Three-Level Scope & Land Use

JING-ZHANG RESONANCE BELT · ■■■■■ · b-cooney

Coordinated ~43.6 km², overall design ~11.4 km², key areas ~368.4 ha (three).
Gap-free land-use partition (coverage ~1.0): green spine centered, functions along edges.

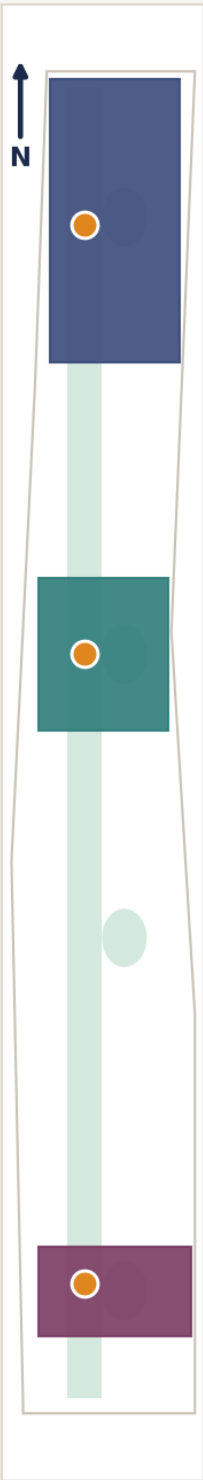

Detailed Design of Key Areas

JING-ZHANG RESONANCE BELT · ■■■■■ · b-cooney

Detailed Design of Key Areas

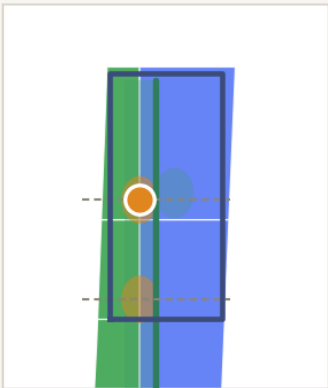

Each area zoomed to show land use, green spine, Resonance Node and slow-mobility (clipped from submitted geometry)

