

Place-Grown Intelligence

Centennial Jing-Zhang Urban AI Growth System

Growing AI from local urban problems through public validation, accountable governance and sustainable conversion.

Urban Design Open Call Submission

11.4 km²
overall design scope

368.4 ha
key-node areas

approx. 51.9 km
conceptual route coverage

12
initial AI scenarios

Conceptual design proposal for the Jing-Zhang AI Innovation Belt
AI grows from local problems, is tested in public space, and returns value to the city.

Cover Board
Jing-Zhang AI Innovation Belt

Overall Aerial View

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

The Jing-Zhang corridor connects communities, parks and urban gateways into a city validation corridor for mobility, open R&D, public AI services and commercial return.

Rail / Transit Axis

Metro, bus and cycling interchange

Blue-Green Slow Mobility Belt

Walking, cycling and waterfront open space

AI Origin Community

Community-level public AI service entry

Zhongzhiyuan

AI technology validation and governance

Dazhongsi Renewal Gateway

Industry display, consumption and urban living room

Figure Note

Concept-stage aerial view showing the Jing-Zhang corridor, three AI node types, transit access and public open-space organization. Specific boundaries, metrics and implementation scopes must follow the formal data ledger and later design development.

Sources And Evidence Chain

SOURCE GOVERNANCE

Public sources, provisional geometry, explanatory figures and recomputable metrics

Formal Basis

Call brief / taskbook / templates
Registry + submission rules
Re-sync main before final

Spatial Data

Provisional boundaries
Framework + mobility GeoJSON
Legal red lines: official files

Figure Assets

AI aerials and diagrams
SVG layer + local PNG / 4K
Expression only, not survey

Metrics

Technical + economic metrics
Formulas and assumptions logged
Pending items disclosed

EVIDENCE FLOW

1 Read Sources

official / public / assumptions

2 Register

tiered sources.json records

3 Compute

GeoJSON + metrics.json

4 Cite In Text

proposal.md evidence tags

5 Explain Visually

A3 / A0 / HTML / PNG

6 Self Check

matrix + self_check

Source Tiers

● formal-ready

Official, public and cleared sources.

● background-only

Narrative context only; not for metrics.

● provisional-only

Temporary assumptions; disclose and recalculate.

Current Project Use

Official taskbook	scope / tracks / format	formal basis
-------------------	-------------------------	--------------

Temp geometry	spatial expression	concept stage
---------------	--------------------	---------------

AI aerial images	vision / diagram	visual layer
------------------	------------------	--------------

Route scripts	area / length / nodes	recomputable
---------------	-----------------------	--------------

Economics estimate	CAPEX / revenue	order estimate
--------------------	-----------------	----------------

Submission Boundary

This figure explains evidence governance.
It does not replace statutory drawings.
Authoritative files: sources.json, GeoJSON,
metrics.json, matrices and self-check outputs.

formal-ready / background-only / provisional-only

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Support Figure S02 | Existing Resources and Problem Logic v2

From land, resources, mobility, and spatial conditions to a public framework and AI scenario value chain.

Existing Conditions and Problem Logic

The site is not short of resources. It lacks an operating interface.

Narrative

The area already concentrates universities, labs, AI firms, communities, rail access, Jing-Zhang Heritage Park, and the Xiaoyue River. These assets remain scattered and weakly connected. The proposal reorganizes them into a working interface that links real demand, technical capacity, public validation, governance, and operational transformation.

Problem Summary

- 01

Dense resources, weak integration
Universities, labs, firms, communities, and parks are present, but there is no shared demand gateway, capacity matching, or accountable operating mechanism.
- 02

Linear potential, insufficient stitching
The Jing-Zhang corridor and Xiaoyue River provide a linear base, while stations, communities, parks, and enterprise edges still need walkable and service-oriented stitching.
- 03

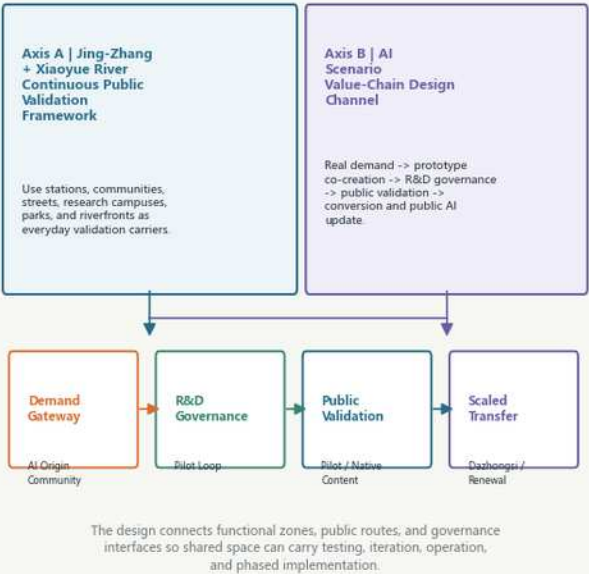

AI needs real city scenarios, not boundaryless deployment
Public-space testing needs scenario passports, entry review, human takeover, data boundaries, and exit rules.
- 04

Public value and commercial return are misaligned
Accessibility, environment, heritage, and community service should not be screened out by single-ROI logic or pure branding demands.

