

JING-ZHANG CYCLING COMMONS

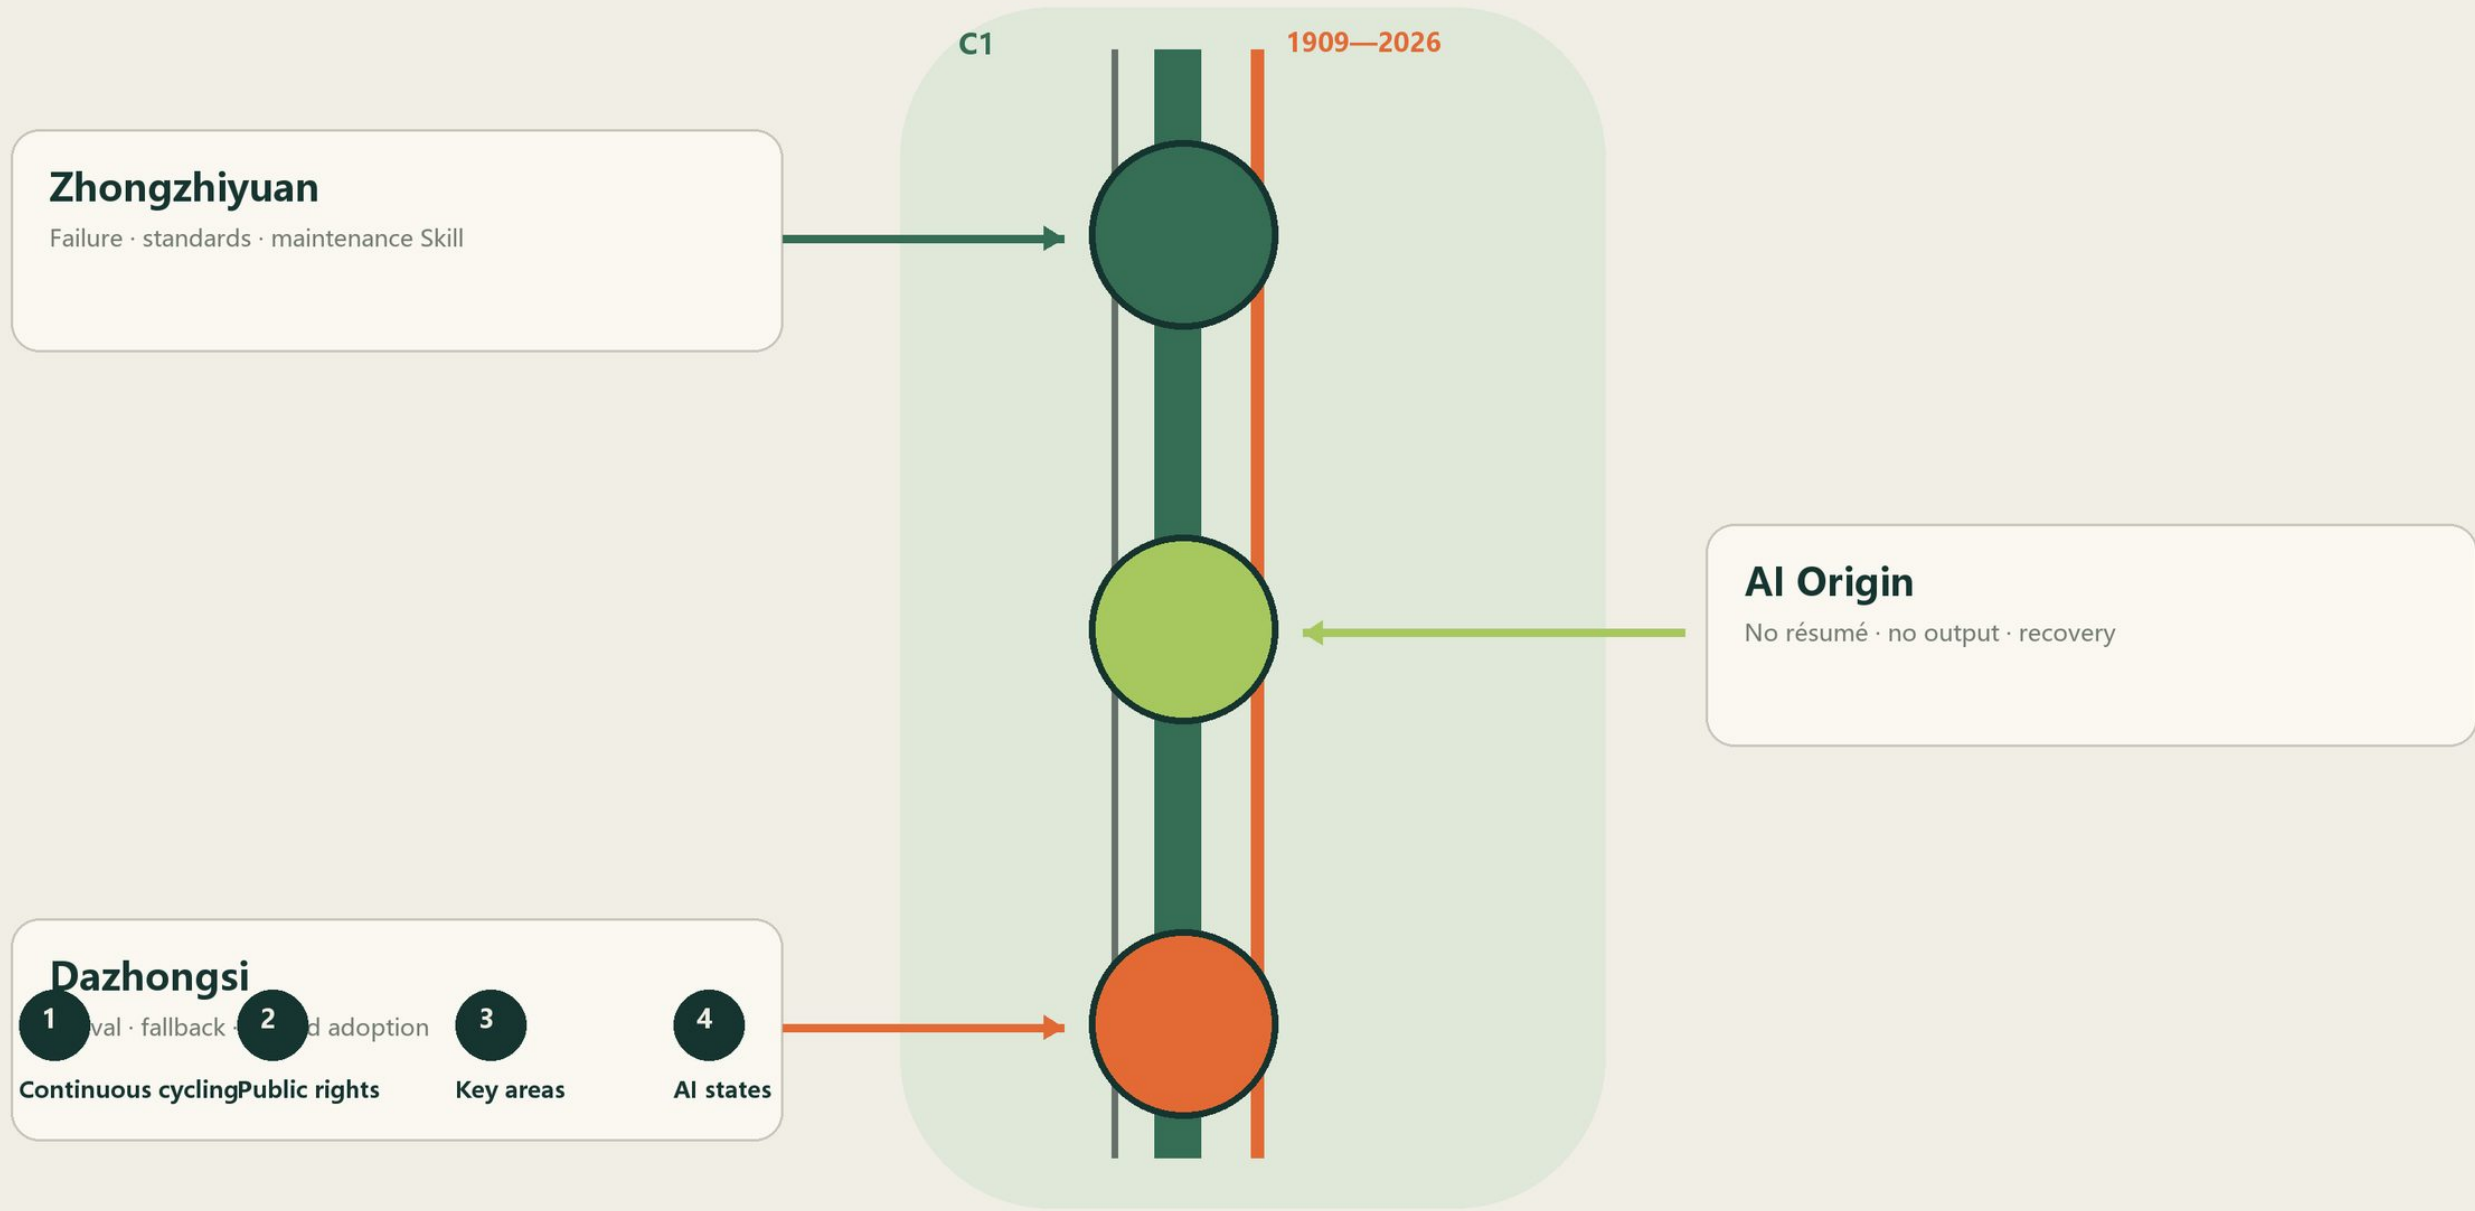

Ride to work, find room to breathe

SPATIAL MANIFESTO

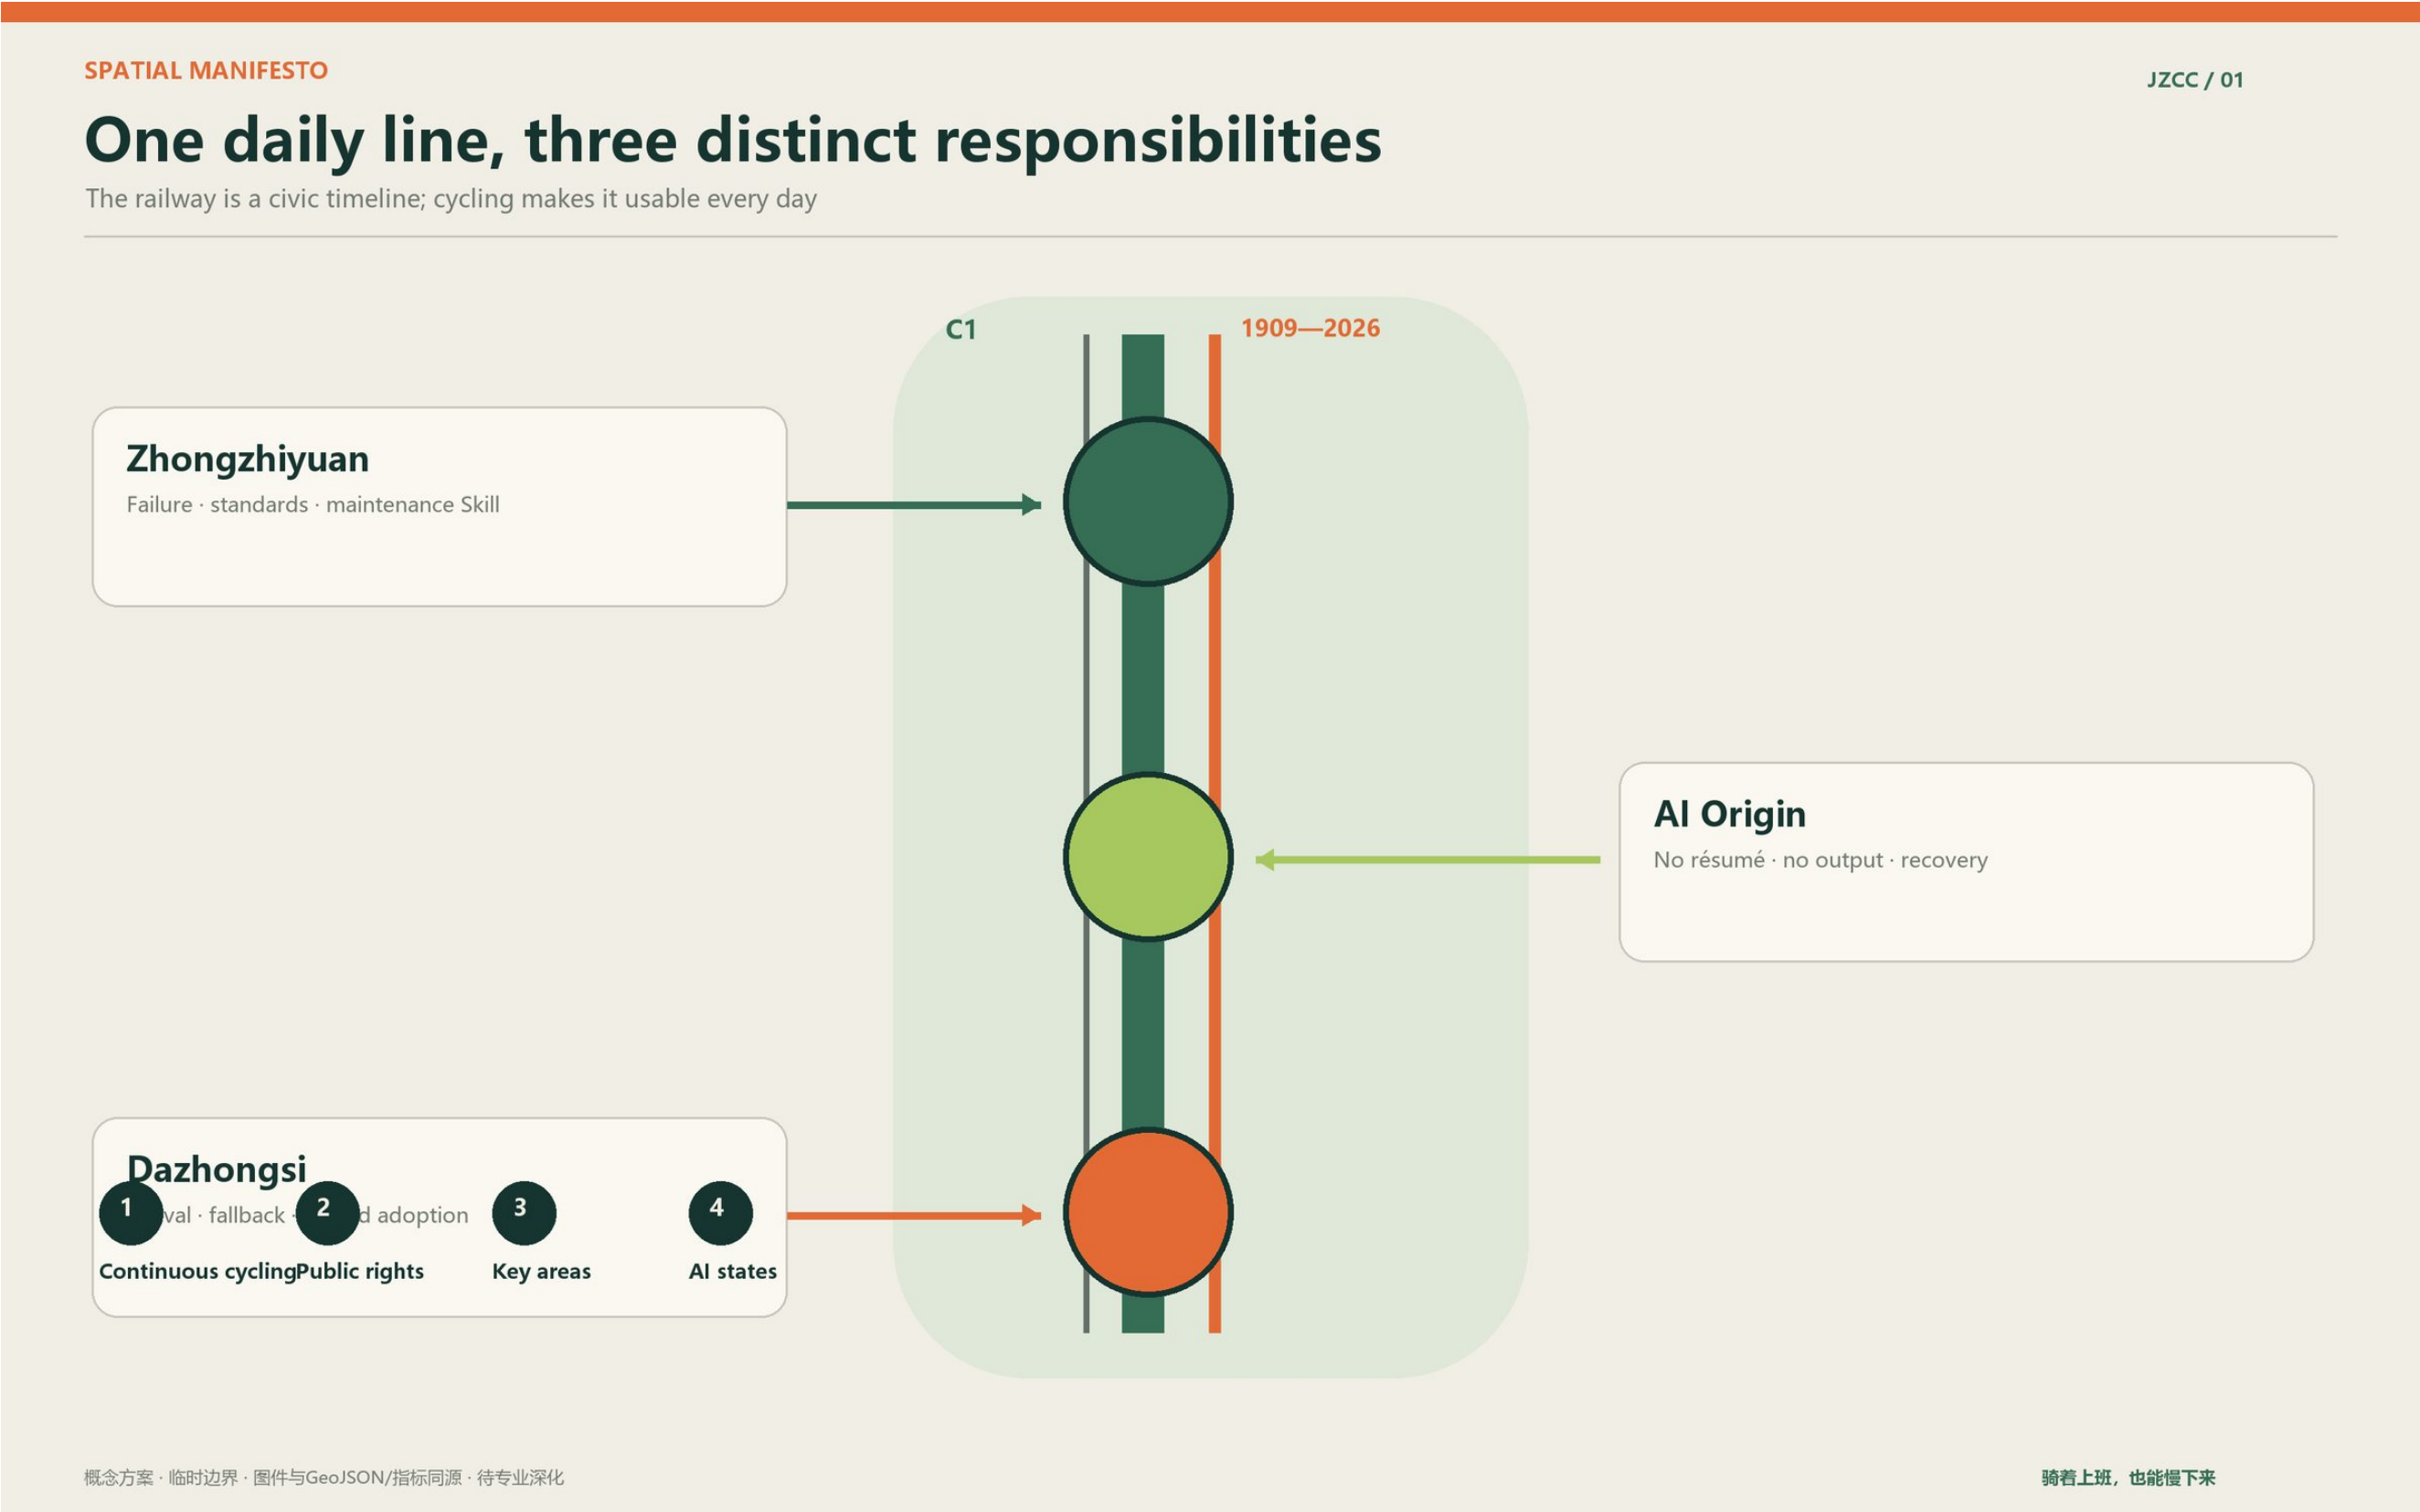

JZCC / 01

One daily line, three distinct responsibilities

The railway is a civic timeline; cycling makes it usable every day

A public contract

概念方案 · 临时边界 · 图件与GeoJSON/指标同源 · 待专业深化

骑着上班，也能慢下来

The proposal gives the corridor a daily use before adding spectacle.

