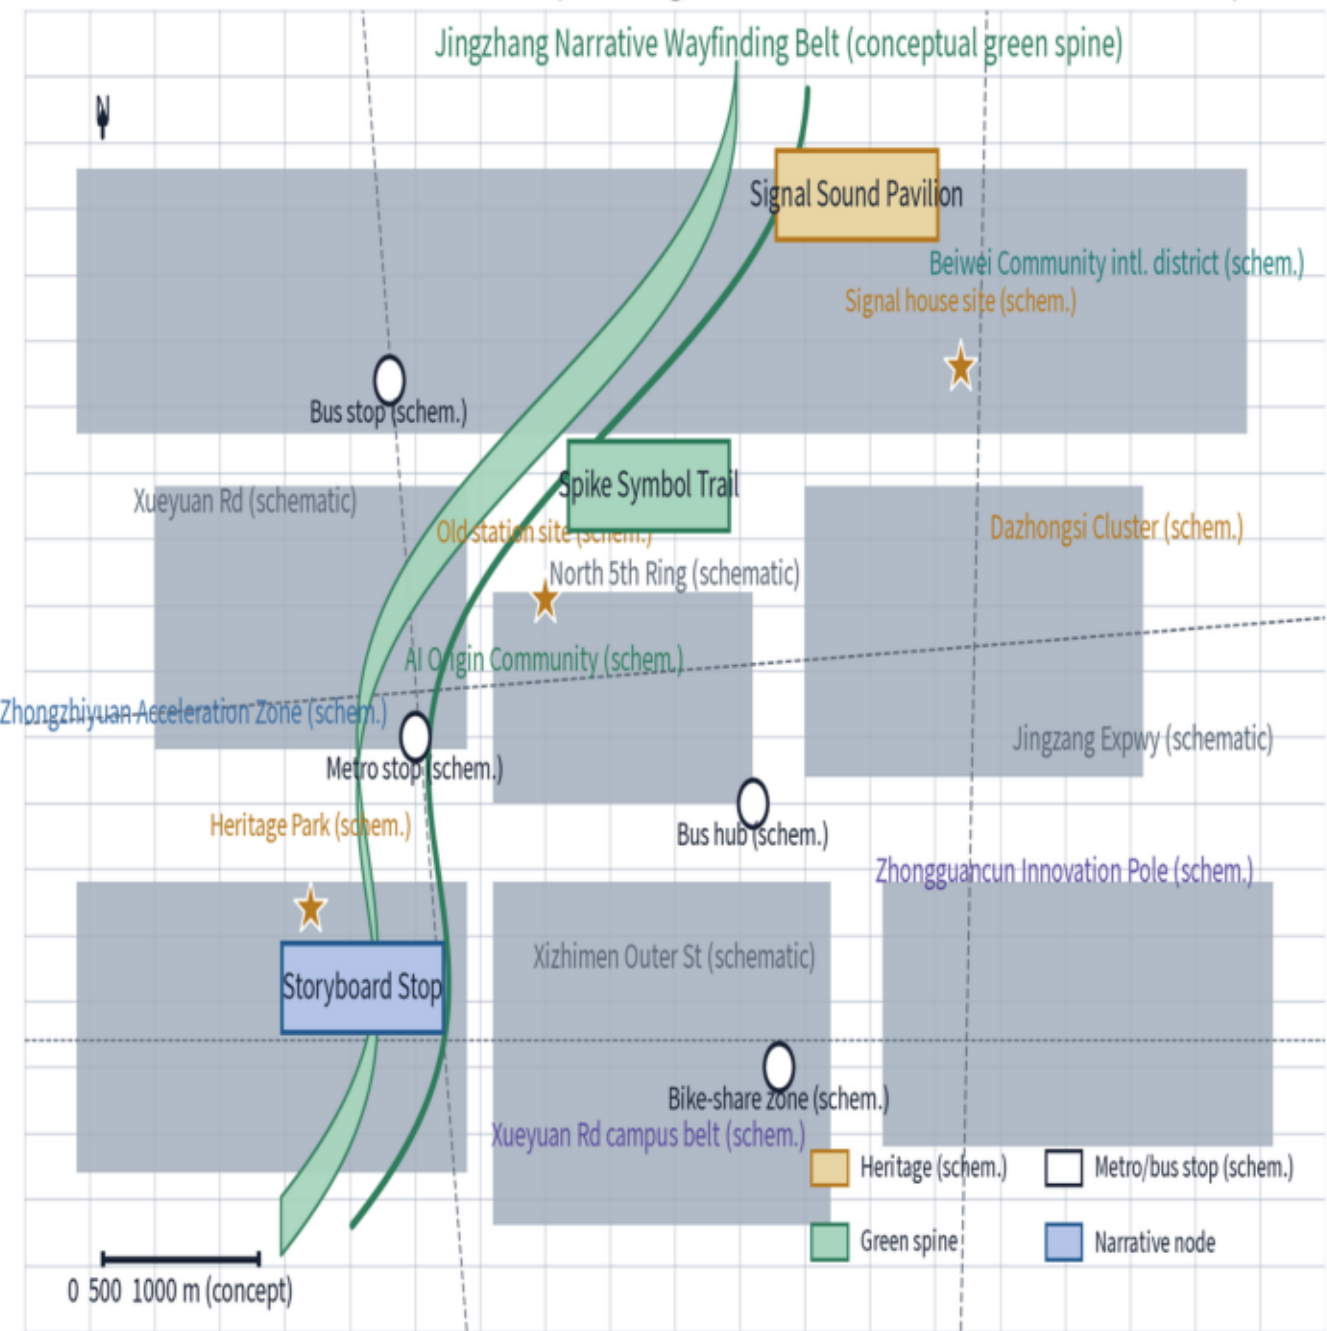

An integrated narrative wayfinding system along the centennial Jingzhang green belt:
reading - walking - listening (one belt, three stations). All content is conceptual advice on a
provisional boundary; recompute when official data is published.