Missing-Link Logic and Design Response

Therefore, the proposal is not a new isolated plot or a single exhibition belt

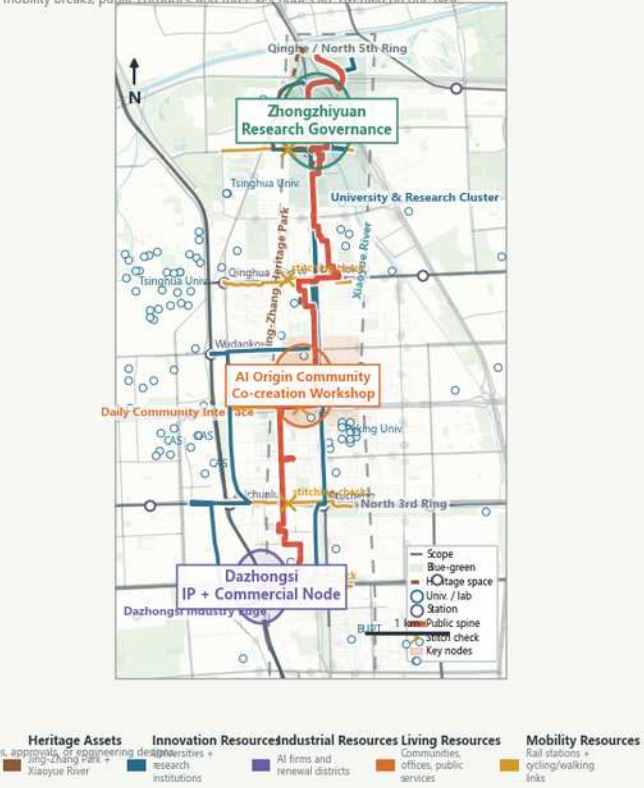

It is a dual system: a public-space framework plus an AI scenario value chain.

Evidence boundary: public data supports problem diagnosis only; provisional scopes, routes, and nodes are not statutory boundaries.

Integrated Resource Basemap

Land, open space, innovation resources, everyday services, industrial edges, mobility breaks, public corridors, and three key nodes are overlaid on one base.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Figure 02 | Site Overview + Overall Spatial Strategy | EN-02

System Logic

43.6 km²

Integrated research frame

11.4 km²

Overall public-design scope

368.4 ha

Three focused key-node areas

1. Demand Entry

AI Origin Community collects local problems through staffed, low-threshold interfaces.

2. Technical Admission

Zhongzhiyuan turns prototypes into reviewable tests with safety and governance rules.

3. Public Validation

Xiaoyue River and the heritage park verify ecology, culture,

mobility and everyday services.

4. Conversion + Renewal

Dazhongsi sorts validated services into public continuation, enterprise adoption or revenue return.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Figure 03 | Transit, Slow Mobility + Blue-Green Public Space | EN-v2

Four Mobility Tasks

Rapid Transfer Loop

Use existing rail, bus and cycling interfaces for efficient arrival and transfer.

Continuous Walking Experience

Link the three nodes through staged, legible and serviceable pedestrian sections.

Blue-Green Public Validation

Use Xiaoyue River and the heritage park for low-risk ecological, cultural and daily-life testing.

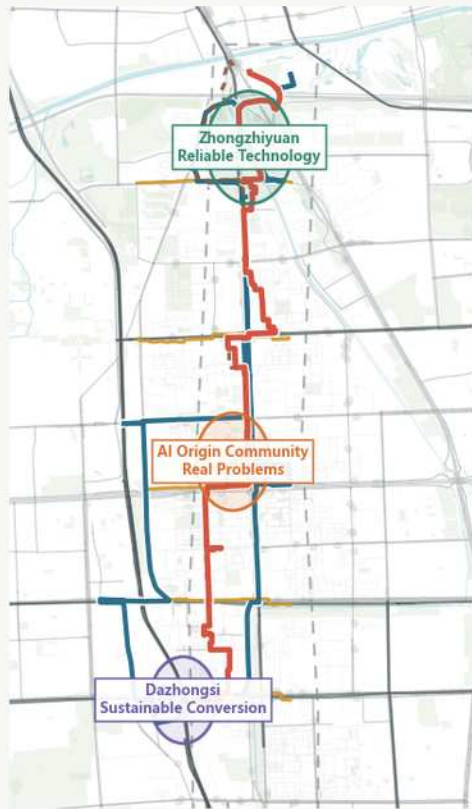

Service + Takeover Interfaces

Provide staffed help, accessible rest, wayfinding, maintenance access and emergency handover.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Figure 04 | Functional Zoning + Overall Spatial Structure | EN.v2

Capital systems are layered onto the existing urban fabric to support phased, low-disturbance renewal.

Five Functional Systems

F1 Continuous Public Spine

Connect arrival, wayfinding, rest, safety, accessibility and staffed service supply.

F2 River-Park Validation Belt

Use blue-green and heritage spaces for public-facing tests with clear exit rules.

F3 Community / Campus / Industry Loops

Create short everyday loops around stations, neighborhoods and institutional edges.

F4 Three AI Key Areas

Assign different responsibilities to Zhongzhiyuan, AI Origin Community and Dazhongsi.

