

GLORY • JZ — The Honor Belt

The Honor Belt — River of Merits

概念建议 • 参考方案 • provisional 边界 • 官方数据发布后复算

Key Area Detailed Design

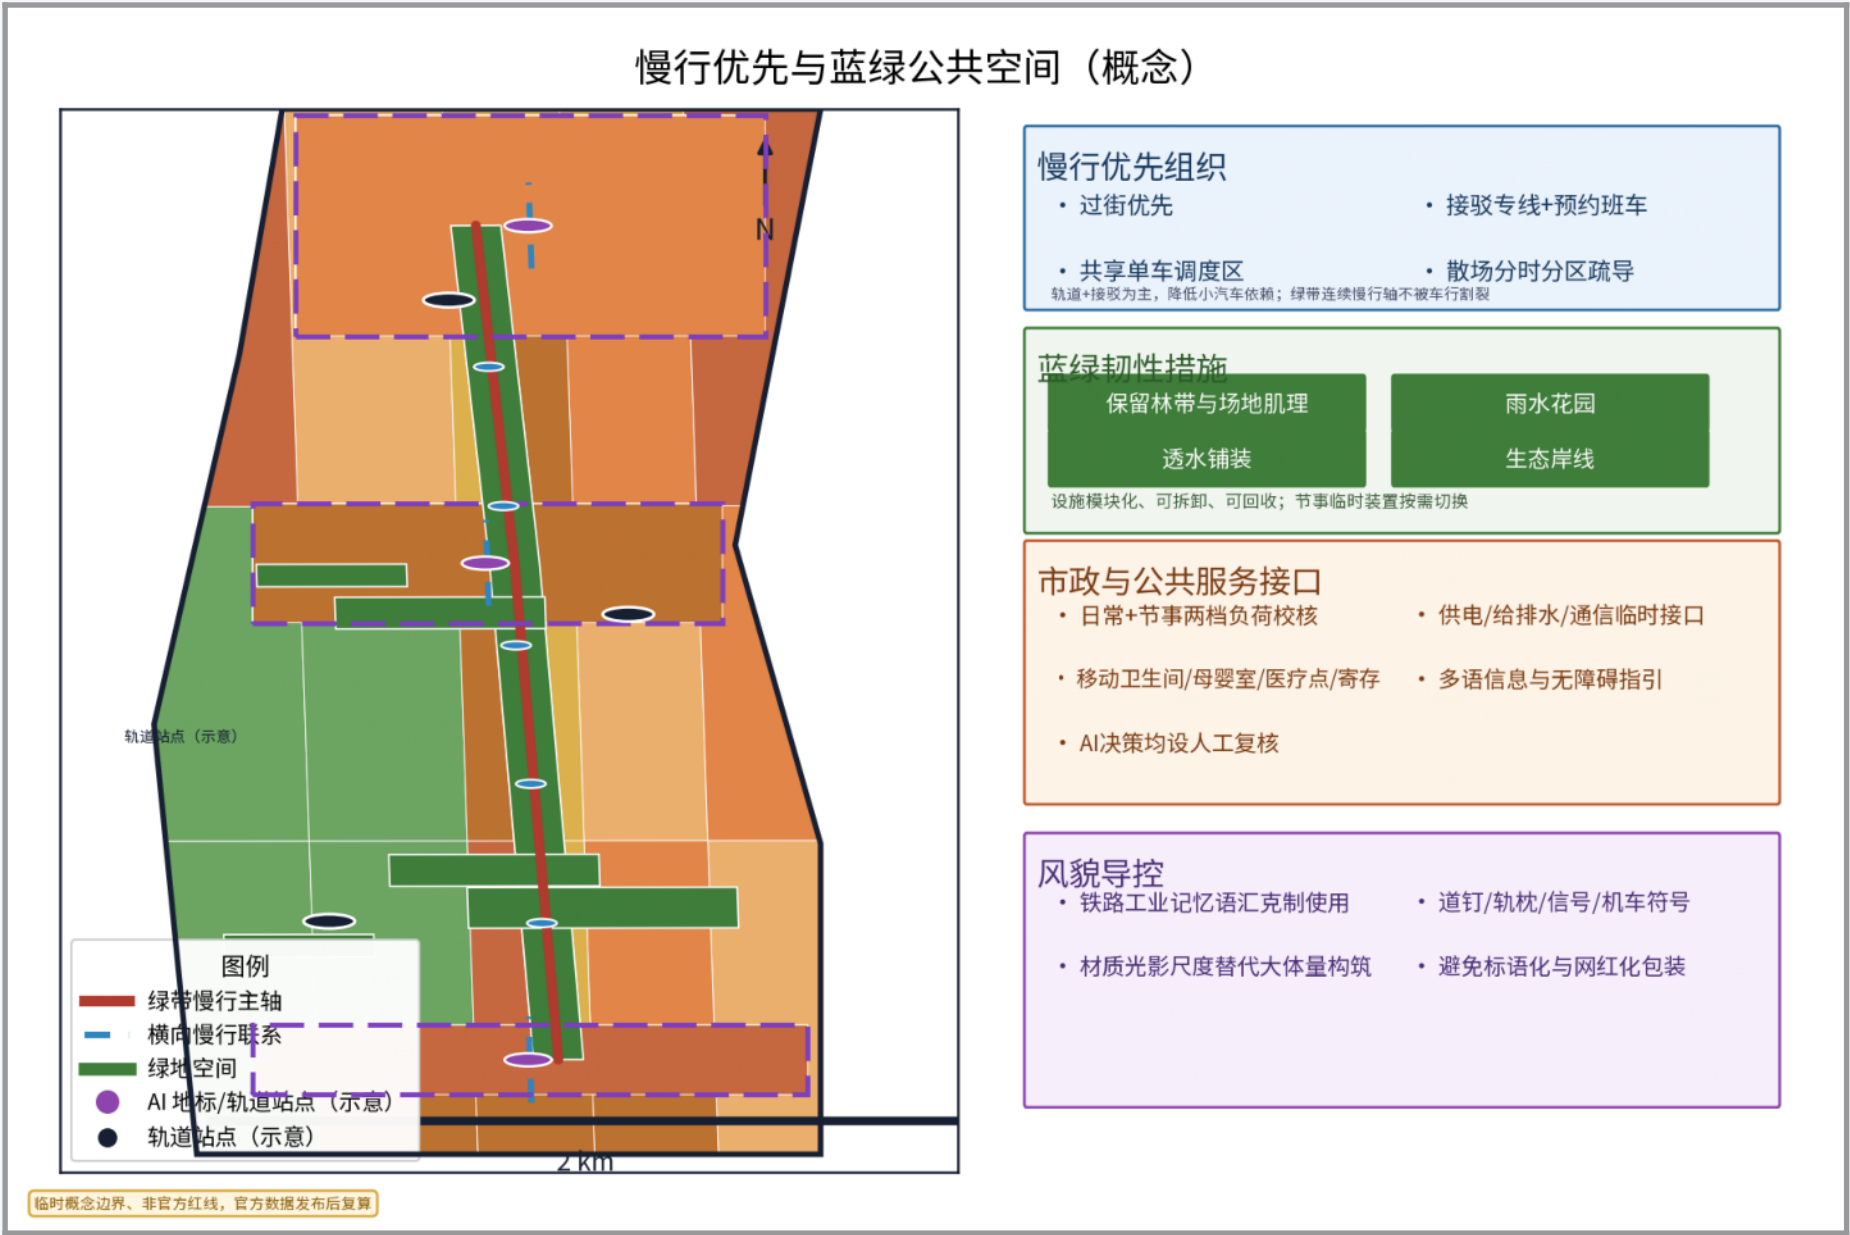

One belt, three gardens: Glory Gallery (modular honor display), Milestone Plaza

Each node reserves AI interfaces and accessible routes; interfaces = rail station /

