

Overview Map: From Place Connection to Responsibility Relay

Six physical human entrances and three distinct landmarks; AI stays backstage.

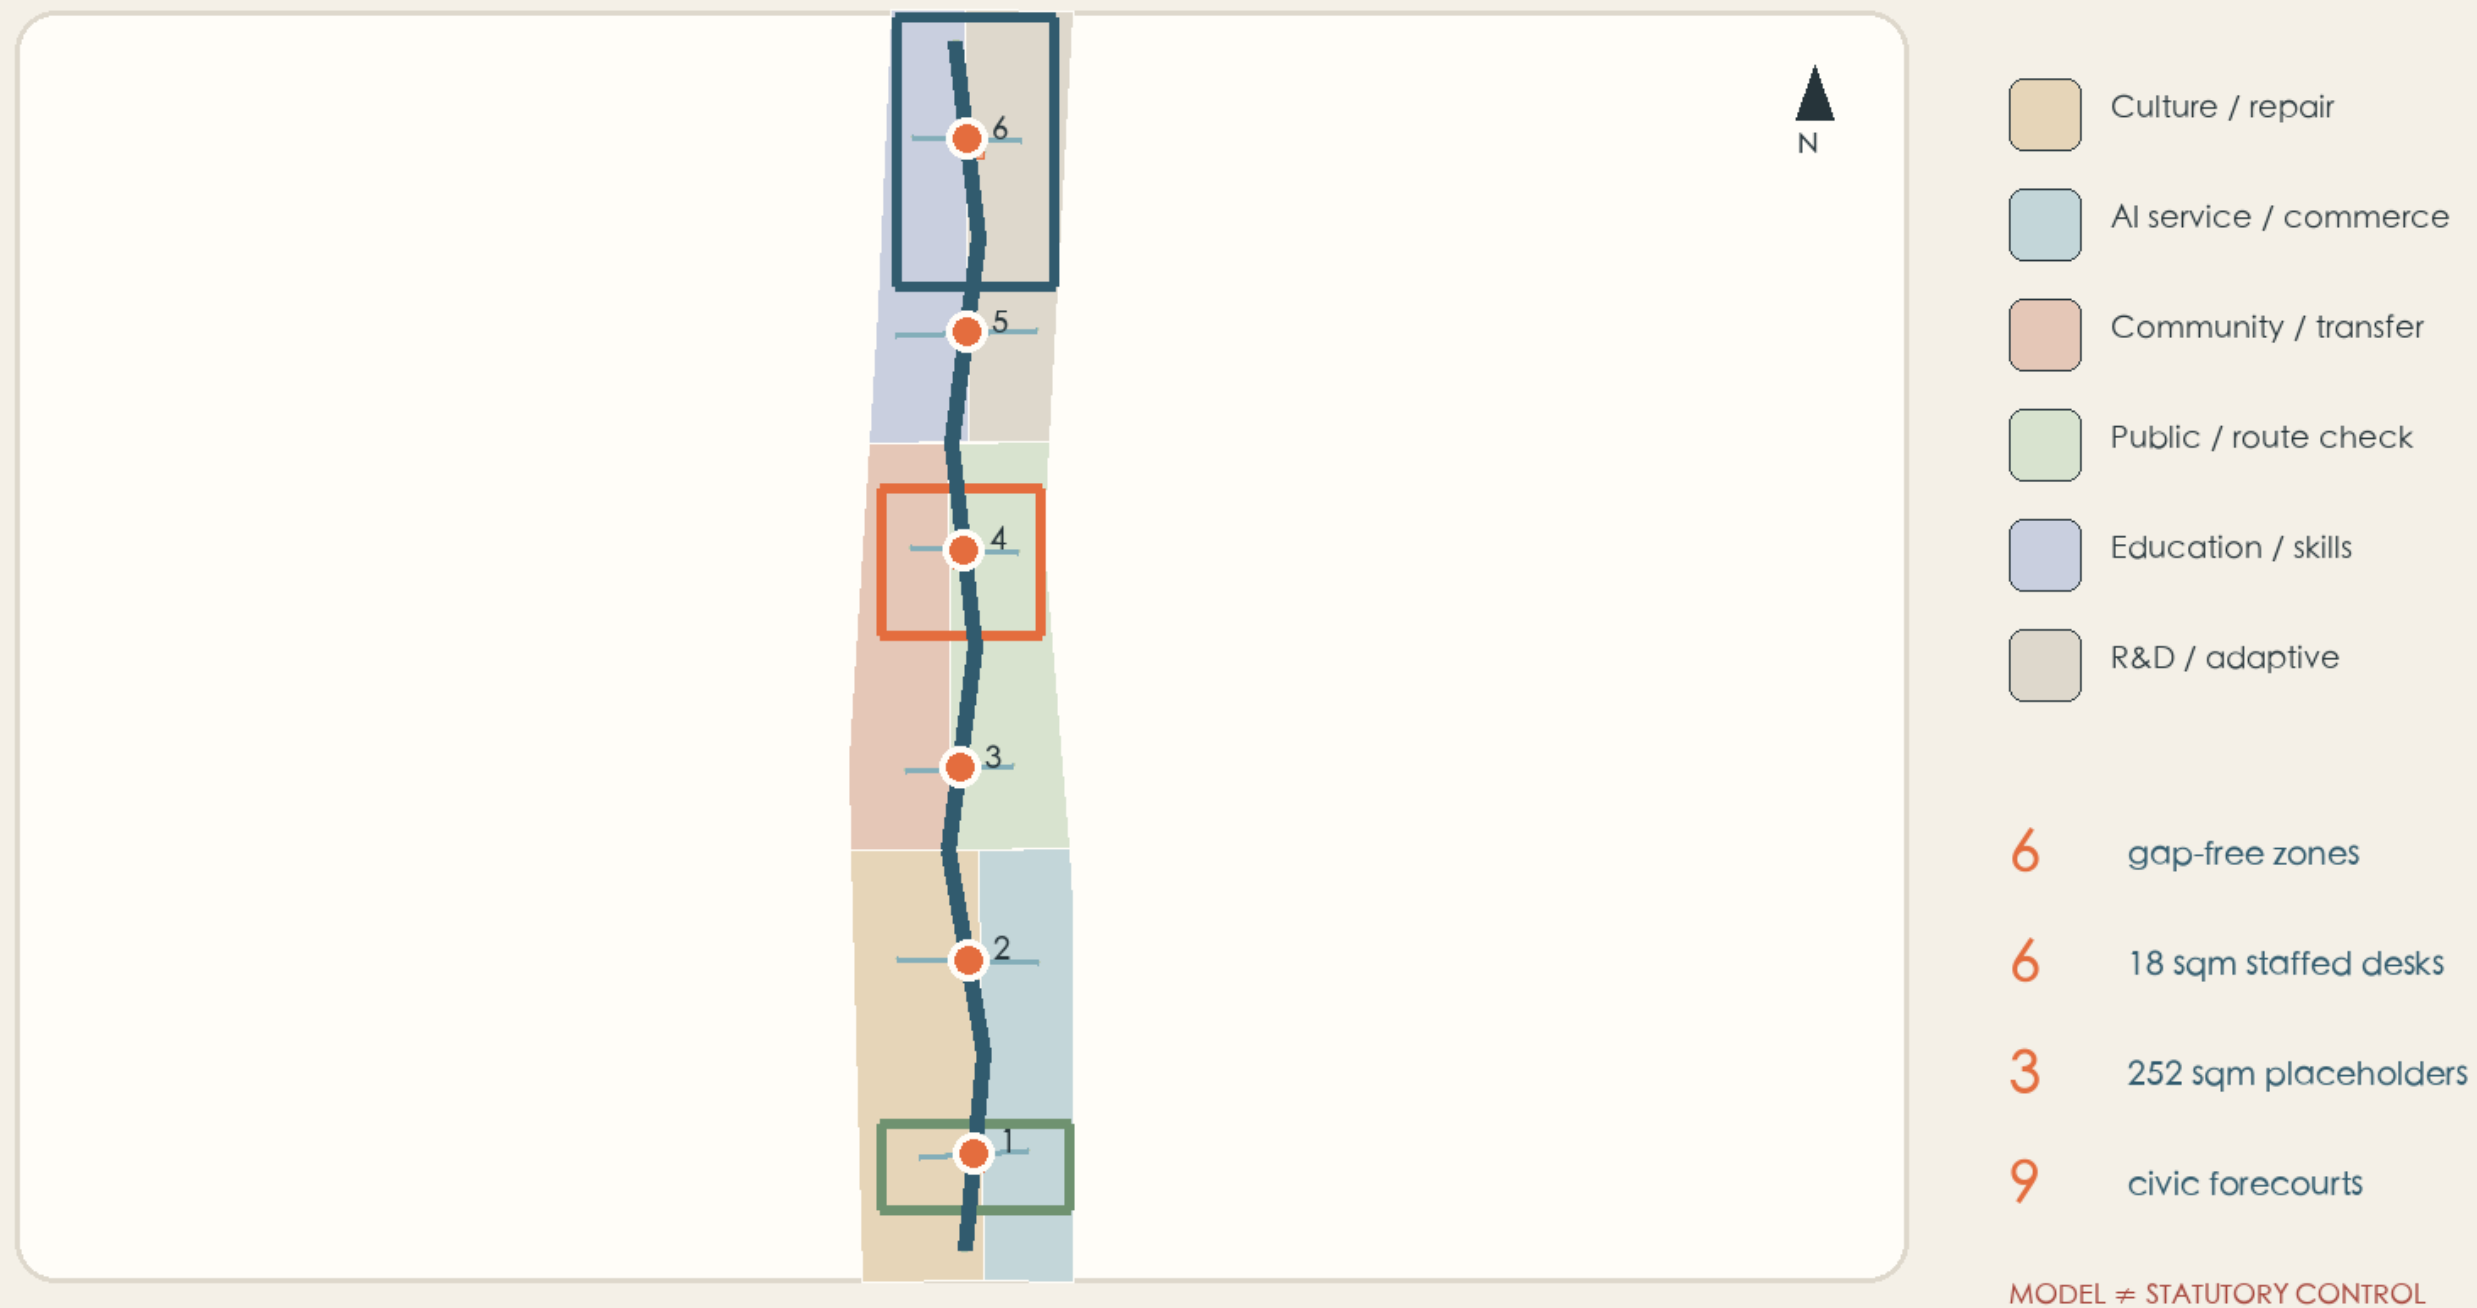

Help is an accountable relay with a boundary and an end.

