

Logo / VI Concept • Centennial Platform

platform cut-line + station frame + rail rhythm; working codename, no trademark search completed

A

B • rail rhythm

steel blue • ochre red • moon white

Centennial Platform • 百年月台

Three nodes: L1 evidence · L2 public echo · L3 slow mobility

CONCEPT ONLY • PROVISIONAL GEOMETRY • NOT AN OFFICIAL REDLINE • RECOMPUTE WITH OFFICIAL DATA

One-Belt Concept Overview • Qinghuayuan Station Anchor

Three Districts–Two Wings + three nodes: a spatial/function/actor loop (concept)

Three positions: Centennial Jingzhang Culture • Urban AI Life Experience • AI Integration Innovation

Five functions: full-stack autonomy • global ecology • AI+ scenarios • active city • governance voice

N

concept north

L1 Memory Pod → L2 Echo Plaza → L3 Green Gallery: evidence → public echo → slow mobility; every step can be human-controlled/exited

CONCEPT ONLY • PROVISIONAL GEOMETRY • NOT AN OFFICIAL REDLINE • RECOMPUTE WITH OFFICIAL DATA

Three Key Nodes and Actor Loops

L1/L2/L3 are provisional concept locations, not built landmarks

space → function → actor → indicator

reversible capacity → public value → content/data/safety/maintenance ownership → continue, fix, archive or exit

The three AI cultural landmarks are concept roles, not permanent construction, official honors or partnerships

CONCEPT ONLY • PROVISIONAL GEOMETRY • NOT AN OFFICIAL REDLINE • RECOMPUTE WITH OFFICIAL DATA

Land-use and Function Structure • No statutory ratios

Concept function layer: colors discuss compatibility, not statutory use or development intensity

Culture + community

memory guide / reading / room
retain: verify first, low intervention

Innovation + testing

developers / T1–T3 / prototypes
renovate: reversible, maintainable

Daily service + blue-green

mobility / rest / maintenance
demolish: only study after review

Unified loop

official boundary/ownership/heritage → compatible function → reversible space → operation → recalculation → continue/change/exit

Not provided: FAR • height • building scale • road redline • engineering capacity

[data:geometry/land_use.geojson] • [metric:site_area_sqm] • [metric:green_ratio] • [metric:public_space_ratio]

CONCEPT ONLY • PROVISIONAL GEOMETRY • NOT AN OFFICIAL REDLINE • RECOMPUTE WITH OFFICIAL DATA

Slow Mobility, Blue-Green and Public-Service Interfaces

Survey obstacles first, then choose paper/subtitle/audio/tactile/staff alternatives

heritage memory — station-front public space — slow green gallery (concept sequence)

Segment obstacle checklist

- ☐ level change / break / obstruction
- ☐ light / seating / toilet
- ☐ crossing / tactile / Braille
- ☐ subtitle / audio / staff escort

AI and safety boundary

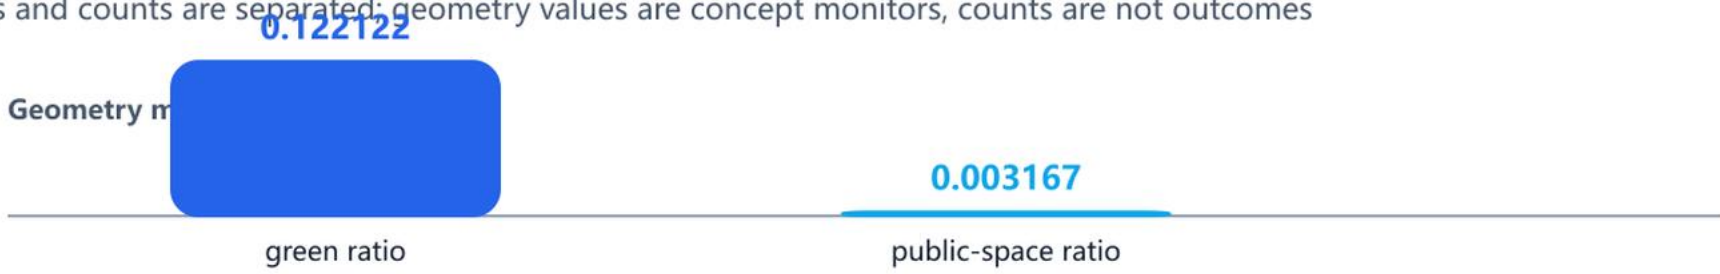

- aggregate flow/queue aid only
- no screening · ID · tracking
- human review for key decisions
- threshold: downgrade / retime / stop

