

Overall Concept: One Spine, Three Nodes

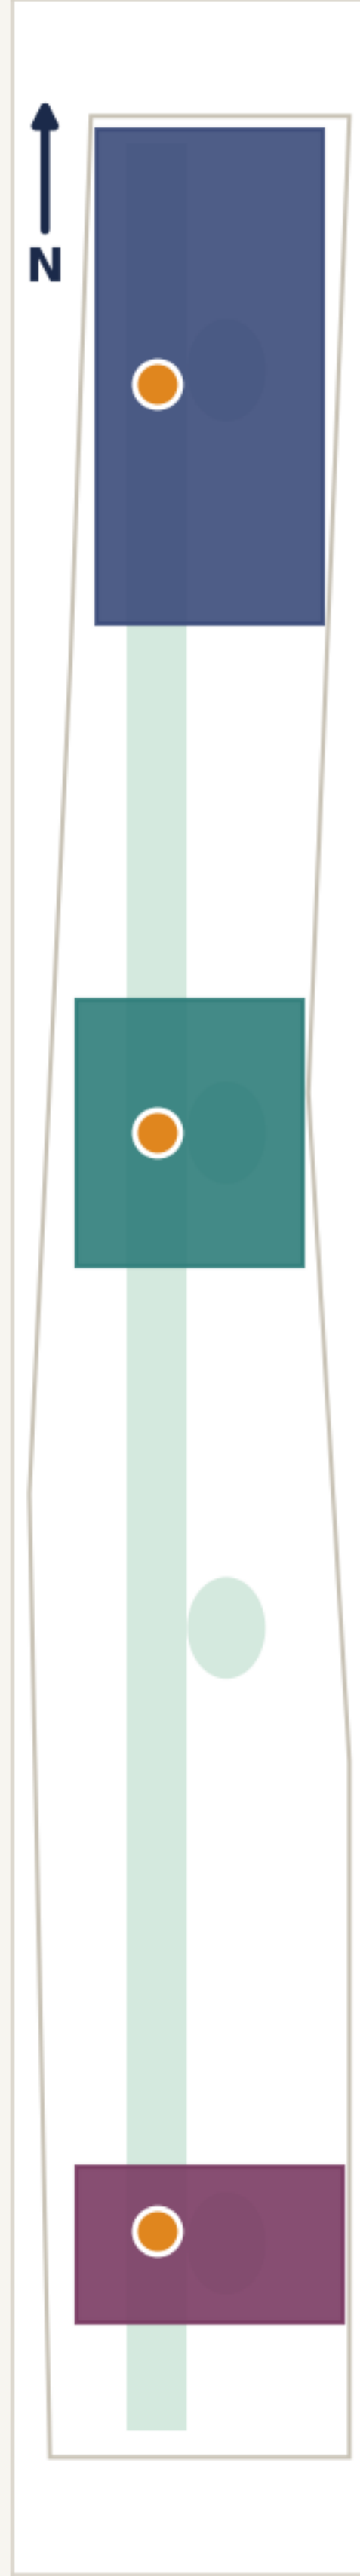

A heritage 'resonance spine' linking three key areas and three Resonance Nodes

Detailed Design of Key Areas

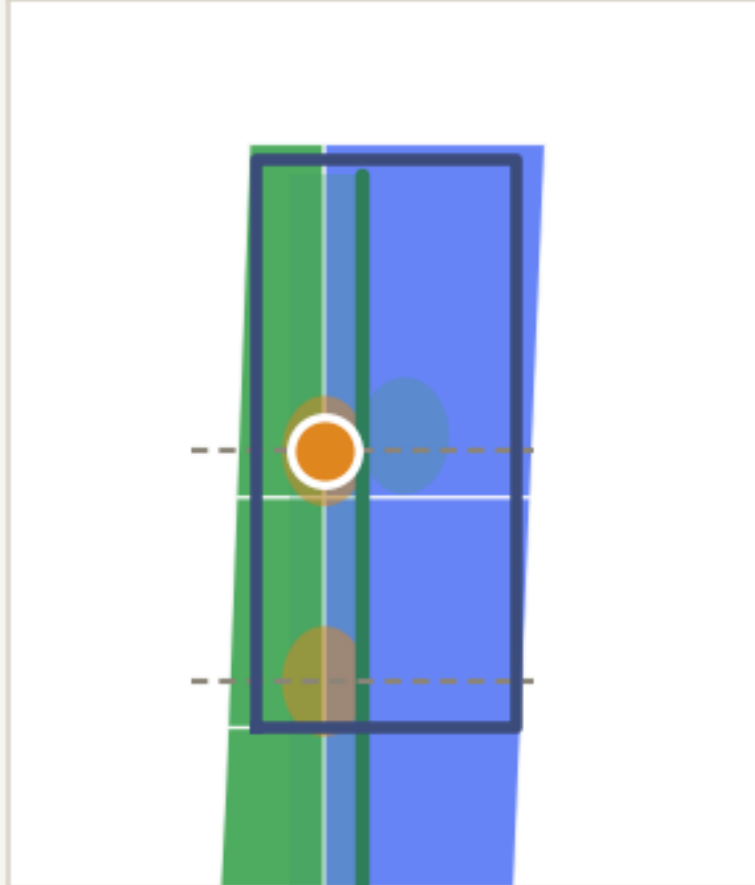

Each area zoomed to show land use, green spine, Resonance Node and slow-mobility (clipped from submitted geometry)