- 01 Paid duty
Two trained people per open interface
- 02 Bounded help
Green completes; amber gets a second human check
- 03 Formal return
Red is not matched or attempted

PROVISIONAL GEOMETRY · NOT AN APPROVED PLAN

Concept Land Use and Spatial Structure

A reproducible functional model, not statutory parcel use.

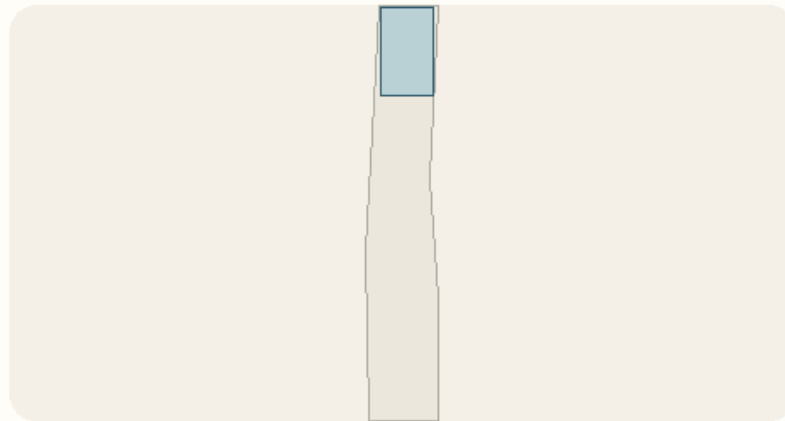

Three Areas Are Not One Desk in Three Colours

Timetable, interchange, maintenance: three spaces, operating models, and stop gates.

