site-overview

Three Districts–Two Wings

Spatial / Function / Actor Loop

Concept spatial structure - Qinghuayuan station node - provisional geometry

Actors: content stewards • community editors • access adviser • operator • evaluator

L1 evidence entry → L2 public echo → L3 slow connection | reversible concept nodes

Scope is conceptual; no official boundary, partnership, approval or built-condition claim

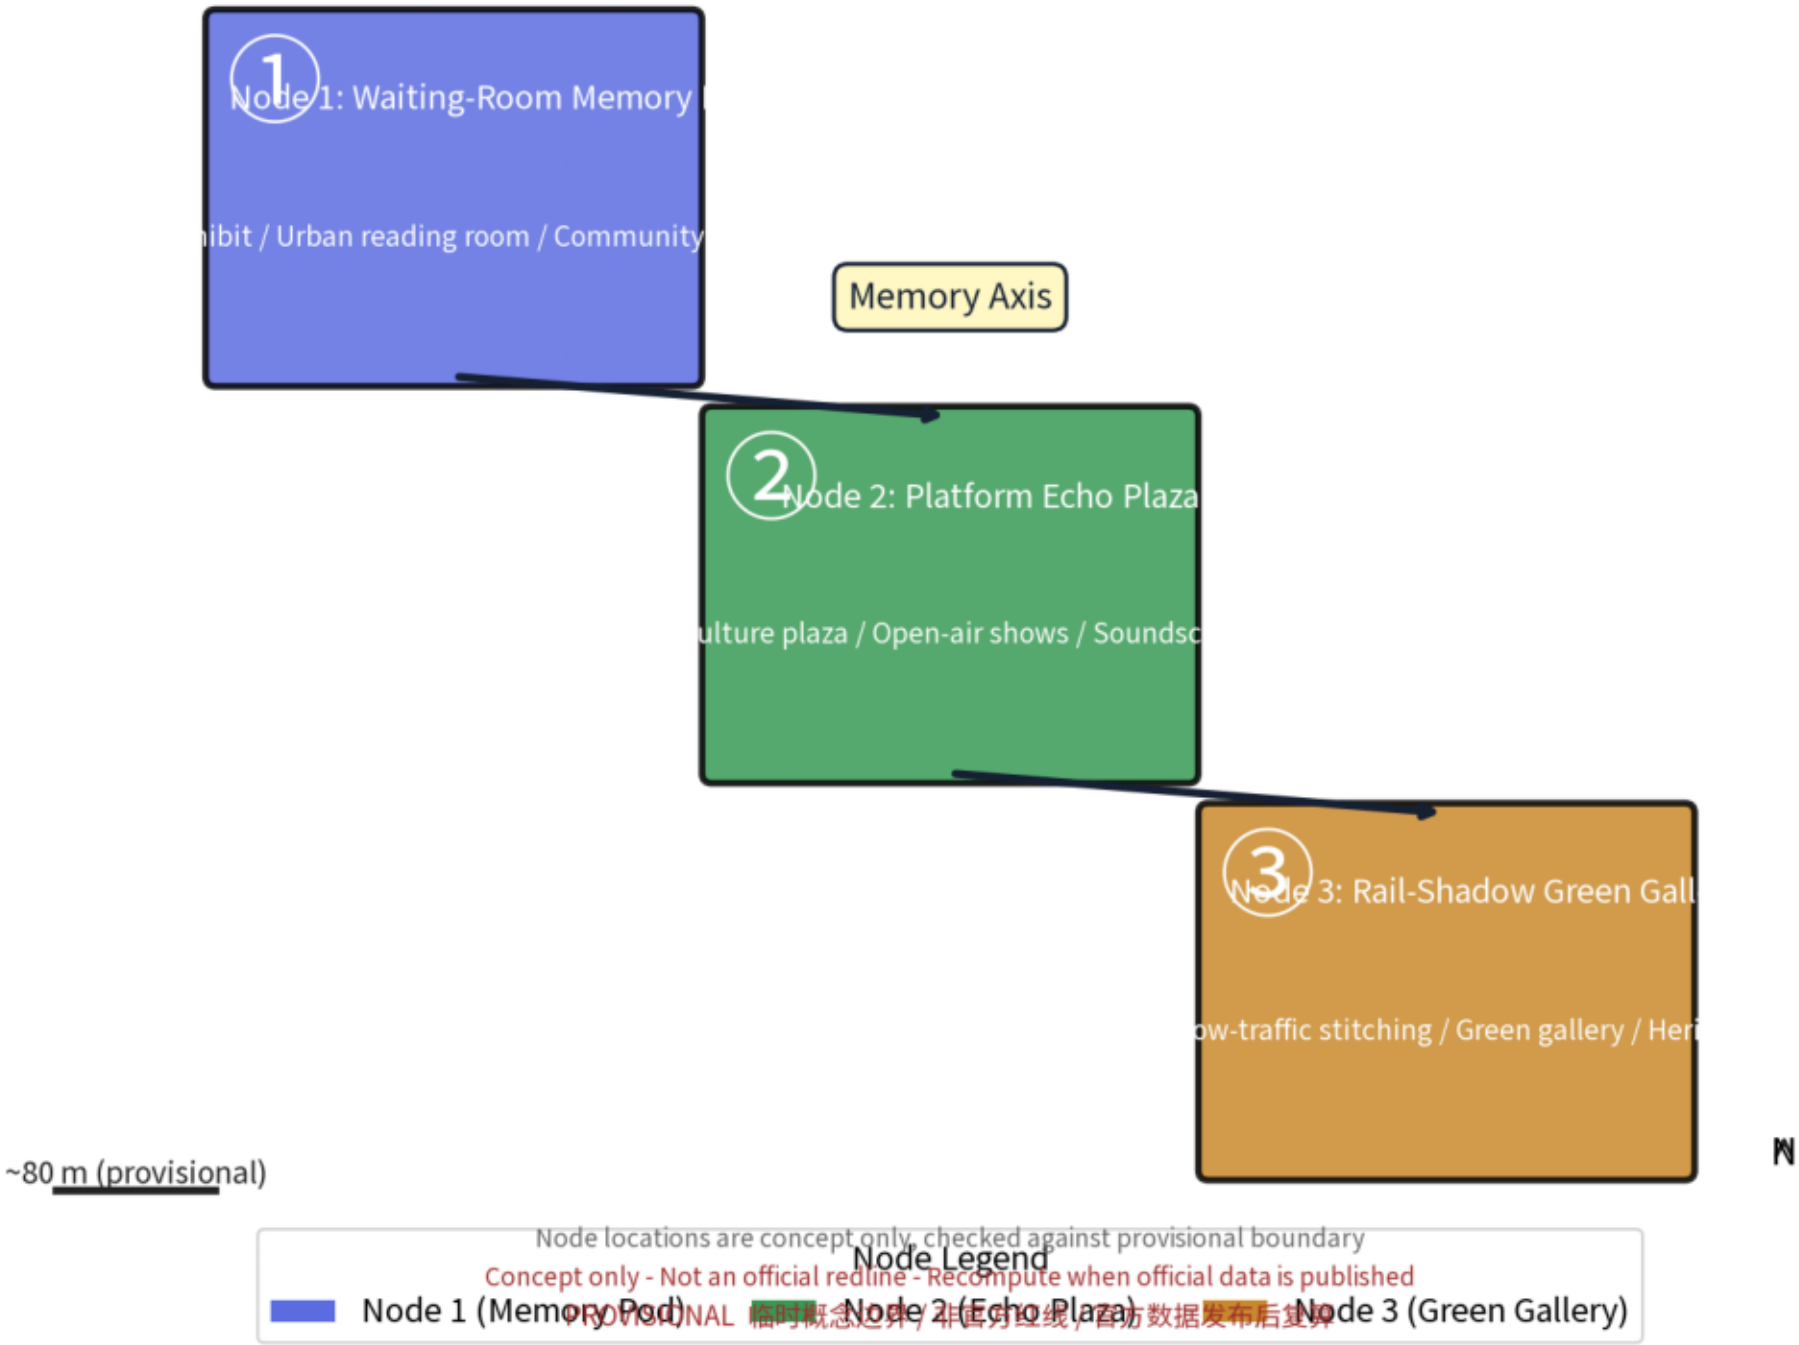

Concept only - Not an official redline - Recompute when official data is published
PROVISIONAL 临时概念边界 / 非官方红线 / 官方数据发布后复算

Recompute when official data is published

PROVISIONAL - Concept only - Not an official redline

key-areas

Three-Node Index and Design Task Map (provisional boundary)