Official scopes: coordinated research approx. 43.6 km2 | overall design approx. 11.4 km2 | key areas approx. 368.4 ha

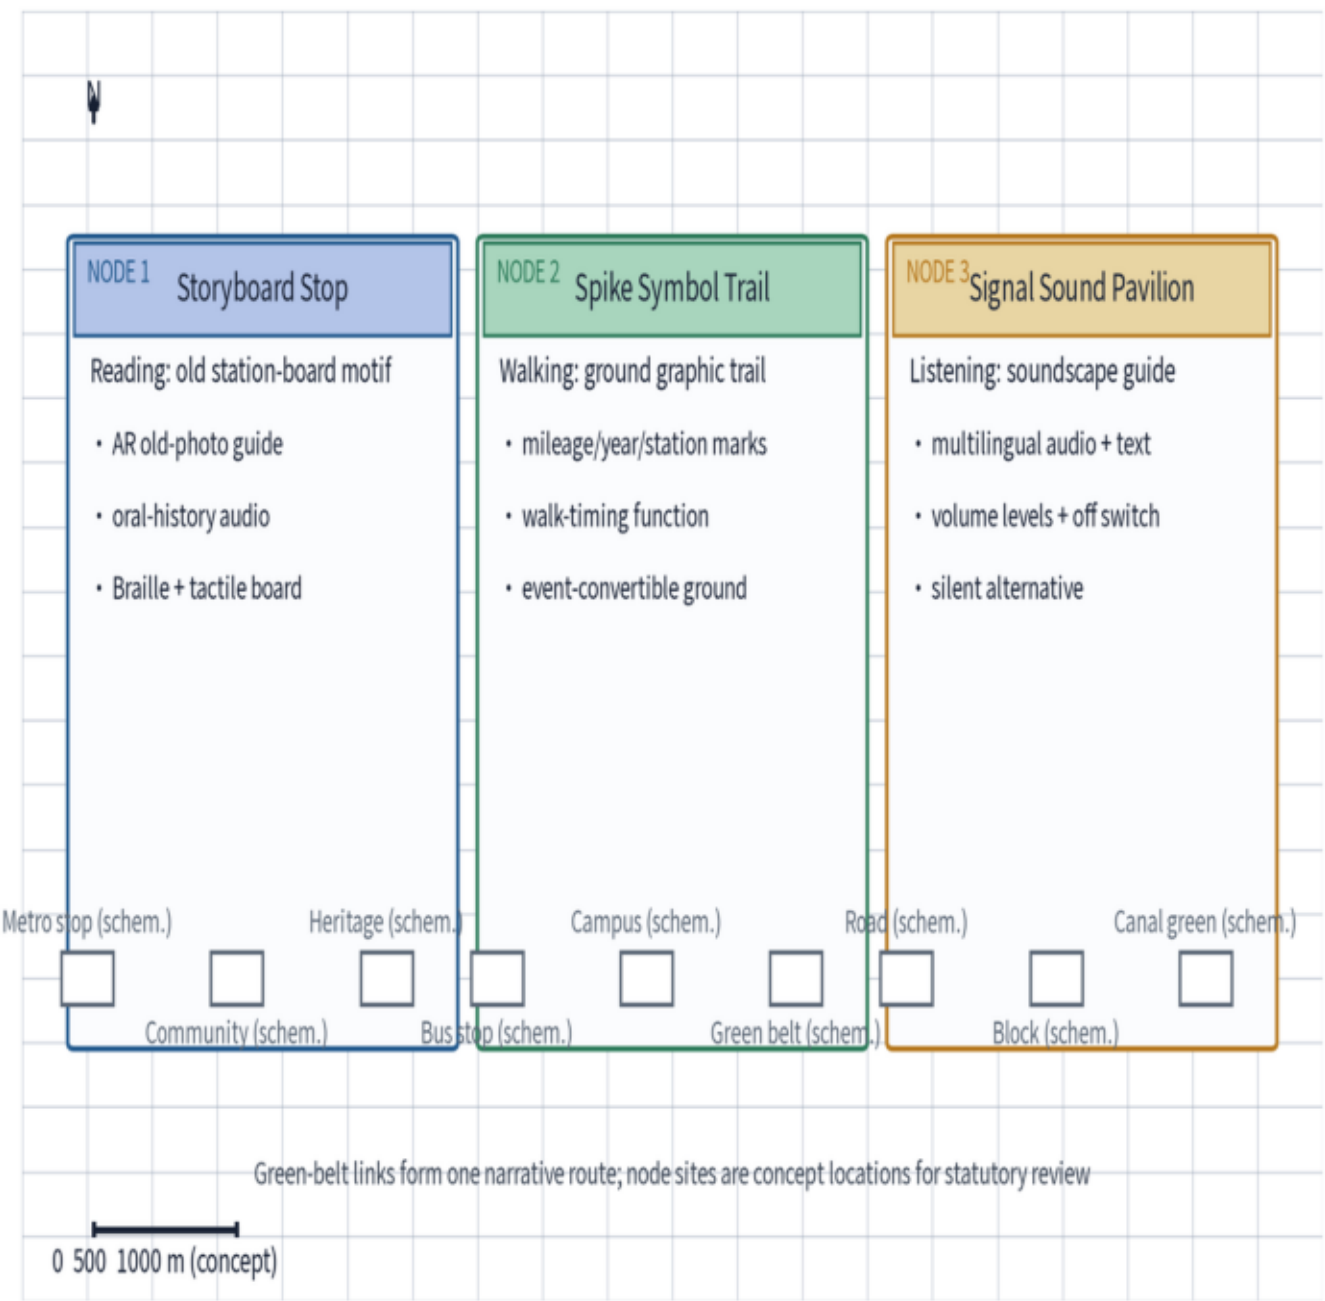

Overview and node index

Overall Overview: Narrative Wayfinding Belt and Corridor Relations (Concept)

Provisional - temporary conceptual boundary, not an official redline
Concept output: not for approval, engineering or precise-area use; recompute on official data

