

STITCH LIVING ROOM — JINGZHANG HERITAGE PARK AI COMMONS

STITCH • JZ — East-West Stitching & AI Public Space Concept

Organizing the Jingzhang Railway heritage green belt as an east-west stitching interface:

One Belt, Three Nodes: Stitch Bridge Court • East-West Market Gallery • Stitch Axis

8-Factor Mechanism (Land, Space, Industry, Capital, Talent, Compute, Data, Scenarios) mapped to Two Wings

Twelve AI+ scenario cards: anonymous aggregation, human review, appeal and anomaly shut-off; no biometric surveillance

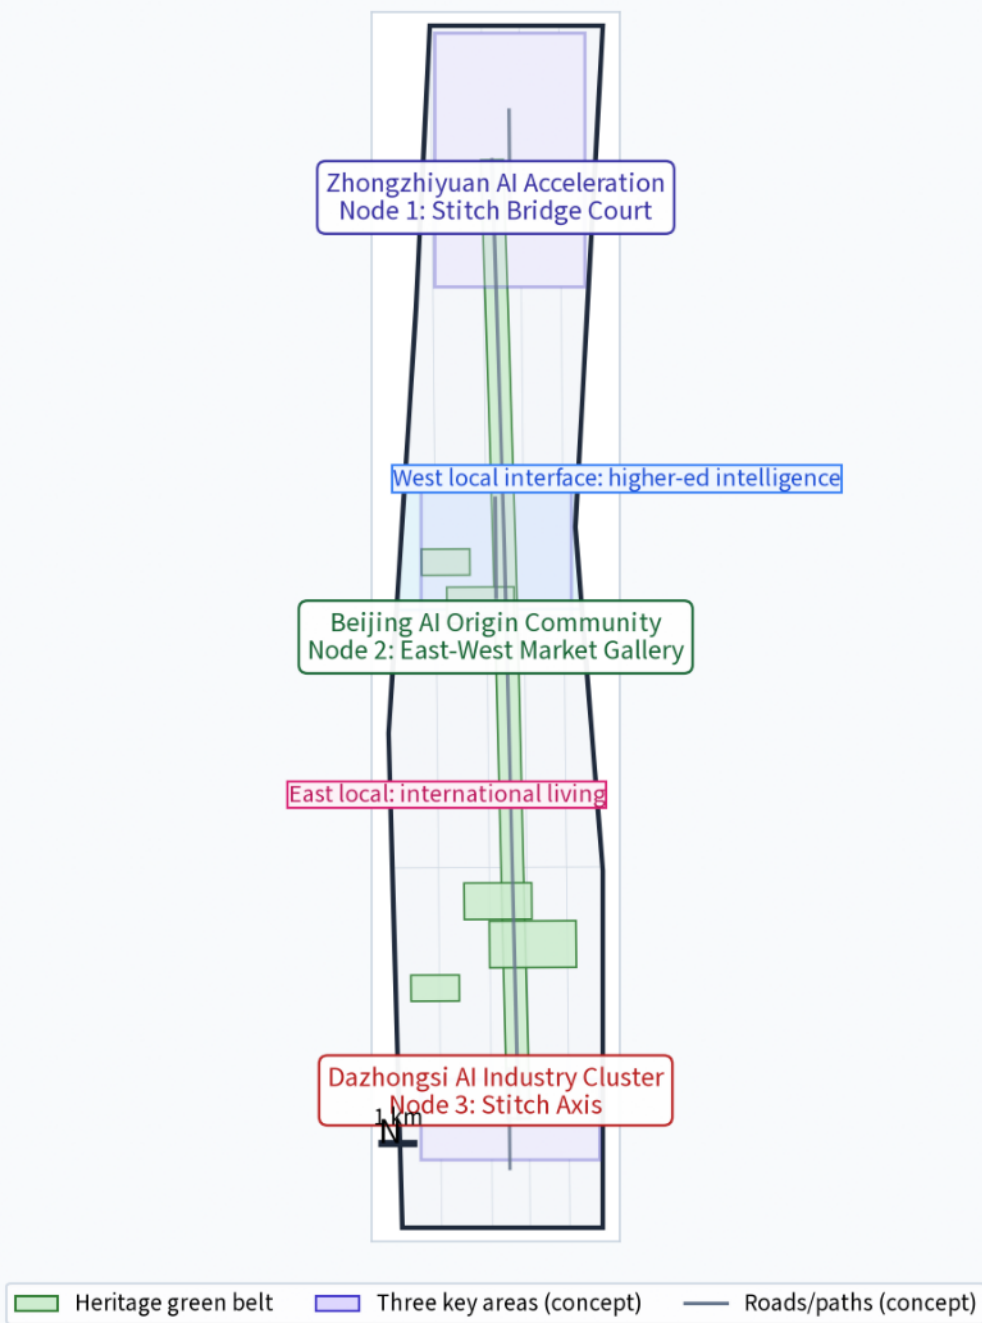

All content is conceptual advice on a provisional boundary; recalculate upon official data release.

Official Scopes: Coordinated Research ~43.6 km² | Overall Design ~11.4 km² | Key Areas ~368.4 ha

PROVISIONAL • not an official redline • recalculate after official data | Concept output is not for statutory approval or construction

Site Overview: Stitch Living Room STITCH • JZ — One Belt, Three Nodes

Overall scope ≈11.4 km² • heritage green belt, three nodes, east-west connections and formal Two Wings (provisional)

PROVISIONAL • conceptual boundary, not an official redline • recalculate after official data

Formal Two Wings

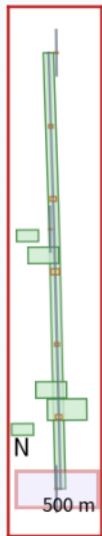

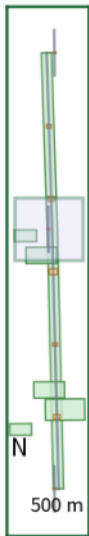