01

Zhongzhiyuan AI Innovation Accelerator

Civic Skills Roster Lab

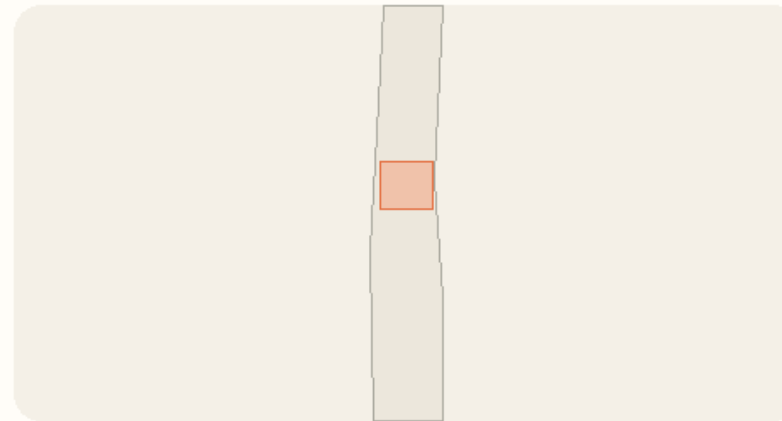

Break capabilities from firms, universities, and open-source groups into bounded public shifts with a named lead. Employees participate on sponsored work time; students receive a stipend or recognised credit where applicable.

STOP · No solo escort, vulnerable-person casework, approval promises, or medical/legal judgement.

02

Beijing AI Origin Community

Human Transfer Hub

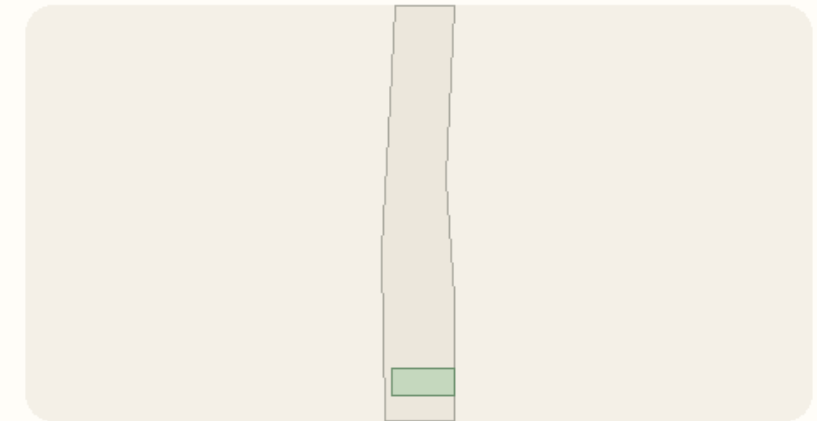

Use a visible desk, paper maps, a route-status wall, and a quiet explanation bay for no-account wayfinding, same-day accessible-route checks, and formal-service referral. Trained paid staff handle accompaniment and complex situations.

STOP · No repairs, passwords, or money; no volunteer-only escort; no QR-only entrance.