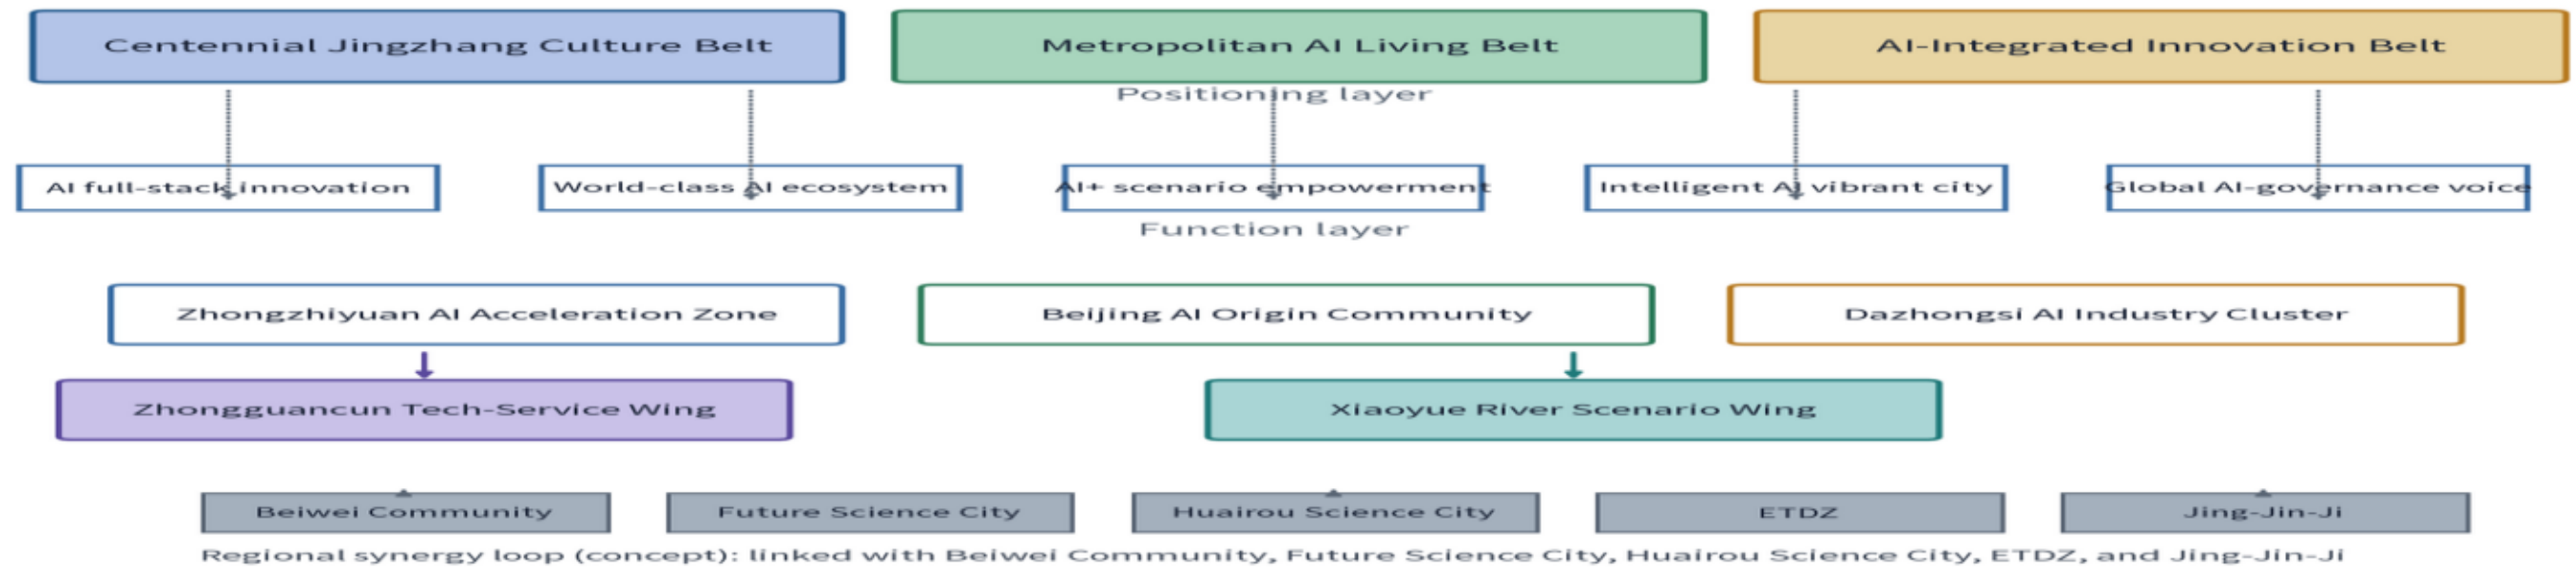

Key-Area Index: Three Nodes with Transit, Roads, Communities, Heritage (Concept)

Provisional - temporary conceptual boundary, not an official redline
Concept output: not for approval, engineering or precise-area use; recompute on official data

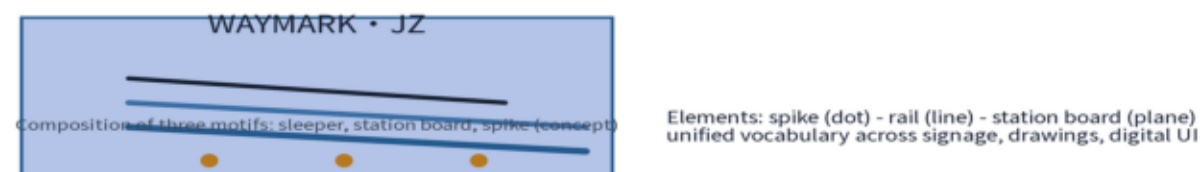

Strategy, brand and regional synergy

Three Positionings - Five Functions - Three Zones Two Wings Synergy Loop (Concept)

Provisional - temporary conceptual boundary, not an official redline
