01 Basis and three-level scope

Three-level scope framework

The 43.6 km² research scope covers ecosystem and two-wing synergy; the 11.4 km² design scope carries renewal, land use, mobility and the heritage park belt; the ~368.4 ha key-area scope (announced approx.; ~369.3 ha by provisional recompute, not an official precise area) delivers implementation-oriented concept design. All conclusions remain bounded by the provisional boundary.

Basis and evidence tiers

Formal: announcement, agent taskbook, professional standards; background: three-areas-two-wings, Haidian 1+X+1; provisional-only: organizer's rough boundary. 42 known metrics are provisional-derived and recomputed with the spatial-review method (areas 3-decimal, ratios 6-decimal); 5 unknown metrics (FAR, GFA, height, road area, road ratio) carry reasons.

Originality and rights

Naming, logo, colours and copy are original; no unauthorised trademarks, fonts or corporate marks. Figures and PDFs render with local system fonts; HTML pages embed a Noto Sans SC subset (SIL OFL 1.1, redistributable, full licence text in report/copyright_statement.md Appendix A) so Chinese text stays readable offline.

FAR, height, GFA and road area await official controls — all unknown with recompute triggers; no statutory judgement.

0802 研发	547 ha · 47.9% along the vein
05 商服	202 ha · 17.7% at stations
0702 社区	255 ha · 22.3% networked
1401 绿地	137 ha · 12.0% vein system
unknown	FAR/GFA/height/road — awaiting controls

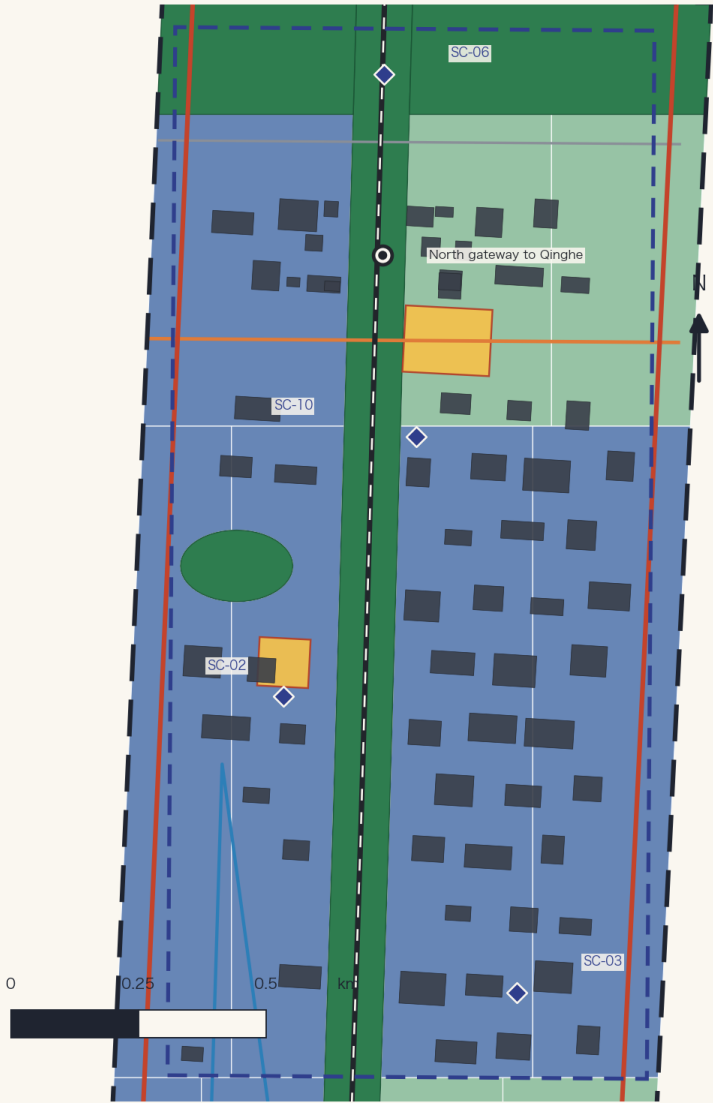

03 Key area 1 · Zhongzhiyuan AI Acceleration Area

Garden-typed full-stack innovation block (≈192.1 ha)

North gateway sequence: exhibition forecourt, red-team sandbox, shared testing garden, Qinghe low-carbon interface. Nodes SC-02/03/06; projects JZ-02/JZ-05; landmark the Eye of the Vein.

