

Cover and core concept

ZHANGHEN · JINGZHANG NARRATIVE WAYFINDING BELT

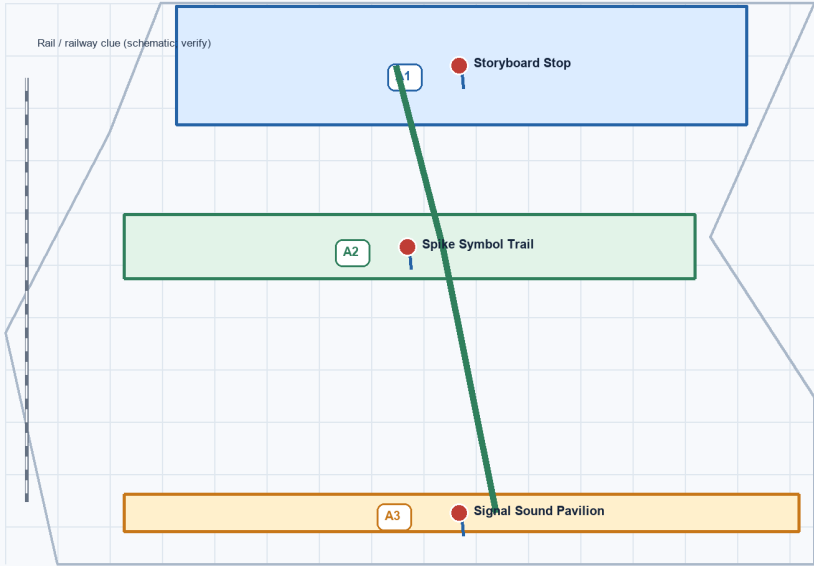

Cultural Storytelling Sign System Concept · WAYMARK·JZ (internal working codename)

Reading — Walking — Listening · One Belt, Three Stations

All content is conceptual advice; nodes, spaces and test thresholds are provisional, for professional-team deepening and joint confirmation before launch.

Key-area spatial index · three areas, three stations, connection objects

Spatial types, road/rail/station clues and agent.4 public routes (concept diagram)

Zhongzhiyuan AI Autonomous Innovation Acceleration Area

Station: Spike Symbol Trail
Type: Rail Heritage Stitch Promenade
Operator: park public-space team + university evaluator

Beijing AI Origin Community

Station: Storyboard Stop
Type: community reading / co-creation gateway
Operator: community council + volunteer alliance

Dazhongsi AI Industry Cluster

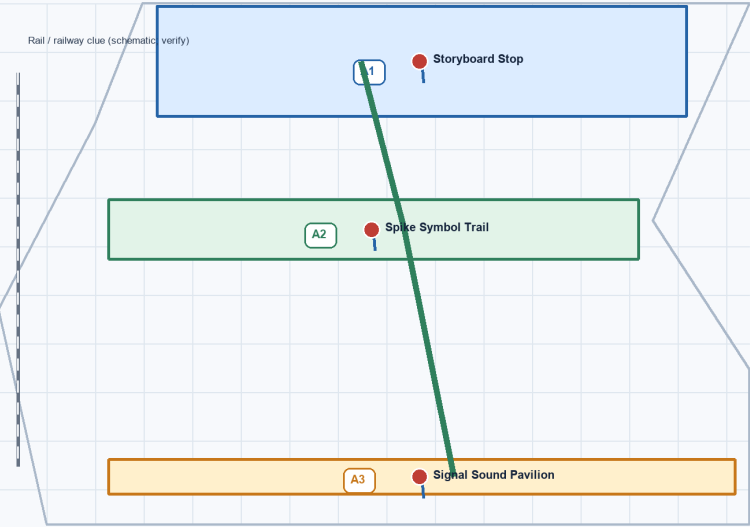

Station: Signal Sound Pavilion
Type: Cross-street Slow Gateway + convertible station-front space
Operator: park team + merchant group; consumption/business test

Public route: read -> walk -> listen; human guides, paper/tactile boards and mute mode remain fallback

Overview and spatial index

Key-area spatial index · three areas, three stations, connection objects

Spatial types, road/rail/station clues and agent.4 public routes (concept diagram)

Zhongzhiyuan AI Autonomous Innovation Acceleration Area
Station: Spike Symbol Trail
Type: Rail Heritage Stitch Promenade
Operator: park public-space team + university evaluator