Component library: modular, reversible, reusable; daily leisure vs event mode o

Slow-Traffic First & Blue-Green Network

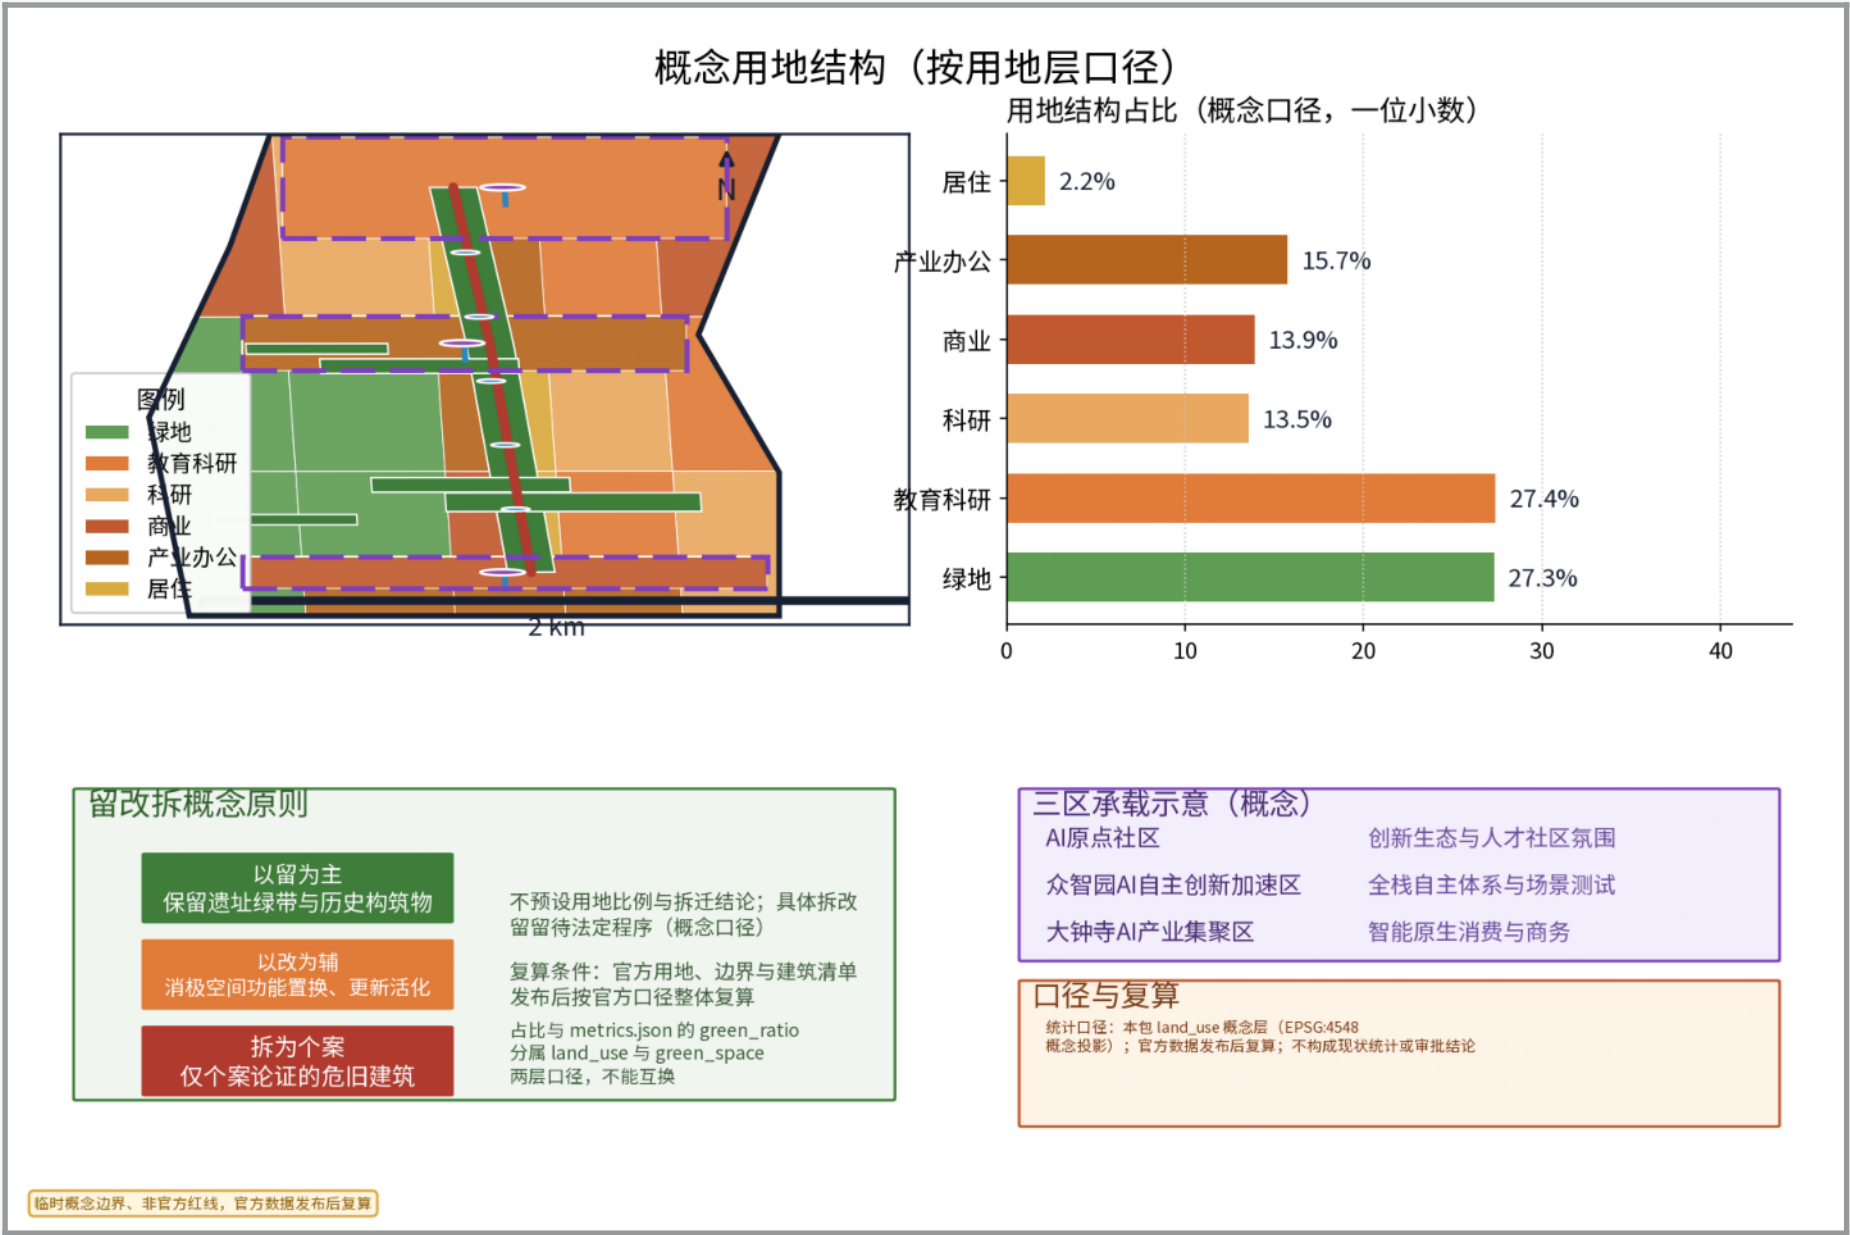

Slow traffic first: continuous green-belt axis linking nodes and rail stations; even

Blue-green resilience: retain tree belts and fabric, rain gardens, permeable pavin