Operations and preconditions

Area operator manages access; testing operator runs trials and closures. Preconditions: official boundary, blue line, flood control, red lines, energy and safety.

Key facts

面积	≈192.1 ha (provisional recomputation)
定位	Garden-typed full-stack innovation block
场景节点	SC-02/03/06
更新项目	JZ-02/JZ-05
朝圣地标	Eye of the Vein

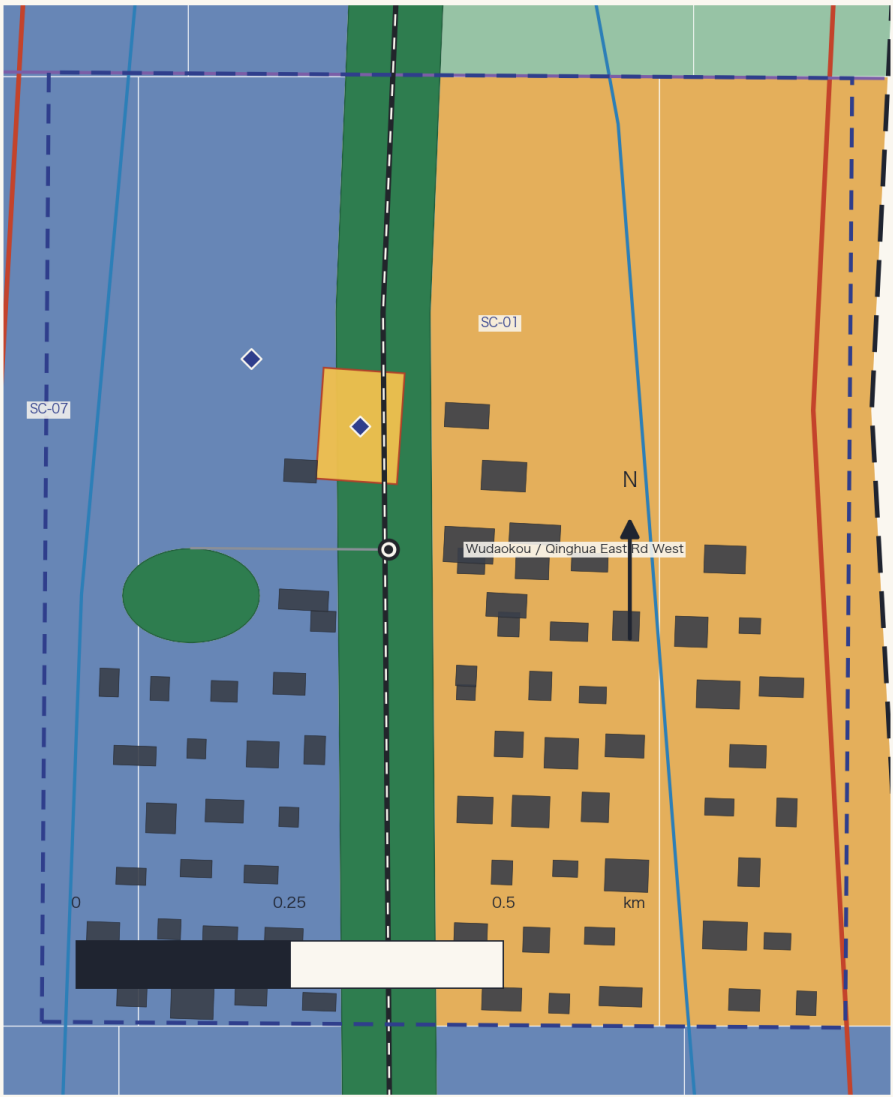

04 Key area 2 · Beijing AI Origin Community

Campus-adjacent transfer and talent community (≈104.3 ha)

Station/campus gateway sequence: Origin Release Hall, transfer street, talent service lounge, shared courts. Nodes SC-01/07/09; projects JZ-03/JZ-06; landmark Qinghuayuan Station (official heritage scope prevails).