F5 Technology Service Network

Link IP, compliance, capital, talent and international services without overstating implementation.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Figure 05 | Three Key Areas + Responsibility Matrix | ENV2

Entire nodes work as sequential responsibilities in one AI growth chain, rather than as isolated themed districts.

Node Responsibilities

Zhongzhiyuan

Make technology reliable

R&D adaptation, safety review,
governance sandbox, controlled
testing and operational handoff.

AI Origin Community

Make problems real

Staffed problem entry, resident
co-creation, youth prototyping,
public review and feedback
logging.

Dazhongsi

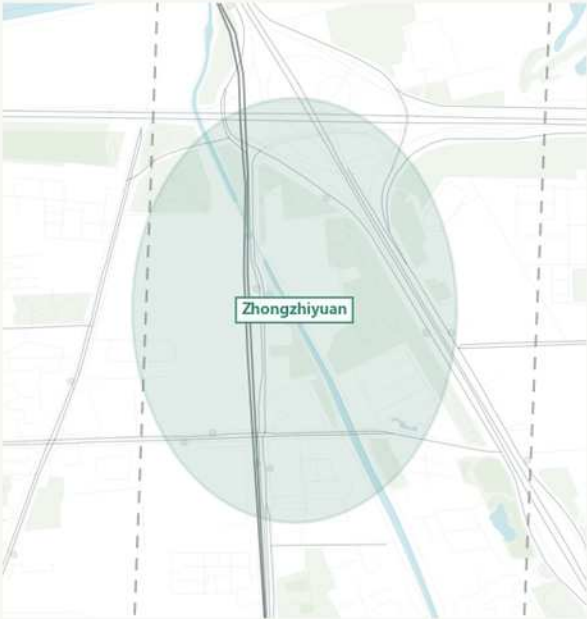

Make outcomes sustainable

Station-city gateway, product
validation, enterprise service,
launch window and revenue-return
operations.

Real demand -> technical admission -> public validation -> public / commercial sorting -> public AI renewal

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Figure 06 | Zhongzhiyuan R&D Pilot + Governance Hub | EN v2

Carrier System

Shared R&D Lab

Adapt models, interfaces, devices and operation tools to real urban-service scenarios

Trusted Agent Sandbox

Check permissions, logs, bias, privacy, safety and human takeover before field exposure

Controlled Test Yard

Test terminals, embodied devices, emergency stops and reversible deployment in limited areas

Public Test Gallery

Support public understanding and third-party review without exposing high-risk systems

Operating Sequence

Demand Intake

Candidate problems arrive from the Origin Community scenario passport.

Prototype Adaptation

Teams prepare service scripts, interfaces, maintenance plans and responsible owners.

Governance Review

Privacy, security, safety, ethics, copyright and takeover mechanisms are checked.

Admission Protocol

Scope, staffing, stop rules, evaluation criteria and exit conditions are locked.

Field Validation

Only admitted scenarios move to river-park or Dazhongsi pilots.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Figure 07 | AI Origin Community Demand Entry + Co-Creation | EN v2

Community Carrier

Staffed Entry

Offline windows and assisted expression keep participation accessible to non-expert users

Problem Collection Desk

Describe, classify, merge and log issues without excessive or unnecessary data collection

Youth Prototype Workshop

Use open desks, light tools and review areas to turn problems into low-fidelity prototypes

Public AI Feedback Room

Use manual tickets, dashboards and public review to support continue, adjust or exit decisions

Operating Sequence

Community Entry

Residents, youth, commuters and operators express place-based

service problems

Scenario Passport

Record problem, consent, place, owner, data boundary, fallback and

exit rules

Co-Creation

Prepare prototype, service script and low-risk test plan with

residents and operators

Community Review

Review public value, acceptance, fairness, maintenance burden and

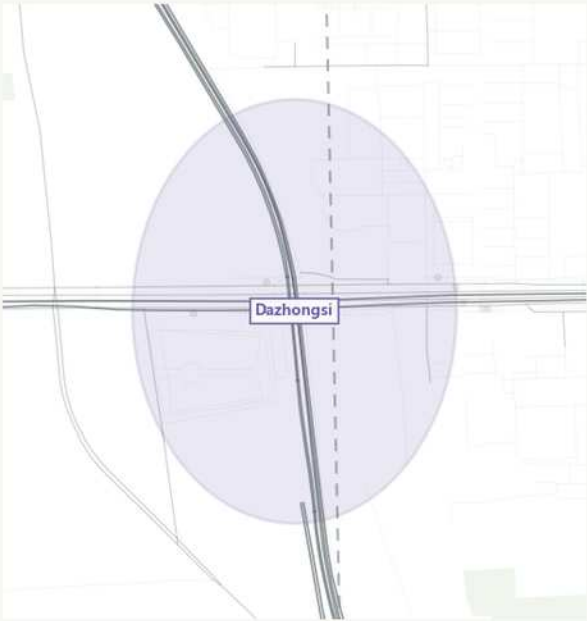

risk

Zhongzhiyuan Handoff

Qualified candidates move to R&D adaptation and governance review

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Figure 08 | Dazhongsi Productization + Operations Scaling Node | EN v2

Conversion Carrier

Station-City Gateway

Metro, bus, walking stitching and accessible arrival organize a public-facing service interface

AI Product Validation Hall

Run trials, demos, user testing and maintainability review before market-facing deployment

Enterprise Service Desk

Bundle deployment, API, compliance, talent, capital and international service support

Return-Loop Backend

Separate contracts, settlement, audits and public renewal from enterprise operating costs.