Context

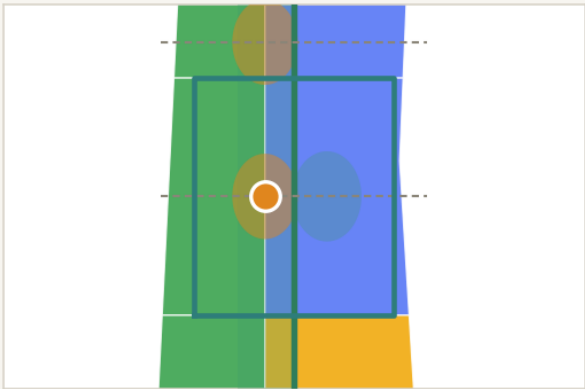

Prelude

Full-stack innovation · standards · low-carbon exchange

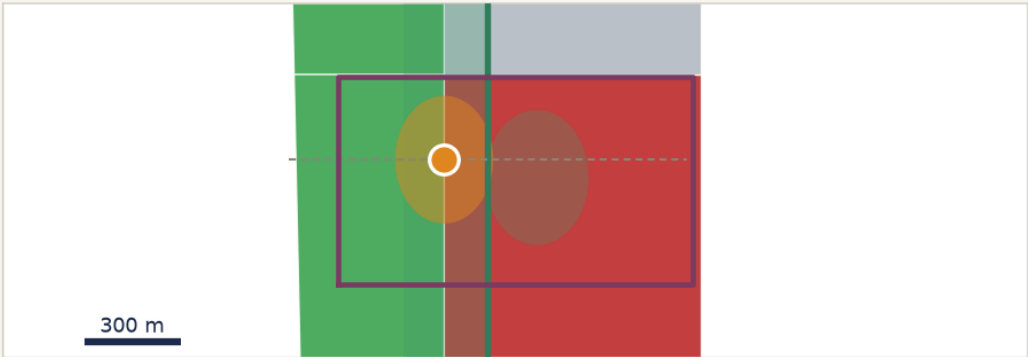

Chorus

Youth night commons · open-source · near-campus

Coda