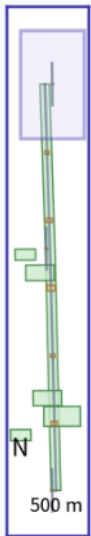

- Zhongguancun Technology Service
- Wing: R&D, incubation, transfer;
- Zhongzhiyuan interface.
- Xiaoyuehe Scenario Empowerment
- Wing: open scenes, ecology,

Rules and boundaries

- public experience; Origin/Axis
- interface.
- Two Wings are taskbook mapping;
- higher-ed/international living
- are local interfaces only.
- Land, boundary, partners,
- funding and equipment remain to
- be confirmed; anonymous
- aggregation, human review,
- appeal and shut-off are self-

Key Areas and Three Nodes: Access, Stay, Review

Three provisional concept points • north, scale, roads and green belt shown

Zhongzhiyuan AI Acceleration Node 1: Stitch Bridge Court

- Tech Service Wing •
- crossing/under-bridge demos

Input: public
topics/anonymous aggregates;
output: cards/public roster;
human review and shut-off on
anomalies.

Beijing AI Origin Community Node 2: East-West Market Gallery

- Xiaoyuehe Wing •
- market/community

Input: public
topics/anonymous aggregates;
output: cards/public roster;
human review and shut-off on
anomalies.

Dazhongsi AI Industry Cluster Node 3: Stitch Axis

- rail
- access/accessibility/comfort

Input: public
topics/anonymous aggregates;
output: cards/public roster;
human review and shut-off on
anomalies.

