

The Jingzhang Rings · Urban Design

A 9.7 km technology-history axis and a 6.4 km improvement-reach ecological axis (6.2 km drawn) hold the Eight Great Colleges and Zhongguancun between them

The Jingzhang Rings · Land use and metric recomputation

Land use is a strict partition of the site: no gaps, no overlaps, areas recomputable

A · Recomputed from submitted geometry

A · Recomputed from submitted geometry

site_area_sqm	11,412,825.386 sqm
PROVISIONAL_REPOSITORY boundary · EPSG:4548	
green_space_area_sqm	2,463,013.830 sqm
union of green_space.geojson	
public_space_area_sqm	1,203,476.584 sqm
union of public_space.geojson	
building_footprint_area_sqm	15,855.006 sqm
37 new conceptual volumes	
green_ratio	0.2158 ratio
green/site, not a statutory figure	
public_space_ratio	0.1054 ratio
public space/site	

C · Unknowns: left blank on purpose

- floor_area_ratio — regulatory controls missing, existing building stock unknown
- Height / density / setback / demolition / investment — conceptual advice only

B · Evidence chain: every number traces to a file

geometry/site_boundary.geojson	PROV-SITE-001	provisional repository boundary · EPSG:4548
geometry/green_space.geojson	49 feats	EPSG:4548
geometry/public_space.geojson	145 feats	EPSG:4548
geometry/buildings.geojson	37 feats	EPSG:4548
geometry/land_use.geojson	223 feats	strict partition
metrics.json	status=known	same partition

Illustrative curves, mechanism only, not observed data, not for trend inference