Interfaces only: mobile light, temporary power, concept rain gardens, toilet wayfinding, emergency announcements; no capacity or engineering claim

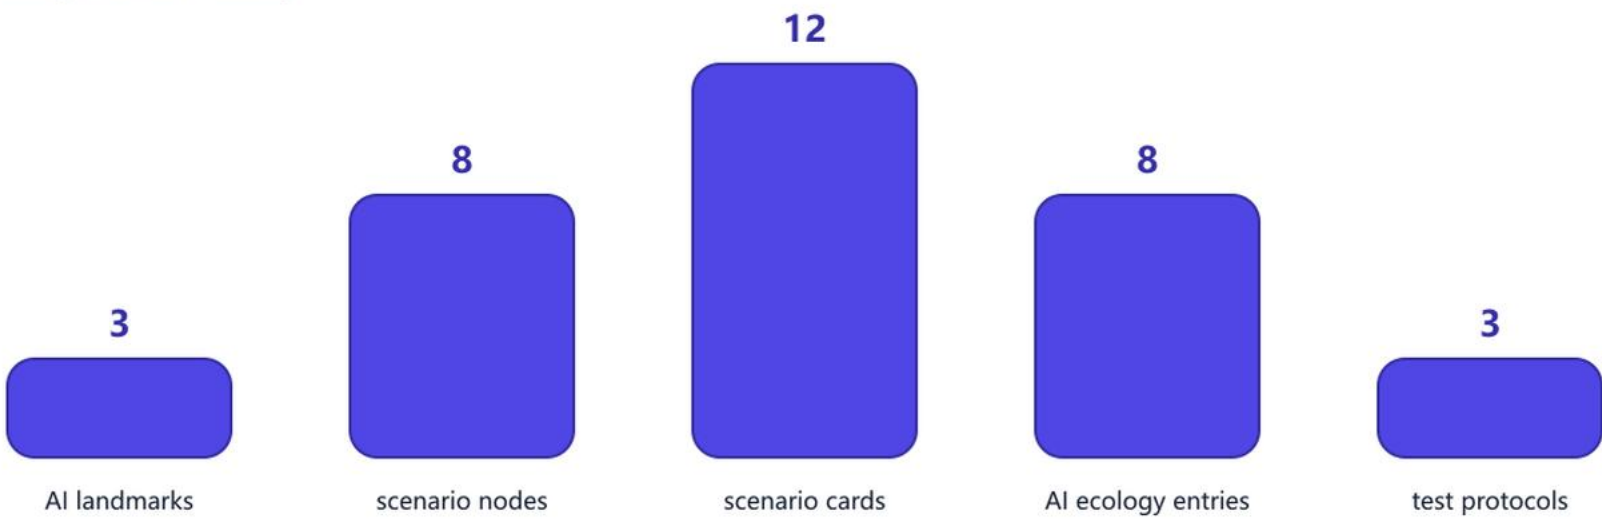

CONCEPT ONLY • PROVISIONAL GEOMETRY • NOT AN OFFICIAL REDLINE • RECOMPUTE WITH OFFICIAL DATA

Metric Evidence Layers • Provisional Recalculation

Ratios and counts are separated; geometry values are concept monitors, counts are not outcomes

Package counts (concept)