Beijing AI Origin Community
Station: Storyboard Stop
Type: community reading / co-creation gateway
Operator: community council + volunteer alliance

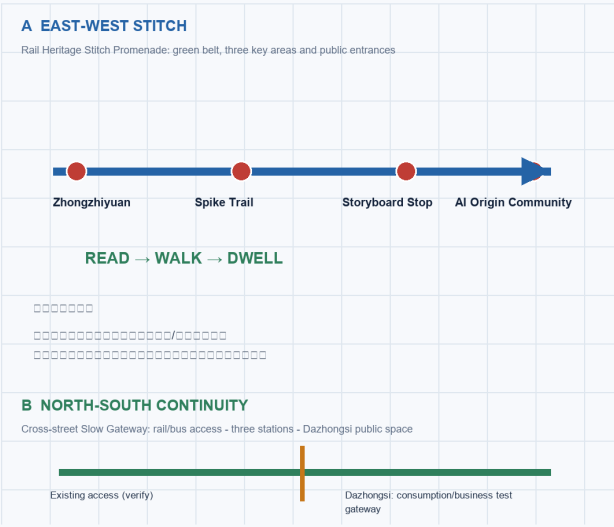

Dazhongsi AI Industry Cluster
Station: Signal Sound Pavilion
Type: Cross-street Slow Gateway + convertible station-front space
Operator: park team + merchant group; consumption/business test

Public route: read -> walk -> listen; human guides, paper/tactile boards and mute mode remain fallback

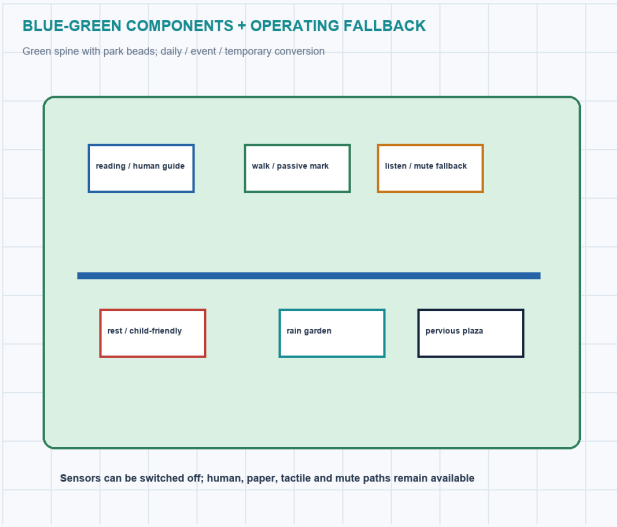

EVIDENCE: geometry/key_areas.geojson · geometry/roads.geojson · geometry/public_space.geojson · compliance_matrix.jsonagent.4
PROVISIONAL · concept boundary · not an official redline · recompute after official data · for review and professional deepening

Slow movement and blue-green public space · east-west stitch / north-south continuity

Two public routes and convertible spatial components (concept diagram, not engineering alignments)