Operating Sequence

Validated Scenario

Only field-tested scenarios enter production and operation sorting.

Commercial Potential Review

Check payer, unit economics, IP, compliance, public risk and maintenance duty.

Product Trial

Test terminals, service scripts, staffing and user support under controlled conditions.

Contract Path

Define procurement, subscription, licensing or service fees only where legal and viable.

Public AI Renewal

Qualified returns support public operation, accessibility, maintenance and audit capacity.

Technical & Investment Indicators

A lightweight start-up framework based on three nodes, two public scenario belts and verifiable AI pilots

Deliverable Board 01

Place-Grown Intelligence
Centennial Jing-Zhang Urban AI Growth System

Overall Design Area

11.4 km²

Official text basis; final boundary to be reviewed

Key Area Total

368.4 ha

Zhongzhiyuan, AI Origin Community, Dazhongsi

Concept Route Coverage

~51.9 km

Mobility, walking, river-park and stitch routes

First-Wave AI Scenarios

12

Including 4 industry validation scenarios

1. Technical Indicators

A spatial framework, measurable scenarios, technical admission and operational review

Spatial Nodes

3 nodes: Zhongzhiyuan / AI Origin / Dazhongsi

Public Scenario Belts

Xiaoyue River eco-health +
Jing-Zhang heritage exchange

Service Points

Dazhongsi: 2 required + 1 conditional
mobile AI service points

Technical Admission

100% scene passport coverage
for first-wave scenarios

Governance O&M

Data minimization, third-party testing,
annual review

Mobility Framework

2 north-south systems:
rapid connection + continuous walk

East-West Stitches

5 cross links, approx. 9.3 km

Scenario Validation

12 first-wave AI scenarios,
including 4 industry pilots

Public Safeguard

100% human takeover + offline access
for public AI scenes

Exit Mechanism

Pause or exit low-value, high-risk,
or low-acceptance scenarios

2. Investment Indicators

Four ledgers separate committed scope, annual operation, enterprise input and conditional works

One-Time Project Investment

RMB 117-405M

Annual Operations

RMB 35-125M / yr

Four Financial Ledgers

- 01 One-time investment** Public framework, shared nodes, AI base, pilots and governance start-up
- 02 Annual operation** Human service, platform maintenance, device patrol, events and audit
- 03 Enterprise input** Enterprise R&D, compute, proprietary devices, fit-out and marketing
- 04 Conditional works** Bridges, roads, underground space, utilities and major retrofits

One-Time Investment Breakdown

- | | | |
|-----------------------------|------------------------|--------------------------|
| C1 Studies RMB 5-15M | C2 Mobility RMB 25-70M | C3 Blue-green RMB 12-50M |
| C4 Node retrofit RMB 25-90M | C5 AI base RMB 30-100M | C6 Pilots RMB 15-60M |
| C9 Governance RMB 5-20M | | |

Boundary note: concept-stage order-of-magnitude estimate only; not a formal budget, engineering cost, government investment commitment or enterprise investment commitment.
Green space ratio, public space ratio and other area-based indicators shall be recalculated after final boundaries are confirmed. Route length is coverage, not construction length.

Commercial AI Revenue & Public AI Return Loop

Commercial AI creates incremental revenue; public AI gains long-term renewal capacity

Deliverable Board 02

Place-Grown Intelligence
Conditional revenue estimate

Start-up Phase, 0-18 months

Revenue RMB 1.25-10M

Return RMB 0.4-2.5M

Network Phase, 18-36 months

Revenue RMB 5-38M / yr

Return RMB 1.5-9M / yr

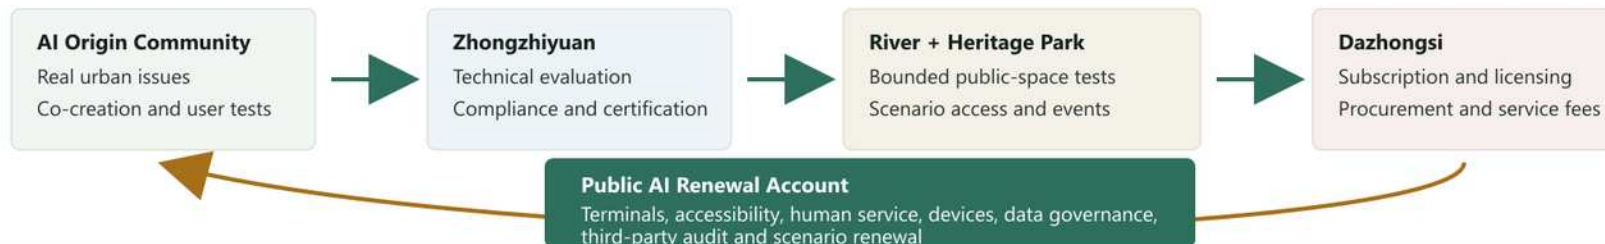

Steady State, after Year 3

Revenue RMB 15-120M / yr

Return RMB 5-30M / yr

1. Spatial Loop: Problem Intake - Technical Validation - Public Testing - Product Conversion - Public Renewal

Only qualified incremental revenue from public scenarios, shared facilities, platform services, public brand and governance testing enters the return base