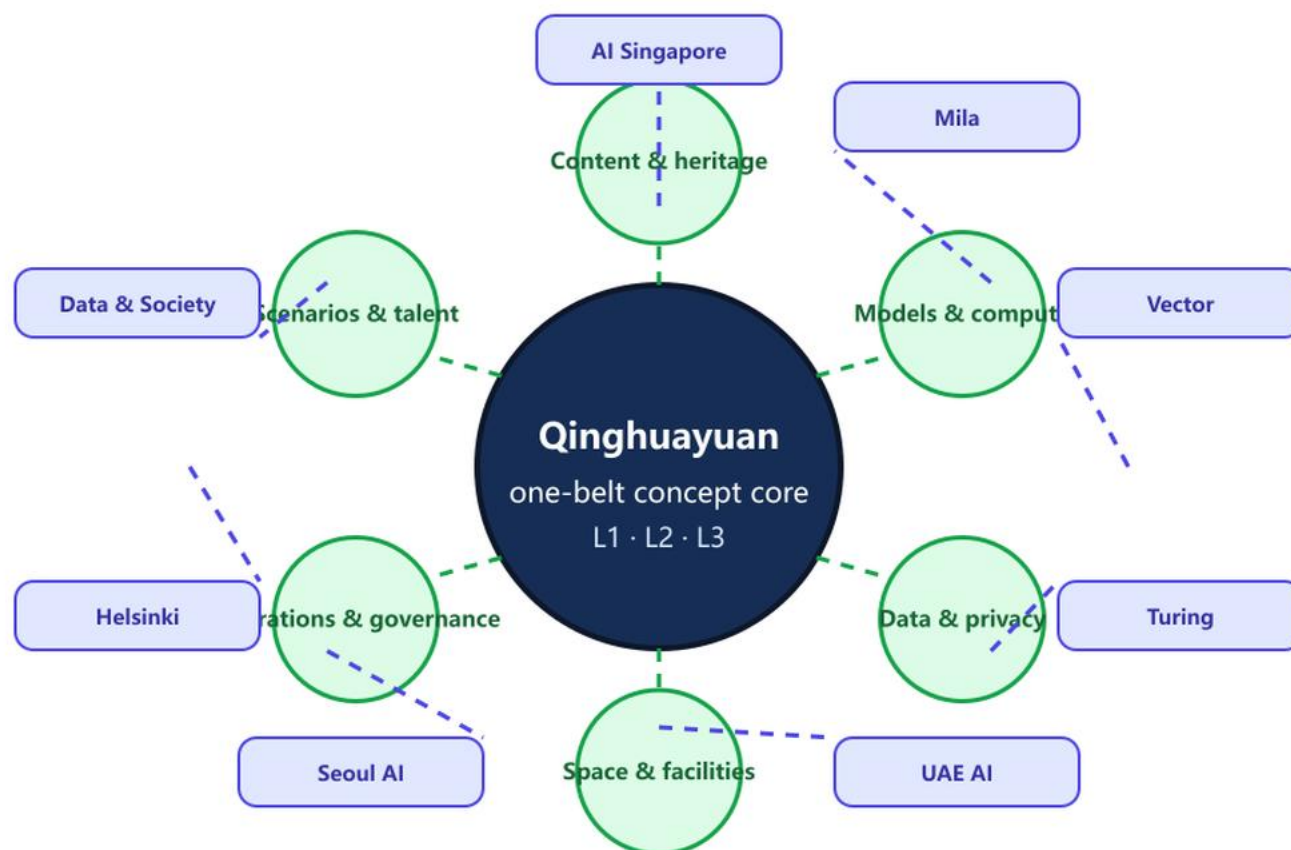

site_area_sqm = 11,412,825.386 • green_space_area_sqm = 1,393,756.159 • public_space_area_sqm = 36,150 (all provisional)

CONCEPT ONLY • PROVISIONAL GEOMETRY • NOT AN OFFICIAL REDLINE • RECOMPUTE WITH OFFICIAL DATA

AI Ecology Map • Six Capability Layers + Verification Queue

Eight global entries are research queues only; no performance, partnership, ranking or rights claim

External coordination separately listed: Beiwei • Future Science City • Huairou • E-Town • Beijing–Tianjin–Hebei (all to verify)

CONCEPT ONLY • PROVISIONAL GEOMETRY • NOT AN OFFICIAL REDLINE • RECOMPUTE WITH OFFICIAL DATA