03

Dazhongsi AI Industry Cluster

Repair & Reuse Commons

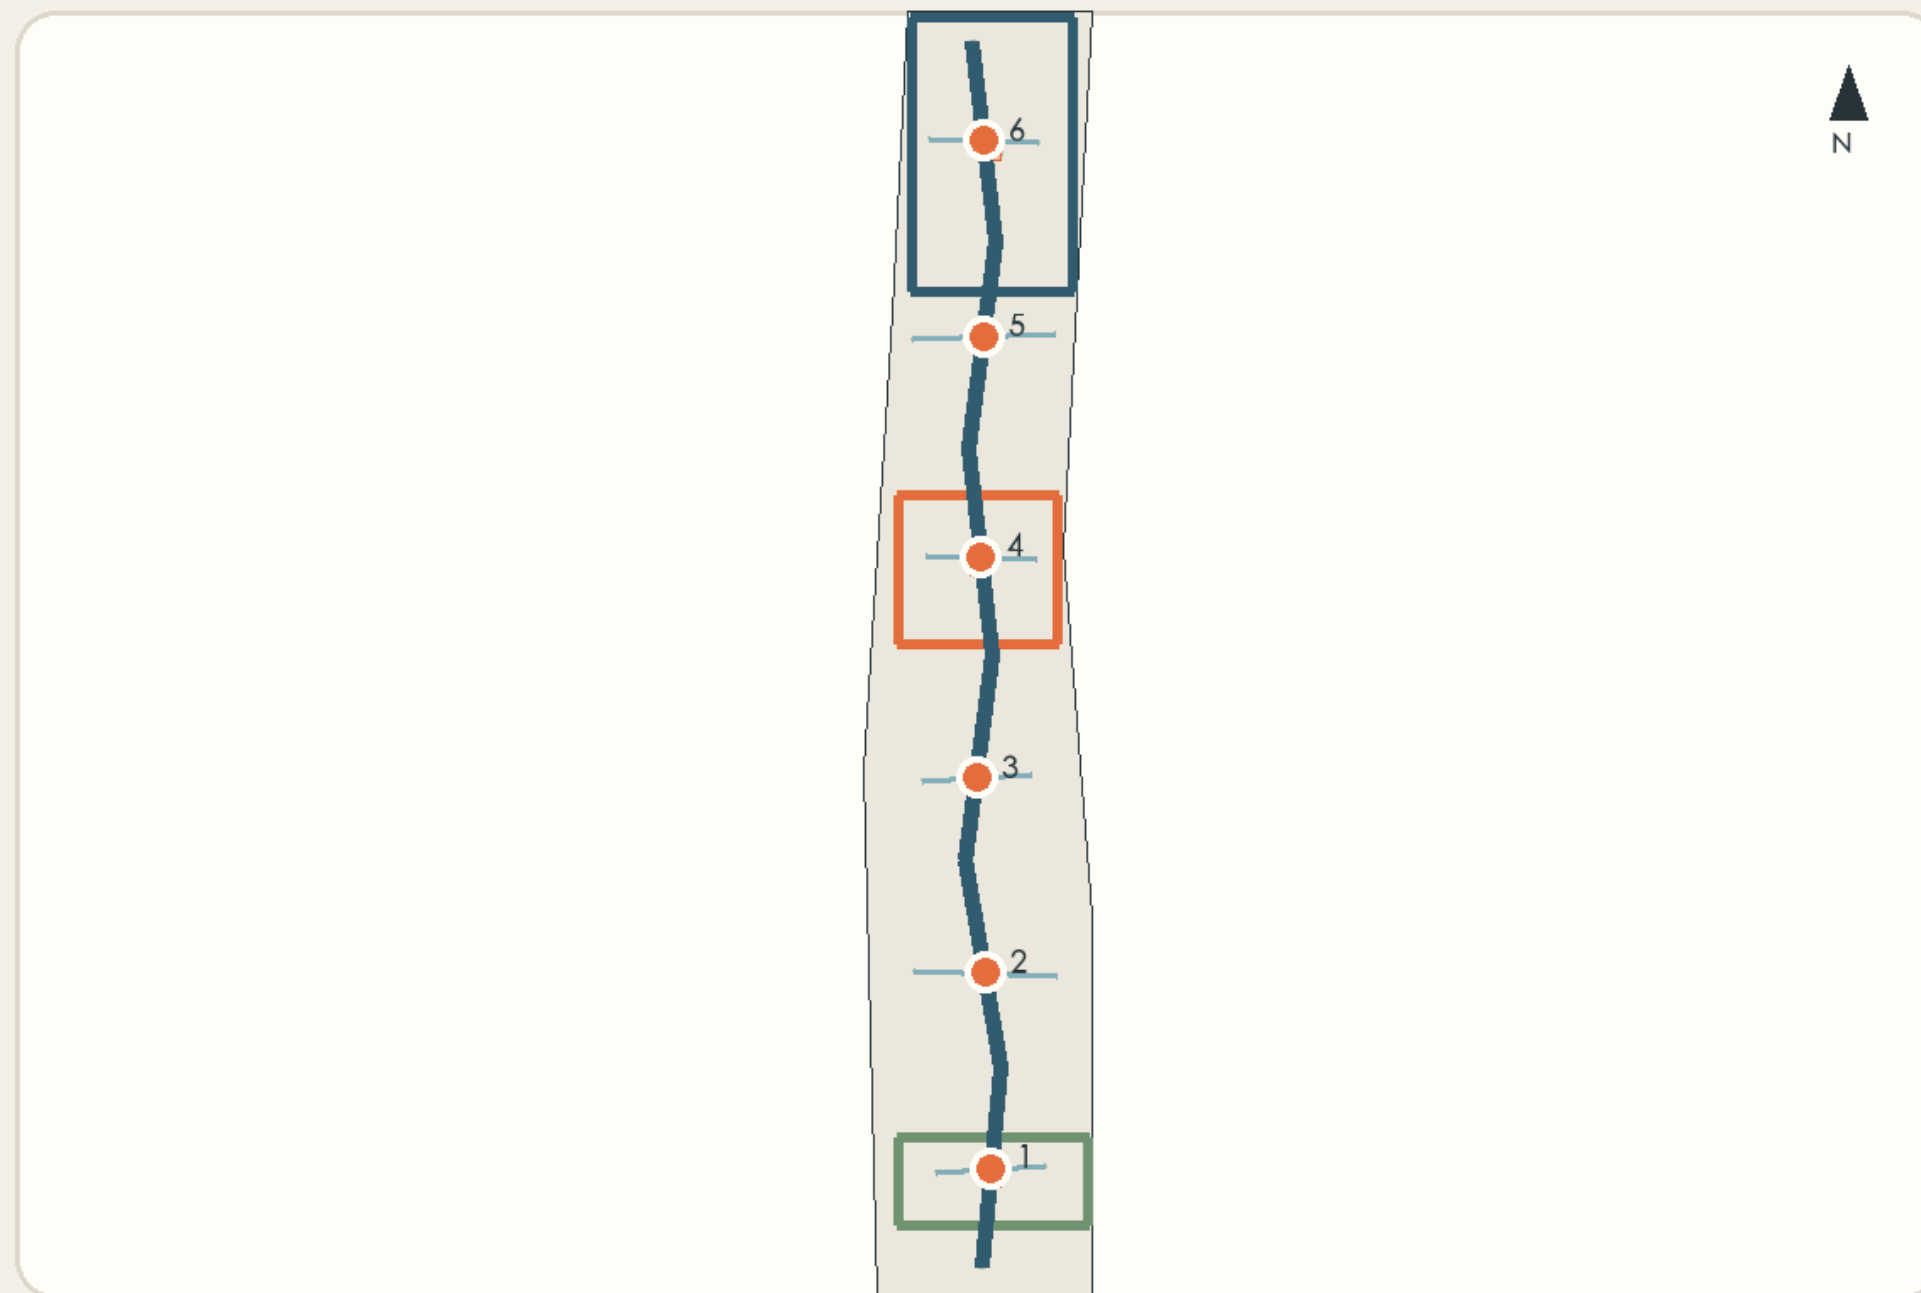

A trained workshop lead supervises low-risk mending, tool orientation, parts sorting, and reuse. The public ledger explains repair, refusal, and referral in aggregate, never as personal repair histories.

STOP · No mains electricity, gas, lithium batteries, medical devices, child-safety products, structural work, or locks.

A Responsibility Relay Usable Today

Routes, shade, rest, forecourts, paper maps, and staffed status share one version.

01 Same-day version
Paper and digital expire together

02 Two-person check
Construction changes require field review

03 Visible rest
Seat, stand, and wheelchair positions

04 Clear handover
Nearest formal owner stays visible

responsibility relay
verified short links
shade / rest
staffed forecourts

Twelve Scenarios, Not Twelve Wishes

Every scenario binds place, AI limit, paid decision, red line, and closure.

S01 No-account wayfinding

HUMAN · Paid navigator confirms today's version

STOP · No identity, account, or continuous location

S02 Construction blocks an accessible route

HUMAN · Two-person field check before publication

STOP · No inferred accessibility claim

S03 Plain-language public-service explanation

HUMAN · Staff checks source and referral owner

STOP · No eligibility decision or legal advice

S04 Multilingual visitor route and referral