Operations and preconditions

Tech-transfer platform handles licensing and tickets; the block operator staffs an assisted-service desk. Preconditions: ownership, existing buildings, stations, capacity and controls.

Key facts

面积	≈104.3 ha (provisional)
定位	Campus-adjacent transfer & talent community
场景节点	SC-01/07/09
更新项目	JZ-03/JZ-06
朝圣地标	Qinghuayuan Station landmark

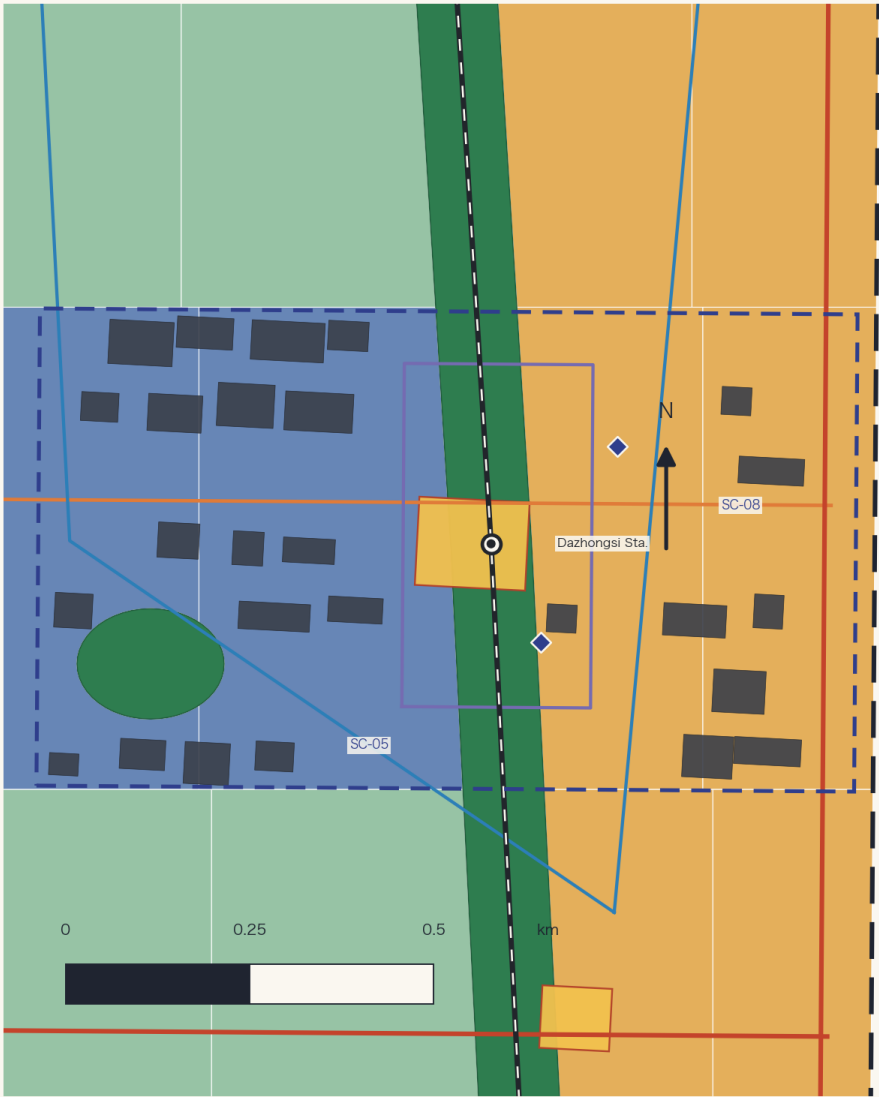

05 Key area 3 · Dazhongsi AI Industry Cluster

Urban intelligent-economy and international block (≈ 72.0 ha)

Station gateway day-night sequence: quadrant walk hall, data-element room, roadshow lounge, park interface. Nodes SC-05/08/10; projects JZ-04/JZ-06; landmark the Data Core.