Concept design / provisional geometry / professional verification required

Masterplan logic

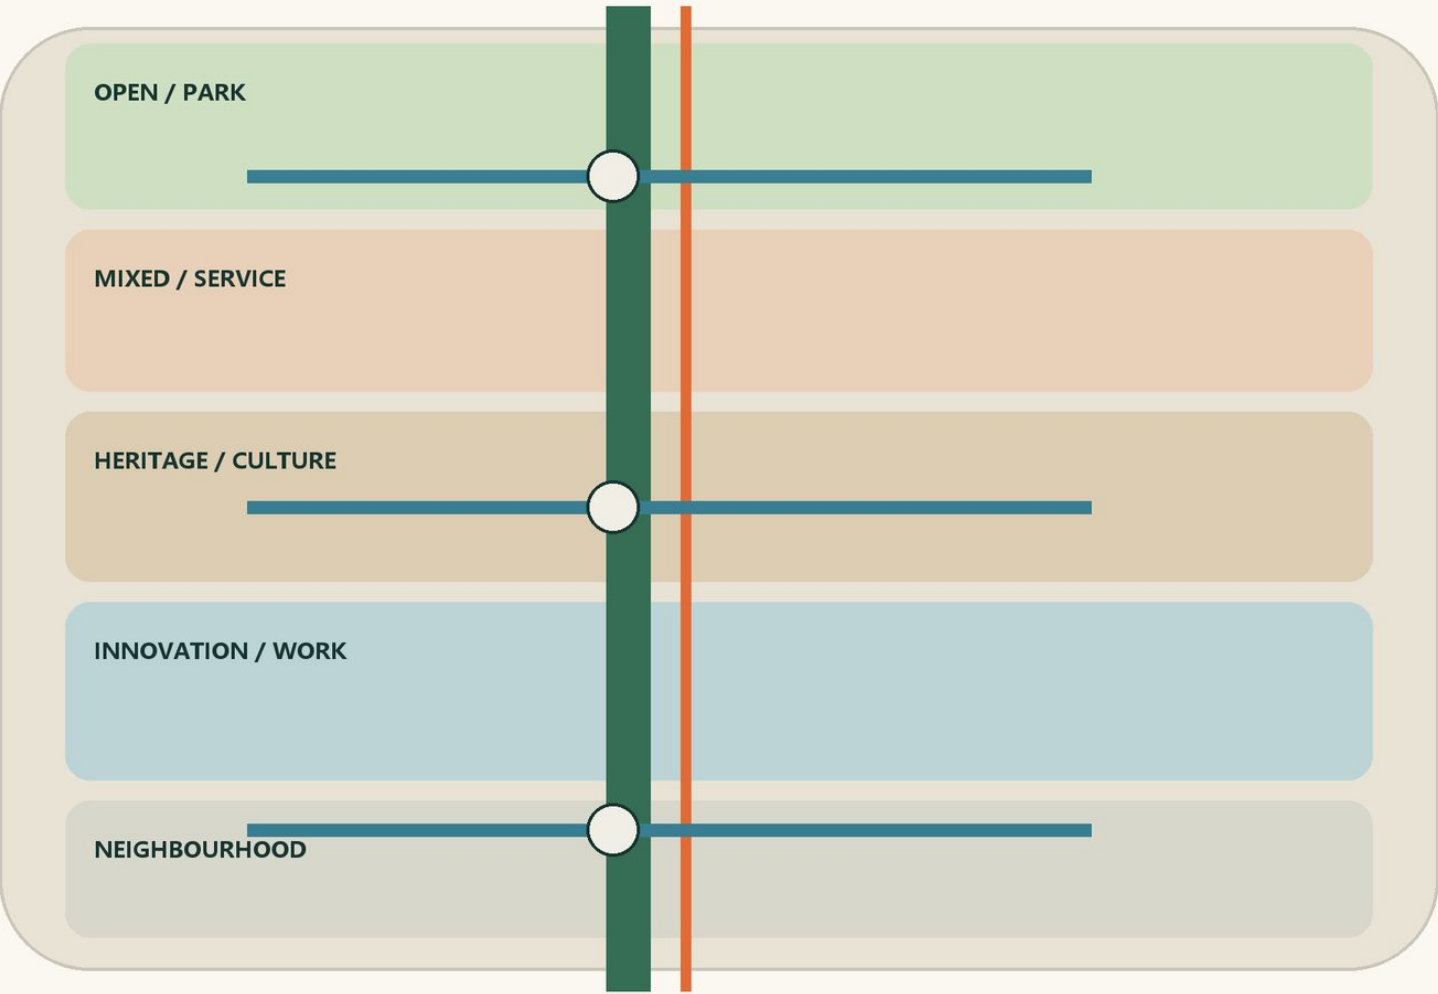

MASTERPLAN LOGIC

JZCC / 02

Spatial structure is a contract

Repair continuity before adding programmes

11.4 km² / PROVISIONAL DESIGN MODEL

C1

No events or queues

C2

Campus-park-community links

C3

Slow railway heritage reading

C4

Family cycling skills loop

OFF

Services work without scanning

概念方案 · 临时边界 · 图件与GeoJSON/指标同源 · 待专业深化

骑着上班，也能慢下来

Continuity repair and ordinary services precede devices.

Concept design / provisional geometry / professional verification required

Three areas, three duties

THREE DUTIES

JZCC / 03

Do not build the same AI showroom three times

Each district owns a different decision in the public adoption chain

01 ZHONGZHIYUAN

Know when it is wrong

Manual baseline

bounded trial

repair

retirement

Water and light

Racks and obstruction

Maintenance Skill Forge

02 AI ORIGIN

Prove nothing to belong

Quiet coexistence

optional help

leave no profile

Unprogrammed quiet

Age-separated branches

AI off by default

03 DAZHONGSI

Decide whether to adopt

Interchange

fallback

limited adoption

review

Cycling arrival

Staff and paper maps

Adopt/stop notice

概念方案 · 临时边界 · 图件与GeoJSON/指标同源 · 待专业深化

骑着上班，也能慢下来

Test failure, provide recovery, then decide adoption.

Concept design / provisional geometry / professional verification required

Three spatial prototypes

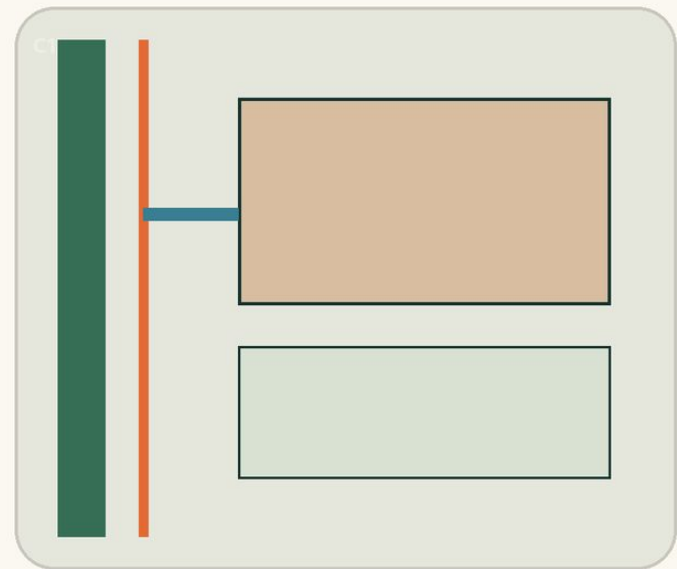

SPATIAL PROTOTYPES

JZCC / 11

Three spatial types, not three copies

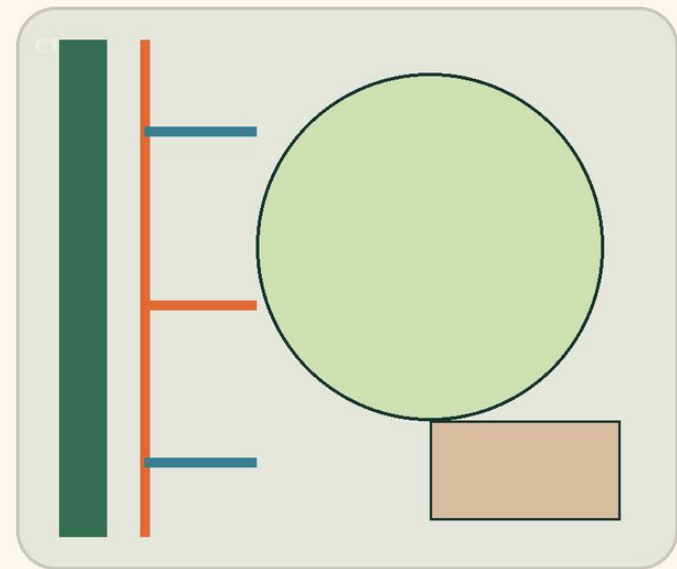

Indicative modules clarify adjacency and conflict; exact plans await official survey

ZHONGZHIYUAN / TEST YARD

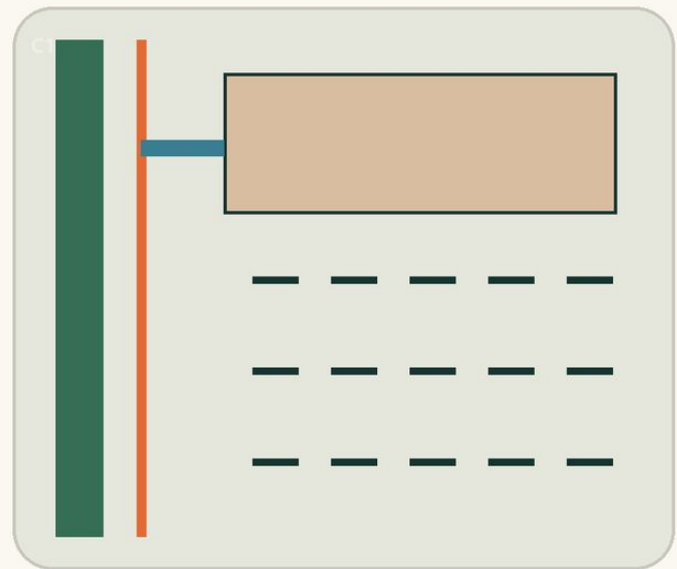

- Clear C1
- Repair + test shed
- Open ticket wall
- Paid staff rest

AI ORIGIN / RECOVERY

- Unprogrammed core
- Lawn + woodland
- Walk/run branches
- Optional help room

DAZHONGSI / ARRIVAL

- Cycling forecourt
- Sorted parking + repair
- Staff + paper service
- Adoption review room

概念方案 · 临时边界 · 图件与GeoJSON/指标同源 · 待专业深化

骑着上班，也能慢下来

Modules clarify adjacency without pretending to be surveyed site plans.