HUMAN · Bilingual staff confirms key time and place

STOP · Machine translation is not an official promise

S05 Phone accessibility settings

HUMAN · Owner operates device; lead only guides

STOP · No passwords, accounts, payment, or private content

S06 Open-source model scope card

HUMAN · Student, mentor, and site lead sign

STOP · No residents as unconsented data sources

S07 Startup seeks a test setting

HUMAN · Ecosystem liaison and safety lead decide

STOP · No procurement, approval, or exclusive-access promise

S08 Frontline worker spots an AI error

HUMAN · Duty lead may take it down immediately

STOP · Do not wait for self-correction

S09 Low-speed robot near-miss drill

HUMAN · On-site controller holds a physical stop

STOP · No first test in open foot traffic

S10 Clothing or simple non-powered repair

HUMAN · Workshop lead checks tools and result

STOP · No restored-performance or warranty claim

S11 Tool orientation and parts reuse

HUMAN · Lead confirms material, PPE, and group size

STOP · No unsupervised minor tool use

S12 Event egress and crowd assistance

HUMAN · On-site command has final authority

STOP · Does not replace emergency plans, fire response, or alarm

Three-area columns: Human Transfer / Skills Roster / Repair & Reuse

Boundaries Warm Language Cannot Cover

Volunteer labour, vulnerability, privacy, repair, and formal duty share one control surface.