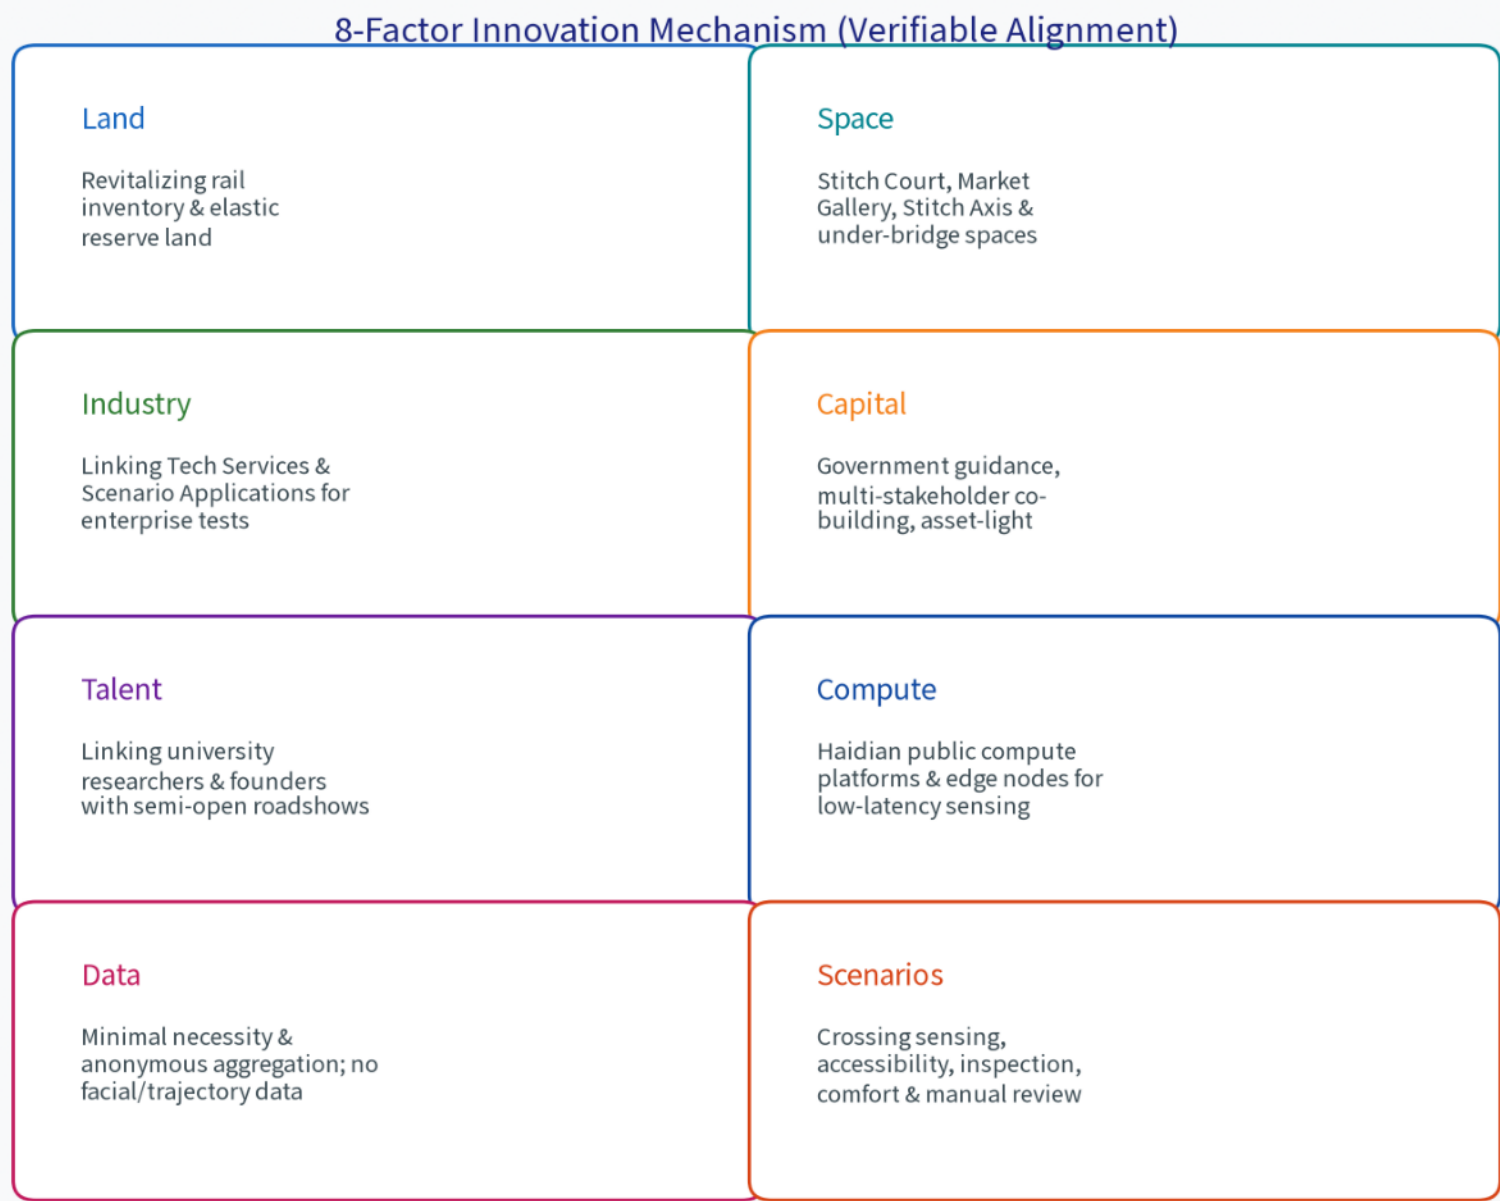

All three nodes are concept points; engineering, heritage, rail, fire, structure, ownership and operation require later joint review.