Operations and preconditions

Area operator runs events; data operator runs licensing, audit and takedowns. Preconditions: station conditions, red lines, utilities, ownership, permits and event safety.

Key facts

面积	≈ 72.0 ha (provisional)
定位	Urban intelligent-economy block
场景节点	SC-05/08/10
更新项目	JZ-04/JZ-06
朝圣地标	Data Core

06 Scenario cards, TVS, mobility and blue-green

12 scenario cards and 3 TVS

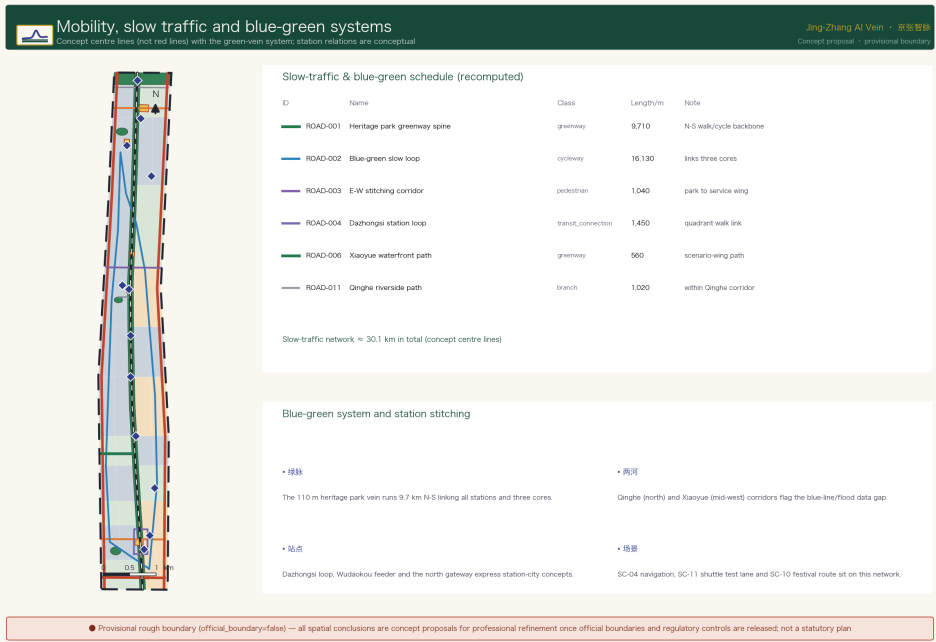

Each card specifies users, nodes, services, lawful data, privacy minimisation, human review/fail-closed, operators, maturity and metrics; SC-02/08/11 are test-validation scenarios with testable blueprints and equivalent human-service channels.

Mobility and blue-green

A 9.7 km greenway spine, a 16.1 km slow loop and E-W stitching corridors form a $\approx$ 30.1 km network. All roads are concept centre lines (not red lines); station integration is conceptual.

Scenario governance

Data minimisation, public sources, explainability and human review; no personal tracking, no commercial profiling; equivalent desk service for non-smartphone users.

07 Phasing and long-term operations

Phasing (discussion scope)