Context

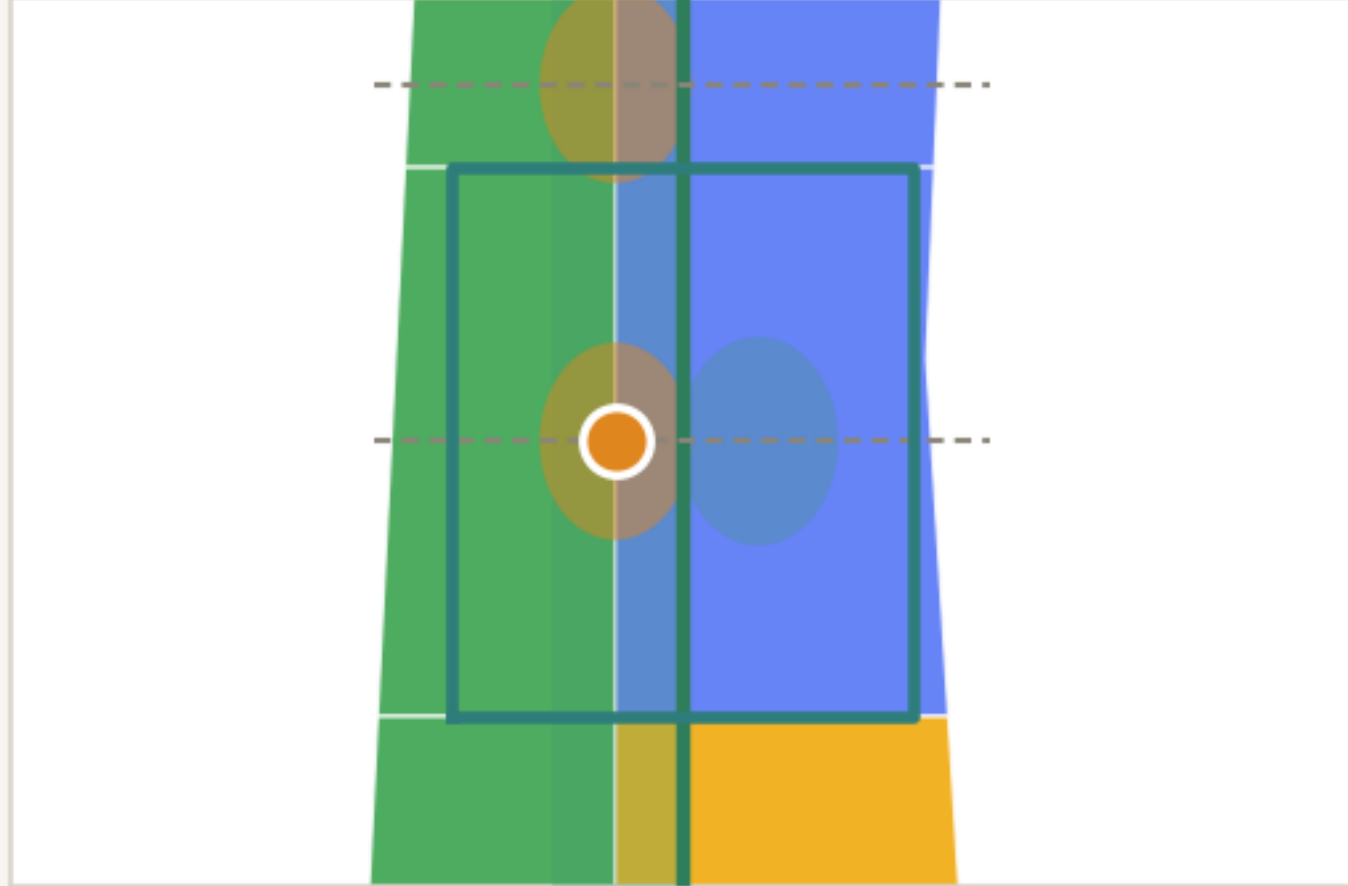

Prelude

Full-stack innovation · standards · low-carbon exchange

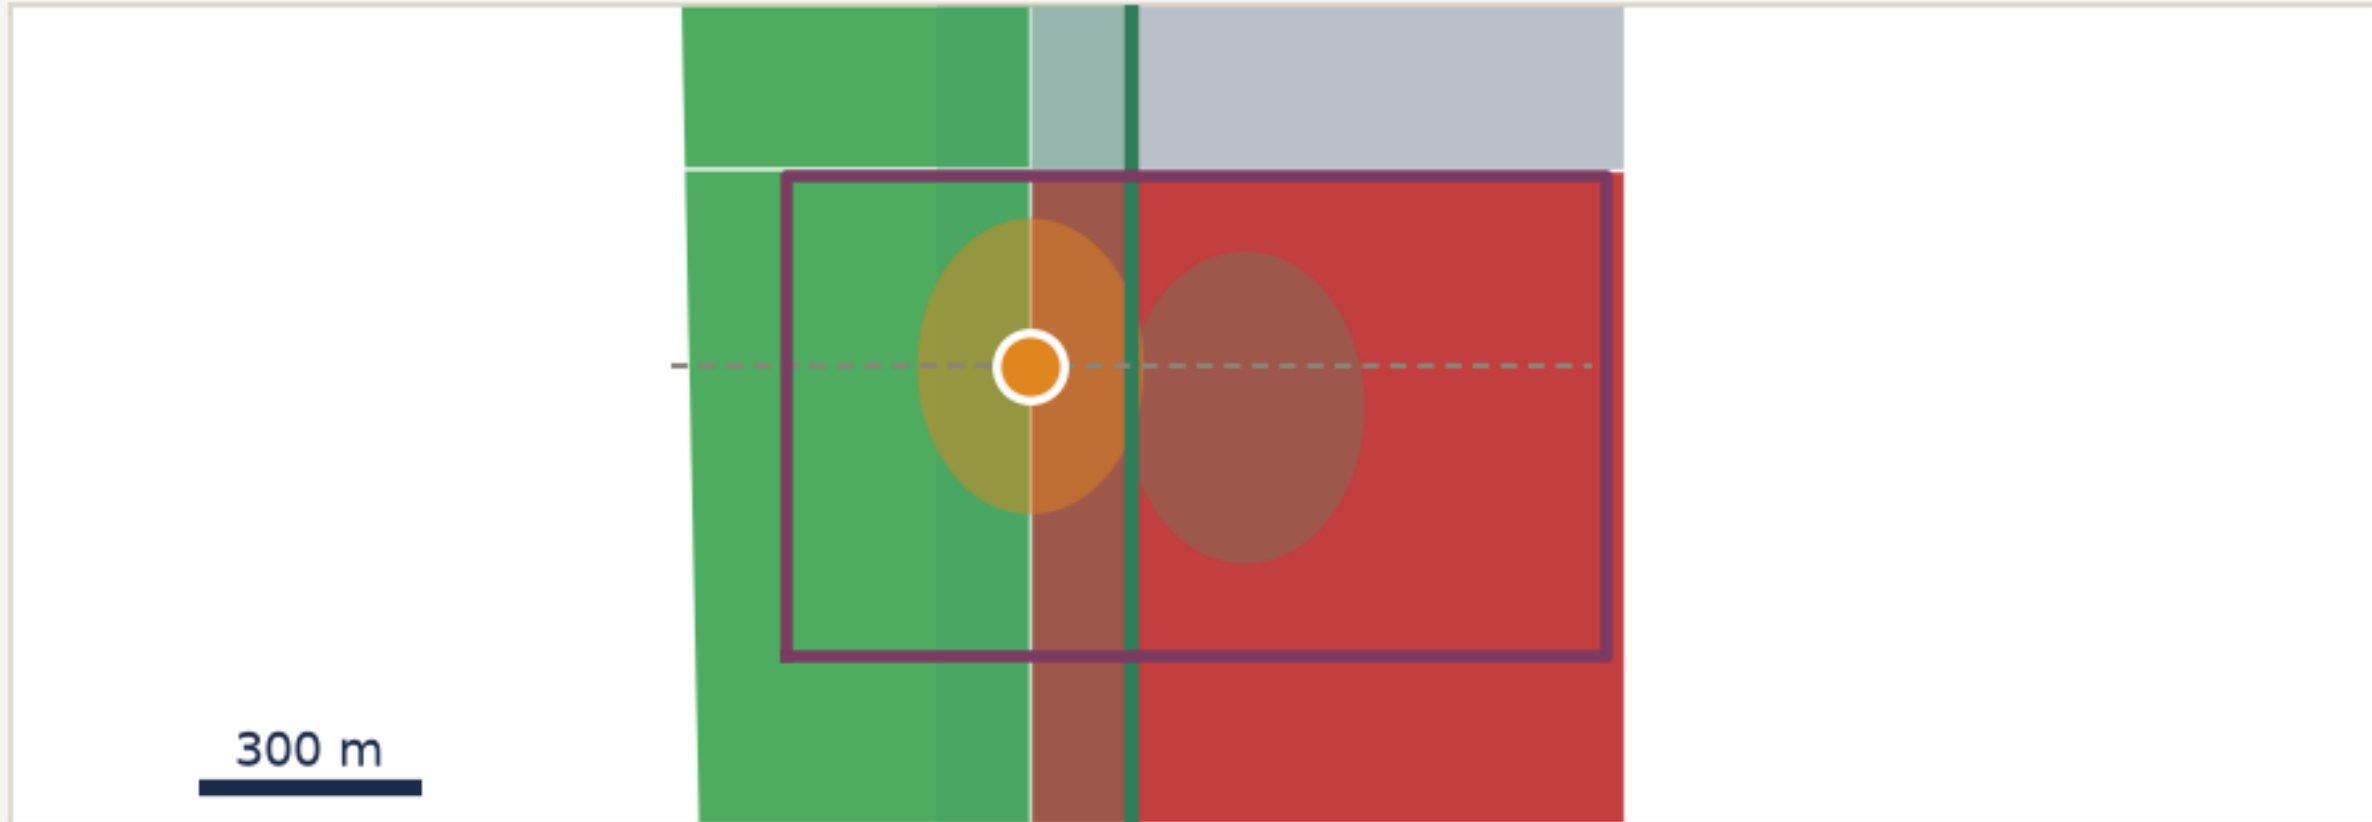

Chorus

Youth night commons · open-source · near-campus

Coda

Transit calm soundscape · 4-quadrant links · roadshow