2. Five Commercial AI Revenue Items

Board-level formulas; final ratios and contract accounts must be confirmed during implementation

Scenario Access

Projects × RMB 50-300k

Compliance Testing

Projects × RMB 100-500k

Platform Access

Projects × RMB 50-500k / yr

User Test & Launch

Batches × RMB 100k-1M

Licensing / Procurement

Projects × RMB 100k-3M or 1%-5%

● Return amount is not total revenue; legacy enterprise revenue and unrelated business income are excluded from the return base. ● Conditional estimate only; it does not imply signed contracts, established funds, realized income or fixed return ratios.

Submission wording: commercial AI revenue is a supplementary renewal pool for public AI, working with public investment, annual O&M and social contribution rather than replacing required operations funding.

Zhongzhiyuan

AI Technology Validation And Governance Admission Node

Where R&D, controlled testing, public test galleries and human takeover mechanisms are embedded in the existing park fabric.

Public Test Gallery

Public experience, third-party tests

Bus And Cycling Access

Interchange, stops and slow entry

Key Legend

Transit access

Walking access

Controlled testing

Human takeover

Figure Note

Zhongzhiyuan is not a closed lab. It acts as the northern technology gateway where shared R&D, governance review, controlled yards and public test galleries form an open but controlled admission node.

North-South Fast Access

Connects to Origin and Dazhongsi

Human Takeover Point

On-duty support and incident review

Continuous Walking Line

Wayfinding, shade and accessibility

Recommended Caption

Zhongzhiyuan brings enterprise testing, third-party review and public experience into one scenario-passport system.

Access note: this conceptual aerial uses existing transit, walking, cycling and public interfaces as the primary access logic.

Boundary note: conceptual figure only; it is not a statutory red line, approved construction boundary, secured site or implementation commitment.

AI Origin Community

Real Problem Entry And Youth Co-Creation Node

Community living rooms, problem walls, prototype workshops and staffed service windows let urban demand enter the AI scenario-passport system.

Community Problem Wall

Mobility, lighting, accessibility

Youth Co-Creation Workshop

Students, residents and companies

Public AI Service Window

Consultation, feedback, takeover

Figure Note

The AI Origin Community gathers real problems, supports youth co-creation, offers low-threshold prototype trials and keeps offline staffed access for equitable participation.

Prototype Trial Loop

Wayfinding and feedback terminals

Bus And Cycling Access

Station transfer and slow entry

Age-Friendly Crossing

Rest, shade and accessibility

Key Legend

● Problem entry

● Youth prototypes

● Staffed access

● Community review

Recommended Caption

AI Origin Community is the civic living room where real urban problems enter the AI system and residents can review the results.

Access note: this conceptual aerial uses existing transit, walking, cycling and public interfaces as the primary access logic.

Boundary note: conceptual figure only; it is not a statutory red line, approved construction boundary, secured site or implementation commitment.

Dazhongsi

AI Productization And Operational Scaling Node

Station-city stitching, stock commercial renewal and shared enterprise services turn validated AI scenarios into purchasable, subscribable and operable services.

Station-City Gateway

Metro, bus and walking access

AI Product Validation Hall

Trials, demos and public review

2+1 Mobile Service Points

Route validation and product use

Figure Note

Dazhongsi handles product validation, enterprise services, launch exchange and public/commercial classification through station interfaces and stock commercial renewal.

Enterprise Service Desk

Investment, API and compliance

Public / Commercial Sorting

Scale only validated value

Launch And Exchange Window

Release, methods and partners

Key Legend

Station-city stitching

Product validation

Enterprise services

Return loop

Recommended Caption

Dazhongsi is not an ordinary commercial endpoint; it is the productization, operations and classification outlet for validated scenarios.

Access note: this conceptual aerial uses existing transit, walking, cycling and public interfaces as the primary access logic.

Boundary note: conceptual figure only; it is not a statutory red line, approved construction boundary, secured site or implementation commitment.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Special S02 | Personas and Scenario Mapping v1

Six overlapping community roles are translated into 6 operable personas tied to tasks, spatial entries, scenario cards, and human boundaries

6 personas, not demographic labels

Each persona defines the task, friction, entry path, AI value, human fallback, and stop rule.

