

QINGHE PIVOT REALM - NORTHERN GATEWAY | Qinghe Station TOD Gateway (Concept)

Anchored on the real Qinghe HSR station, the concept turns HSR 'arrival' into innovation 'convergence', forming the northern gateway of the Centennial Jing-Zhang AI Innovation Belt. One station, one pivot, three-node network: Shuguang Living Room (station-front urban living room), Rail-over Pivot Platform (rail-over innovation complex), Shuhe Nexus (north-station tech community). Public-benefit mechanism: over-track value feeding back into public space, with a reversible public-space component library, community co-creation council window, honor display system and annual programs. Three official text scopes: Coordinated Research - 43.6km², Overall Design - 11.4km²; Key Areas - 368.4ha. All geometry in this package is provisional concept model; recompute when official boundary and survey data are released.

12 scenario cards, 3 industry test scenarios, 8 scenario nodes and 3 AI landmarks. AI governance three-phrase rule: anonymized aggregation only, key decisions human-reviewed, no over-surveillance. High-risk scenarios (seamless security / crowd guidance) set statutory-actor assumptions, minimal data, retention-deletion, appeal, human takeover and pilot exit conditions.

Long-term operation: annual programs (HSR pop-up expo / rail-over convergence forum / station-front weekend market), developer community (open APIs + test sandbox), scenario open call (quarterly test list), attraction-conversion (pitch filing - landing tracking - feed-back credits); phasing near 1-3y, mid 3-5y, long 5-10y with stop/exit paths.

6 sourced global hub cases: Takanawa Gateway City, Azabudai Hills, King's Cross, Hudson Yards, Jewel Changi, Paris La Defense (see proposal/sources.json).