Concept output: not for approval, engineering or precise-area use; recompute on official data

Brand Identity & Visual System (Logo/VI): unified brand, internal codename

Primary palette (concept)

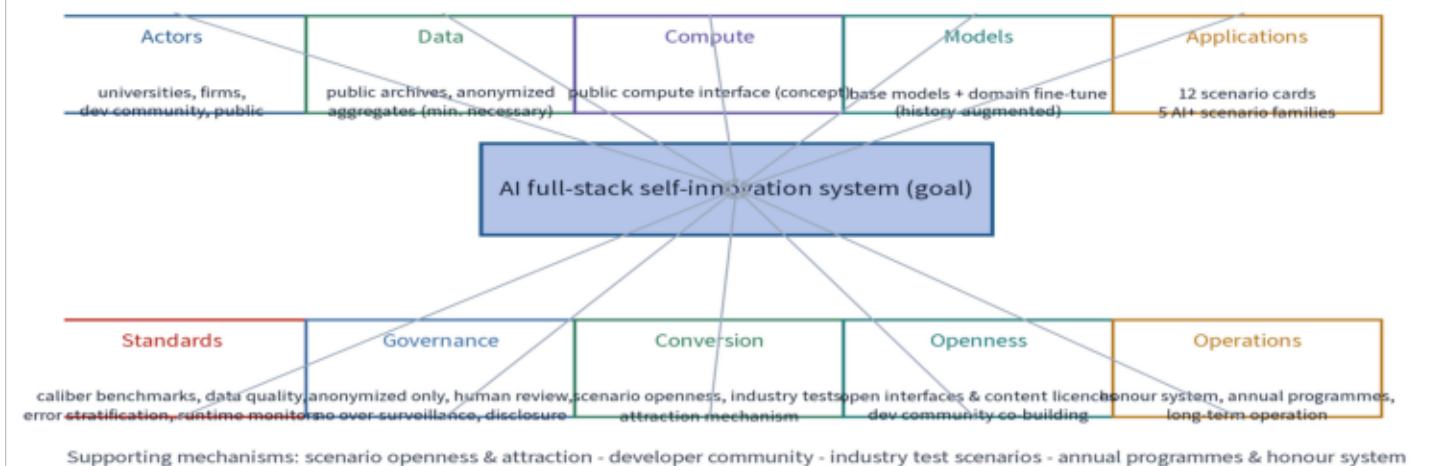

Usage boundary: no trademark search completed at concept stage; the name and mark are handled as an internal working codename - no external registration or commercial use until clearance.

Prohibited: never combine with any institution's mark, never imply government endorsement, never use where confusable with railway operations; minimum sizes in the future VI manual.