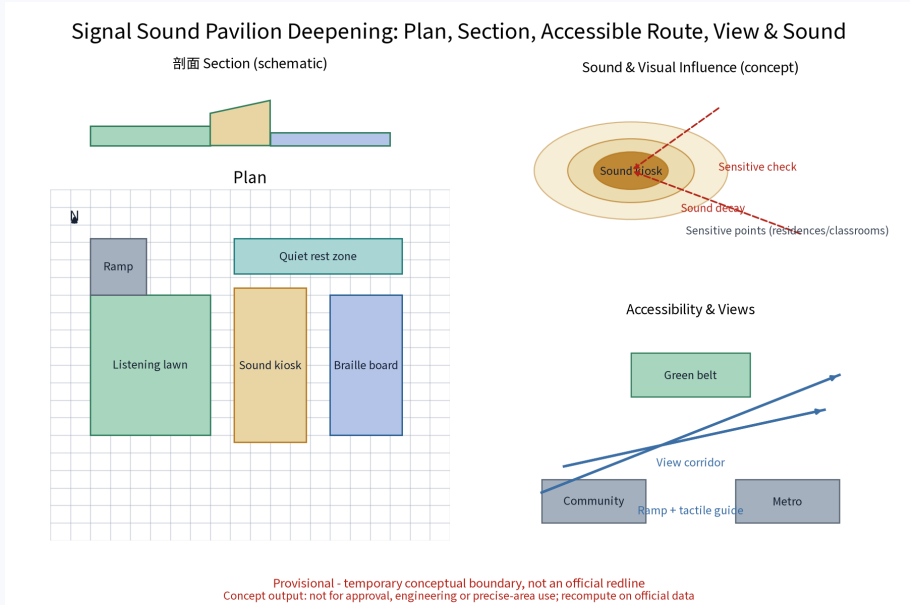

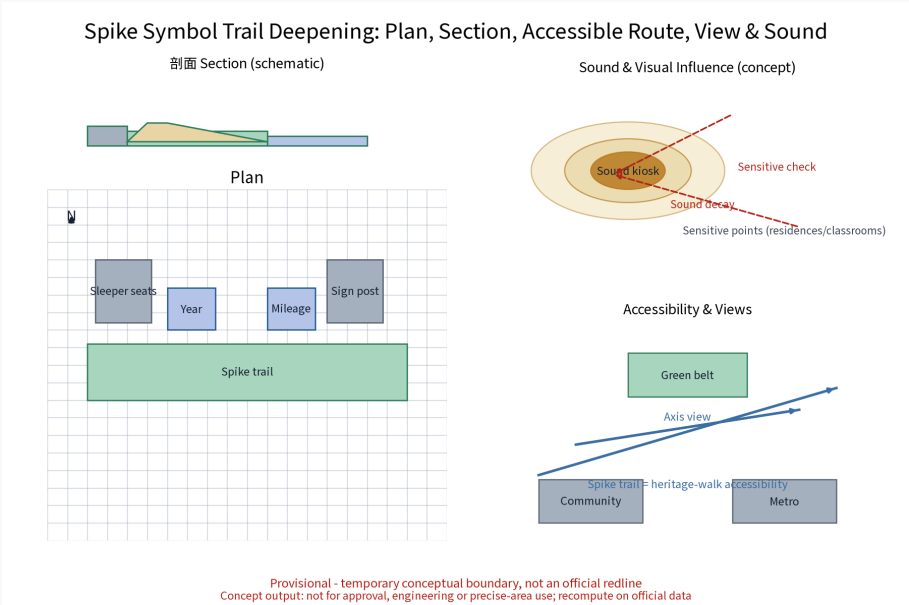

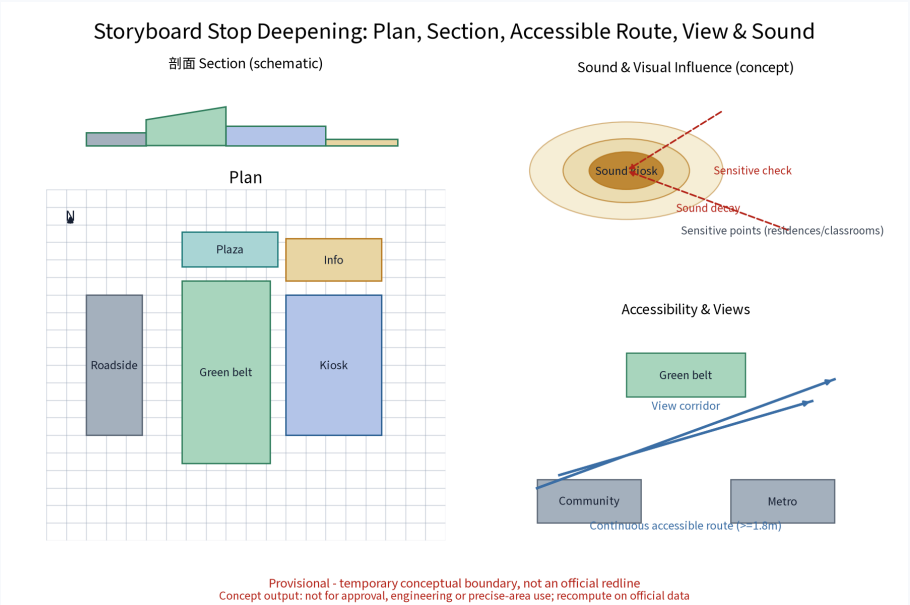

EVIDENCE: geometry/roads.geojson · geometry/green_space.geojson · geometry/public_space.geojson · DATA-SRC.MOHURD-URBAN-DESIGN-MEASURES
PROVISIONAL · concept boundary · not an official redline · recompute after official data · for review and professional deepening

