

Zipper Jingzhang

Century Jingzhang AI Innovation Belt Urban Design · Concept Proposal

Provisional rough boundary, official_boundary=false · Conceptual suggestion · COMMUNITY-DISPLAY-ONLY

01 Design Concept: The Zipper Mechanism

Three Existing Gaps

Corridor severance · Mismatched supply · Heritage isolation — the Jingzhang corridor stays detached from the urban fabric on both sides

Three Parts of the Zipper Mechanism

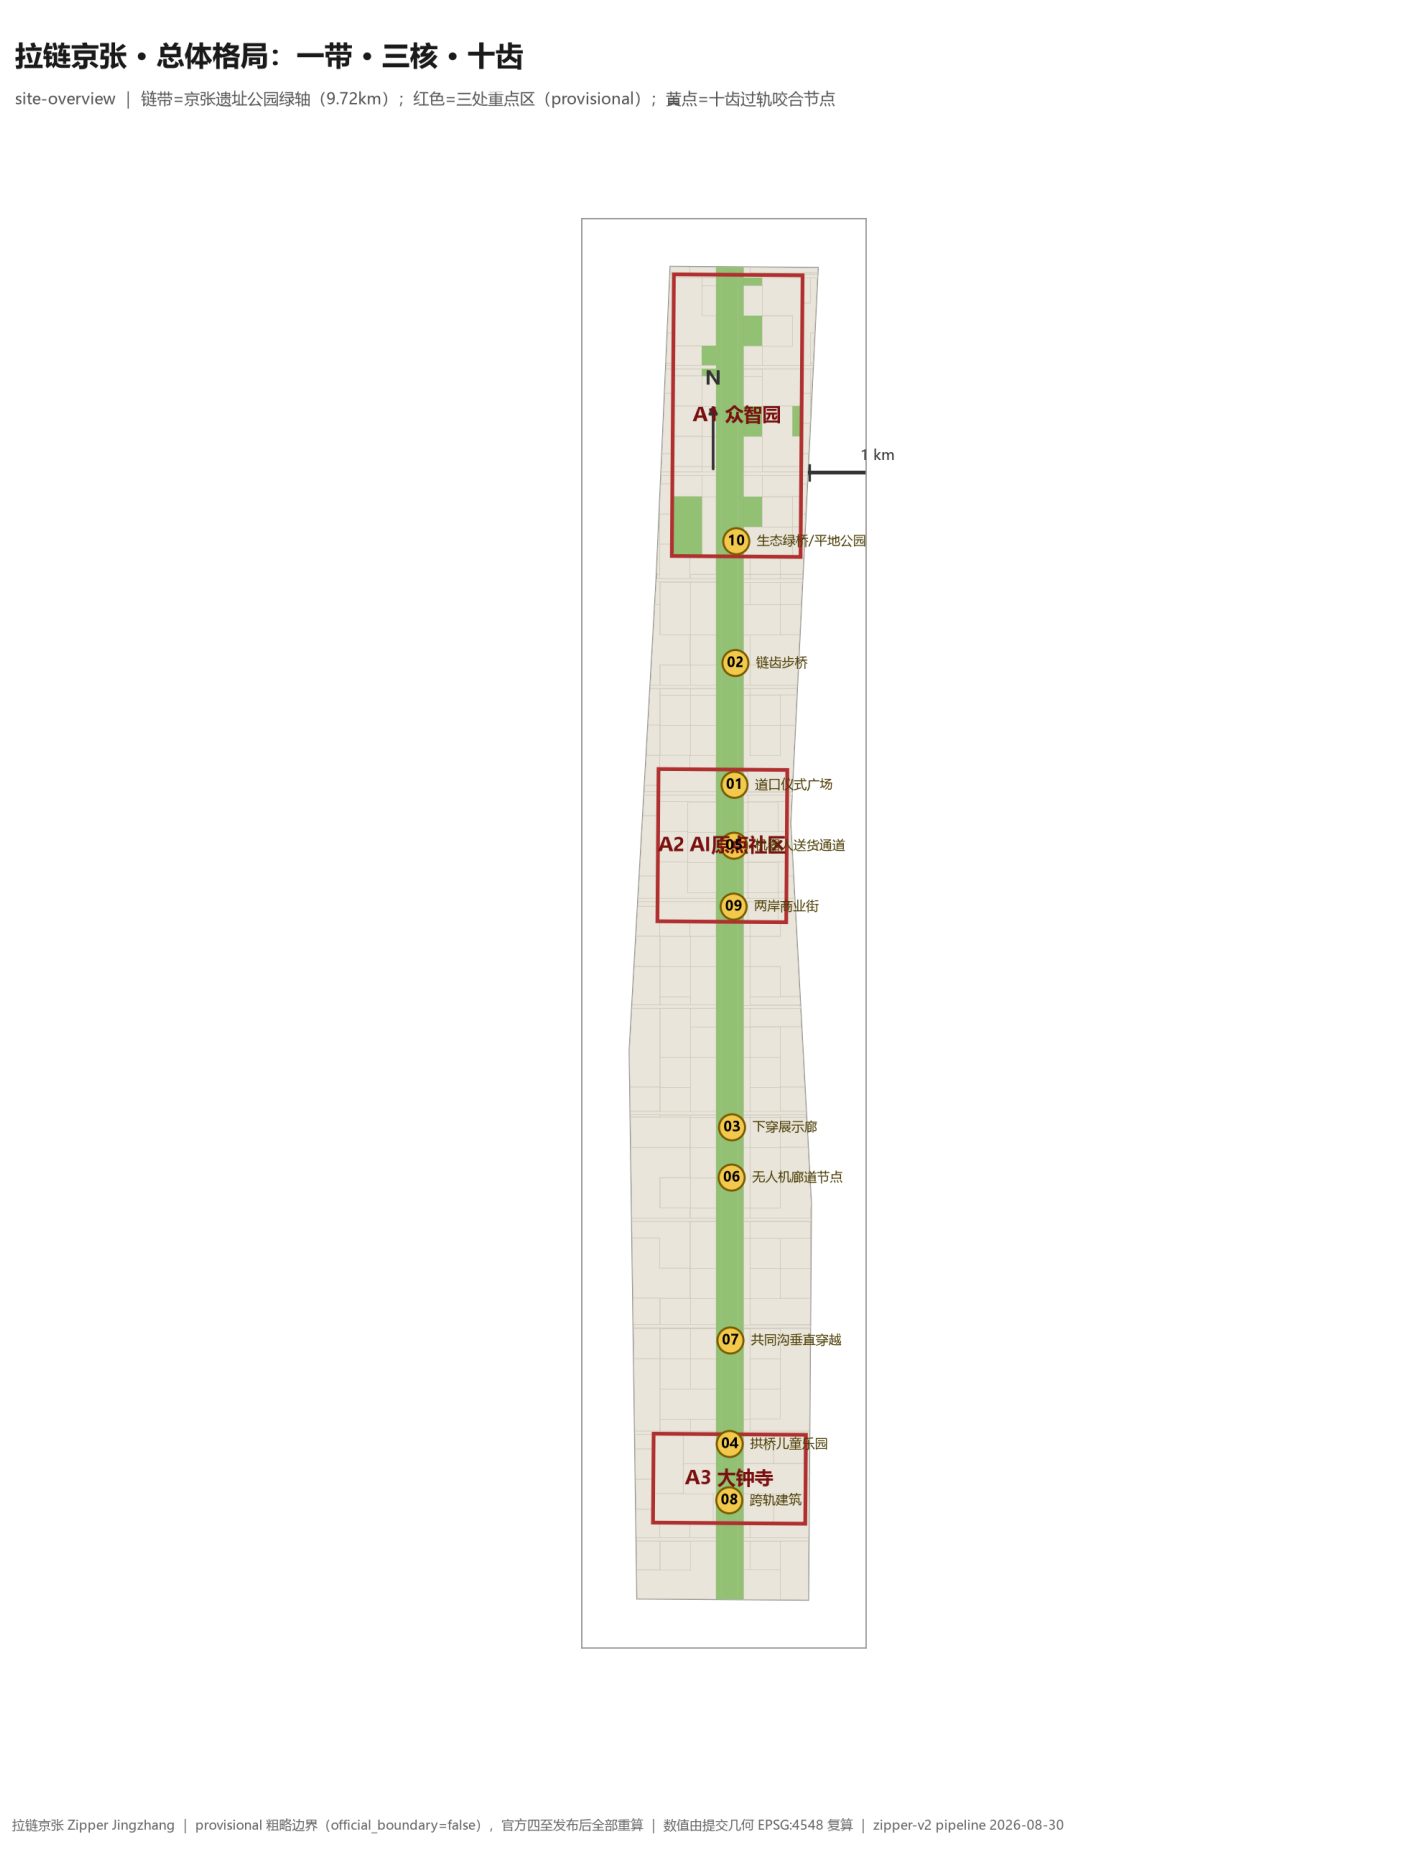

Chain Band: 9.72 km green-axis backbone
Chain Teeth: 10 rail-crossing meshing nodes Z-01...Z-10
Zipper Head: intelligent operations system

