

Site Overview: Stitch Living Room (STITCH • JZ) One Belt Three Nodes (provisional geometry)

Overall Design Scope ~11.4 km² • Jingzhang Railway Heritage Green Belt • Three Key Areas & Two Wings Synergy

Overall Scope (provisional)

Key Areas (provisional)

Jingzhang Railway Heritage Green Belt

Zhongzhiyuan AI Acceleration Zone [Node 1: Stitch Bridge Court] (concept)

Xiaoyuehe River Corridor

Beijing AI Origin Community [Node 2: East-West Market Gallery]

International Living Interface (East) →

Dazhongsi AI Industry Cluster [Node 3: Stitch Axis]

1 km

Official Two Wings Architecture

[Zhongguancun Tech Service Wing] (West)

- Role: Tech service, R&D incubation, tech transfer
- Anchor: Zhongzhiyuan AI Acceleration Zone
- Carrier: Stitch Bridge Court + enterprise interface

[Xiaoyuehe Scenario Wing] (East)

- Role: Scenario application, eco-empowerment
- Anchor: Beijing AI Origin Community & Dazhongsi
- Carrier: East-West Market Gallery + Stitch Axis

Local Interfaces & Governance

[Local Conceptual Spatial Interfaces]

- West Higher-Ed Interface: Academic exchange
- East International Living: Community markets (Demoted to local interfaces; never replace Two Wings)

[Self-Imposed Design Governance Rules]

- Human Fallback: Manual guidance & info desks
- Anonymous Aggregation: No biometric tracking
- Appeal & Shut-off: Rapid review & opt-out

gle-caliber note: Overall design scope ~11.41 km²; Three zones, two wings and three nodes are conceptual layouts; Accessibility human assistance & AI governance are self-imposed project design rules, not statutory certification

PROVISIONAL • Temporary conceptual boundary, not an official redline | Concept output for competition demonstration only.

AI Innovation Ecosystem: 8-Factor Mechanism & Three Zones Two Wings Synergy

Land • Space • Industry • Capital • Talent • Compute • Data • Scenarios | Zero Fabricated Commitments

8-Factor Innovation Mechanism (Verifiable Alignment)

Land Revitalizing rail inventory & elastic reserve land	Space Stitch Court, Market Gallery, Stitch Axis & under-bridge spaces
Industry Linking Tech Services & Scenario Applications for enterprise tests	Capital Government guidance, multi-stakeholder co-building, asset-light
Talent Linking university researchers & founders with semi-open roadshows	Compute Haidian public compute platforms & edge nodes for low-latency sensing
Data Minimal necessity & anonymous aggregation; no facial/trajectory data	Scenarios Crossing sensing, accessibility, inspection, comfort & manual review

Mapping to Official Two Wings

[Zhongguancun Tech Service Wing]

- Factors: Compute, Data, Talent, Industry
- Mechanism: Aggregates university intelligence, provides edge compute & tech transfer interfaces.

[Xiaoyuehe Scenario Wing]

- Factors: Space, Land, Scenarios, Capital
- Mechanism: Opens urban living AI+ scenarios along green belt with multi-stakeholder co-building.

Mapping to Three Key Areas

- Zhongzhiyuan Zone: Anchors Talent & Compute; hosts Stitch Bridge Court for flow sensing & roadshows.
- Origin Community: Anchors Scenarios & Data; hosts Market Gallery for accessibility & inspection.
- Dazhongsi Cluster: Anchors Space & Industry; hosts Stitch Axis for environmental comfort & safety.

8-factor mechanism & 3-zone 2-wing mapping are conceptual framework designs; no ungrounded corporate or financial commitments.

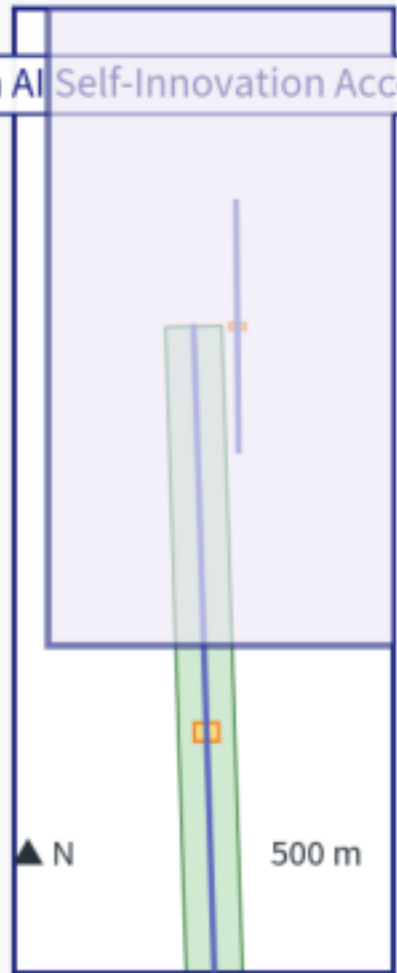

PROVISIONAL • Temporary conceptual boundary, not an official redline | Concept output for competition demonstration only.