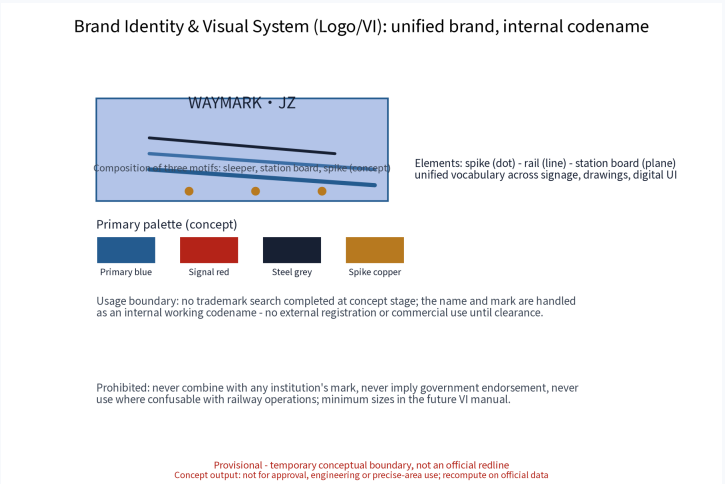

Three areas, three stations and road/rail/station clues plus east-west and north-south routes are conceptual; see geometry and compliance_matrix.

Brand and three stations

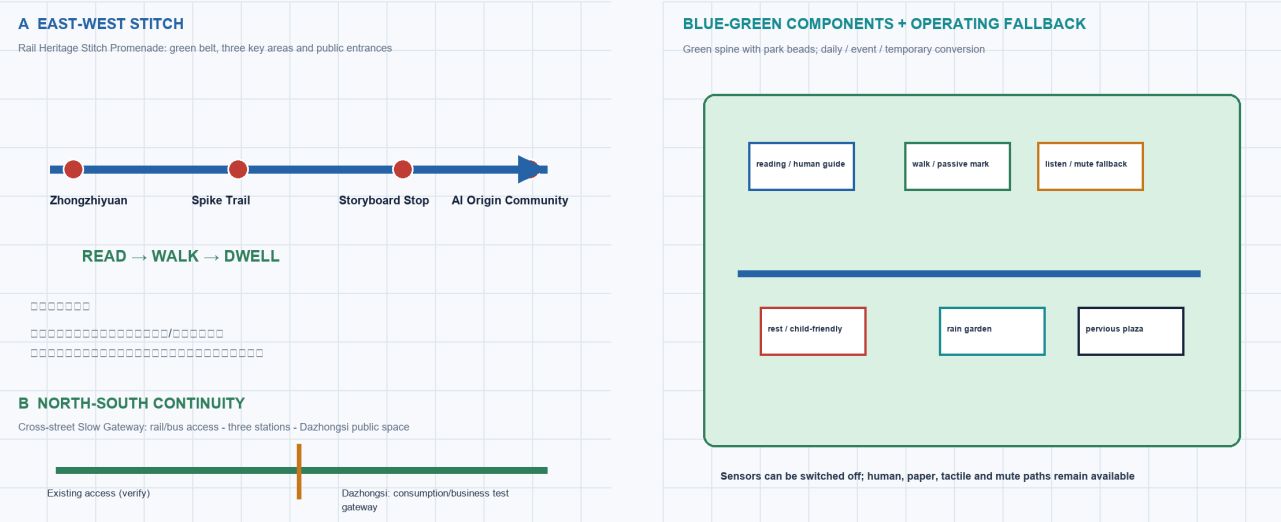

Fixed hierarchy: the English primary brand is ZHANGHEN · JINGZHANG NARRATIVE WAYFINDING BELT; WAYMARK·JZ is internal only; the Chinese title is kept as a translation counterpart.

agent.4 spatial-scenario-operation crosswalk

Slow movement and blue-green public space · east-west stitch / north-south continuity

Two public routes and convertible spatial components (concept diagram, not engineering alignments)