Provisional - temporary conceptual boundary, not an official redline
Concept output: not for approval, engineering or precise-area use; recompute on official data

AI Ecosystem Map: Full-Stack Elements, Openness, Dev Community, Attraction (Concept)

Provisional - temporary conceptual boundary, not an official redline
Concept output: not for approval, engineering or precise-area use; recompute on official data

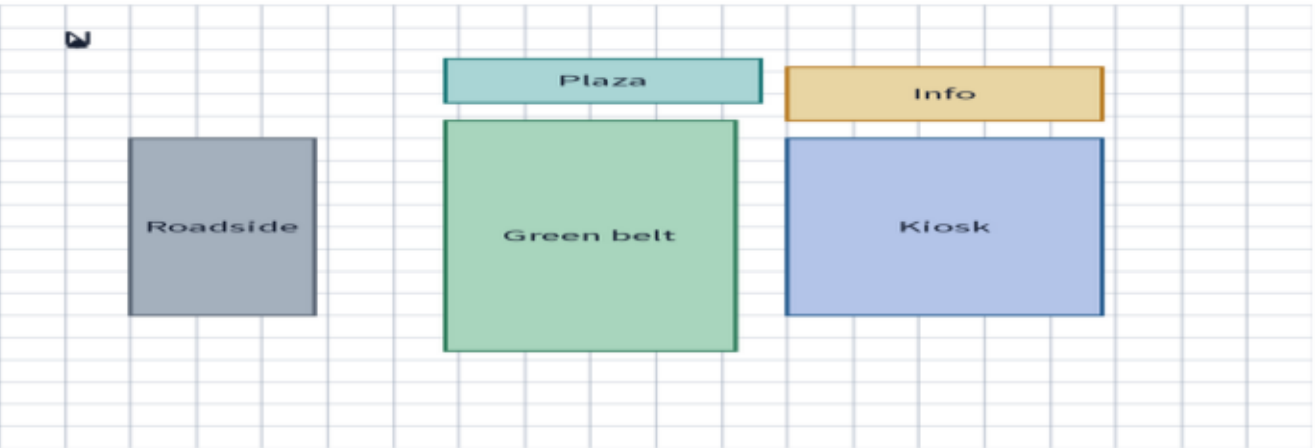

Three-node deepening

Storyboard Stop Deepening: Plan, Section, Accessible Route, View & Sound

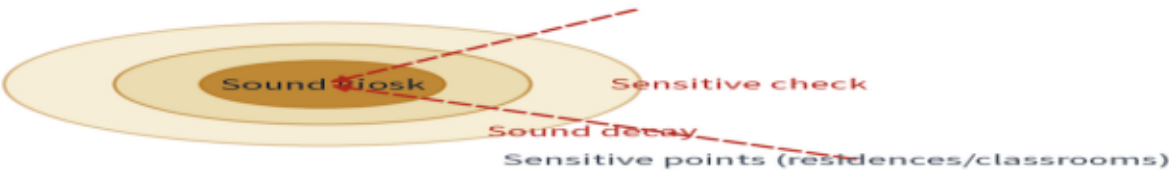

剖面 Section (schematic)

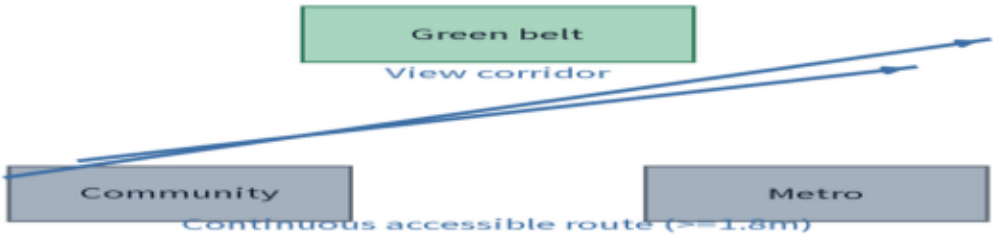

Plan

Sound & Visual Influence (concept)

Accessibility & Views

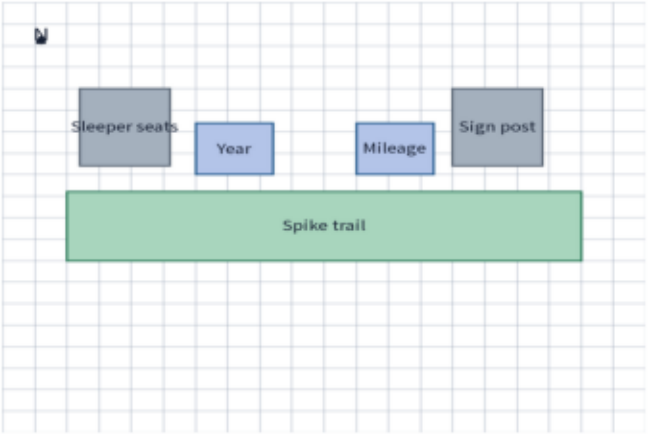

Provisional - temporary conceptual boundary, not an official redline
Concept output: not for approval, engineering or precise-area use; recompute on official data

Spike Symbol Trail Deepening: Plan, Section, Accessible Route, View & Sound

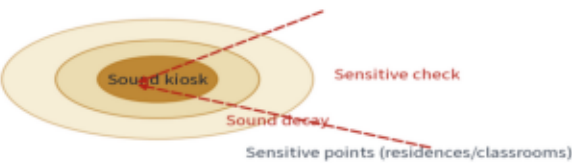

剖面 Section (schematic)