PAID

Two trained people per open interface

VOLUNTEER

Supervised low-risk knowledge only

VULNERABLE

No solo volunteer escort or casework

PRIVACY

No account by default; minimum event fields

REPAIR

High-risk objects refused and referred

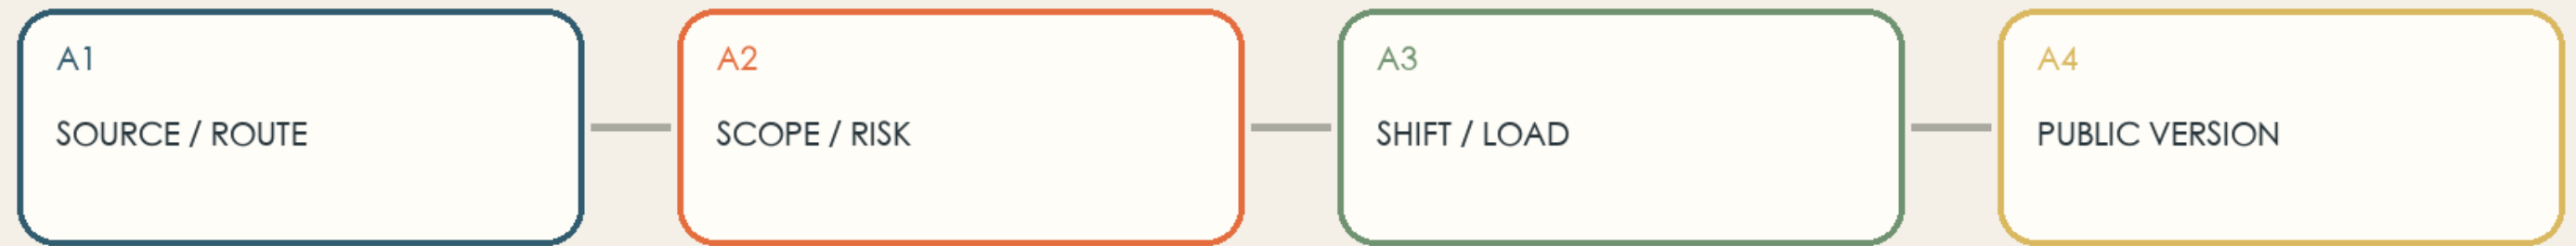

FORMAL DUTY

Red requests return to emergency/formal systems

Any red miss, single-person opening, volunteer substitution, unresolved safeguarding event, or stale route closes the interface.

Four Backstage Agents, Five Human Gates

AI verifies, flags, and edits; people authorise, override, refer, stop, and remain accountable.