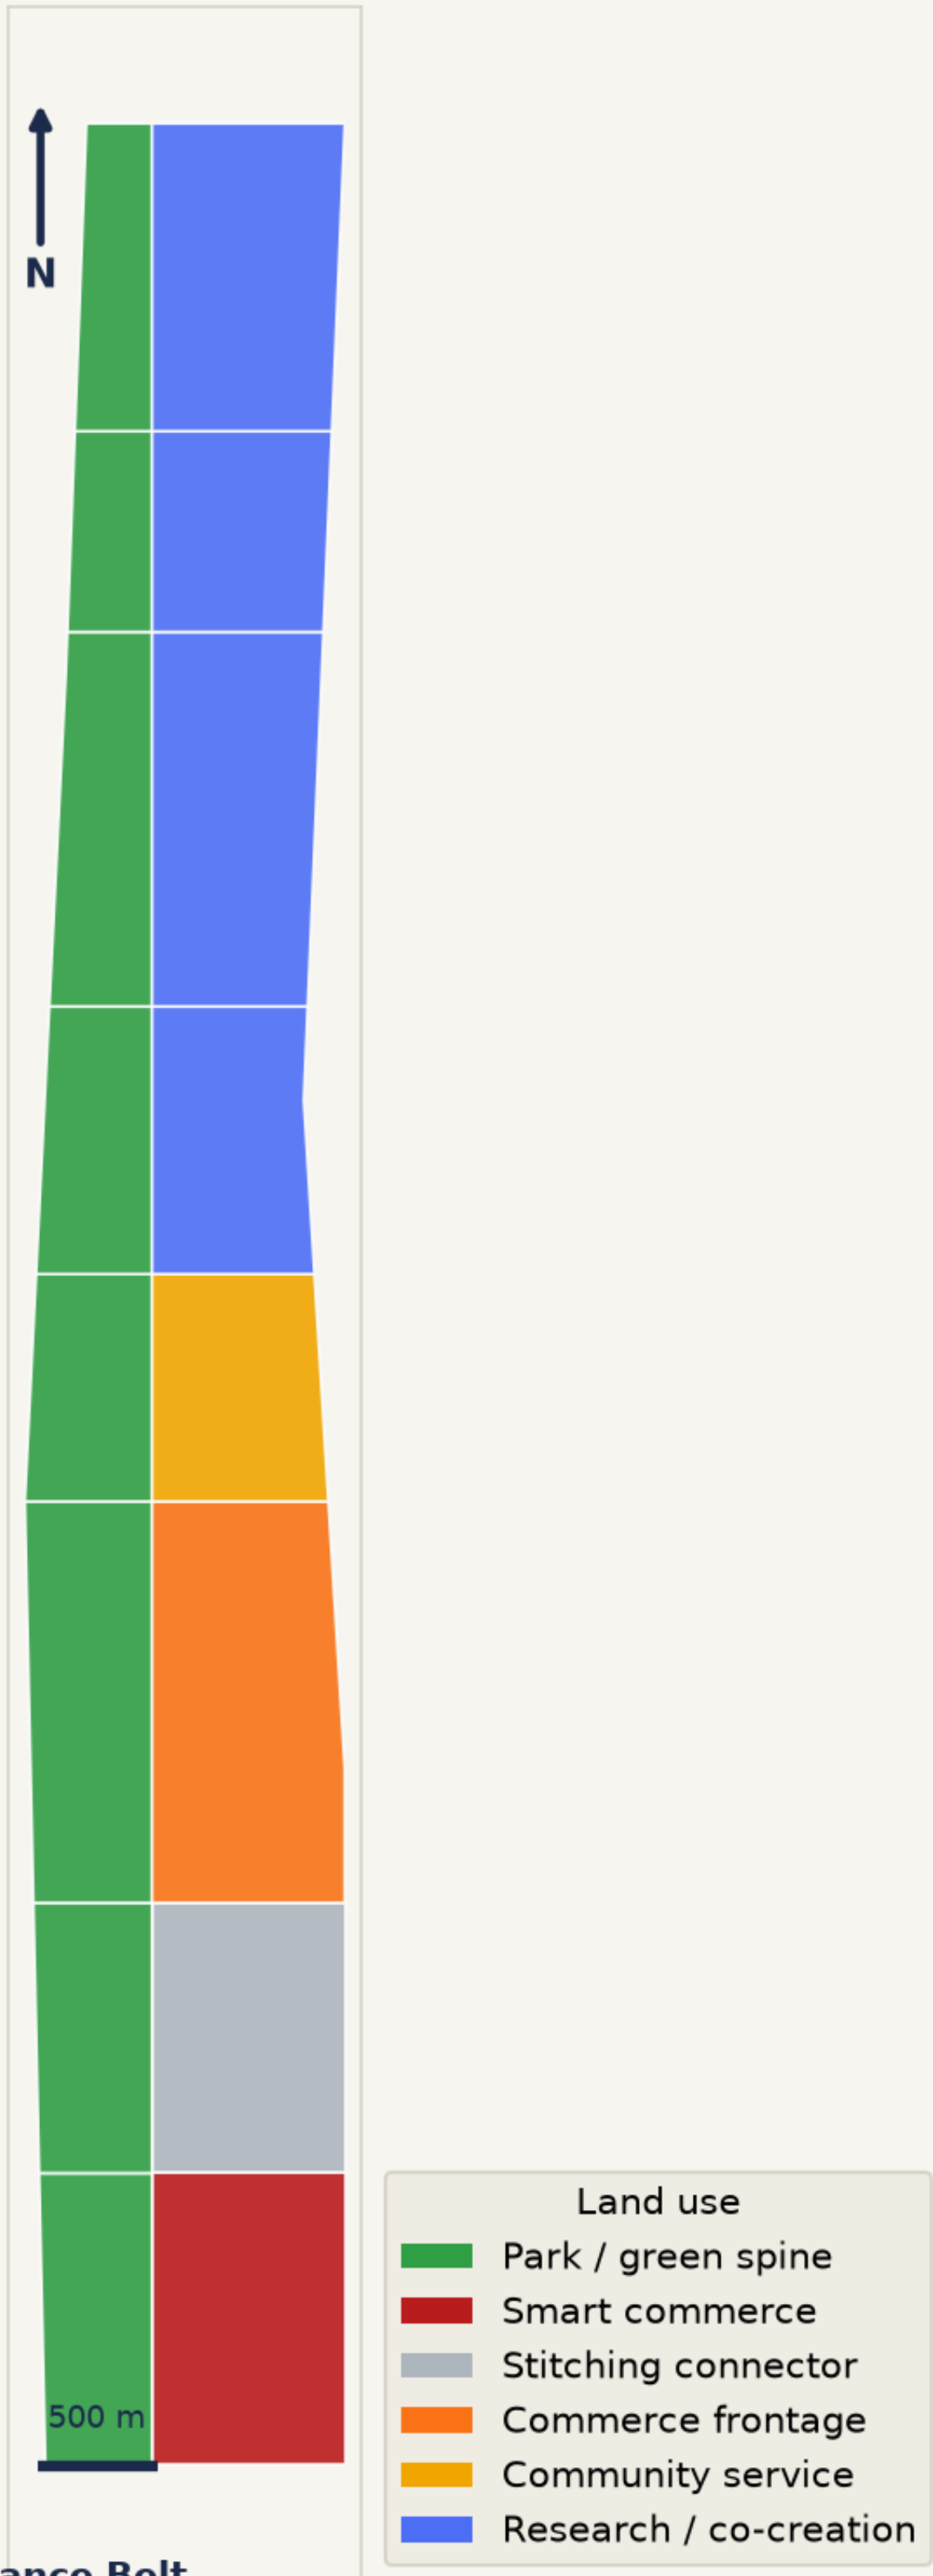

Jing-Zhang Resonance Belt

Submission b-cooney · concept suggestion for professional deepening | Provisional boundary · not an official redline · recalculate on official data

One spine, three nodes, many scenarios, a blue-green loop: the heritage 'resonance spine' links Zhongzhiyuan (Prelude), AI Origin Community (Chorus), Dazhongsi (Coda).

Spatial Structure & Land Use

Gap-free land-use partition (coverage ~1.0): green spine centered, functions along edges