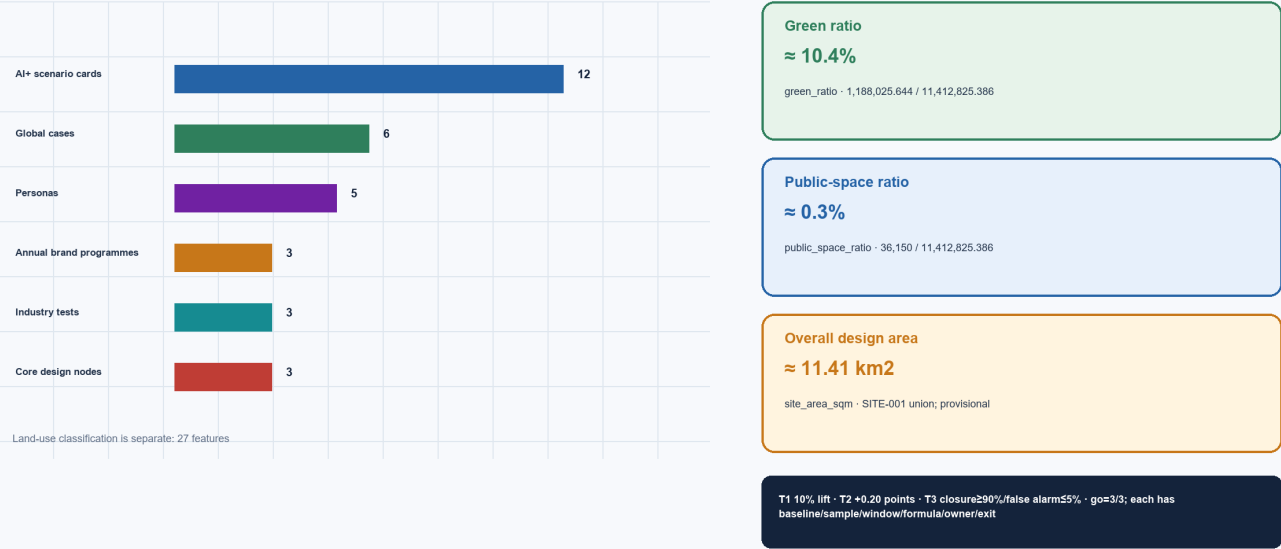

EVIDENCE: geometryloads.geojson · geometrygreen_space.geojson · geometrypublic_space.geojson · DATA-SRC-MOHURD-URBAN-DESIGN-MEASURES

PROVISIONAL · concept boundary · not an official redline · recompute after official data · for review and professional deepening

Metric evidence · counts, ratios and pilot thresholds separated

Geometry-recomputable metrics stay known/provisional; T1-T3 are participant proposals, not results