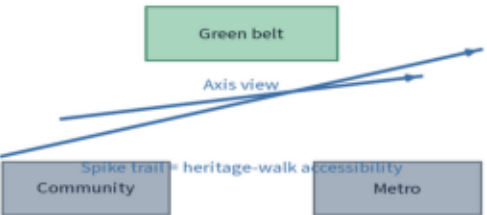

Plan

Sound & Visual Influence (concept)

Accessibility & Views

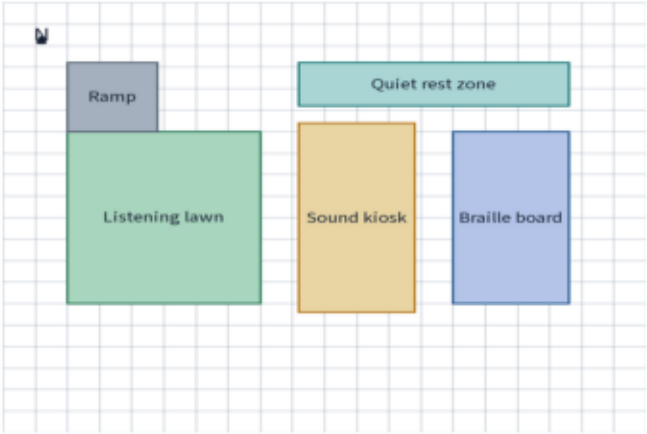

Provisional - temporary conceptual boundary, not an official redline
Concept output: not for approval, engineering or precise-area use; recompute on official data

Signal Sound Pavilion Deepening: Plan, Section, Accessible Route, View & Sound

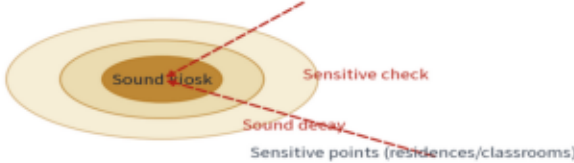

剖面 Section (schematic)

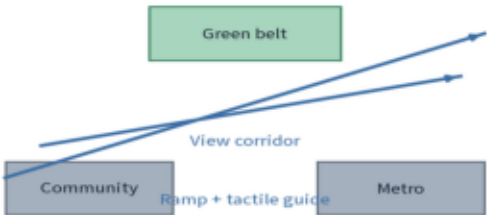

Plan

Sound & Visual Influence (concept)