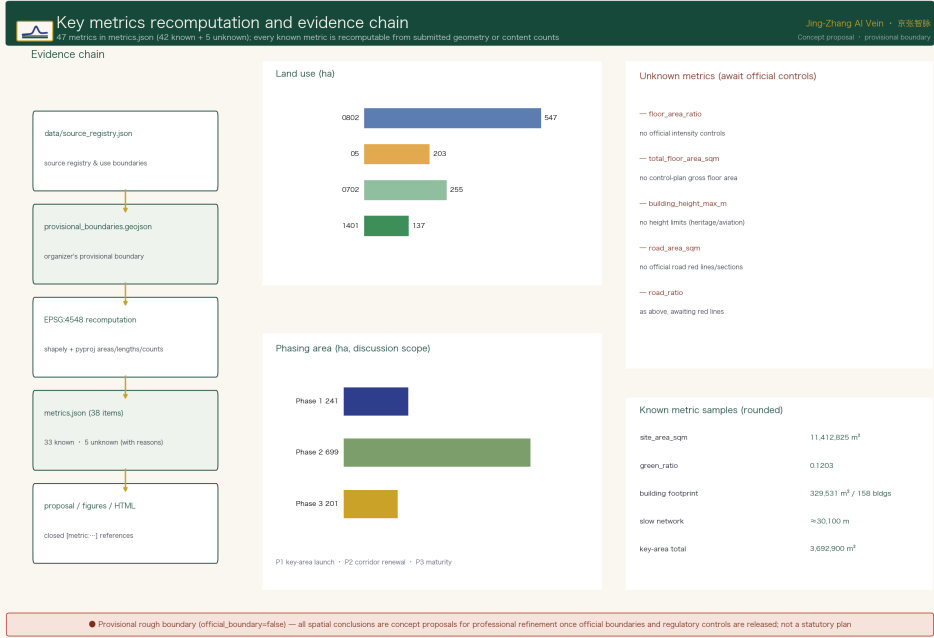

Phase 1 (241 ha) key-area scenario launch; Phase 2 (699 ha) corridor renewal pending controls; Phase 3 (201 ha) Zhongzhiyuan maturity. Concept only, no implementation commitment.

Long-term operations

A four-season twelve-theme calendar under the belt brand (flagship AI Week); developer community assets via contribution walls; scenario opening via apply-assess-publish-operate-review; international outreach with review metrics. All proposed, none confirmed.

Renewal projects (6)

JZ-01 breakpoints, JZ-02 riverfront, JZ-03 transfer street, JZ-04 quadrant link, JZ-05 compute/service node, JZ-06 festival route; each typed with dependencies and risks.

08 Metrics, evidence chain and compliance

Metrics

47 metrics in metrics.json: 42 known recomputed in EPSG:4548 with the spatial-review method (areas 3-decimal, ratios 6-decimal, flagged provisional with warnings); 5 unknown (FAR, GFA, height, road area, road ratio) with reasons and triggers. Samples: site 11,412,825 m²; green 0.1203; footprints 329,531 m²/158; network ≈30,100 m.

known samples (precise recompute)

site_area_sqm	11,412,825 m²
green_ratio	0.1203
land_use_parcel_count	45
building_footprint	329,531 m² / 158
slow_traffic_network_length_m	≈30,100 m
key_area_total_area_sqm	3,692,900 m²
phasing_phase_1_area_sqm	2,407,400 m²
scenario_node_count	12 (3 TVS)

Performance metrics are operations-review quantities, not statutory conditions.

Evidence & self-check

sources.json (20) → provisional boundary → EPSG:4548 recomputation → metrics.json → closed [metric:...] references; compliance_matrix covers 23 requirements across agent.1–6; standard and depth matrices carry standards and depth; all four self-check gates PASS.

DETERMINISTIC PASS	SPATIAL PASS	VISUAL PASS	EVIDENCE PASS
-----------------------	-----------------	----------------	------------------

Bilingual contract: zh master + en equivalent; all text-bearing deliverables have language copies; manual readability records in visual/assets/.

Risk, rights and compliance

- Nine data gaps (official boundary, key-area polygons, controls, red lines, ownership, existing buildings, heritage, municipal safety, facilities) are itemised in assumptions.json; conclusions lacking official conditions are downgraded.
- Rights: sources, licences and limits in sources.json and report/copyright_statement.md; naming/logo/colours/copy original; system fonts render locally only; HTML offline with no remote deps or tracking.
- AI governance: minimisation, public sources, explainability, human review; agents do not replace statutory approval, profiling or official commitments.
- Tools & fonts: all geometry, figures and drawings generated locally with Python 3.9 (shapely 2.0 / pyproj 3.6 / matplotlib 3.9 / Pillow 11 / reportlab); CJK rendered with local system fonts (Hiragino Sans GB / STHeiti), PDF-embedded subsets, no font files redistributed; all graphics, logo and copy are original to this proposal.