PROVISIONAL • conceptual boundary, not an official redline • recalculate after official data

AI Innovation Ecosystem: 8-Factor Mechanism & Three Zones Two Wings Synergy

PROVISIONAL concept boundary • not an official redline • recalculate after official data

Land • Space • Industry • Capital • Talent • Compute • Data • Scenarios | Zero Fabricated Commitments

Mapping to Official Two Wings

- [Zhongguancun Tech Service Wing]
- Factors: Compute, Data, Talent, Industry
 - Mechanism: Aggregates university intelligence, provides edge compute & tech transfer interfaces.
- [Xiaoyuehe Scenario Wing]
- Factors: Space, Land, Scenarios, Capital
 - Mechanism: Opens urban living AI+ scenarios along green belt with multi-stakeholder co-building.

Mapping to Three Key Areas

- Zhongzhiyuan Zone: Anchors Talent & Compute; hosts Stitch Bridge Court for flow sensing & roadshows.
- Origin Community: Anchors Scenarios & Data; hosts Market Gallery for accessibility & inspection.
- Dazhongsi Cluster: Anchors Space & Industry; hosts Stitch Axis for environmental comfort & safety.

8-factor mechanism & 3-zone 2-wing mapping are conceptual framework designs; no ungrounded corporate or financial commitments.