One Chain, Three Cores

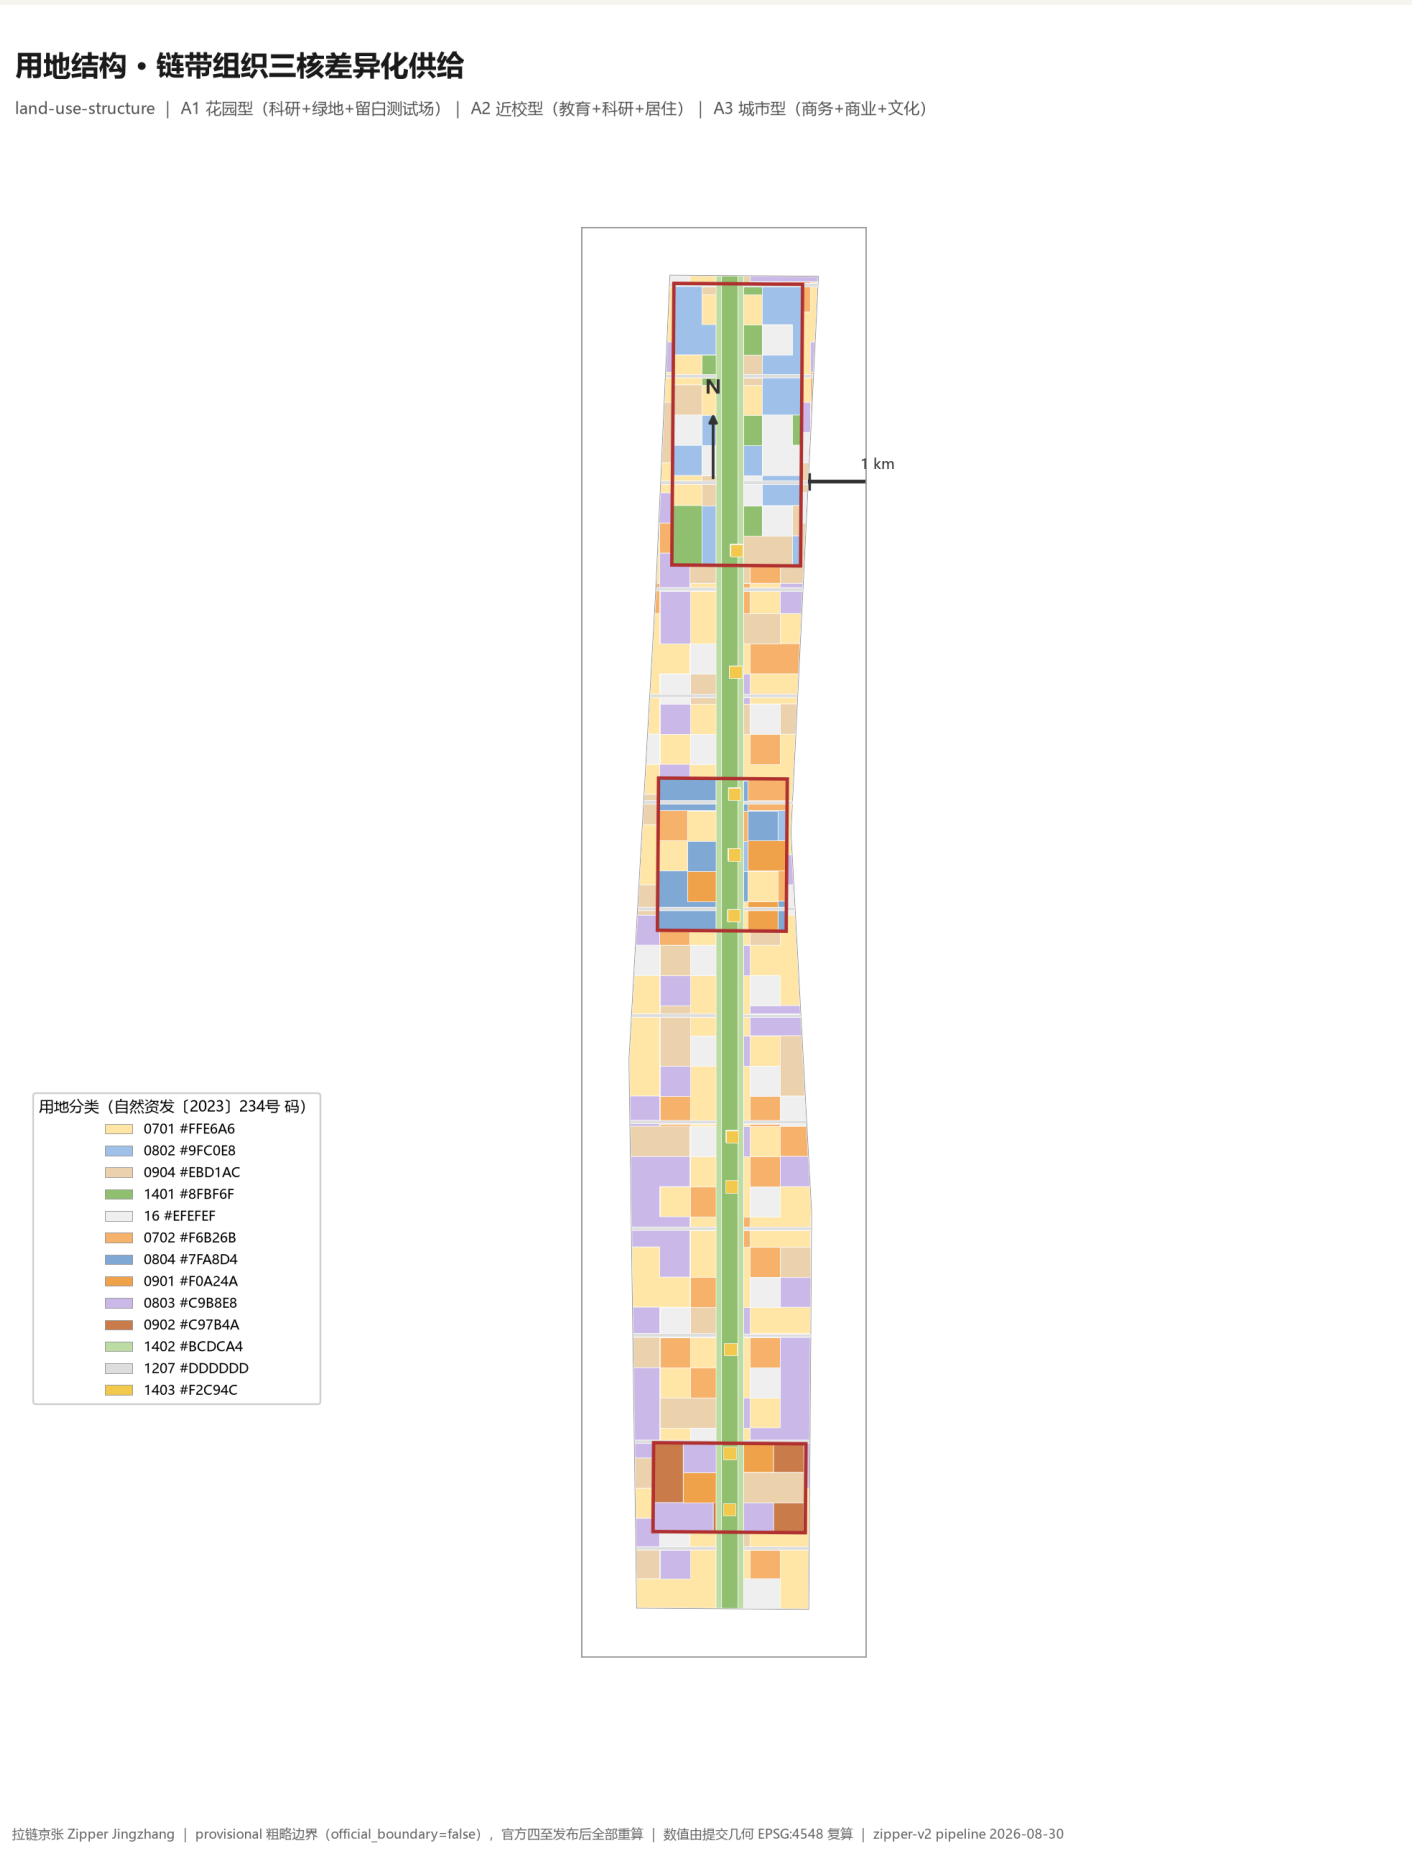

A1 Zhongzhi Park · Garden type
A2 Beijing AI Origin Community · Campus-adjacent type
A3 Dazhongsi · Urban type

Total area 11,412,825 m² · Green space 18% · Public space 0.8% · Chain teeth 10 · Scene cards 11 (3★)

02 Site Plan: One Chain, Three Cores, Ten Teeth

Overall structure — one chain, three cores, ten teeth (provisional boundary)