Concept design / provisional geometry / professional verification required

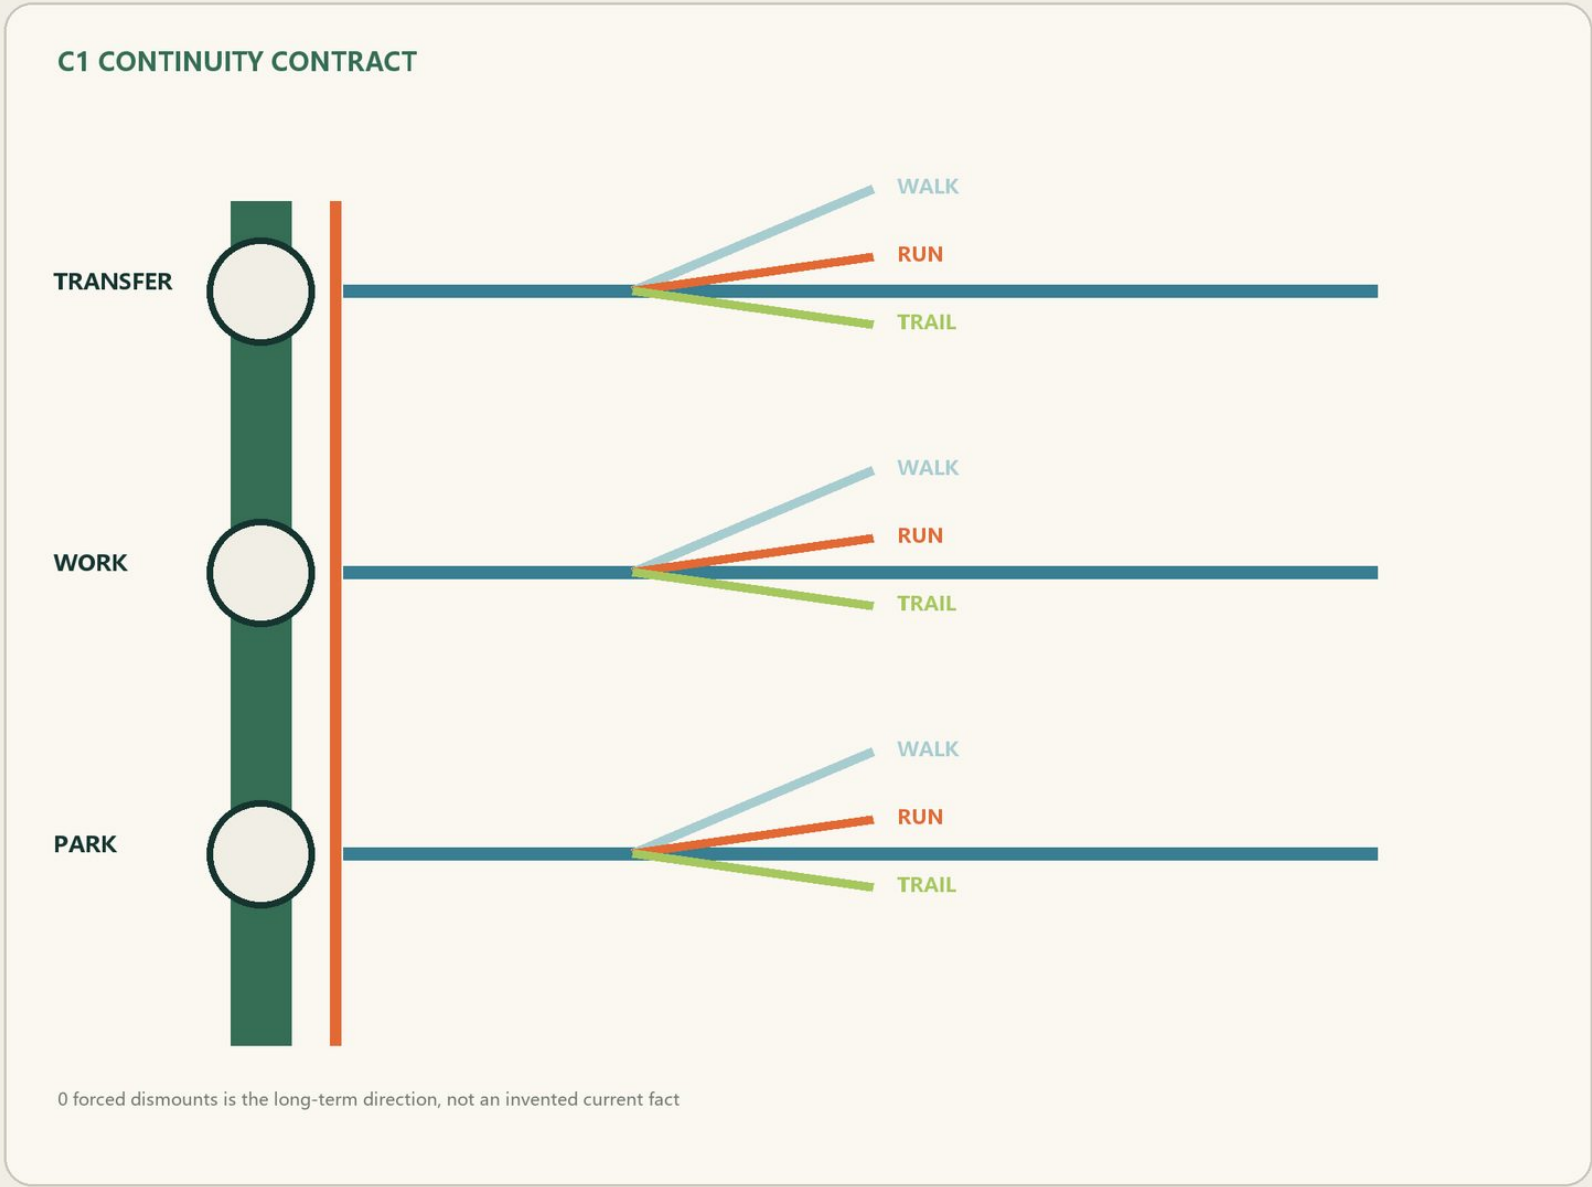

Cycling and comfort

MOBILITY + COMFORT

JZCC / 04

The bicycle is the trunk, not decoration

Walking, running and trail routes branch without breaking commuter reliability

RIGHT OF WAY

C1 stays clear; temporary events use branches

ARRIVAL