P-01 Local Everyday Resident Living community Task Report daily problems and use low-barrier public services. Barrier Worries about disturbance, data capture, or no response. Path Neighborhood entry -> Origin desk / mobile desk -> human-reviewed ticket. Boundary Digital use optional; no default face recognition or commercial profiling. Scenes SC-01 / SC-04 / SC-06 / SC-12 Spaces AI Origin Community + river + public feedback nodes	P-02 Commuting Young Passerby Passing-through community Task Move safely through the river, park, and station area. Barrier Route gaps, detours, night safety, accessibility, and unclear help points. Path Transit stop -> walking line -> rest point / staffed desk. Boundary Anonymous routing is allowed; help requests go to human staff first. Scenes SC-03 / SC-06 / SC-09 Spaces Public square + station zones + Dazhongsi local identity
P-03 Campus / Developer Co-creator Creating community Task Find real urban problems, prototype cheaply, and get feedback. Barrier Unclear problem validity, test access, and next-stage adoption. Path Problem call -> prototype workshop -> Zhongzhiyuan sandbox. Boundary Before field use: human review, bounded test, and stop rules. Scenes SC-02 / SC-07 / SC-08 Spaces AI Origin Community + Zhongzhiyuan	P-04 Cultural Walker and Public Visitor Cultural community Task Understand railway, river, and urban memory through light interaction. Barrier Fragmented history, broken guidance, and uncertain content rights. Path Heritage park / river -> memory station -> content experience. Boundary Oral histories, media, and generated content need source and rights records. Scenes SC-05 / SC-11 Spaces Heritage Park + river + Dazhongsi cultural site
P-05 AI Enterprise Product Validator Industrial community Task Test, review, and translate AI products in bounded urban settings. Barrier Missing user tests, deployment interfaces, compliance edge, and duty. Path Zhongzhiyuan review -> bounded river/park trial -> Dazhongsi service. Boundary No procurement promise; scaling follows evidence and classification gates. Scenes SC-07 / SC-08 / SC-09 / SC-10 / SC-11 Spaces Zhongzhiyuan + development area + Dazhongsi	P-06 Public Operator and Human Fallback Operating community Task Manage access, incidents, review, complaints, events, and maintenance. Barrier Unclear owner, service hours, cost, takeover authority, and exit rules. Path Belt dashboard -> staffed nodes -> review / pause / exit decision. Boundary AI cannot approve projects, funding, or scaling; humans decide. Scenes SC-01 / SC-06 / SC-08 / SC-10 / SC-12 Spaces Belt operations dashboard + service center + back-office nodes

Scenario - Space - Operations Mapping

Scenario IDs come from the first 12 scenario cards; blank cells are not the persona's primary spaces.

	AI Origin Community	Zhongzhiyuan	River + Heritage Park	Dazhongsi	Belt Operations Platform
	demand / co-creation	R&D / governance	public validation	production / ops	human fallback / feedback
P-01 Local Everyday Resident	SC-01,12		SC-04,06		feedback
P-02 Commuting Young Passerby			SC-03,06	SC-09	help
P-03 Campus / Developer Co-creator	SC-02	SC-07,08			passport
P-04 Cultural Walker and Public Visitor			SC-05	SC-11	rights
P-05 AI Enterprise Product Validator		SC-07,08	trial	SC-09,10,11	audit
P-06 Public Operator and Human Fallback	SC-01,12	SC-08	SC-06	SC-10	owner

Formal Expression Boundary

1. This board is a design hypothesis for submission, not field-interview statistics or personal-data profiling.
2. The six community roles overlap; one person may appear in multiple personas and scenarios.
3. Public-space AI scenarios use data minimization, opt-out access, and human assistance by default.
4. Enterprise tests, commercialization, and public-AI feedback require later owner, contract, and compliance confirmation.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Persona - Scenario Matching Map v1

Six personas explain the real users, spatial entries, and human responsibility boundaries behind 12 scenario cards

6 personas enter one urban AI growth chain

Personas are not standalone labels; they place real problems, innovation capacity, public experience, industrial validation, and human operations in one loop.

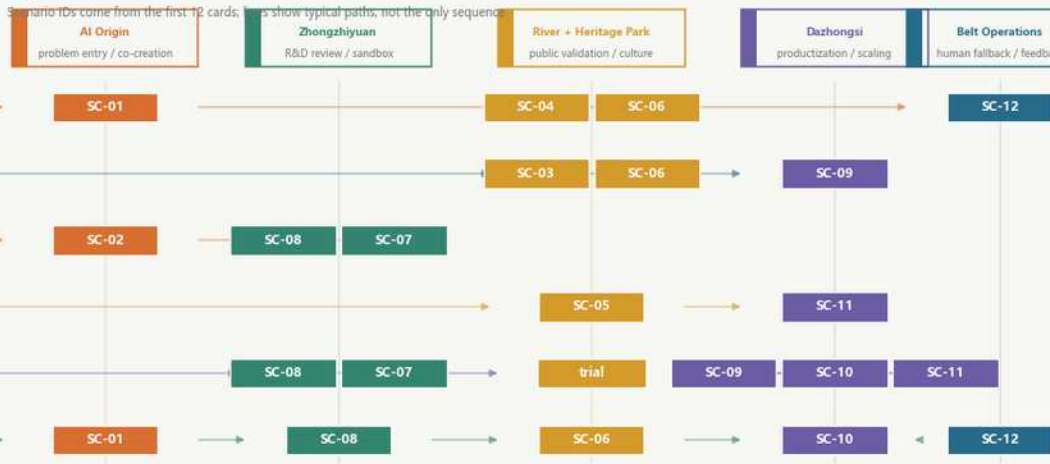

Persona Entries

from six overlapping communities

- P-01 Local Everyday Resident**
daily issues, public services, facility feedback
- P-02 Commuting Young Passerby**
walkability, night safety, station access
- P-03 Campus / Developer Co-creator**
real problems, cheap prototypes, bounded tests
- P-04 Cultural Walker and Public Visitor**
railway memory, river content, content rights
- P-05 AI Enterprise Product Validator**
technical review, bounded validation, product translation
- P-06 Public Operator and Human Fallback**
access, review, complaints, pause, exit

Spatial Receivers and Scenario Flow

Scenario IDs come from the first 12 cards. This shows typical paths, not the only sequence.