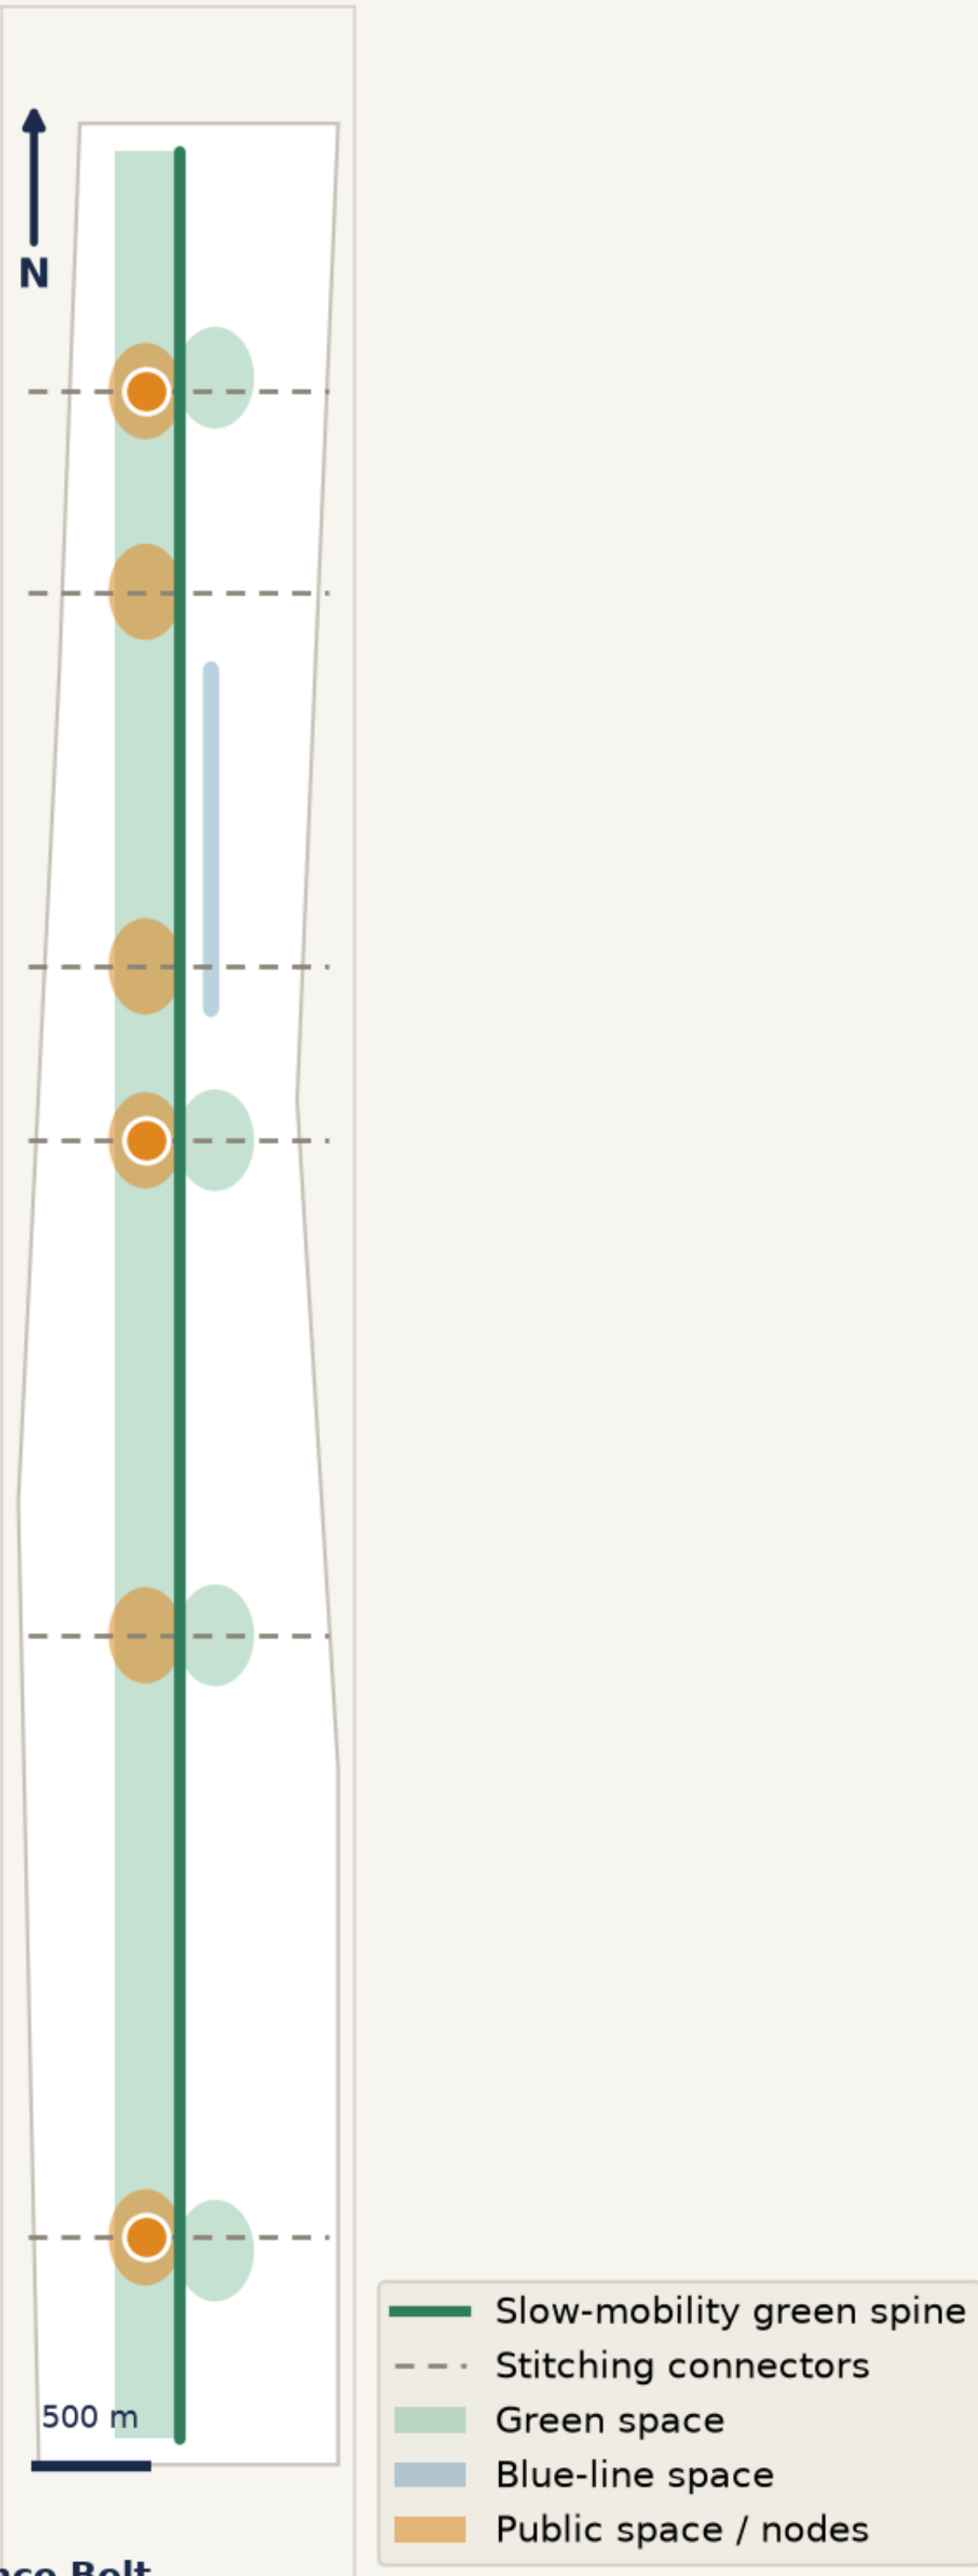

Jing-Zhang Resonance Belt

Submission b-cooney · concept suggestion for professional deepening | Provisional boundary · not an official redline · recalculate on official data

Mobility & Blue-Green Public Space

Slow-mobility spine + connectors + continuous blue-green + Resonance Node network