Sorted racks, cargo bays, pumps, lockers, changing

CLIMATE

Shade, water, rain cover, leaves and ice inspection

SAFETY

Slow crossings, night lighting, AED and staffed help

TRAIL

Light, reversible, away from sensitive habitat

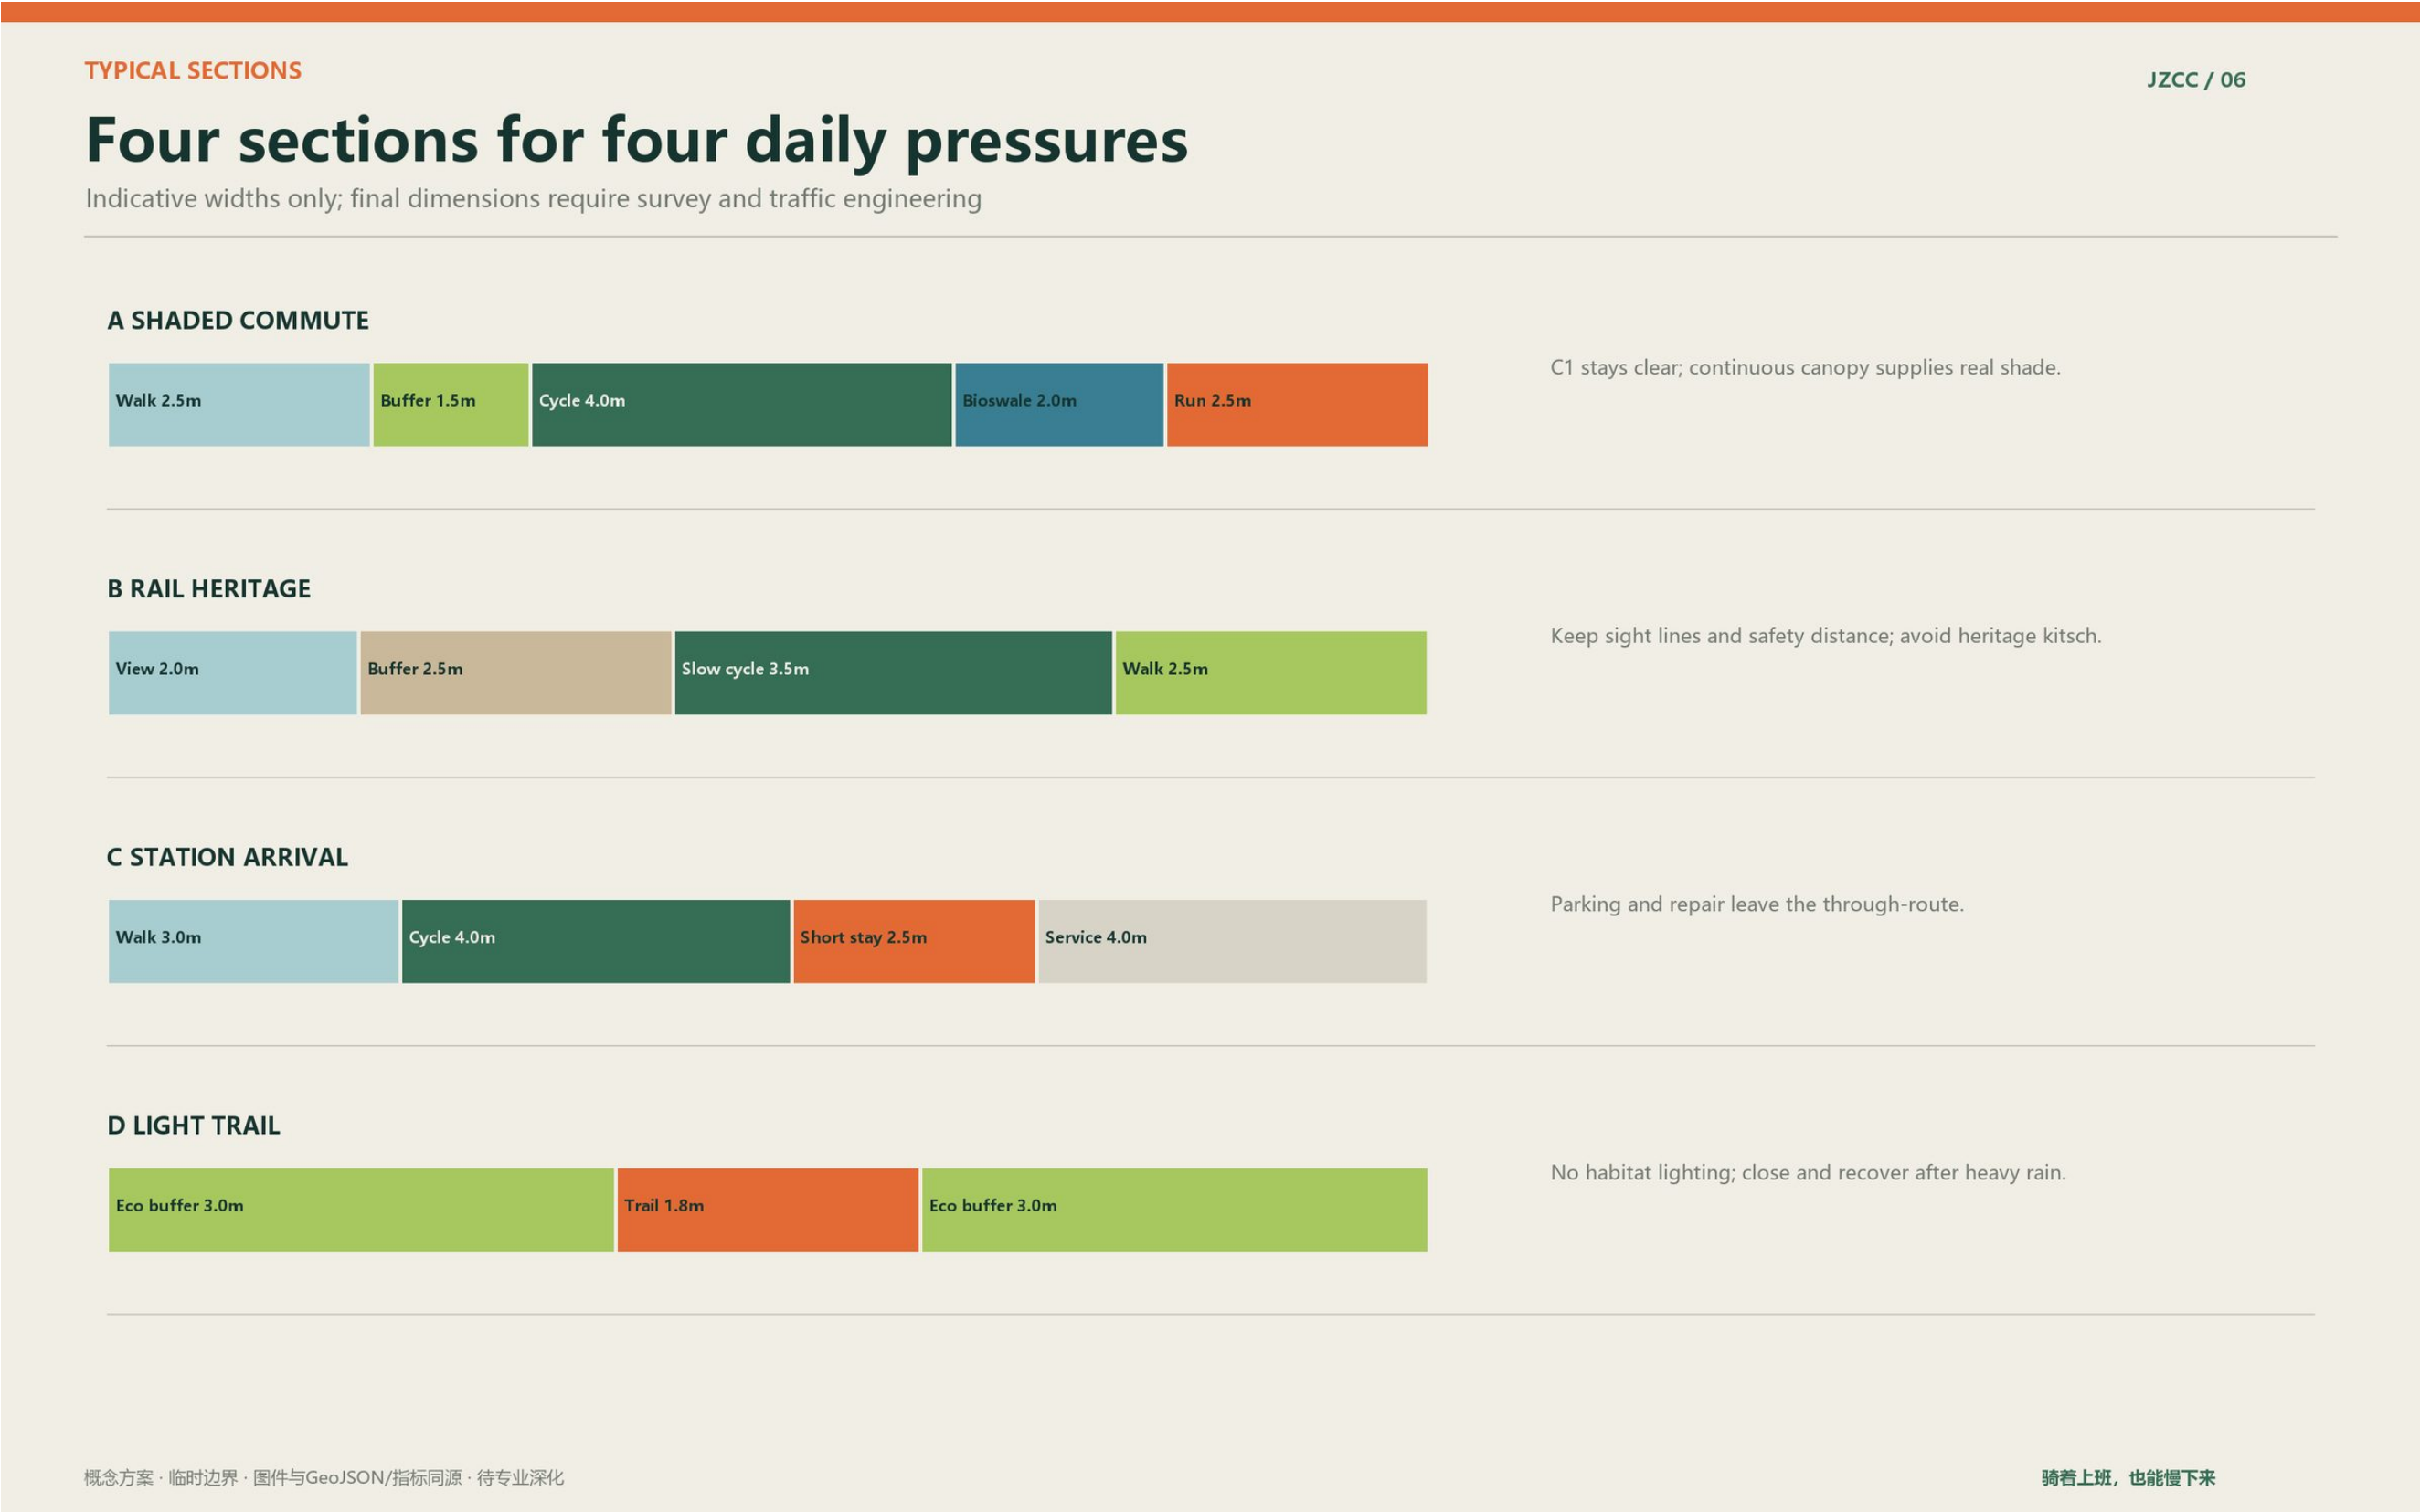

概念方案 · 临时边界 · 图件与GeoJSON/指标同源 · 待专业深化

骑着上班，也能慢下来

C1 is a commuter trunk; other speeds become branches.