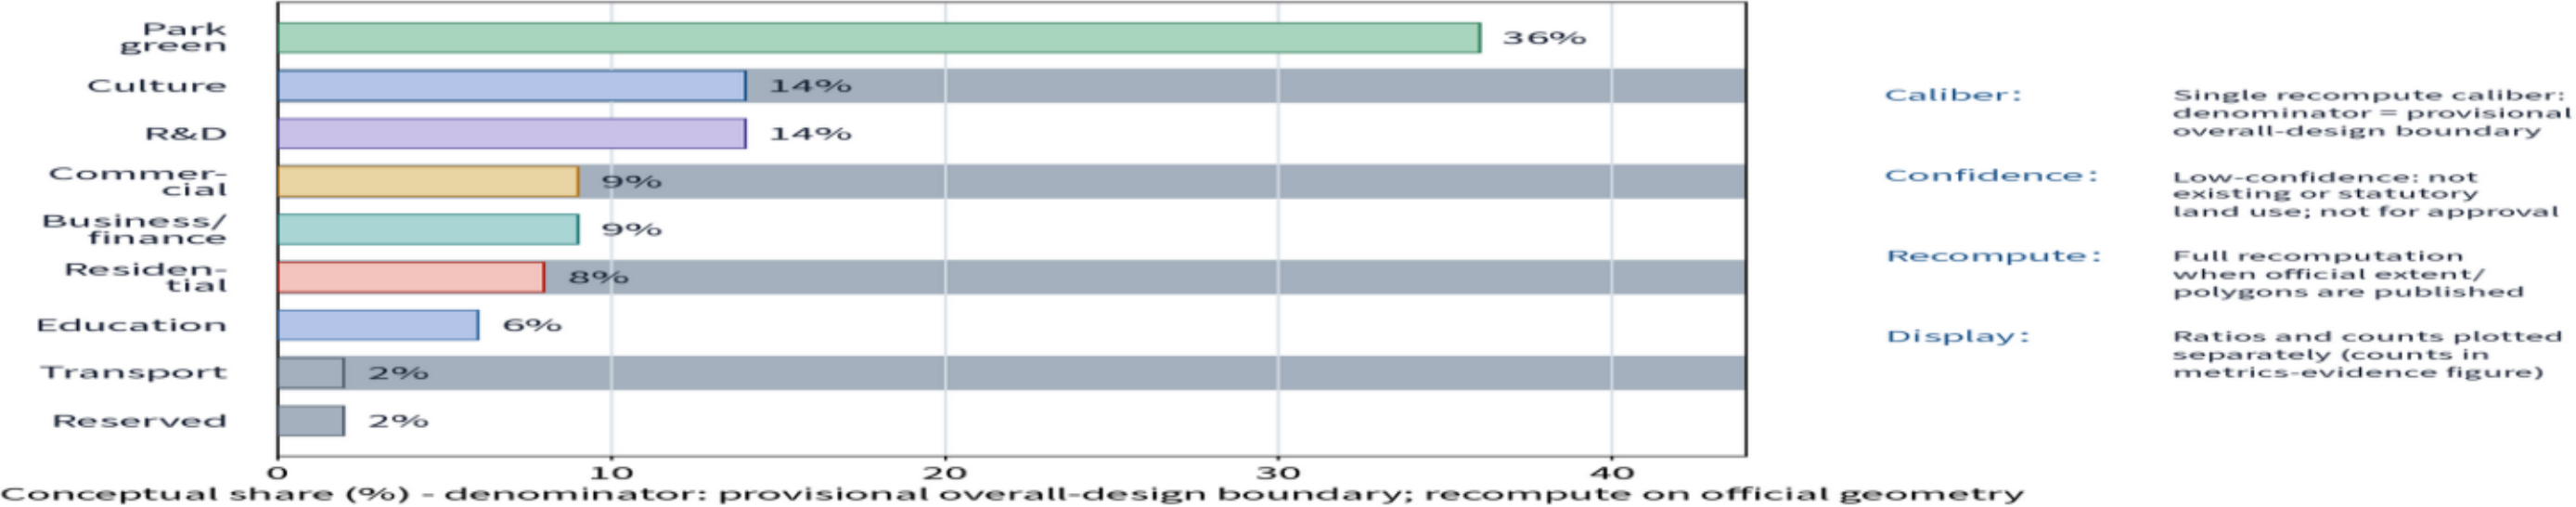

Accessibility & Views

Provisional - temporary conceptual boundary, not an official redline
Concept output: not for approval, engineering or precise-area use; recompute on official data

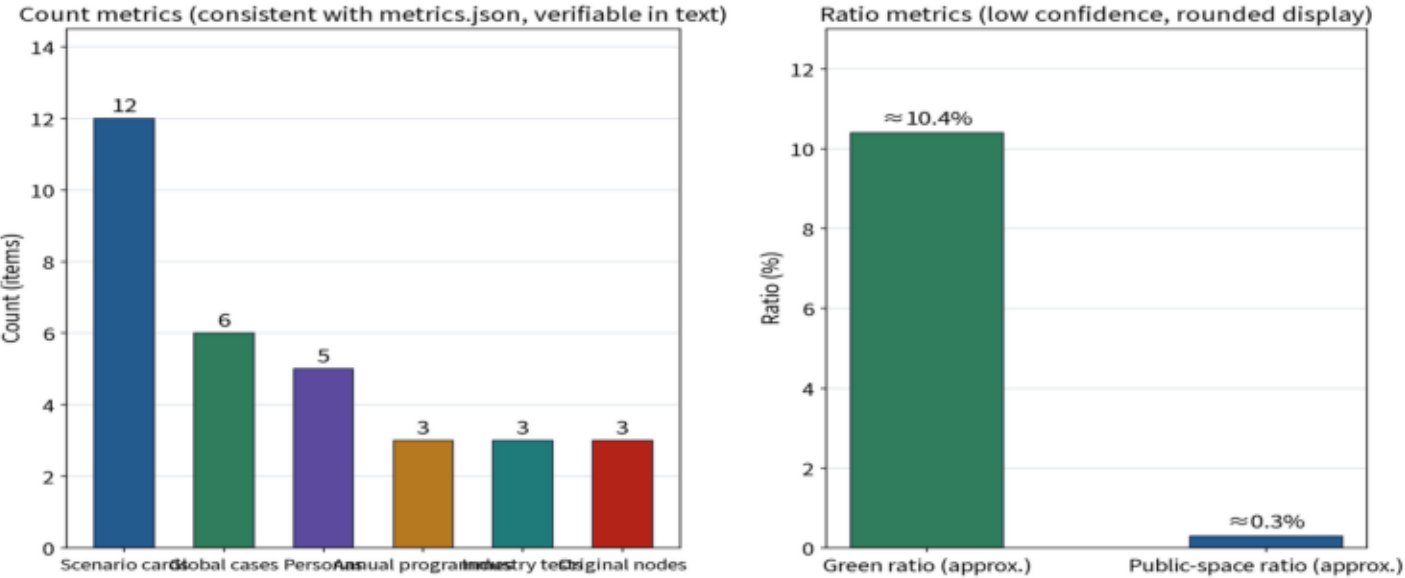

Land use, metrics and blue-green

Conceptual Land-Use Structure (not existing or statutory; relative magnitudes only)