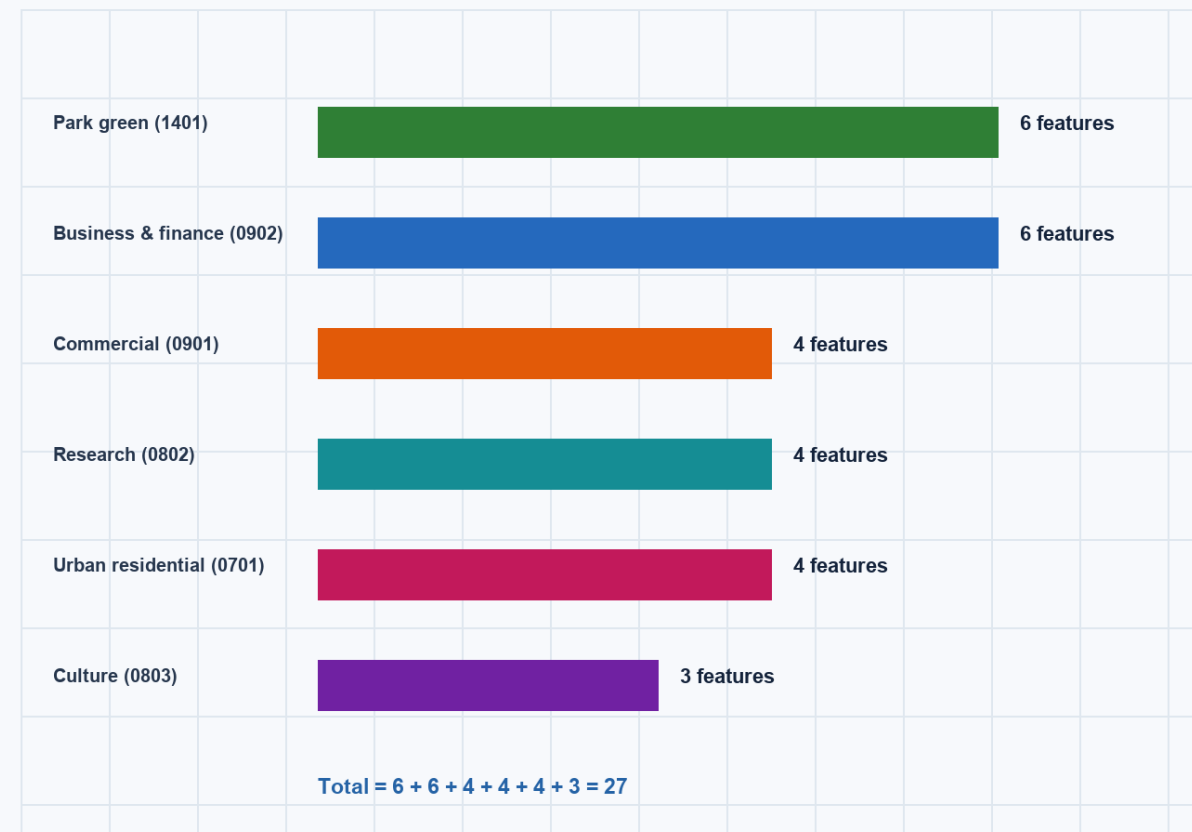

EVIDENCE: metrics.json · visualassets/test_protocols.json · geometrysite_boundary.geojson · geometrygreen_space.geojson · geometrypublic_space.geojson

PROVISIONAL · concept boundary · not an official redline · recompute after official data · for review and professional deepening

agent.4: Zhongzhiyuan—Spike Trail—innovation test; AI Origin Community—Storyboard Stop—reading/co-creation; Dazhongsi—Signal Pavilion + convertible station-front space—intelligent-native consumption/business test. Human, paper, tactile and mute fallbacks remain.

27-feature language

Functional counts are separate from geometry ratios; provisional, not existing or statutory land use

Green-ratio caliber

Numerator: union of six GREEN_SPACE features = 1,188,026 sqm

Denominator: SITE-001 union = 11,412,825 sqm

Ratio: $1,188,025.644 / 11,412,825.386 = 10.4096\% \approx 10.4\%$

The 6/27 code-1401 count is classification only, not the numerator.

Scope and use boundary

The 27 features come from geometry/land_use.geojson; all are design_proposal and low-confidence.

The structure shows relative configuration only, not existing land use, green lines, tenure or approvals.

When official boundaries, green lines and statutory classes arrive, rerun the same union/classification caliber and refresh text, figures, HTML and A0/A3.

EVIDENCE: geometry/land_use.geojson (27 features) · geometry/green_space.geojson · geometry/site_boundary.geojson · metrics.json#land_use_zone_count

PROVISIONAL · concept boundary · not an official redline · recompute after official data · for review and professional deepening

T1-T3 pilots and phasing

Pilot protocol matrix · T1-T3 and go/no-go

Participant-proposed · provisional · non-official; jointly confirm before launch

T1 Visit conversion

Zhongzhiyuan AI Autonomous Innovation Acceleration Area

B 4 weeks + P 4 weeks · >=30 eligible groups each
Formula: completed_visits / eligible_bookings; lift >= 10%
Owner: park operator + university; miss or P0 -> NO-GO

participant-proposed / provisional / non-official

T2 Talent signal

Beijing AI Origin Community

B 4 weeks + P 4 weeks · >=30 valid questionnaires each; validity >=80%
Formula: pilot_mean - baseline_mean; difference >= 0.20 points
Owner: community council + university; miss -> redesign and rebaseline

participant-proposed / provisional / non-official

T3 Operations supply

Dazhongsi AI Industry Cluster

B 4 weeks + P 8 weeks · >=50 eligible work orders; rolling 2-week review
Formula: 24h closure rate and false alarms; >=90% and <=5%
Owner: park operations + merchants; 2-week miss or re-identification -> stop

participant-proposed / provisional / non-official

GO go/no-go gate

Three-protocol joint gate

Compute after T1/T2/T3 windows; formula: passed_protocols / 3
Threshold: 3/3 and zero privacy, heritage, accessibility or transport-safety P0
Owner: temporary review group + professional confirmation; any miss -> NO-GO

participant-proposed / provisional / non-official

EVIDENCE: visual/assets/test_protocols.json · proposal.en.md §Renewal Projects, Implementation Policy, and Phasing

PROVISIONAL · concept boundary · not an official redline · recompute after official data · for review and professional deepening

T1 visit conversion, T2 talent signal, T3 operations supply and go/no-go are participant-proposed, provisional and non-official; full caliber is in test_protocols.json.