Concept design / provisional geometry / professional verification required

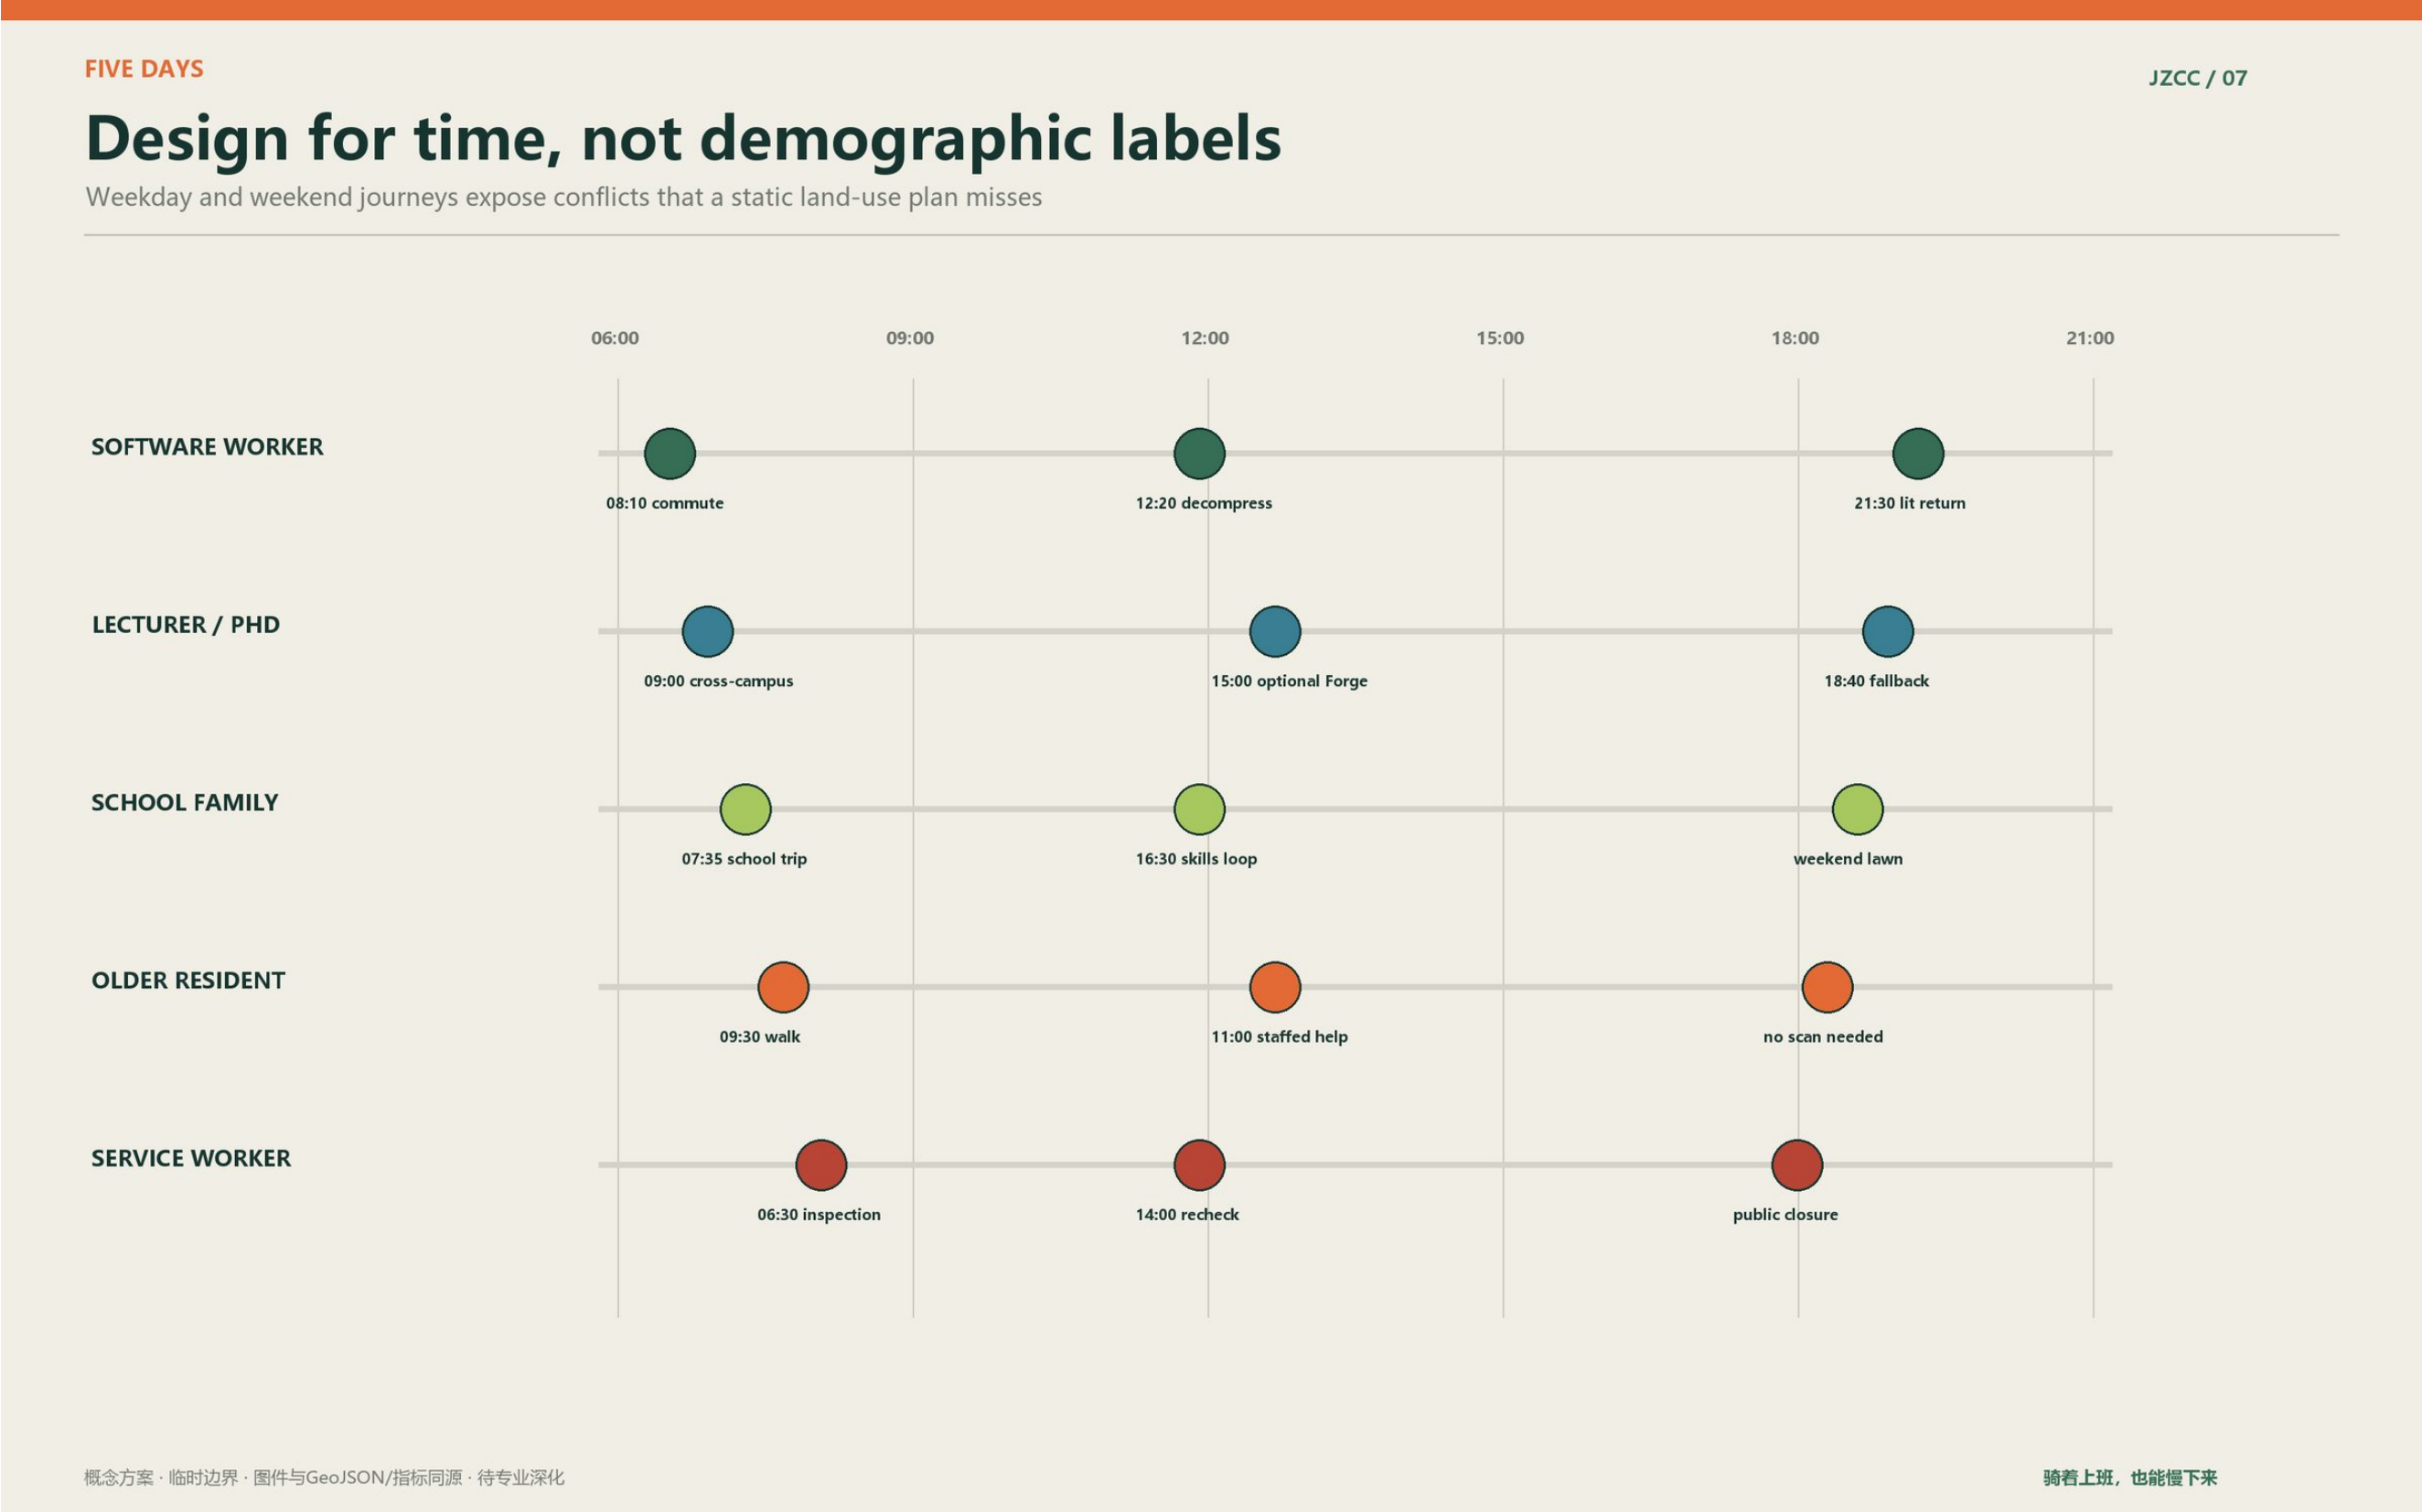

Indicative sections

Widths are indicative and require professional design.

Concept design / provisional geometry / professional verification required

Five daily journeys

Timed journeys expose weekday and weekend conflicts.

Concept design / provisional geometry / professional verification required

Twelve scenario cards

12 SCENARIO CARDS

JZCC / 08

Every smart service keeps an ordinary way through

A scene is complete only when baseline, bounded AI, operator and stop rule are visible

概念方案 · 临时边界 · 图件与GeoJSON/指标同源 · 待专业深化

骑着上班，也能慢下来

Every smart service retains a normal route through.