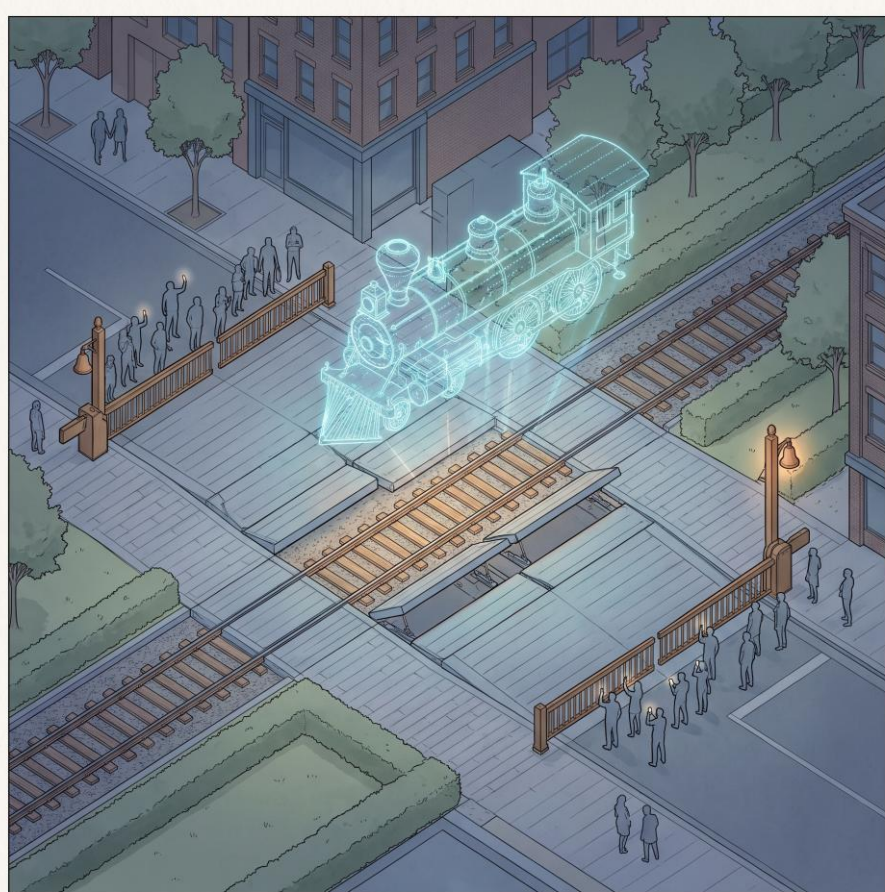

Land-use structure — 44 parcels, full coverage, no overlap

03 Chain-Teeth Mechanism: Ten Rail-Crossing Meshing Nodes (Six Selected)

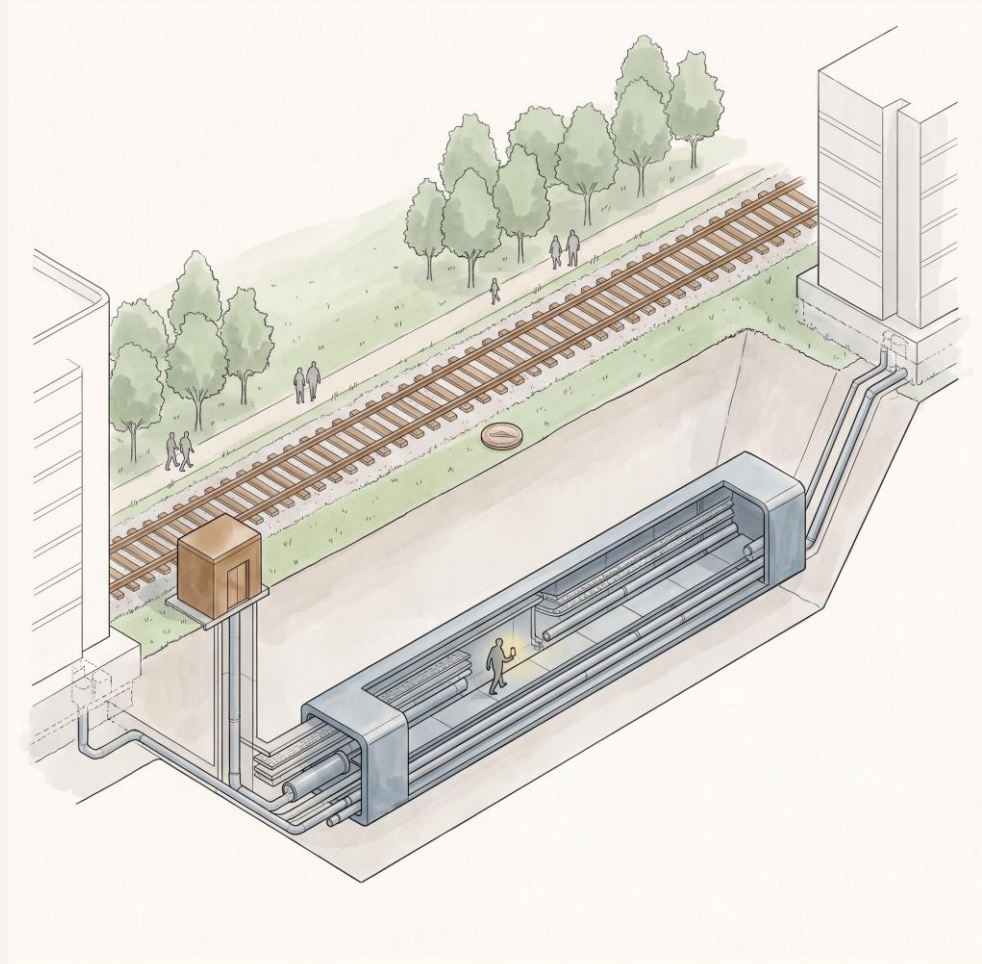