PROVISIONAL - Concept only - Not an official redline

land-use-structure

Land-use structure (concept ratios, official calibre pending)

Single calibre: geometry/land_use.geojson polygon area aggregation (provisional)

Concept only - Not an official redline - Recompute when official data is published

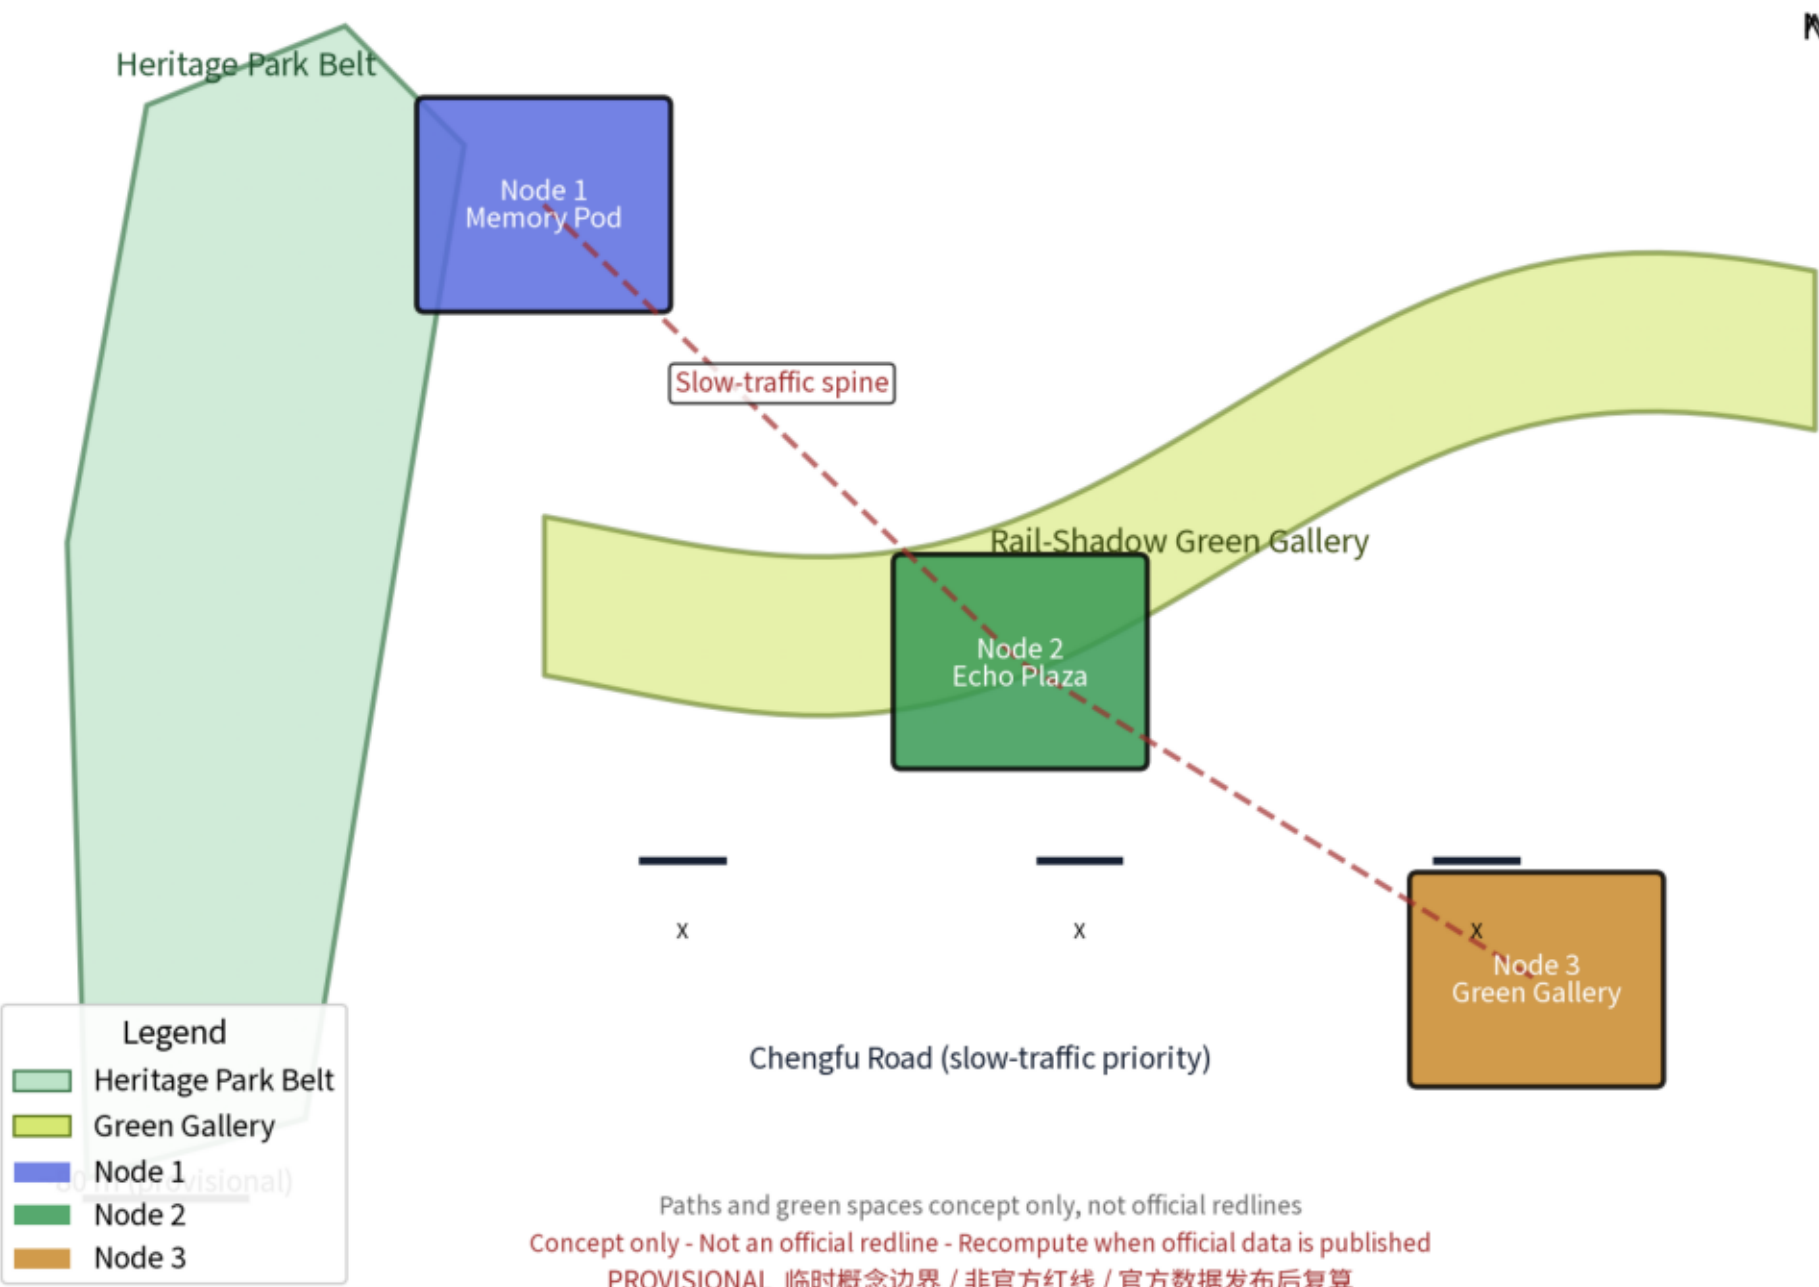