Concept design / provisional geometry / professional verification required

Projects and dependencies

Build ordinary value before smart value

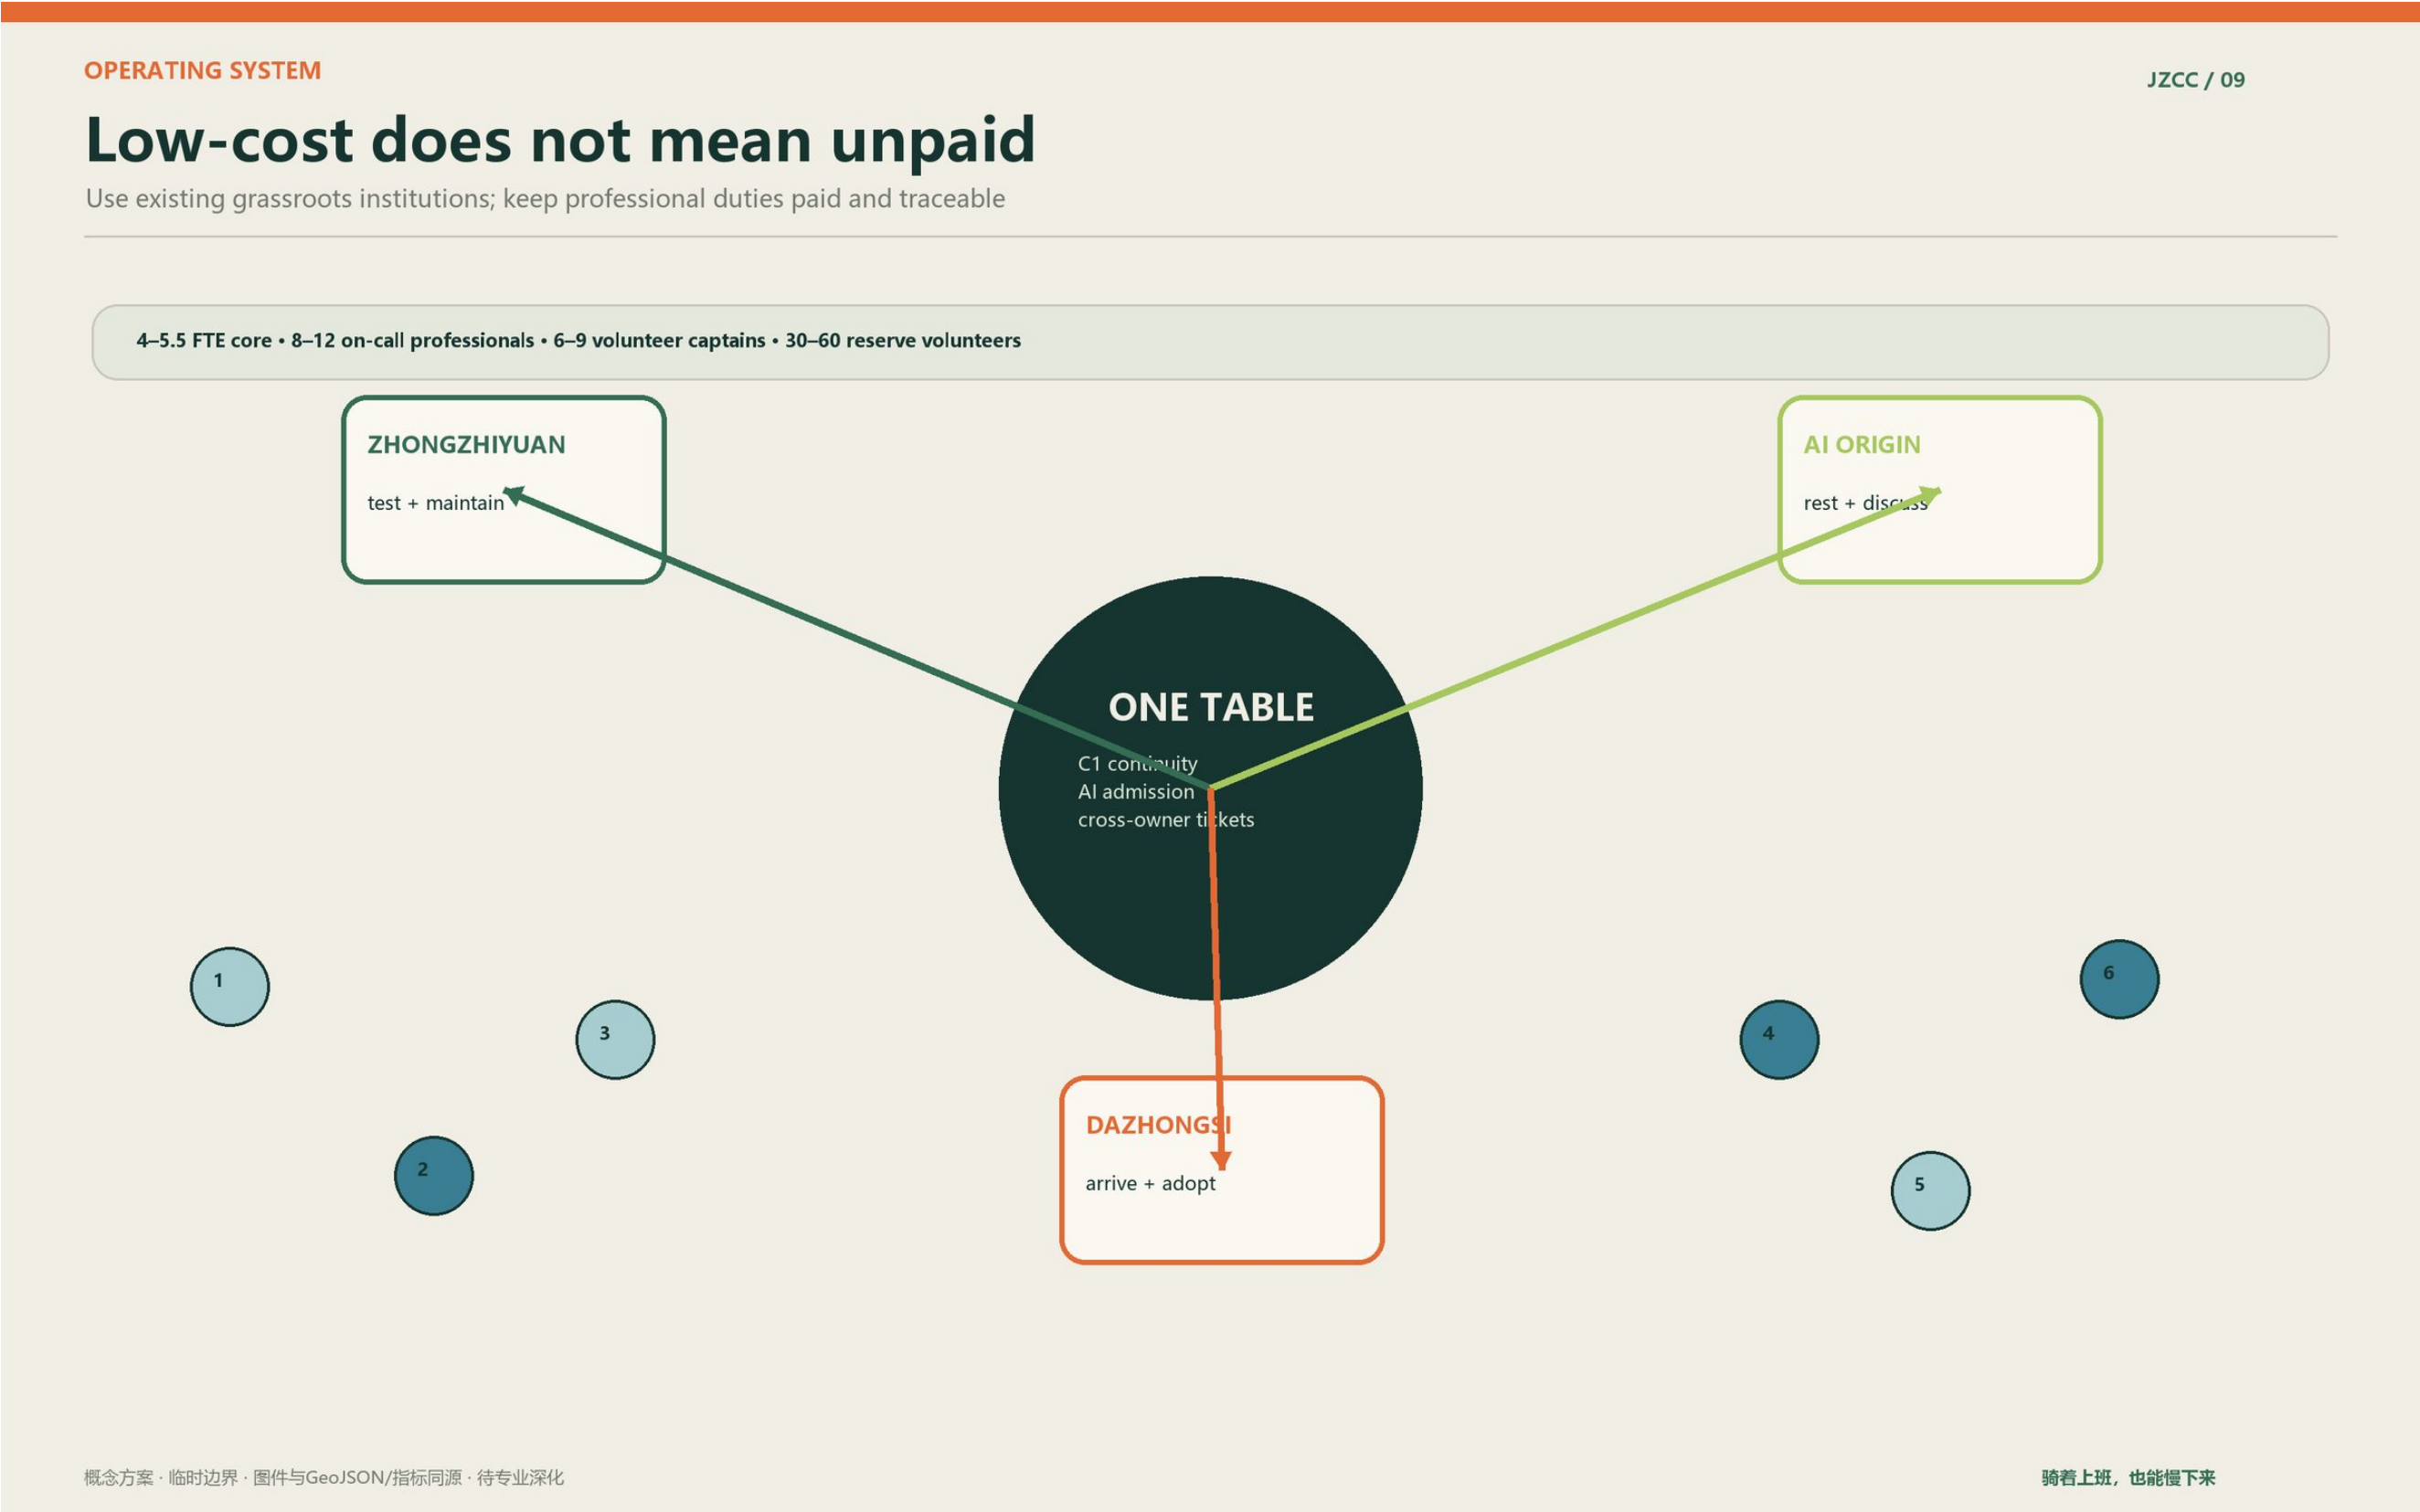

Cost bands are comparative only; ownership, engineering and procurement remain to be verified

PROJECT	PHASE	COST	LEAD / DUTY	DEPENDENCY	EXIT
C1 break repair	0-1	M	Transport + local	Survey / right of way	Restore passage
Shade + water	1	M	Park + maintenance	Trees / water quality	Ordinary facility
Racks + repair	1	L	Station operator	Ownership / fire	Move or remove
AI Origin recovery	1-2	M	Local + park	Quiet / care	Keep ordinary park
Maintenance Forge	2	M	Campus + firm	Contract / safety	Remove tech
First-km test	2	L	Transport + campus	Manual baseline	Manual inspection
AI admission sheet	2	L	Table + compliance	Operator / data	Reject or retire
Dazhongsi adoption	3	M	Station + operator	Two-season review	Restore fallback

Ordinary projects lead; smart projects wait for ownership, safety and baseline evidence.

