

JING-ZHANG · THE SECOND ENCOUNTER

Urban innovation is judged not at launch, but at the second encounter.

JING-ZHANG · THE SECOND ENCOUNTER

CONCEPTUAL PROPOSAL · PROVISIONAL GEOMETRY

Not an official plan. Provisional geometry for discussion and review.

01 FIRST ENCOUNTER

Declare purpose, data boundary, and human fallback.

02 CONSEQUENCE

Record outcomes after service, not personal identity.

03 SECOND ENCOUNTER

Return to compare, question, and add evidence.

04 REPAIR

Publish changes, ownership, stop and exit conditions.

- Four-step protocol: first encounter—consequence—return—repair.
- Public space makes return possible; named human responsibility makes response real.

OVERALL SPATIAL STRUCTURE

One Memory Spine · four cross-links · six Return Stations

ONE MEMORY SPINE · THREE TIME ROLES · SIX RETURN STATIONS

CONCEPTUAL PROPOSAL · PROVISIONAL GEOMETRY

The land-use model is a complete, topology-safe conceptual partition. The Memory Spine crosses every band so return is a civic route, not a specialist office.

- MEMORY SPINE
- RETURN CROSS-LINKS
- STAFFED NODES
- PROVISIONAL EDGE

Not an official plan. Provisional geometry for discussion and review.

- A complete topology-safe conceptual partition covers the provisional boundary.
- Every precision-sensitive result triggers full regeneration when official polygons arrive.

THREE AREAS · THREE MOMENTS

Create—Encounter—Care

THREE AREAS AS THREE MOMENTS OF A RELATIONSHIP

CONCEPTUAL PROPOSAL · PROVISIONAL GEOMETRY

Not an official plan. Provisional geometry for discussion and review.

ZHONGZHIYUAN · CREATE

First Promise Platform: declare purpose, owner, and exit before launch.

AI ORIGIN · ENCOUNTER

Second Encounter House: residents return with consequences for a staffed review.

DAZHONGSI · CARE

Unfinished Monument: display repair, pause, and retirement—not success alone.

- Zhongzhiyuan: First Promise Platform.
- AI Origin Community: Second Encounter House.
- Dazhongsi: Unfinished Monument and maintenance economy.

ONE ORDINARY PERSON’S RETURN

Solve today’s problem first; leave a response that can be traced tomorrow

ONE ORDINARY PERSON’ S RETURN · HELP TODAY FIRST

CONCEPTUAL PROPOSAL · PROVISIONAL GEOMETRY

01 ROAD CLOSED

An accessible route ends at roadworks.

02 HELP NOW

A steward draws a route that works today.

03 QUERY CODE

Name and phone stay blank; no account required.

04 RETURN

3/14/30 days to own, explain, repair, or stop.

Composite journey · pilot target, not a real interview or government commitr

Not an official plan. Provisional geometry for discussion and review.

- Road closure → hand-drawn route → anonymous query code.
- Proposed 3/14/30 rhythm: own, explain, repair or stop.
- This is a composite journey, never presented as a real interview.

METRICS AND EVIDENCE

Recomputable, traceable, and degradable

FROM FIRST USE TO SECOND ENCOUNTER: EVIDENCE CHAIN

CONCEPTUAL PROPOSAL · PROVISIONAL GEOMETRY

Not an official plan. Provisional geometry for discussion and review.

SITE AREA	GREEN RATIO
11.41 km²	16.9%
PUBLIC SPACE	SCENARIOS
1.2%	12

Geometry → Metrics → Claim → Public Return

Every precision-sensitive value is recalculated when official polygons arrive.

- Site 11.41 km²; green 16.9%; public space 1.2%.
- These are provisional design-model outputs, not official controls.

TWO STATIONS FIRST—THEN DECIDE

Do not build six at once; test staffing and ownership over 8+12+4 weeks

TWO STATIONS FIRST · DECIDE AFTER 8+12+4 WEEKS

Test staffing, human access, and ownership before expanding space or technology

- Borrow space, run a bounded pilot, then review in public.
- Stop expansion if ownership is missing, the human route fails, or safety risk appears.