Transit calm soundscape · 4-quadrant links · roadshow

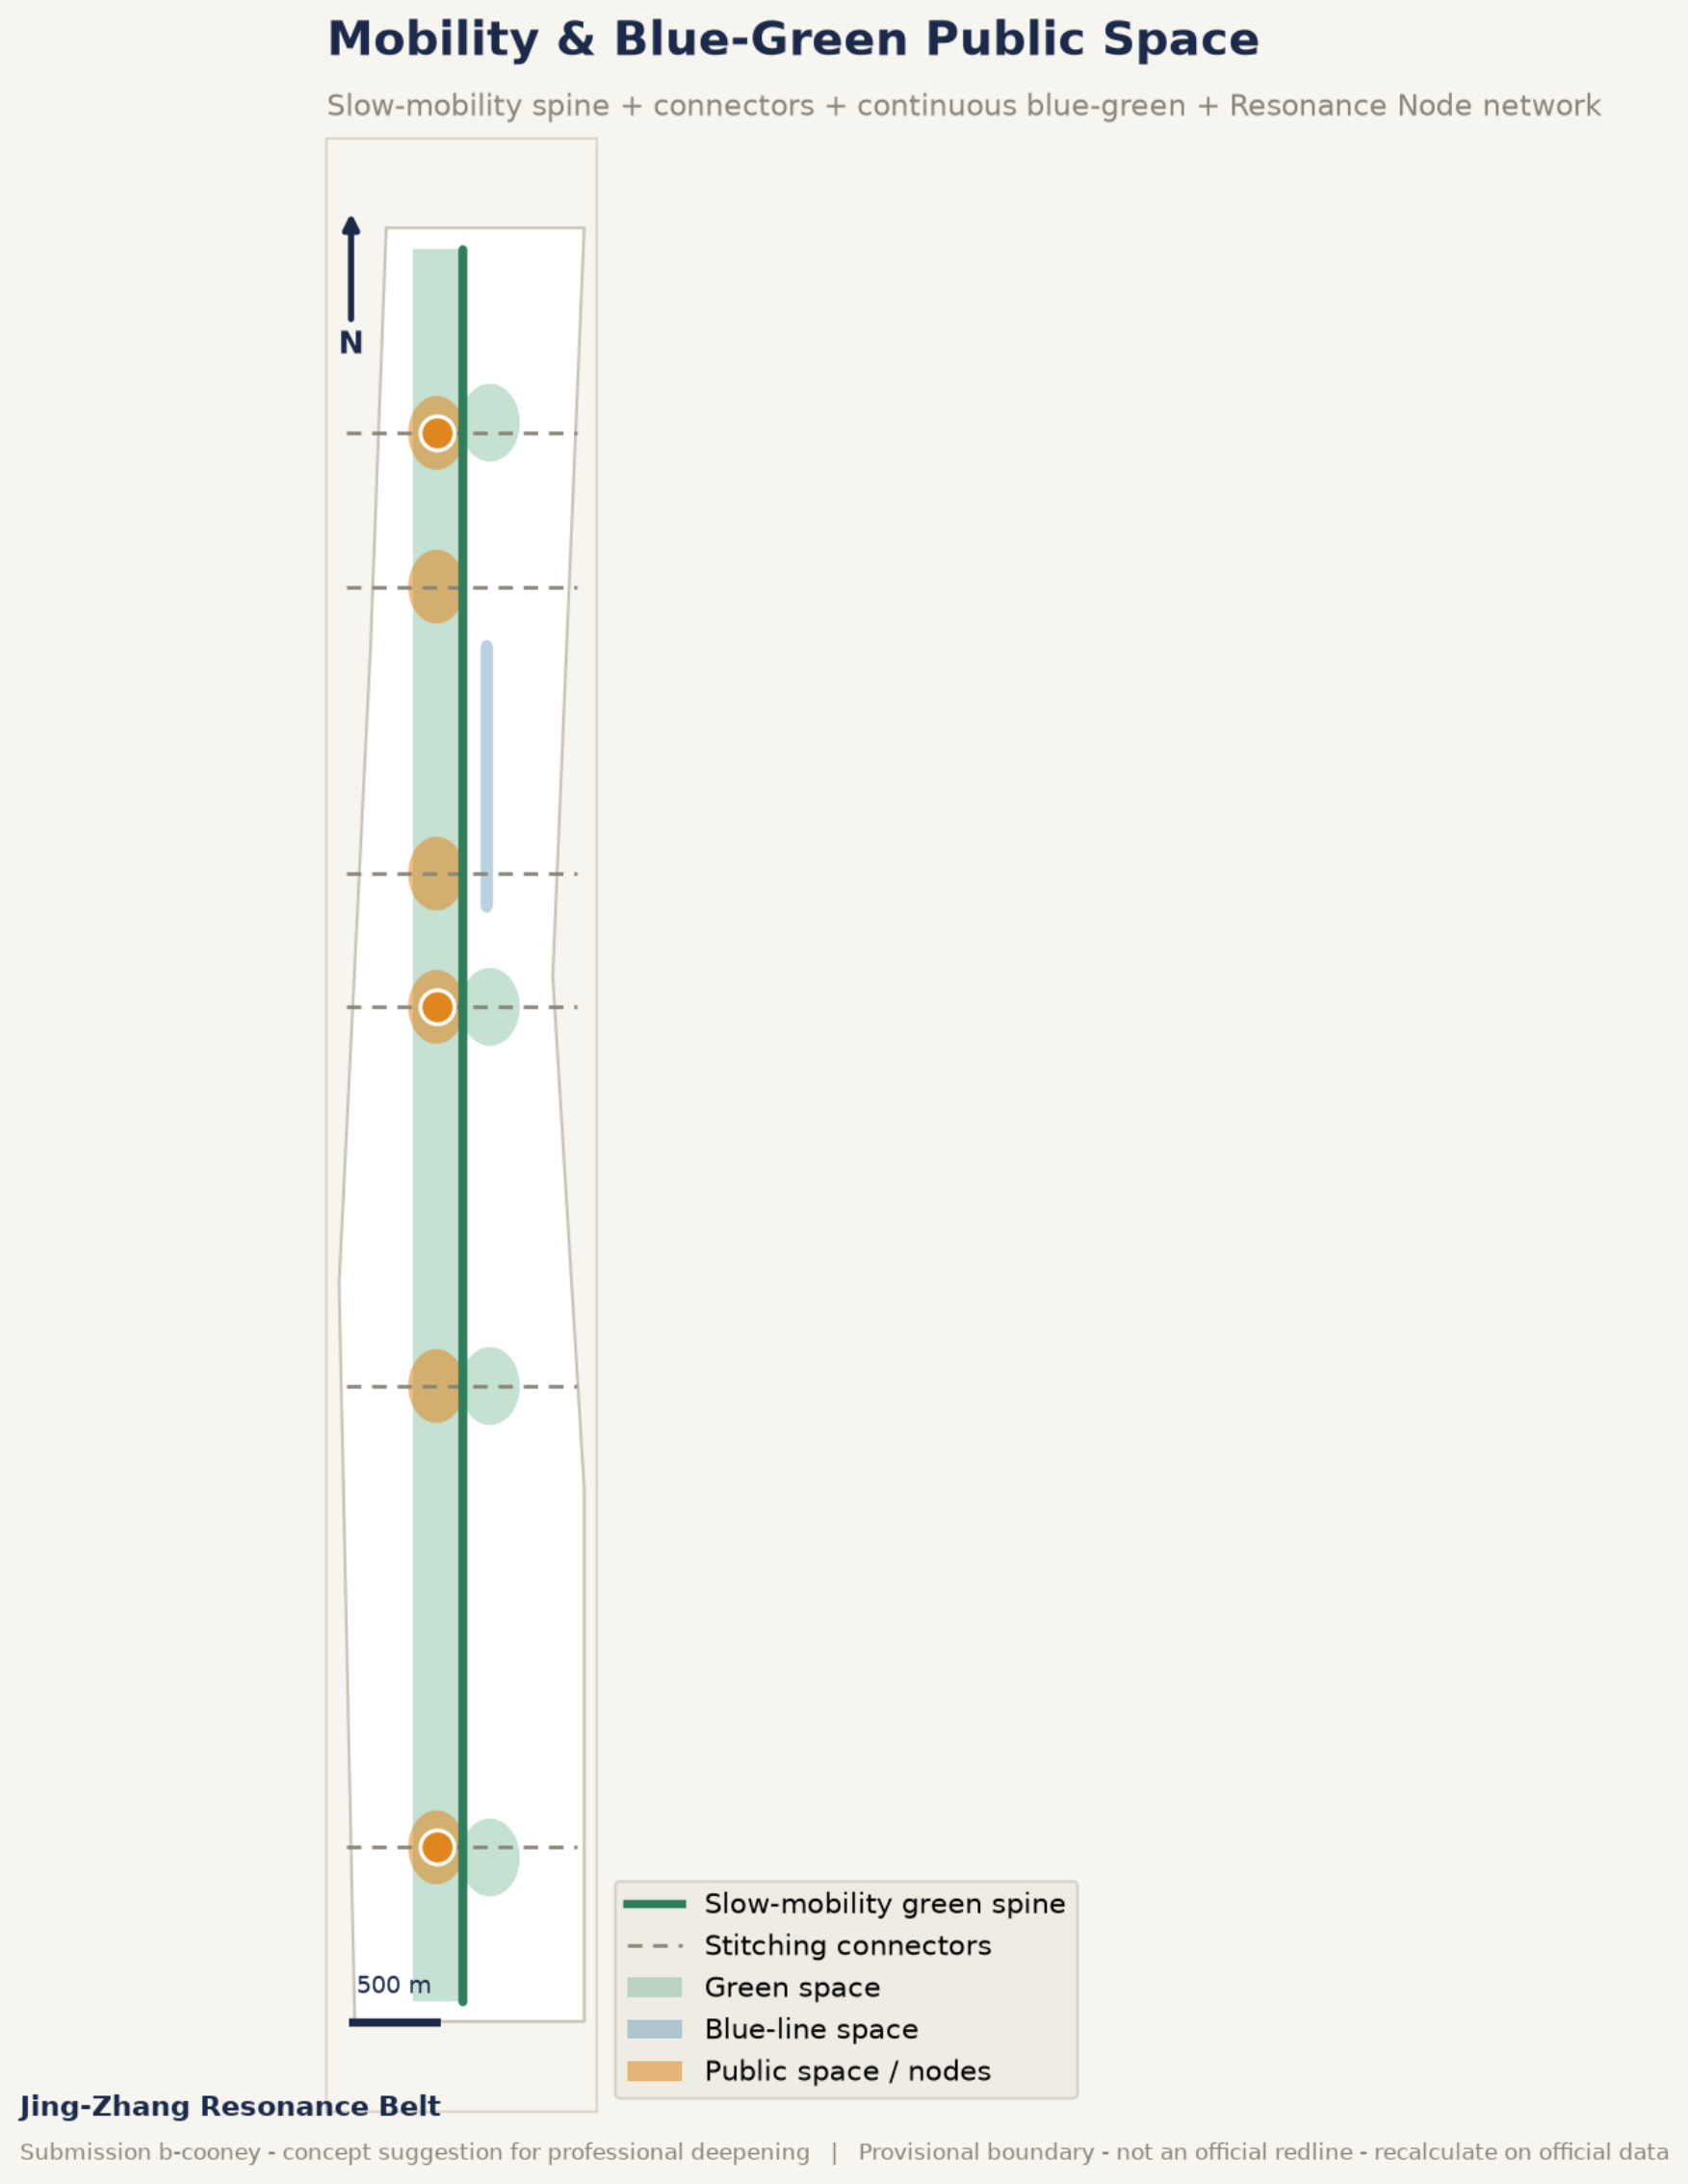

Jing-Zhang Resonance Belt

Submission b-cooney - concept suggestion for professional deepening | Provisional boundary - not an official redline - recalculate on official data

Zhongzhiyuan · Prelude (full-stack innovation / standards / low-carbon exchange)
AI Origin Community · Chorus (youth night commons / open-source / near-campus)
Dazhongsi · Coda (transit calm soundscape / 4-quadrant links / roadshow)