Character: restrained railway-industrial vocabulary (spikes/sleepers/signals/loc

Land-Use Mix & Core Metrics

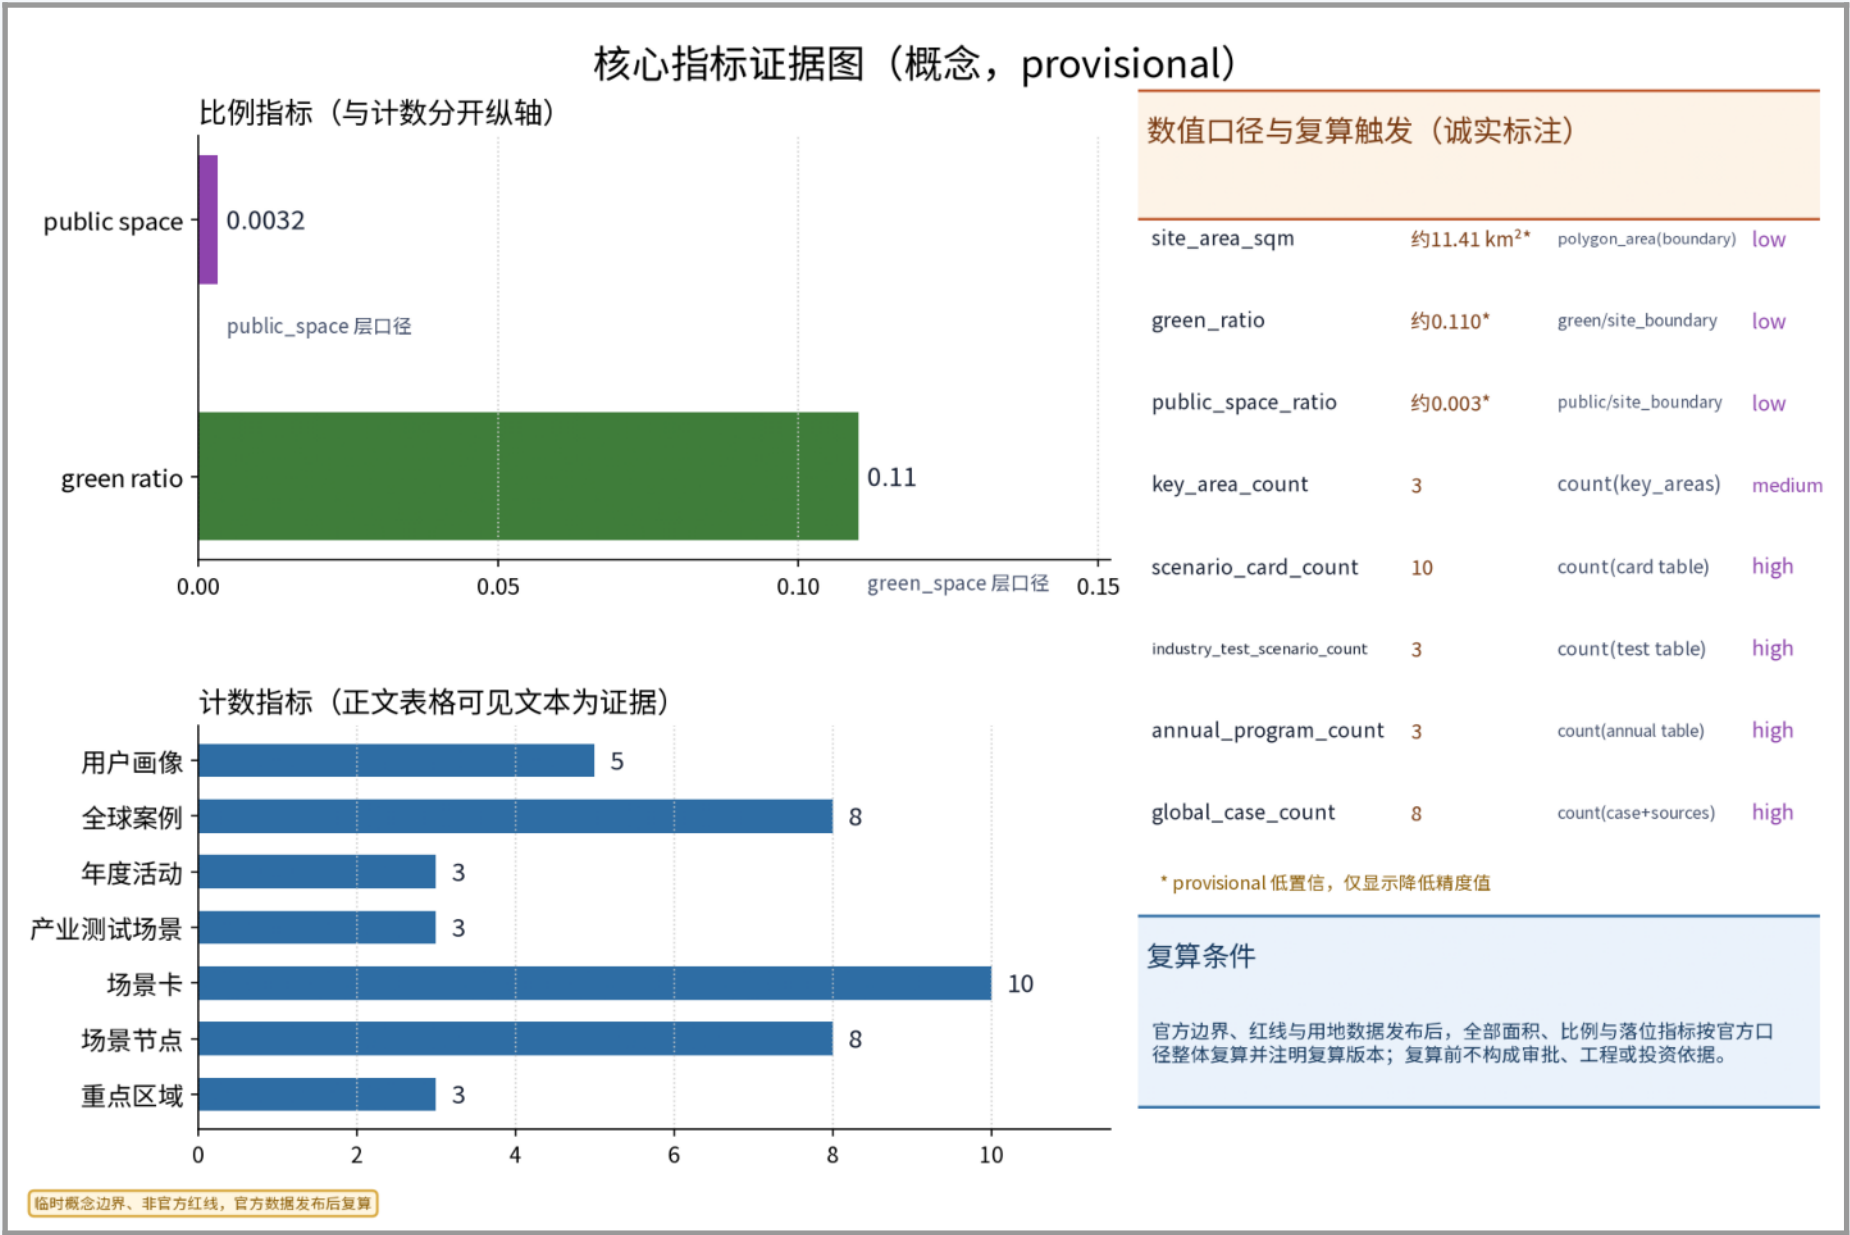

Retain-renovate-demolish concept: retain first (heritage green belt, stations, ind

No preset land ratios or demolition conclusions; shares differ from green_ratio i