12 Scenario Coverage

every scenario is carried by at least one persona

- | | |
|----|----------------------------------|
| 01 | Urban Problem Desk |
| 02 | One-Day Prototype Workshop |
| 03 | Walking Companion and Detour |
| 04 | Xiaoyue River Co-management |
| 05 | Railway Memory Co-creation |
| 06 | Night Safety and Help |
| 07 | Embodied Device Test Yard |
| 08 | Trusted Agent Governance Sandbox |
| 09 | Public Terminal Test Street |
| 10 | Enterprise Deployment Desk |
| 11 | Content and Rights Lab |
| 12 | Public AI Feedback Room |

Formal Boundary

- Design hypothesis, not field statistics.
- Public spaces keep opt-out and human help.
- Industrial validation does not bypass Zhongzhiyuan review.
- Dazhongsi receives only evidenced projects with commercial potential.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Urban Problem Collection Desk | AI Origin Community

Real problems are heard and human-confirmed before entering the AI co-creation and validation chain

SCENARIO TASK

Urban Problem Collection Desk

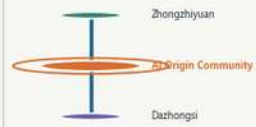

A human window, co-creation table, and public terminal turn a vague concern into a reviewable, traceable scenario passport.

NODE **K2 AI Origin Community** CHAIN STAGE **The first entry of real needs into the system**

POSITION IN THE FULL PROCESS

LOCATION INDEX

SCENE NOTE

At an open ground floor, residents raise everyday issues through a human window. AI only assists sorting; a human confirms the scenario passport before prototyping and review.

Basis: scene-cards-v0.1.mxd, PROJECT-STATE.mxd, and the AI Origin node board. The hero is an AI-generated concept visualization, not a site photo or implementation commitment.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

One-Day Youth Prototype Workshop | AI Origin Community

Turn scenario passports into discussable, testable and reversible low-cost prototypes.

Scene Task

One-Day Youth Prototype Workshop

Open desks, light tools and review areas convert scenario passports into service flows, low-fidelity models and test plans.

Node	Stage	Adjacent
K2 AI Origin	Demand Translation	SC-01 -> Zhongzhiyuan

System Process

Location

Scene Note

Youth co-creators use scenario passports as input, prepare service flows, low-fidelity models and test plans, and submit them for community review before real deployment.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Walking Companion And Accessible Detour | Continuous Walking Line

Provide explainable, rejectable and staff-supported mobility assistance.

Scene Task

Walking Companion And Accessible Detour

Wayfinding, low-height terminals, help points and staffed service stations provide explainable routes, detours, rest and manual help.

Node	Stage	Adjacent
Walking Line	Public Validation	Zhongzhiyuan -> River-Park

System Process

Location

Scene Note

Users can anonymously receive route explanation, detour and rest information. Manual help remains available; face recognition and continuous tracking are not default functions.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Xiaoyue River Ecological Co-Management | Xiaoyue River Line

Convert environmental anomalies into traceable, reviewable and closed-loop maintenance tickets.

Scene Task

Xiaoyue River Ecological Co-Management

Low-power sensing, observation decks and maintenance interfaces help identify water, planting, heat and facility anomalies.

Node	Stage	Adjacent
Xiaoyue River	Ecological Validation	Zhongzhiyuan -> River-Park

System Process

Location

Scene Note

Residents and maintenance staff review anomalies together. AI supports traceable tickets and does not turn public-space monitoring into crowd profiling.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Jing-Zhang Memory Co-Creation Station | Heritage Park Line

Keep railway memory co-created with clear sources, authorization and update rules.

Scene Task

Jing-Zhang Memory Co-Creation Station

Audio points, physical labels and removable projection organize oral history, railway archives and community content into traceable guidance.