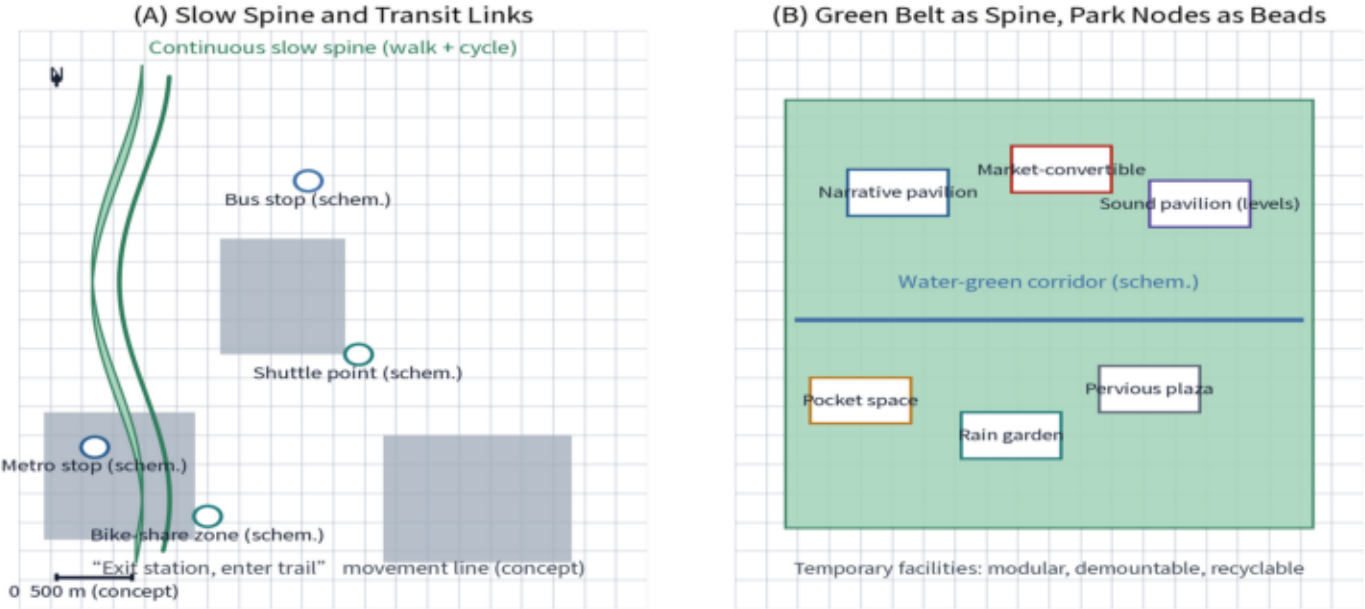

Provisional - temporary conceptual boundary, not an official redline
Concept output: not for approval, engineering or precise-area use; recompute on official data

Core Metric Evidence: counts and ratios plotted separately (ratios low-confidence)

Formula: green area / overall-design-area (provisional); recompute once official geometry is published; concept-scale validation only.
Provisional - temporary conceptual boundary, not an official redline
Concept output: not for approval, engineering or precise-area use; recompute on official data

Slow-Movement and Blue-Green Public Space System (Concept)

Provisional - temporary conceptual boundary, not an official redline
Concept output: not for approval, engineering or precise-area use; recompute on official data

Pilot matrix and phasing

Near-Term Pilot Execution Matrix (1-3 yrs; advisory permissions and KPIs)

Pilot	Roles	Permit deps.	Cost tier	Data boundary	Service level	Acceptance KPI	Public feedback	Exit condition
Storyboard Stop pilot kiosk	District lead; university, operator, volunteers	Site/heritage permit (concept)	Low	Anonymized aggregates only; on-device	Daily opening + staffed shifts	1 fact-check round in 30 days; weekly use > base line	Suggestion box + review; annual disclosure	On failed review/usage -> remove or convert
Spike Trail test segment	District transport/planning lead; subdistrict, community	Road-occupation permit (concept)	Low	Pavement symbols passive; no sensing	Weekly inspection + event sweeps	Sign integrity >=95%; timing accuracy >=90%	Subdistrict council + survey	Two seasons below service line -> deactivate
Signal Pavilion accessible kiosk	Disability/culture lead; accessibility experts, volunteers	Noise & facility permit (concept)	Medium	Audio cached locally; no personal profiles	Volume levels + quiet hours; offline	Braille/tactile integrity >=95%; >=4 languages	User tests incl. sensory-impaired	High complaint rate -> text-only board
Inspection + density pilot	Operator lead; district agencies, merchants	Device/data filing (concept)	Medium	Aggregate heatmap only; retention & access stated	Inspection loop <=24h; full human review	Response >=90%; false-alarm <=5%	Monthly disclosure + open audit	Re-identification risk -> halt and remove

Provisional - temporary conceptual boundary, not an official redline
Concept output: not for approval, engineering or precise-area use; recompute on official data

Five Personas x AI Scenario Mapping with Fallback Paths (Concept)

Primary scenario cards benefiting each persona (of 12)		
Morning Readers (academics)	S1 • S3 • S6	Fallback: paper/human
Midday Wanderers (park workers)	S2 • S1 • S8	Fallback: paper/human
Cross-language Travellers	S3 • S2 • S4	Fallback: paper/human
Weekend Families	S4 • S3 • S6	Fallback: paper/human
Rail Fans & City Walkers	S5 • S2 • S10	Fallback: paper/human

Braille, tactile, large-type and silent alternatives for all personas; offline + human fallback

Provisional - temporary conceptual boundary, not an official redline
Concept output: not for approval, engineering or precise-area use; recompute on official data

Inclusion & Verifiability

- Journey tests
Segments: elderly, children, wheelchair, sensory, cognitive
- Offline & silent
Offline cache, one-touch mute, silent text
- Rest interval
Seats/shelters at ~500 m concept spacing
- Feedback
Suggestion channel, appeal post, annual disclosure
- Representation
Co-creation quota by persona; rosters public