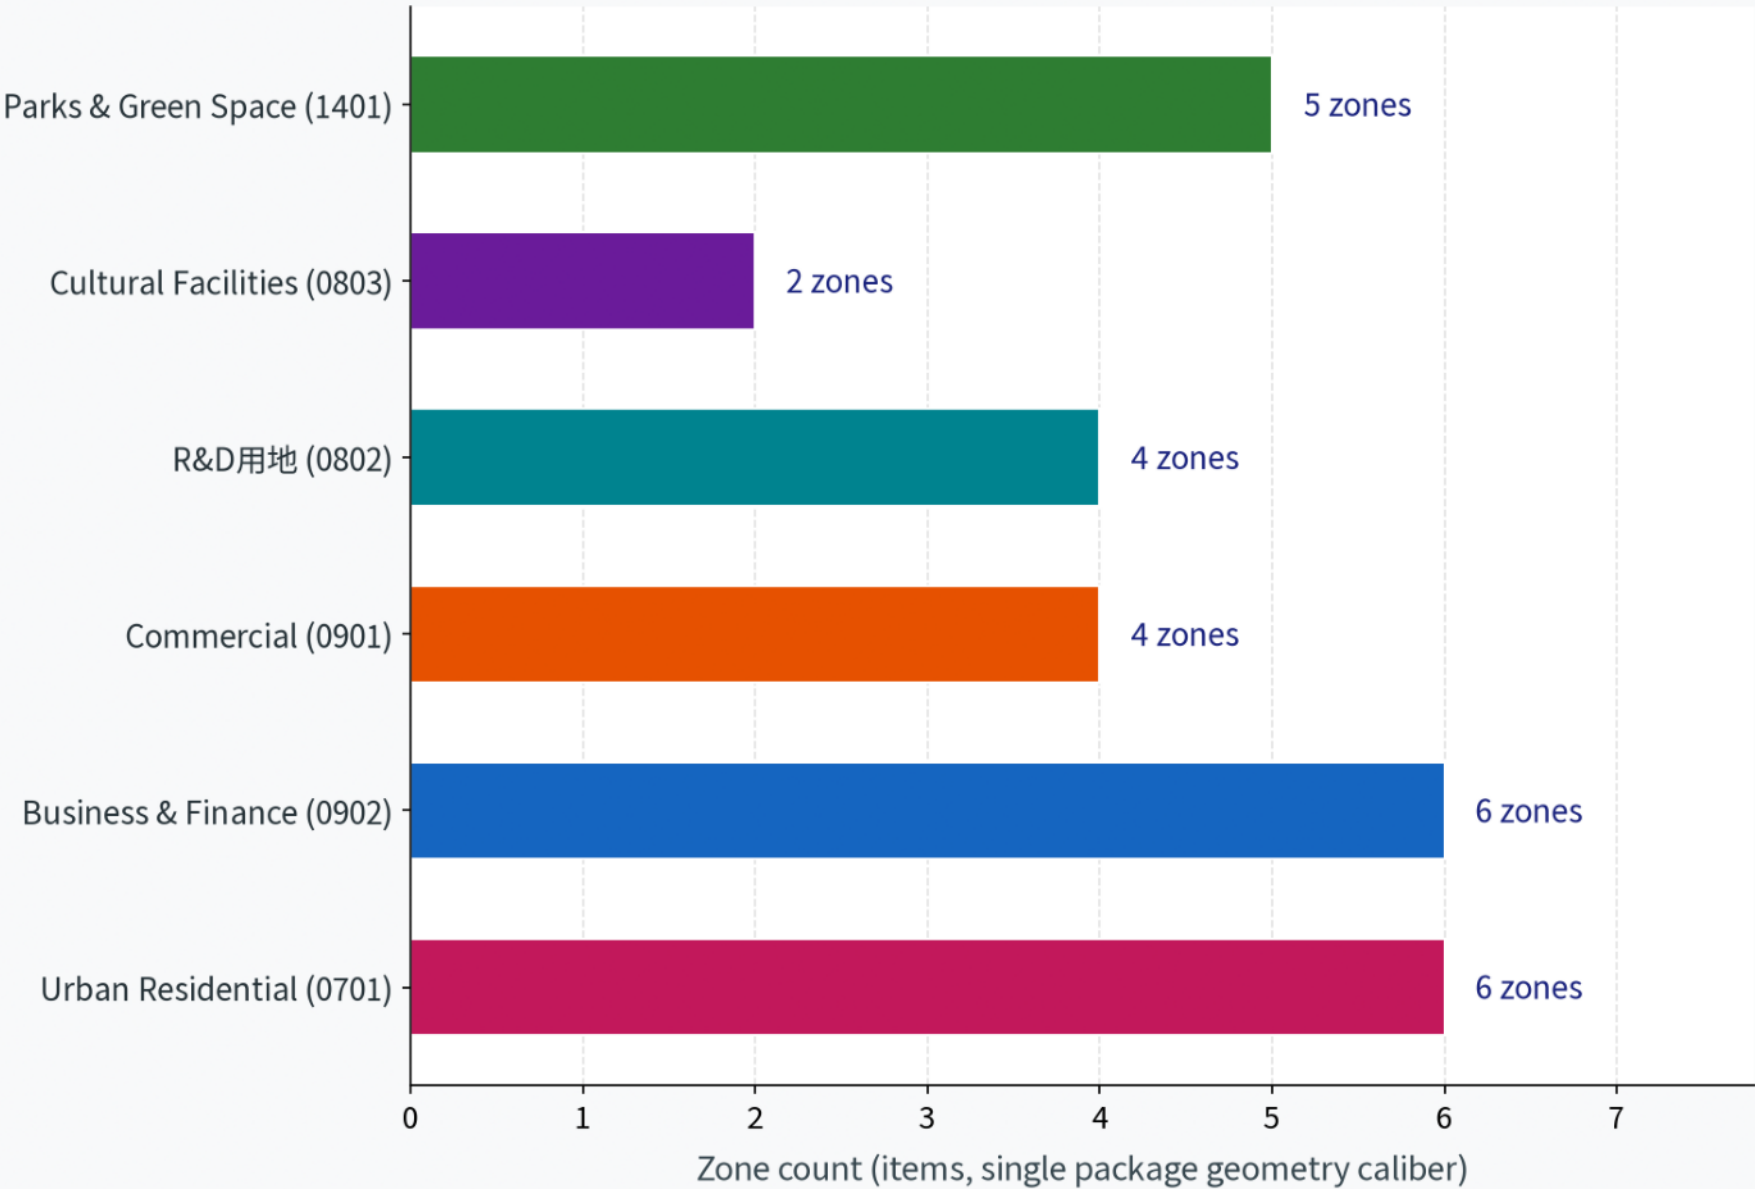

PROVISIONAL • Temporary conceptual boundary, not an official redline | Concept output for competition demonstration only.