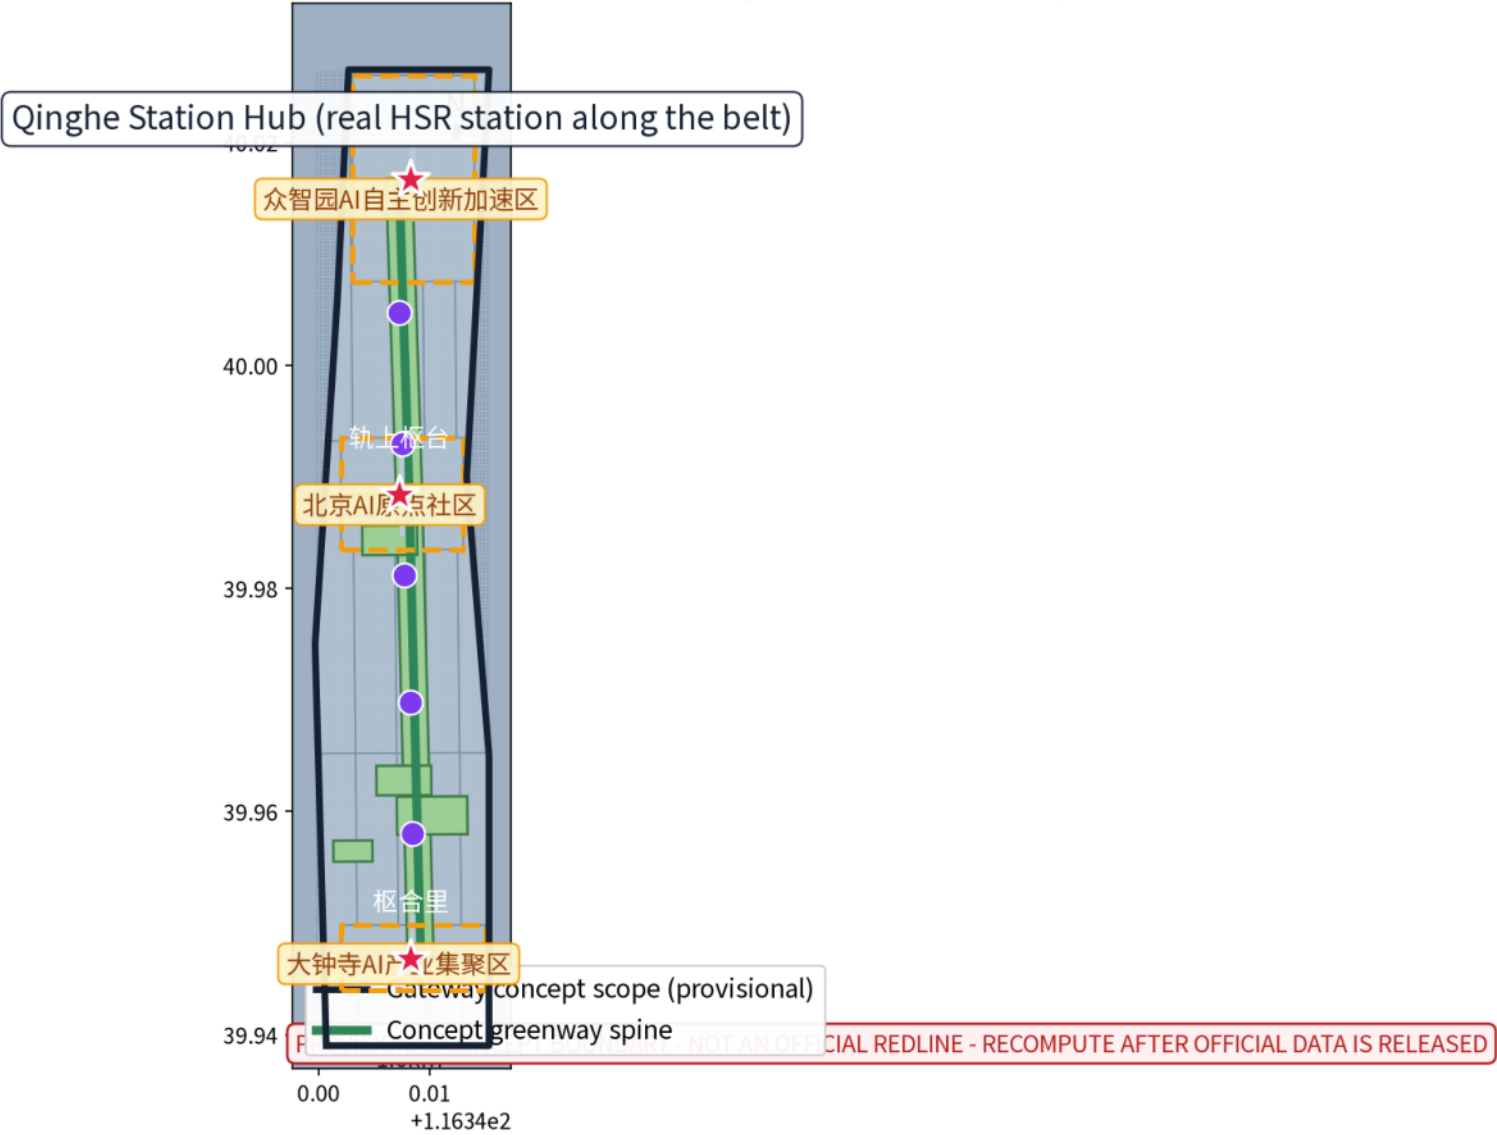

No trademark search completed at concept stage: names and marks are internal working codenames, restricted from external use/registration until clearance. No statutory conclusion or construction commitment is contained.

ALL CONTENT IS CONCEPTUAL - PROVISIONAL CONCEPT BOUNDARY - NOT AN OFFICIAL REDLINE - RECOMPUTE AFTER OFFICIAL DATA IS RELEASED

2. site-overview

ALL CONTENT IS CONCEPTUAL - PROVISIONAL CONCEPT BOUNDARY - NOT AN OFFICIAL REDLINE - RECOMPUTE AFTER OFFICIAL DATA IS RELEASED

Three official text scopes: Coordinated Research ~43.6km² • Overall Design ~11.4km² • Key Areas ~368.4ha