Mobility & Blue-Green Public Space

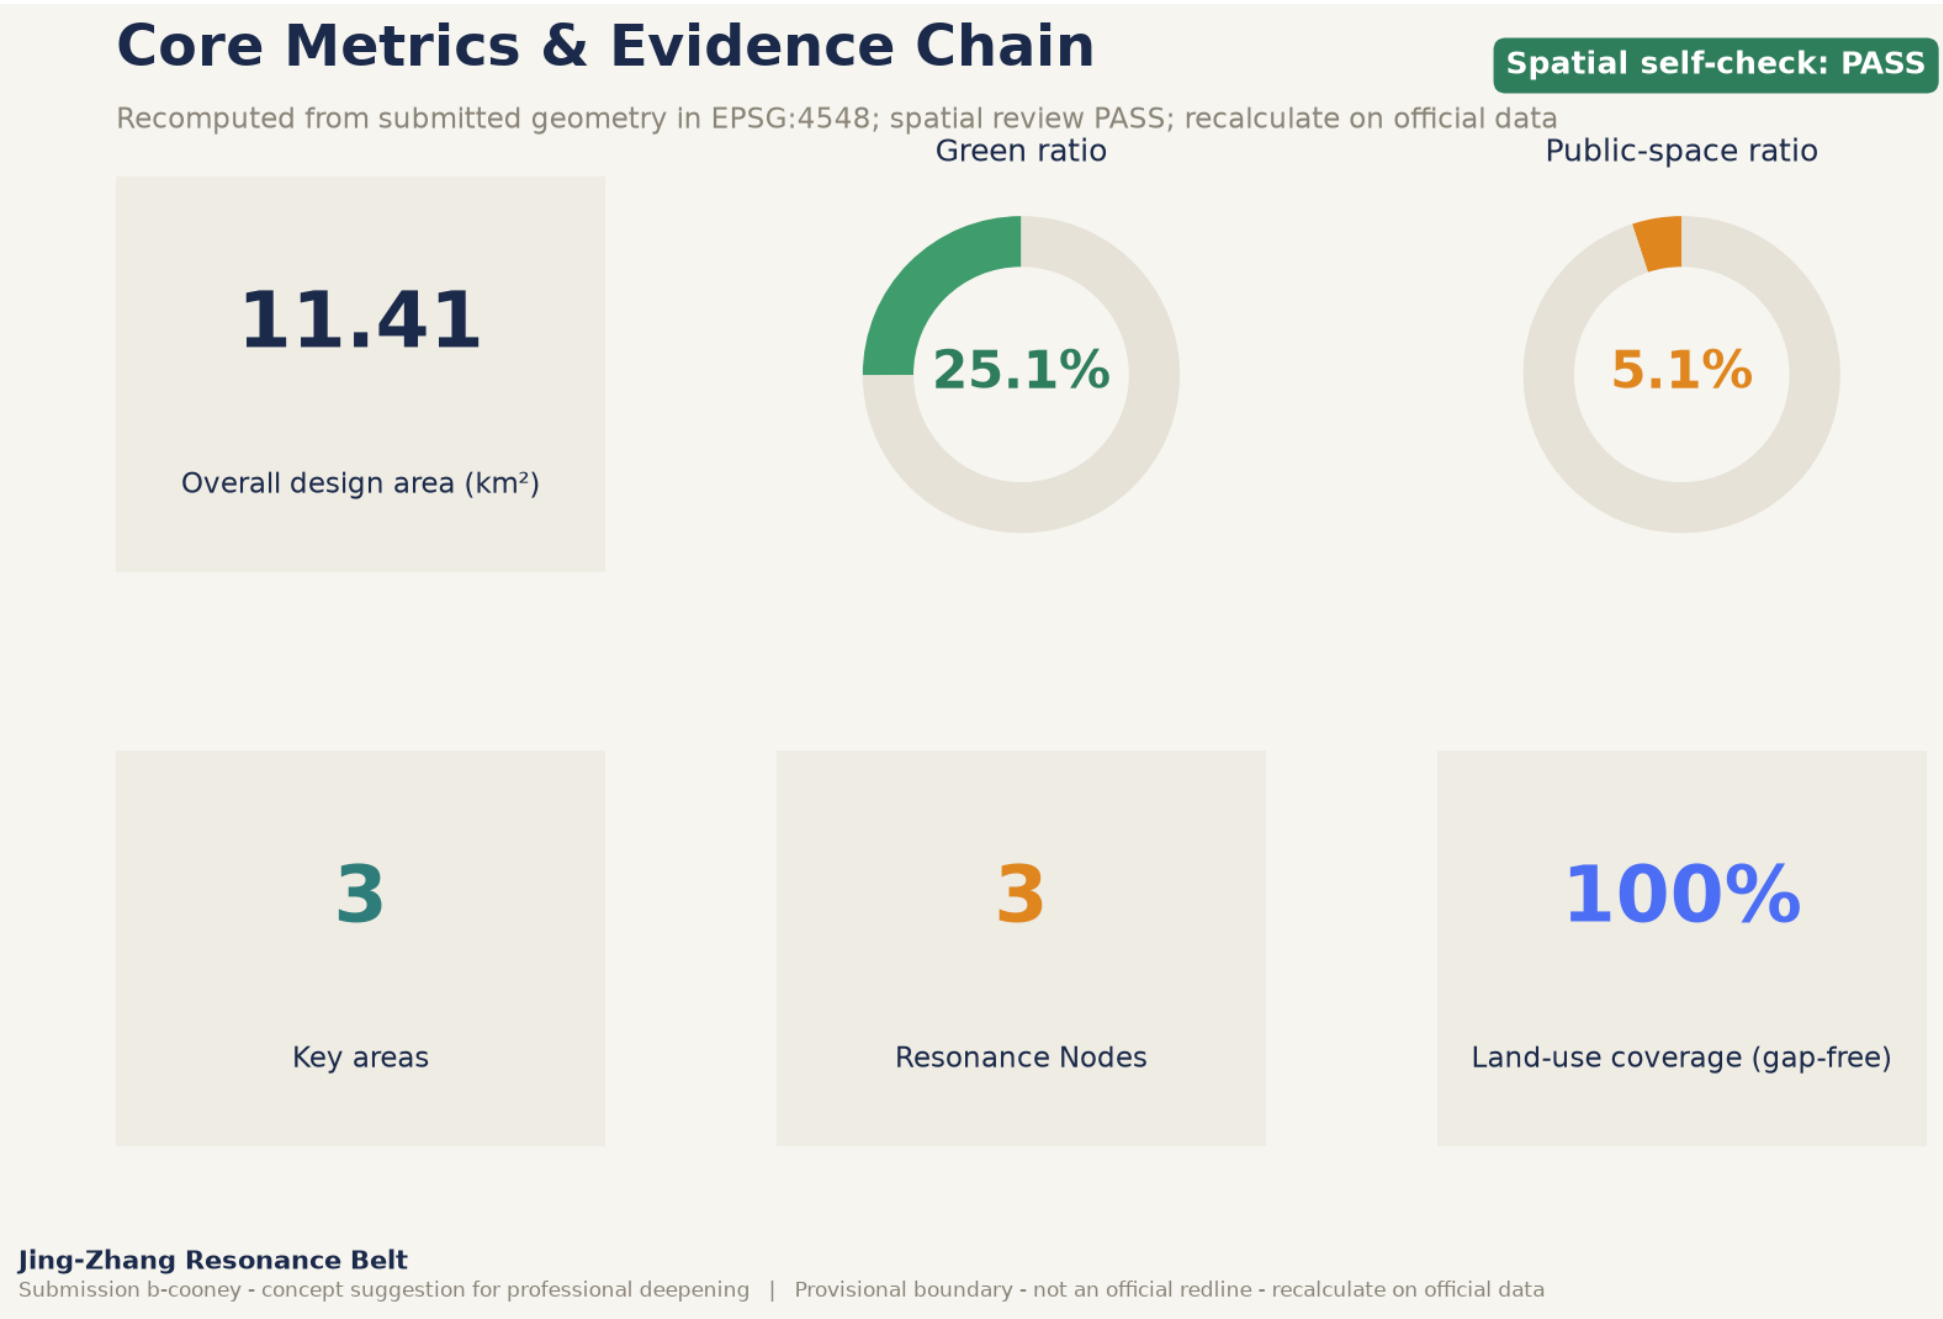

JING-ZHANG RESONANCE BELT · ■■·■■■ · b-cooney

Slow-mobility spine + connectors + continuous blue-green + Resonance-Node public-space network.

Metrics & Evidence Chain

Task Response & Compliance

JING-ZHANG RESONANCE BELT · ■■·■■■ · b-cooney

agent.1–agent.6 all mapped in compliance_matrix.json (branding, ecosystem cases, AI+ scenario cards, landmarks, cultural narrative, long-term operations).

Signature system: a city generative adaptive soundscape (ISO 12913), functional states RESTORE/FOCUS/SOCIAL/VITALIZE/BUFFER/NIGHT, adapting to time/aggregate-crowd/rail rhythm, recent-history memory prevents repetition; non-personal signals only, respecting zone levels and night quiet.

Health evidence (Aletta 2018 et al.) is background only; no clinical claims — state→feeling mappings are site-validated hypotheses.

This proposal claims no official approval; all spatial suggestions are concept suggestions for professional deepening.