Node	Stage	Adjacent
Heritage Park	Memory And Guidance	Origin -> River-Park

System Process

Location

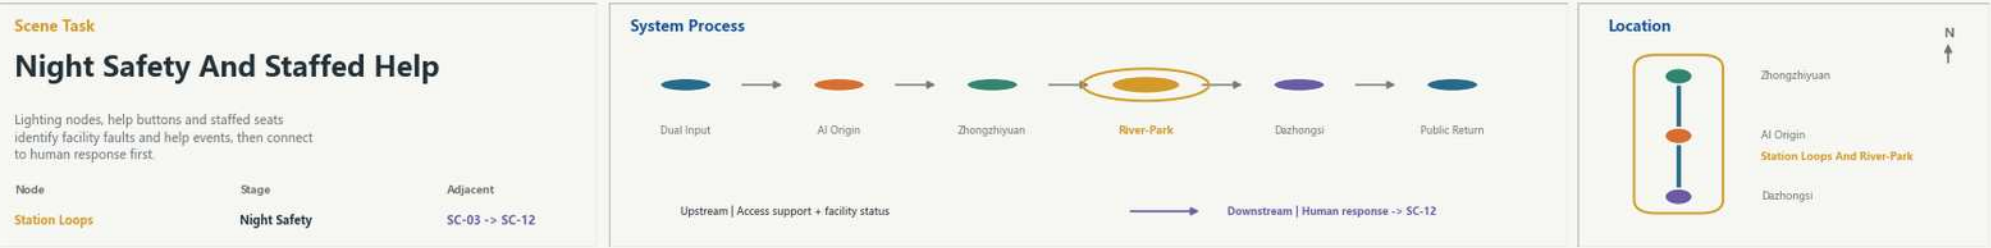

Scene Note

Community stories and railway archives enter guidance only with source and authorization records. Projection and labels remain removable and updatable.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Night Safety And Staffed Help | Station Loops And River-Park

Route nighttime help to staffed response first, without equating safety with identity tracking.

Scene Note

Facility faults and help events are routed to staffed response. The route and help service can be used anonymously; face recognition is not a default capability.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Embodied Device Shared-Path Test Yard | Zhongzhiyuan

Let devices learn yielding, stopping and human takeover inside a limited test yard first.

Scene Task

Embodied Device Shared-Path Test Yard

Limited test yards, observation galleries and repair bays test delivery, cleaning and inspection devices around pedestrians.

Node	Stage	Adjacent
K1 Zhongzhiyuan	Embodied Device Test	SC-08 -> Pilot

System Process

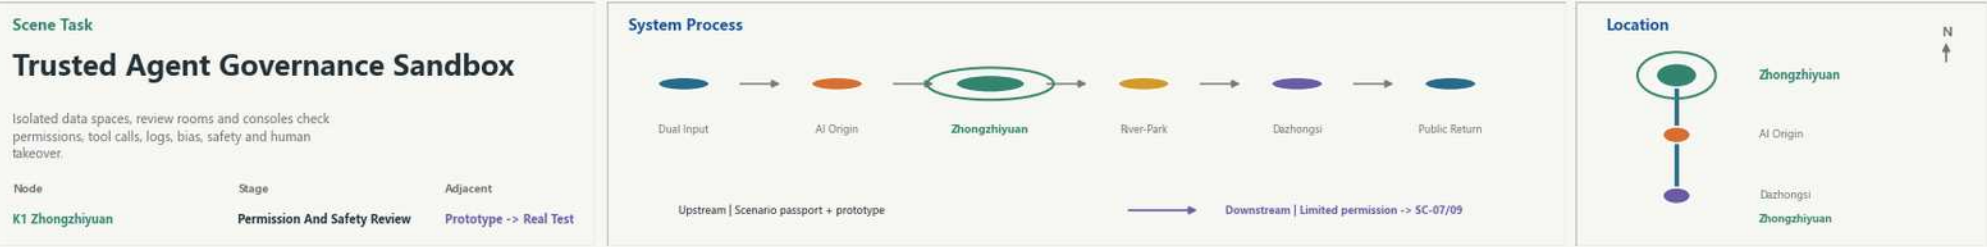

Location

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Trusted Agent Governance Sandbox | Zhongzhiyuan

Review permissions, logs and safety before agents enter real scenarios.

Scene Note

Permissions, tool calls, logs, bias and safety are reviewed before field testing. Responsible humans confirm key decisions; failed agents lose tool access and return for repair.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Public Smart-Terminal Test Street | Dazhongsi

Test usability, accessibility and maintenance cost in real pedestrian flows.

Scene Task

Public Smart-Terminal Test Street

Mobile booths, test positions and staffed service counters test usability, accessibility, stability and maintenance cost.

Node	Stage	Adjacent
K3 Dazhongsi	Public Terminal Test	River-Park -> SC-10

System Process

Location

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Enterprise Agent Deployment And Service Desk | Dazhongsi

Connect validated products to enterprise service while keeping scale-down and exit paths.

Scene Note

The service desk supports deployment, integration, compliance and O&M handover. Critical permissions and launch decisions remain human-confirmed.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

AI Content Consumption And Copyright Test Field | Dazhongsi

Make content consumption pass source, copyright and youth-protection checks.

Scene Task

AI Content Consumption And Copyright Test Field

Small screening, streaming units and copyright desks
test interactive content, digital rights, willingness
to pay and youth protection.

Node	Stage	Adjacent
K3 Dazhongsi	Content And Copyright Test	SC-05 -> SC-12

System Process

Location

Scene Note

Interactive content is checked for source,
authorization and copyright. Manual registration
and youth protection are required; consumption
tests cannot bypass public review.

Place-Grown Intelligence: Centennial Jing-Zhang Urban AI Growth System

Public AI Operations And Feedback Room | Belt-Wide Platform

Use public review and responsible sign-off to decide continue, adjust or exit.

Scene Task

Public AI Operations And Feedback Room

Operations dashboards, manual tickets and public review seats aggregate public value, acceptance, technical effect and O&M data.

Node	Stage	Adjacent
Belt-Wide Platform	Feedback And Exit	All scenes -> Decision

System Process

Location

Scene Note

Public value, acceptance, technology and O&M data are reviewed together. The public and responsible owners decide whether each scenario continues, adjusts or exits.