Recompute: after official land, boundary and building inventories are published

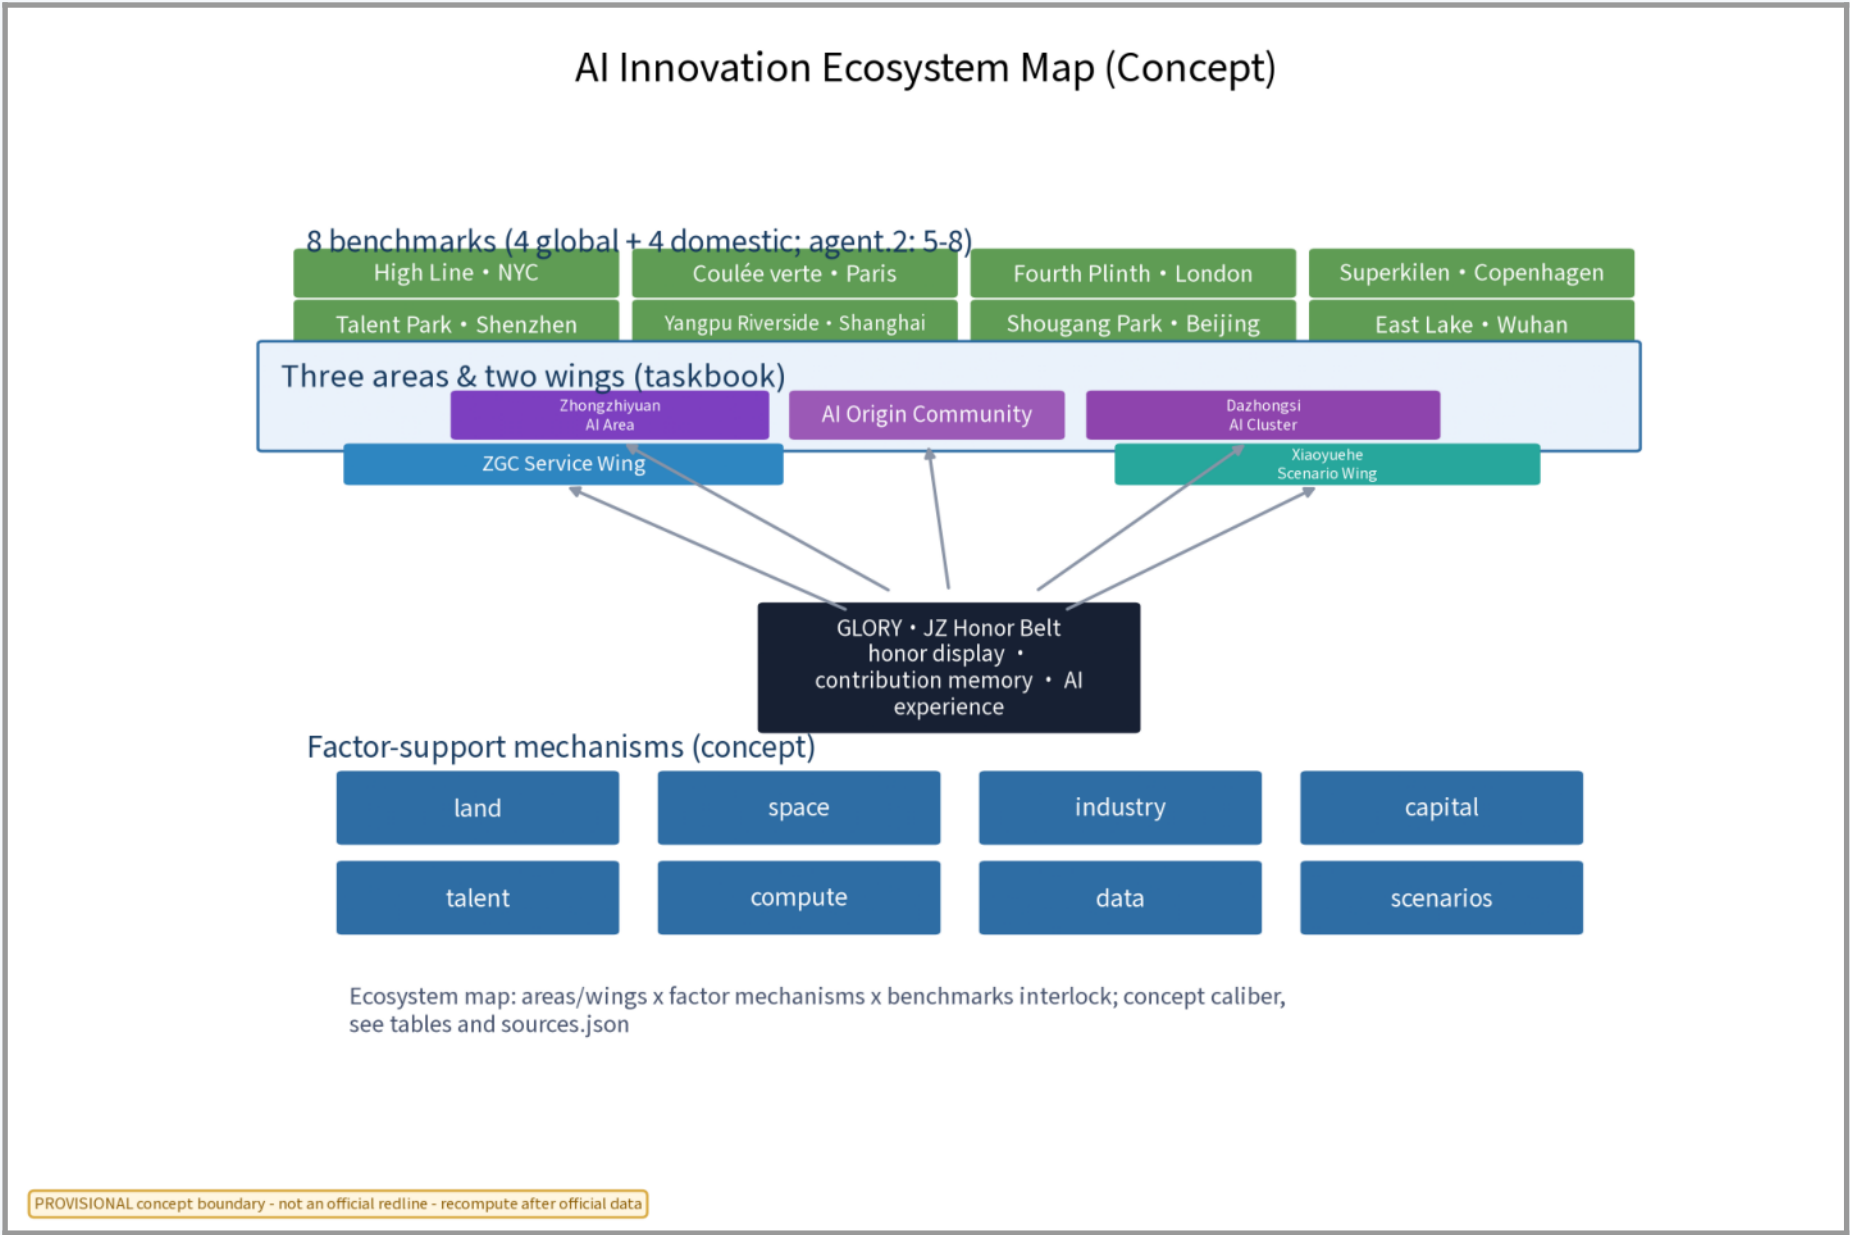

核心指标证据

Core metrics (concept, provisional): site_area_sqm~11.41km², green_ratio~0.11

Source/formula/confidence for every metric in metrics.json; recompute and ver

AI 创新生态图谱与治理

AI governance (three sentences): anonymized aggregation only, key decisions human

3 industry test-verification scenarios: curation de-dup benchmark, multilingual voice

Concept suggestion & reference only; not an approval basis; no conclusive FAR/heig

Three-level official scopes

Coordinated research area ~43.6 km²

Overall design area ~11.4 km²

Key areas ~368.4 ha

Three areas & two wings: AI Origin Community / Zhongzhiyuan AI Acceleration Area / Dazhongsi AI Industry Cluster; Zhongguancun Tech Service Wing / Xiaoyuehe Scenario Wing

Regional synergy (concept): Beiwei Community (int'l living); Future Science City (R&D/test); Huairou Science City (basic research); Beijing E-Town (manufacturing); Jing-Jin-Ji (Jingzhang corridor)