Z-01 Crossing Ritual Plaza · Normal mode

Z-01 · Holographic train, memorial mode

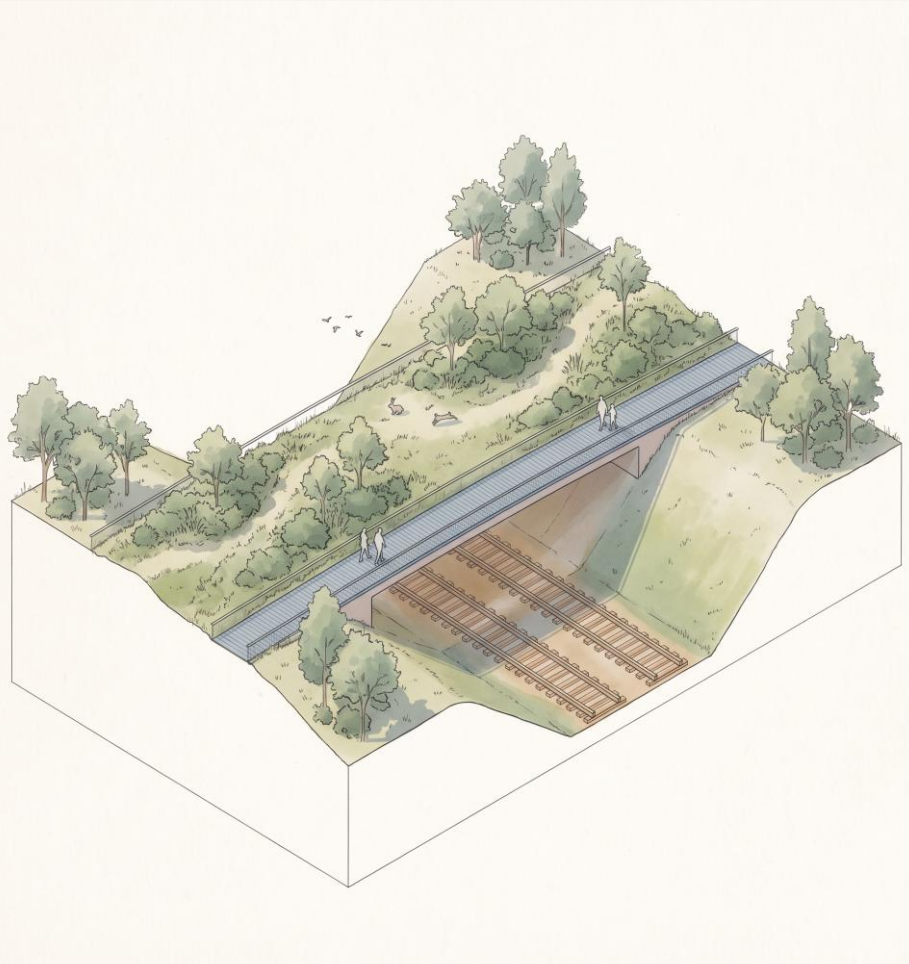

Z-06 Steam train in a hundred-engine light array