PAID HUMAN CONTROL

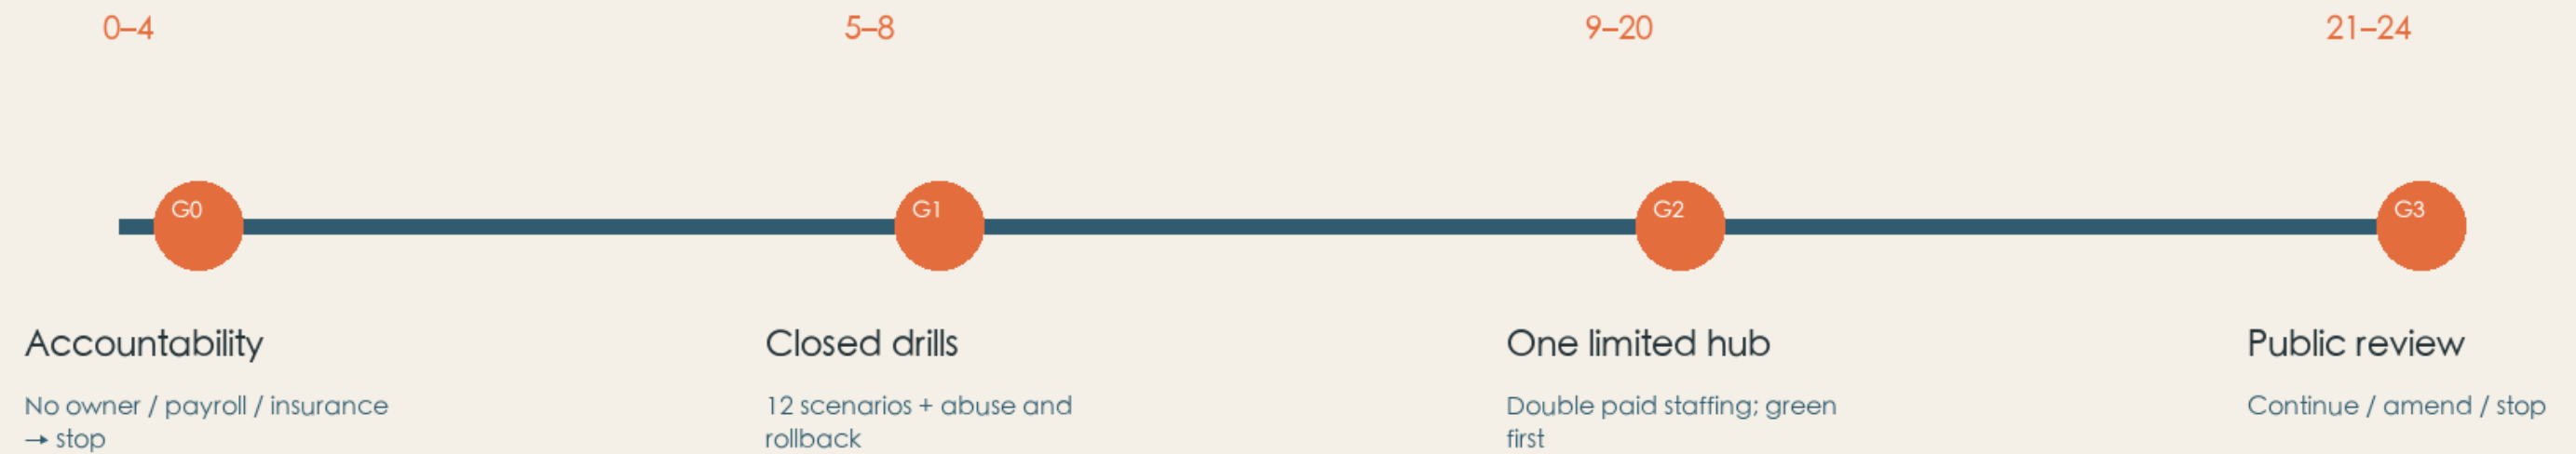

NON-NEGOTIABLE

- × No person ranking
- × No eligibility
- × No diagnosis/legal advice
- × No procurement promise
- × No emergency command

Prove It Can Stop Before Scaling

Four gates separate accountability, rehearsal, limited opening, and public review.

GREEN · deliver

AMBER · second human gate

RED · do not match; formally refer

Eight Packages Need Accountable Owners

No package enters Phase 1 without owner, payroll, insurance, and stop authority.

LH-01	Physical human entrance	AI Origin	Six reversible 18 sqm desks and paper-map cabinets	Paid navigator + safety lead
LH-02	Public RAG boundary card	All three	Entry board, tool labels, referral cards	Protocol editor
LH-03	Paid shift and handover ledger	All three	Visible roster and internal handover sheet	Shift manager
LH-04	Same-day accessible-route status	AI Origin	Status wall, paper map, verified short links	Two-person field team
LH-05	Sponsored civic-skills roster	Zhongzhiyuan	Open table, scope card, drill yard	Paid or sponsored lead
LH-06	Repair and reuse commons	Dazhongsi	Locked tools, isolation bench, ledger wall	Workshop lead
LH-07	Formal-service referral interface	AI Origin	Current contact sheet and closure status	Paid navigator
LH-08	Public review and version archive	All three	Aggregate board, stop decisions, archive	Independent review chair

No owner · No paid shift · No insurance · No stop power = NO OPENING

Do Not Turn Targets into Results

Counts are known; spatial meaning is low-confidence; operations, safety, and cost require a pilot.