Conceptual Land-Use Structure (Single-Caliber Recomputation)

Zone Counts from Package GeoJSON • Single Caliber • Recompute upon Official Data

PROVISIONAL concept boundary • not an official redline • recalculate after official data

Functional Zone Distribution (Total 27 Zones)

Unified Green Ratio Caliber

- Core Metric: green_ratio ≈ 13.4%
- Green Space Area: 1,532,454 sqm (~153.2 ha)
- Overall Design Area: 11,412,825 sqm (~11.41 km²)
- Formula: green_space_area / site_area
- Single Caliber: Verified against package green_space.geojson; data fully reconciled.

Spatial Synergy & Policy Guidelines

- Public Space Ratio: ≈ 0.32% (36,150 sqm)
- Slow Greenway Spine: Connects Stitch Bridge Court, Market Gallery & Stitch Axis
- Retain/Renovate/Demolish: Preserves heritage green belt; renews industrial structures
- Flexibility: Modular reversible under-bridge units.

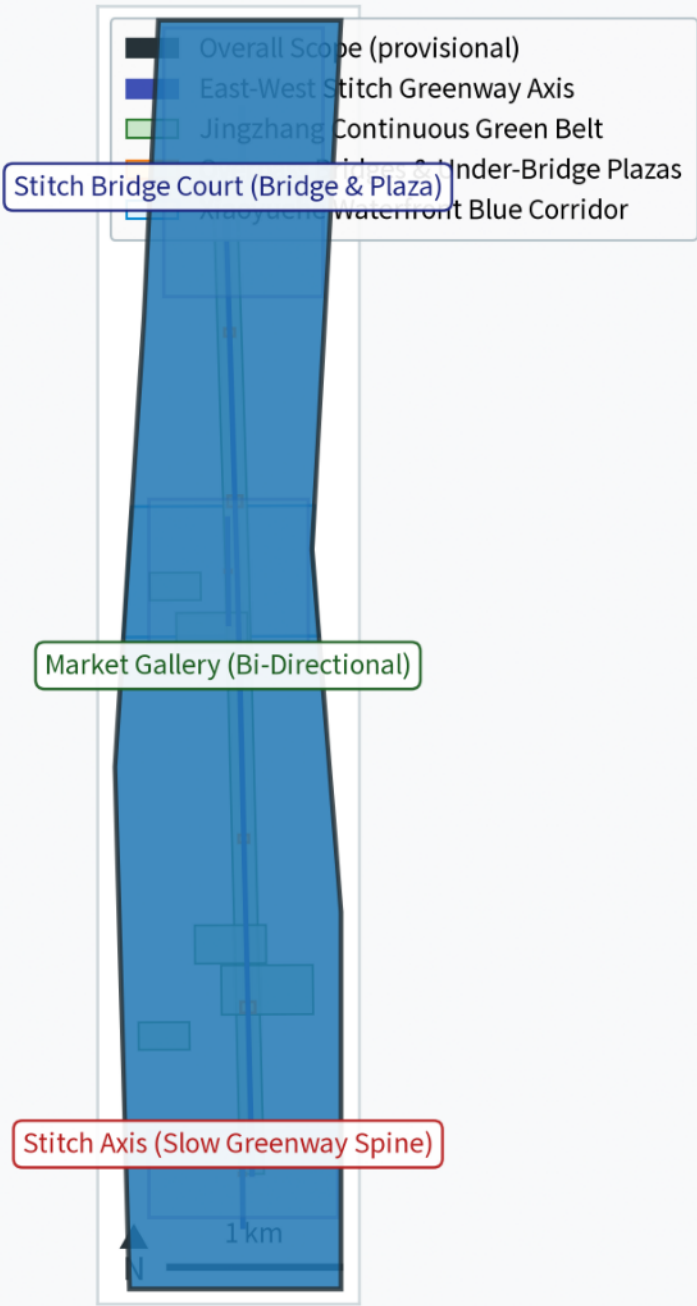

er note: Green ratio approx. 13.4% (green_ratio = green space area 1,532,454 sqm / site area 11,412,825 sqm); conceptual zone structure expresses compatible functional layout, not statutory or existing land use; recalculate upon

PROVISIONAL • Temporary conceptual boundary, not an official redline | Concept output for competition demonstration only.