Z-07 Utility-tunnel vertical crossing

Z-09 Both-bank retail street at night

Z-10 Eco green bridge

Chain band panorama · Normal mode

Chain band panorama · Memorial mode

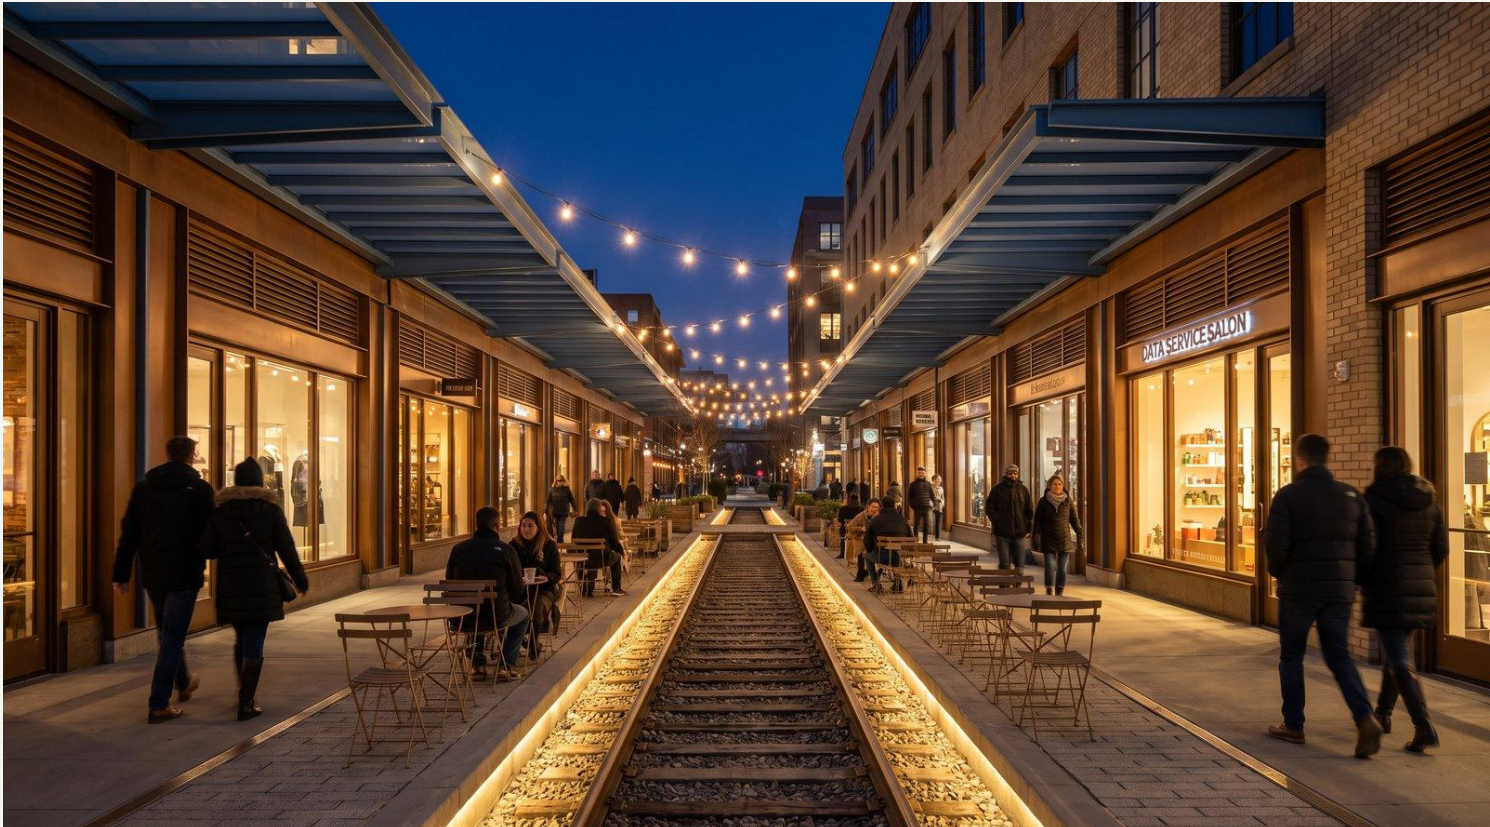

A1 Zhongzhi Park · Qinghe garden-type interface

A2 Beijing AI Origin Community · Campus-adjacent spin-off street

A3 Dazhongsi · Rail-crossing building and station-city hub

Both-bank retail street at night