Concept design / provisional geometry / professional verification required

Operating system

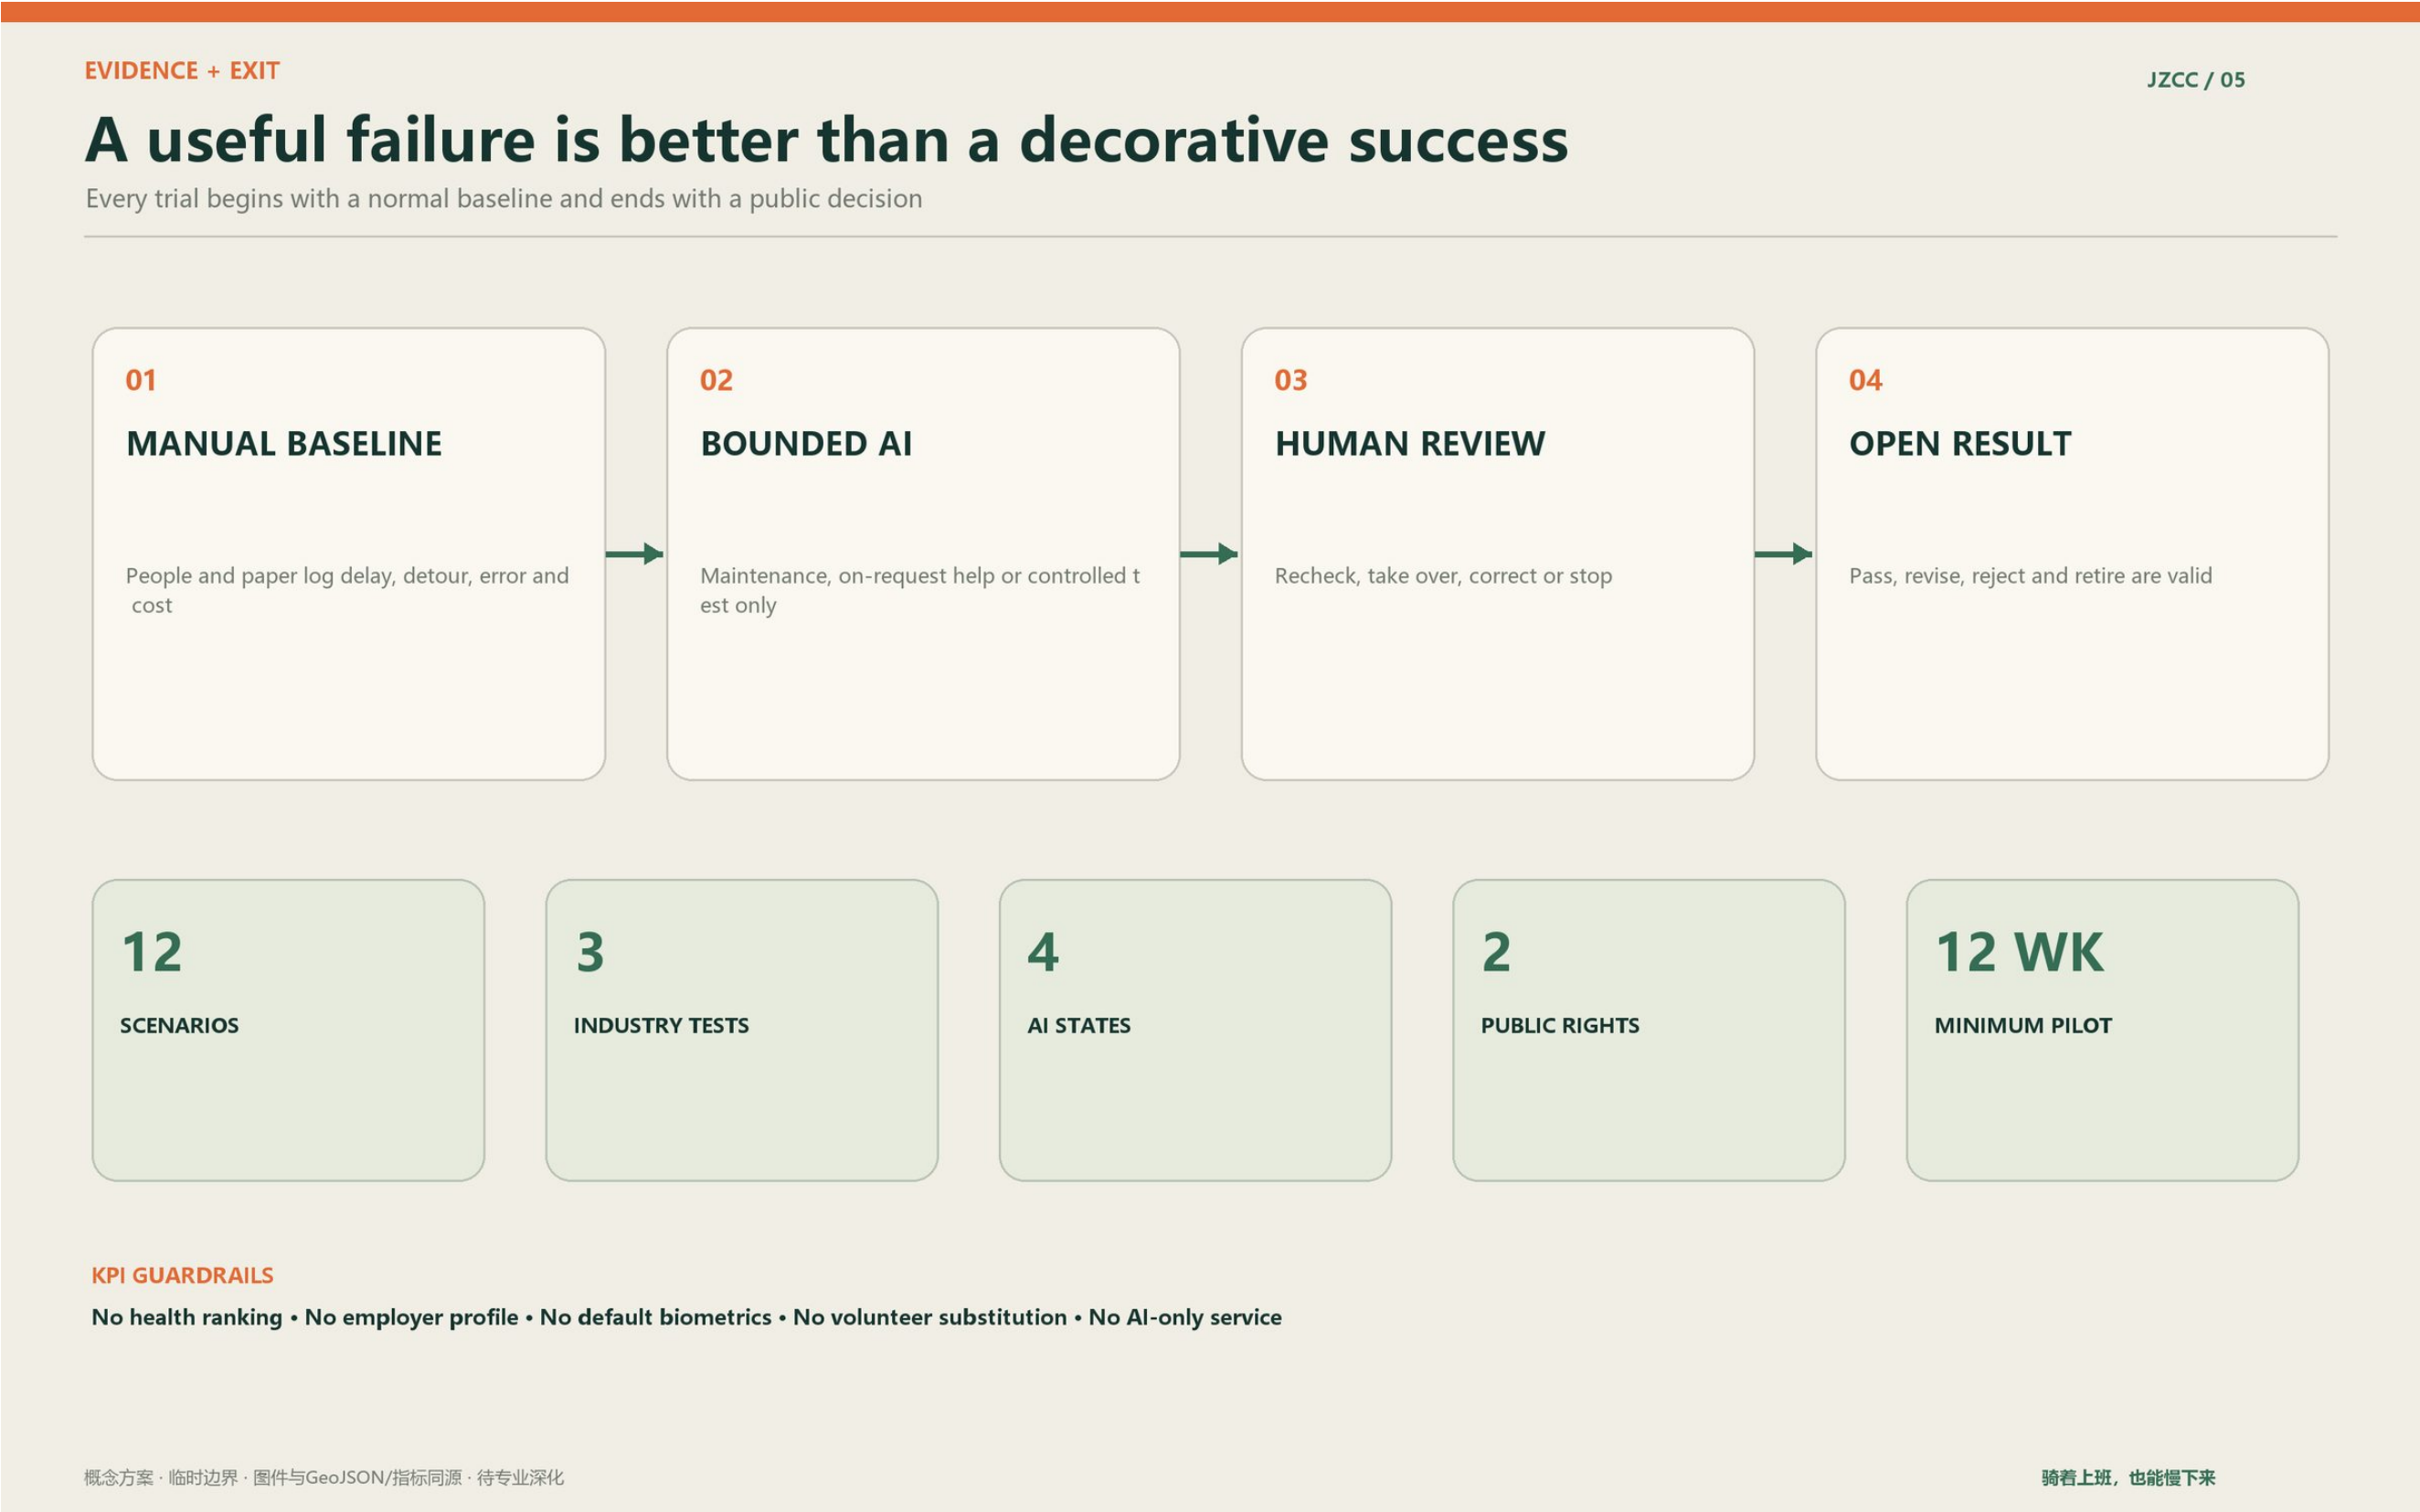

Existing grassroots systems coordinate; professional work stays paid.

Concept design / provisional geometry / professional verification required

Twelve-week pilot

Evidence and exit

AI Origin: recovery without a résumé

The image communicates human scale and restrained technology. Spatial evidence remains in plans, sections, GeoJSON and metrics.

AI-generated conceptual scene; not survey, statutory or construction evidence.

Zhongzhiyuan: maintenance Skill Forge

The image communicates human scale and restrained technology. Spatial evidence remains in plans, sections, GeoJSON and metrics.

AI-generated conceptual scene; not survey, statutory or construction evidence.

Dazhongsi: cycling arrival and adoption

The image communicates human scale and restrained technology. Spatial evidence remains in plans, sections, GeoJSON and metrics.

AI-generated conceptual scene; not survey, statutory or construction evidence.