Slow Greenway Mobility & Blue-Green Public Network (provisional)

Green Spine as Axis • Nodes as Pearls • East-West Slow Mobility • Under-Bridge Activation

PROVISIONAL concept boundary • not an official redline • recalculate after official data

Slow-Traffic First & Crossing Strategy

- Greenway Spine: Continuous slow path on rail greenway
- Crossing Density: Added overpasses & crosswalks to eliminate railway severance and balance flow
- Transit Integration: Links Dazhongsi & Wudaokou stations with barrier-free paths, reducing car use
- Event Traffic: Shuttle buses & phased dispersal.

Blue-Green Ecology & Under-Bridge

- Blue-Green Layout: Green spine + river wing + nodes
- Sponge City: Permeable paving & rain gardens
- Under-Bridge Grey Space: Light, paving & art interventions create micro community living rooms
- Industrial Heritage: Spikes & rails subtly integrated.

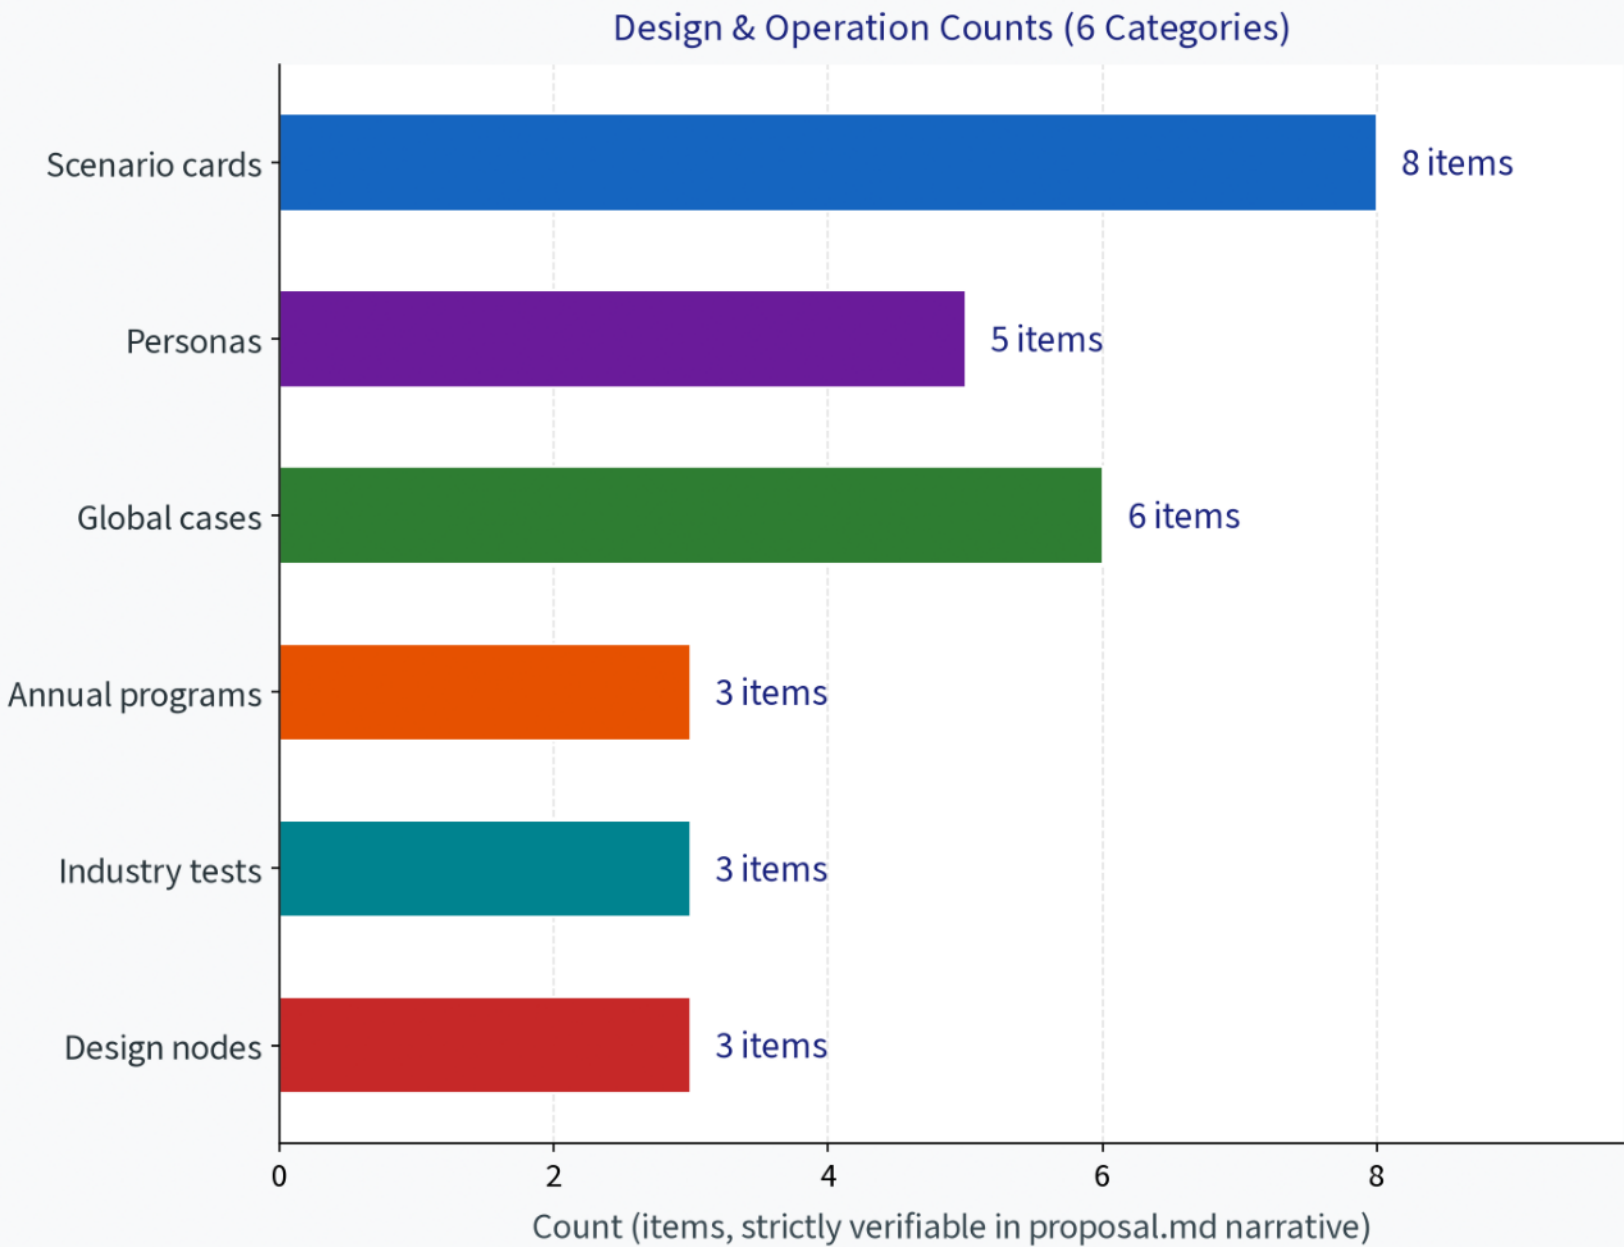

Slow-traffic & blue-green networks are conceptual planning representations; engineering siting subject to statutory review.

PROVISIONAL • Temporary conceptual boundary, not an official redline | Concept output for competition demonstration only.

Core Metric Evidence: Counts & Ratios (Plotted Separately)

Derived from metrics.json & package geometry • Counts and ratios separated • Recompute upon official data

PROVISIONAL concept boundary • not an official redline • recalculate after official data

Formula: $\text{green_ratio} = \text{green_space_area} / \text{site_area (provisional)}$; count and ratio metrics strictly decoupled. Recompute all values upon official geometry release.

PROVISIONAL • Concept output: not for statutory approval or construction use • Recompute on official data

Green Ratio (green_ratio)

≈ 13.4%

1,532,454 sqm / 11,412,825 sqm

Public Space Ratio

≈ 0.32%

36,150 sqm (plazas/activity nodes)

Overall Design Scope Area

≈ 11.41 km²

11,412,825 sqm (provisional boundary)