PROVISIONAL concept boundary • not an official redline • recalculate after official data | Concept output: not for statutory approval or construction use

Key Areas & Three Node Detailed Design Index (Concept Nodes)

Stitch Bridge Court • Market Gallery • Stitch Axis | Three Key Areas & Two Wings Deepening

Zhongzhiyuan AI Self-Innovation Acceleration Zone

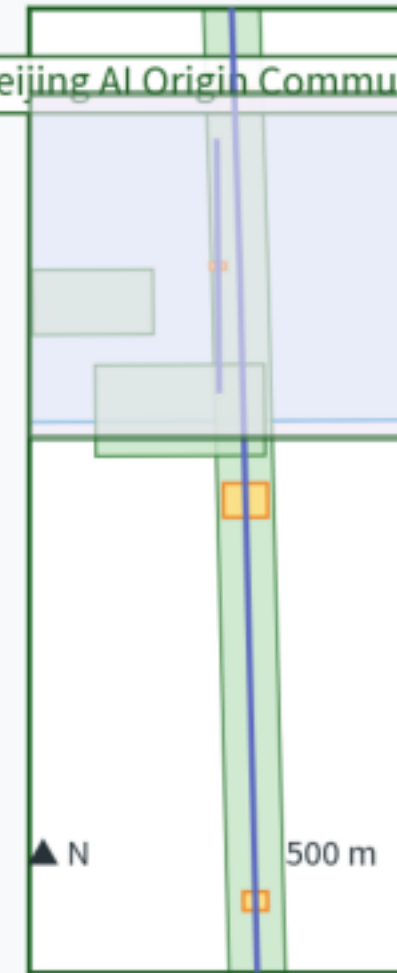

Node 1: Stitch Bridge Court (STITCH-COURT)

Crossing Bridge & Under-Bridge Plaza • Tech Service Interface

- Function: Overpass bridge combined with activated under-bridge plaza for community interaction and service delivery.
- Synergy: Anchors Zhongguancun Technology Service Wing for R&D translation and commercialization.
- AI Scenario: Anonymized crossing demand sensing; 100% human guidance.

Beijing AI Origin Community

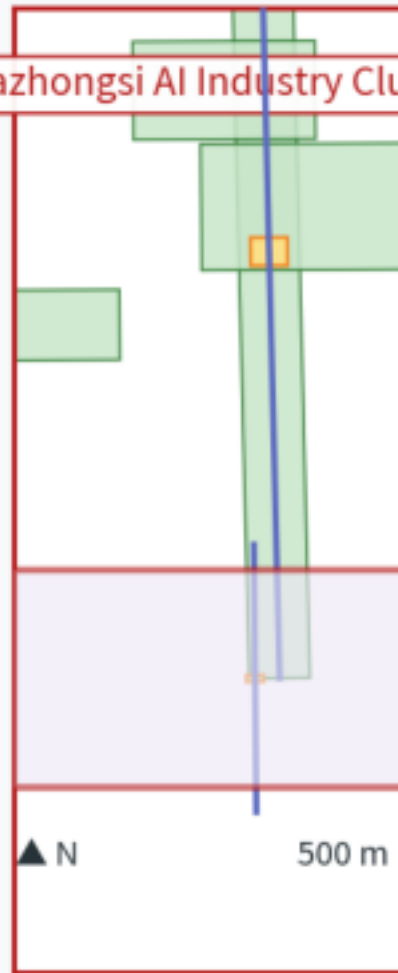

Node 2: East-West Market Gallery (MARKET-GALLERY)

Bi-Directional Market Corridor • Community Dialogue • Scenario Paradigm

- Function: Integrates eastern international community & western youth vitality for cross-cultural exchange.
- Synergy: Anchors Xiaoyuehe Scenario Empowerment Wing as a living laboratory for innovation.
- AI Scenario: AI-assisted accessible routing & facility inspection; instant application of smart infrastructure.

Dazhongsi AI Industry Cluster

Node 3: Stitch Axis (STITCH-AXIS)

East-West Slow Greenway Spine • TOD Transit Integration • Governance Framework

- Function: Continuous slow-traffic spine seamlessly linking rail transit and public space for mobility.
- Synergy: Southern synthesis node for Tech Service and Scenario Empowerment, creating a regional hub.
- AI Scenario: Environmental comfort sensing & alert human review; no biometric tracking.

Three nodes are conceptual deep-design locations; final siting subject to official redline and statutory review; AI scenarios strictly adhere to anonymous aggregation and human fallback, prohibiting biometric tracking.

PROVISIONAL • Temporary conceptual boundary, not an official redline | Concept output for competition demonstration only.

Slow Greenway Mobility & Blue-Green Public Network (provisional)

Green Spine as Axis • Nodes as Pearls • East-West Slow Mobility • Under-Bridge Activation

Overall Scope (provisional)

East-West Stitch Greenway Axis

Jingzhang Continuous Green Belt

Stitch Bridge Court (Bridge & Plaza)

Market Gallery (Bi-Directional)

Stitch Axis (Slow Greenway Spine)

1km

Slow-Traffic First & Crossing Strategy

- Greenway Spine: Continuous slow path on rail greenway.
- Crossing Density: Added overpasses & crosswalks to eliminate railway severance and balance flow.
- Transit Integration: Links Dazhongsi & Wudaokou stations with barrier-free paths, reducing car use.
- Event Traffic: Shuttle buses & phased dispersal.

Blue-Green Ecology & Under-Bridge

- Blue-Green Layout: Green spine + river wing + nodes.
- Sponge City: Permeable paving & rain gardens.
- Under-Bridge Grey Space: Light, paving & art interventions create micro community living rooms.
- Industrial Heritage: Spikes & rails subtly integrated.

Slow-traffic & blue-green networks are conceptual planning representations; engineering siting subject to statutory review.

PROVISIONAL • Temporary conceptual boundary, not an official redline | Concept output for competition demonstration only.