PROVISIONAL 临时概念边界 / 非官方红线 / 官方数据发布后复算

Package metrics - provisional / concept boundary

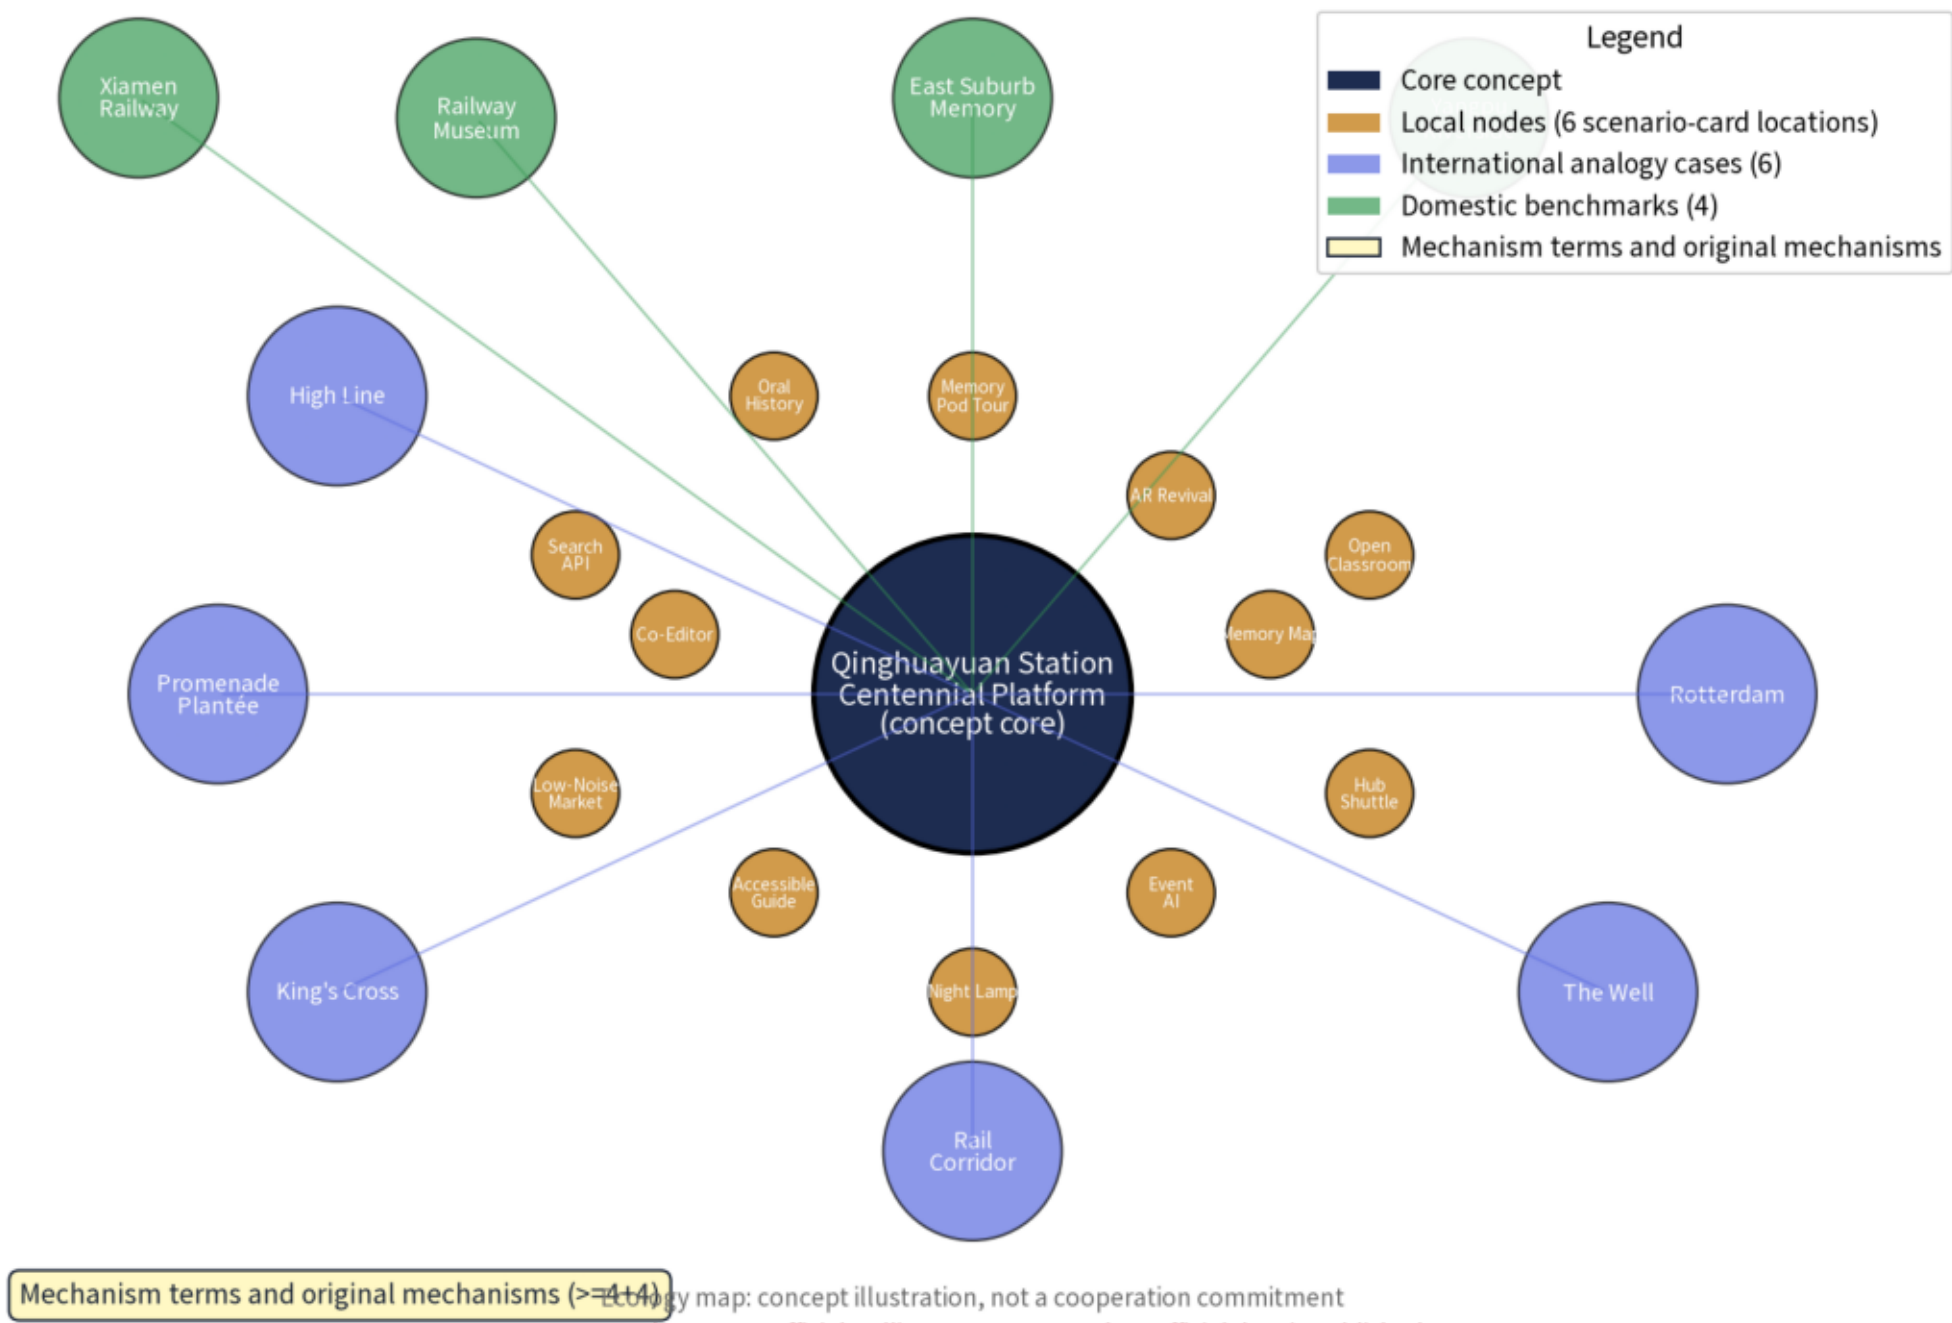

Metric	Value	Status / boundary
building_footprint_area_sqm	111,600	known concept geometry; low-confidence/provisional; not building area or statutory met
global_case_count	8	known research queue; low-confidence/provisional; all to_verify, not case facts or partne
scenario_card_count	12	known concept records; low-confidence/provisional; not pilots or outcome evidence
industry_test_scenario_count	3	known proposed protocols T1-T3; low-confidence/provisional; not tests or authorized pilo
landmark_count	3	known concept records; low-confidence/provisional; not built landmarks or heritage desi
persona_count	5	known concept categories; low-confidence/provisional; not population or user statistics
phase_count	3	known concept stages P1-P3; low-confidence/provisional; not delivery or approval commi

Counts are package records; geometry is a reproducible design input. None is an effect, legal indicator, built fact or authorization.