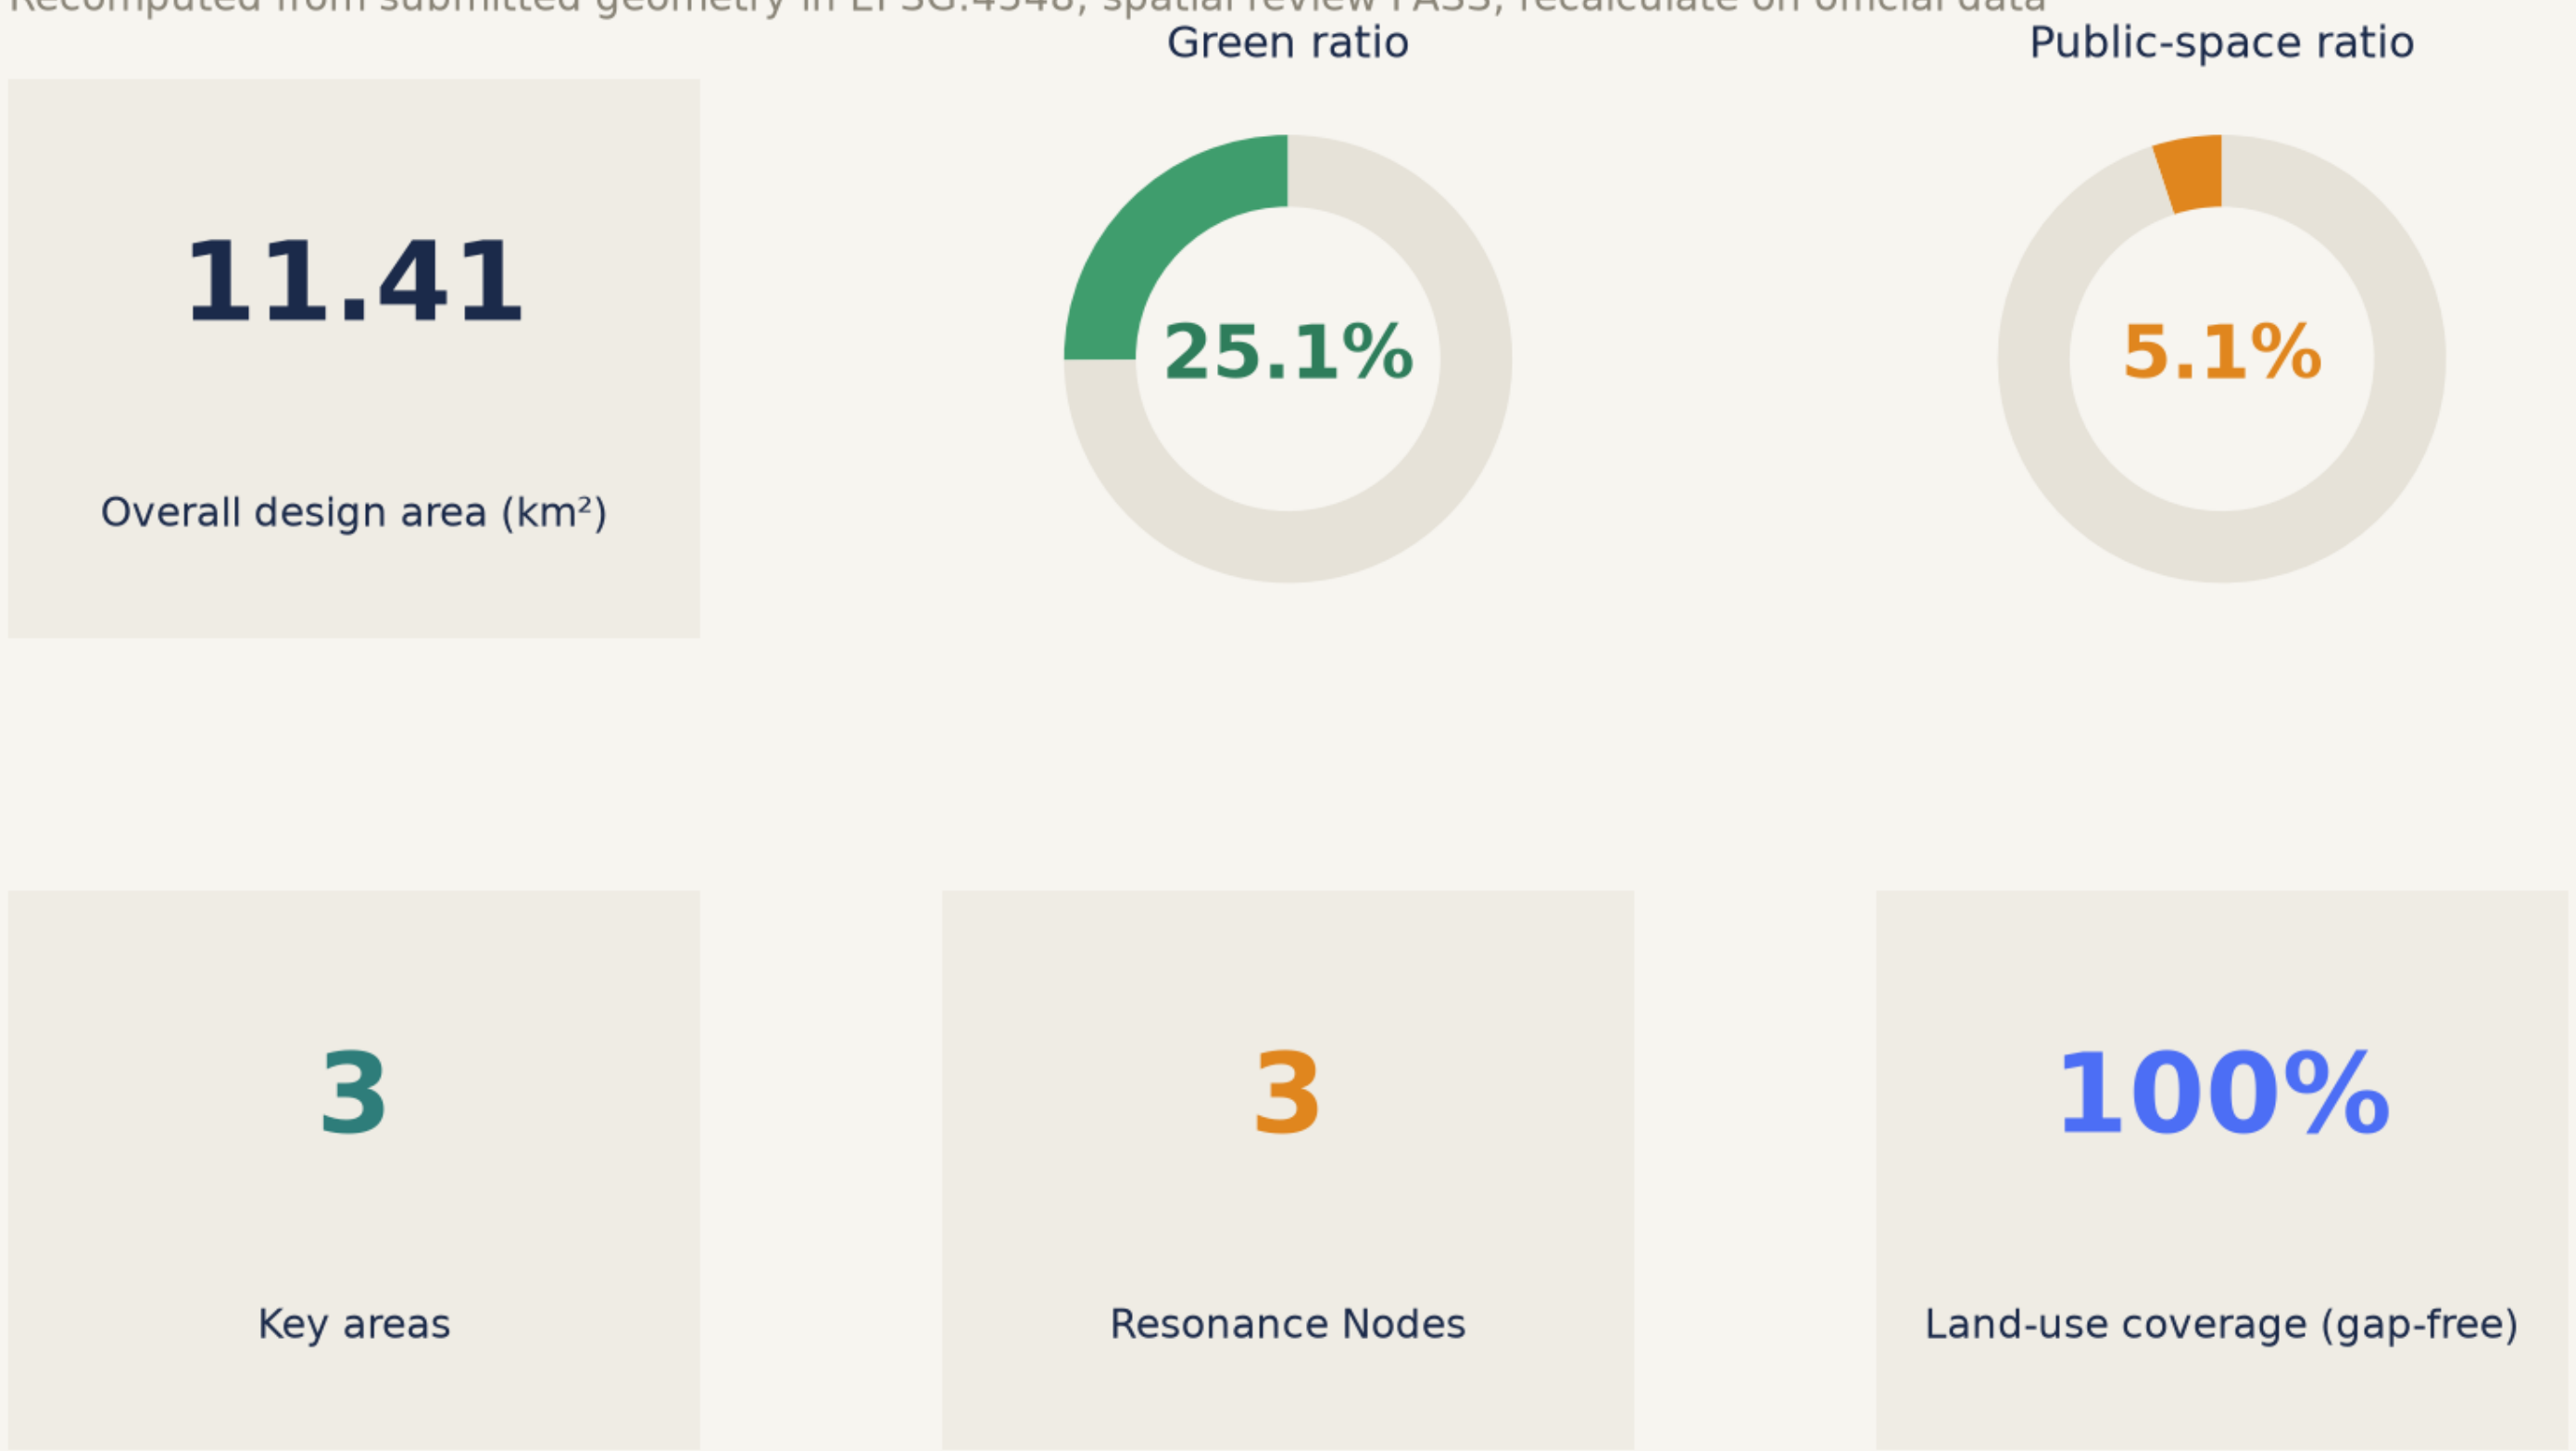

Jing-Zhang Resonance Belt

Submission b-cooney · concept suggestion for professional deepening | Provisional boundary · not an official redline · recalculate on official data

Core Metrics & Evidence Chain

Recomputed from submitted geometry in EPSG:4548; spatial review PASS; recalculate on official data

Spatial self-check: PASS