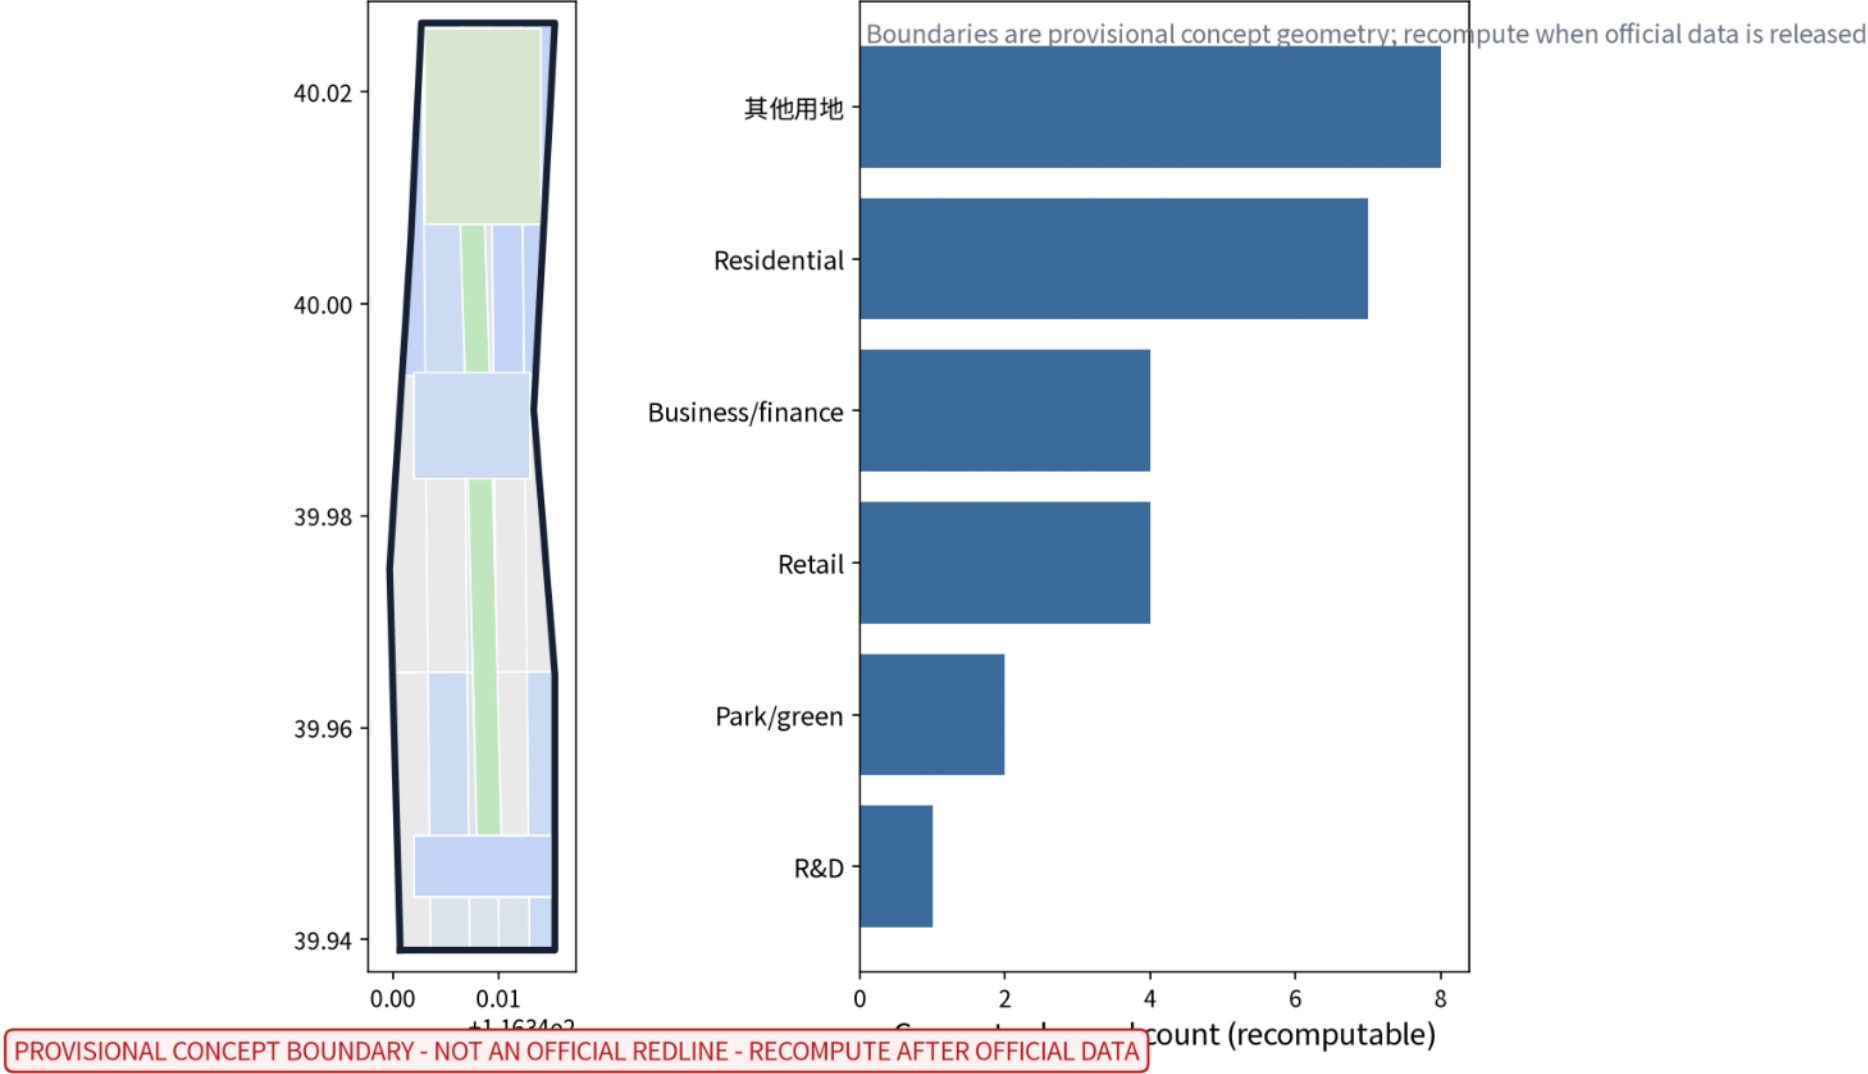

3. land-use-structure

ALL CONTENT IS CONCEPTUAL - PROVISIONAL CONCEPT BOUNDARY - NOT AN OFFICIAL REDLINE - RECOMPUTE AFTER OFFICIAL DATA IS RELEASED

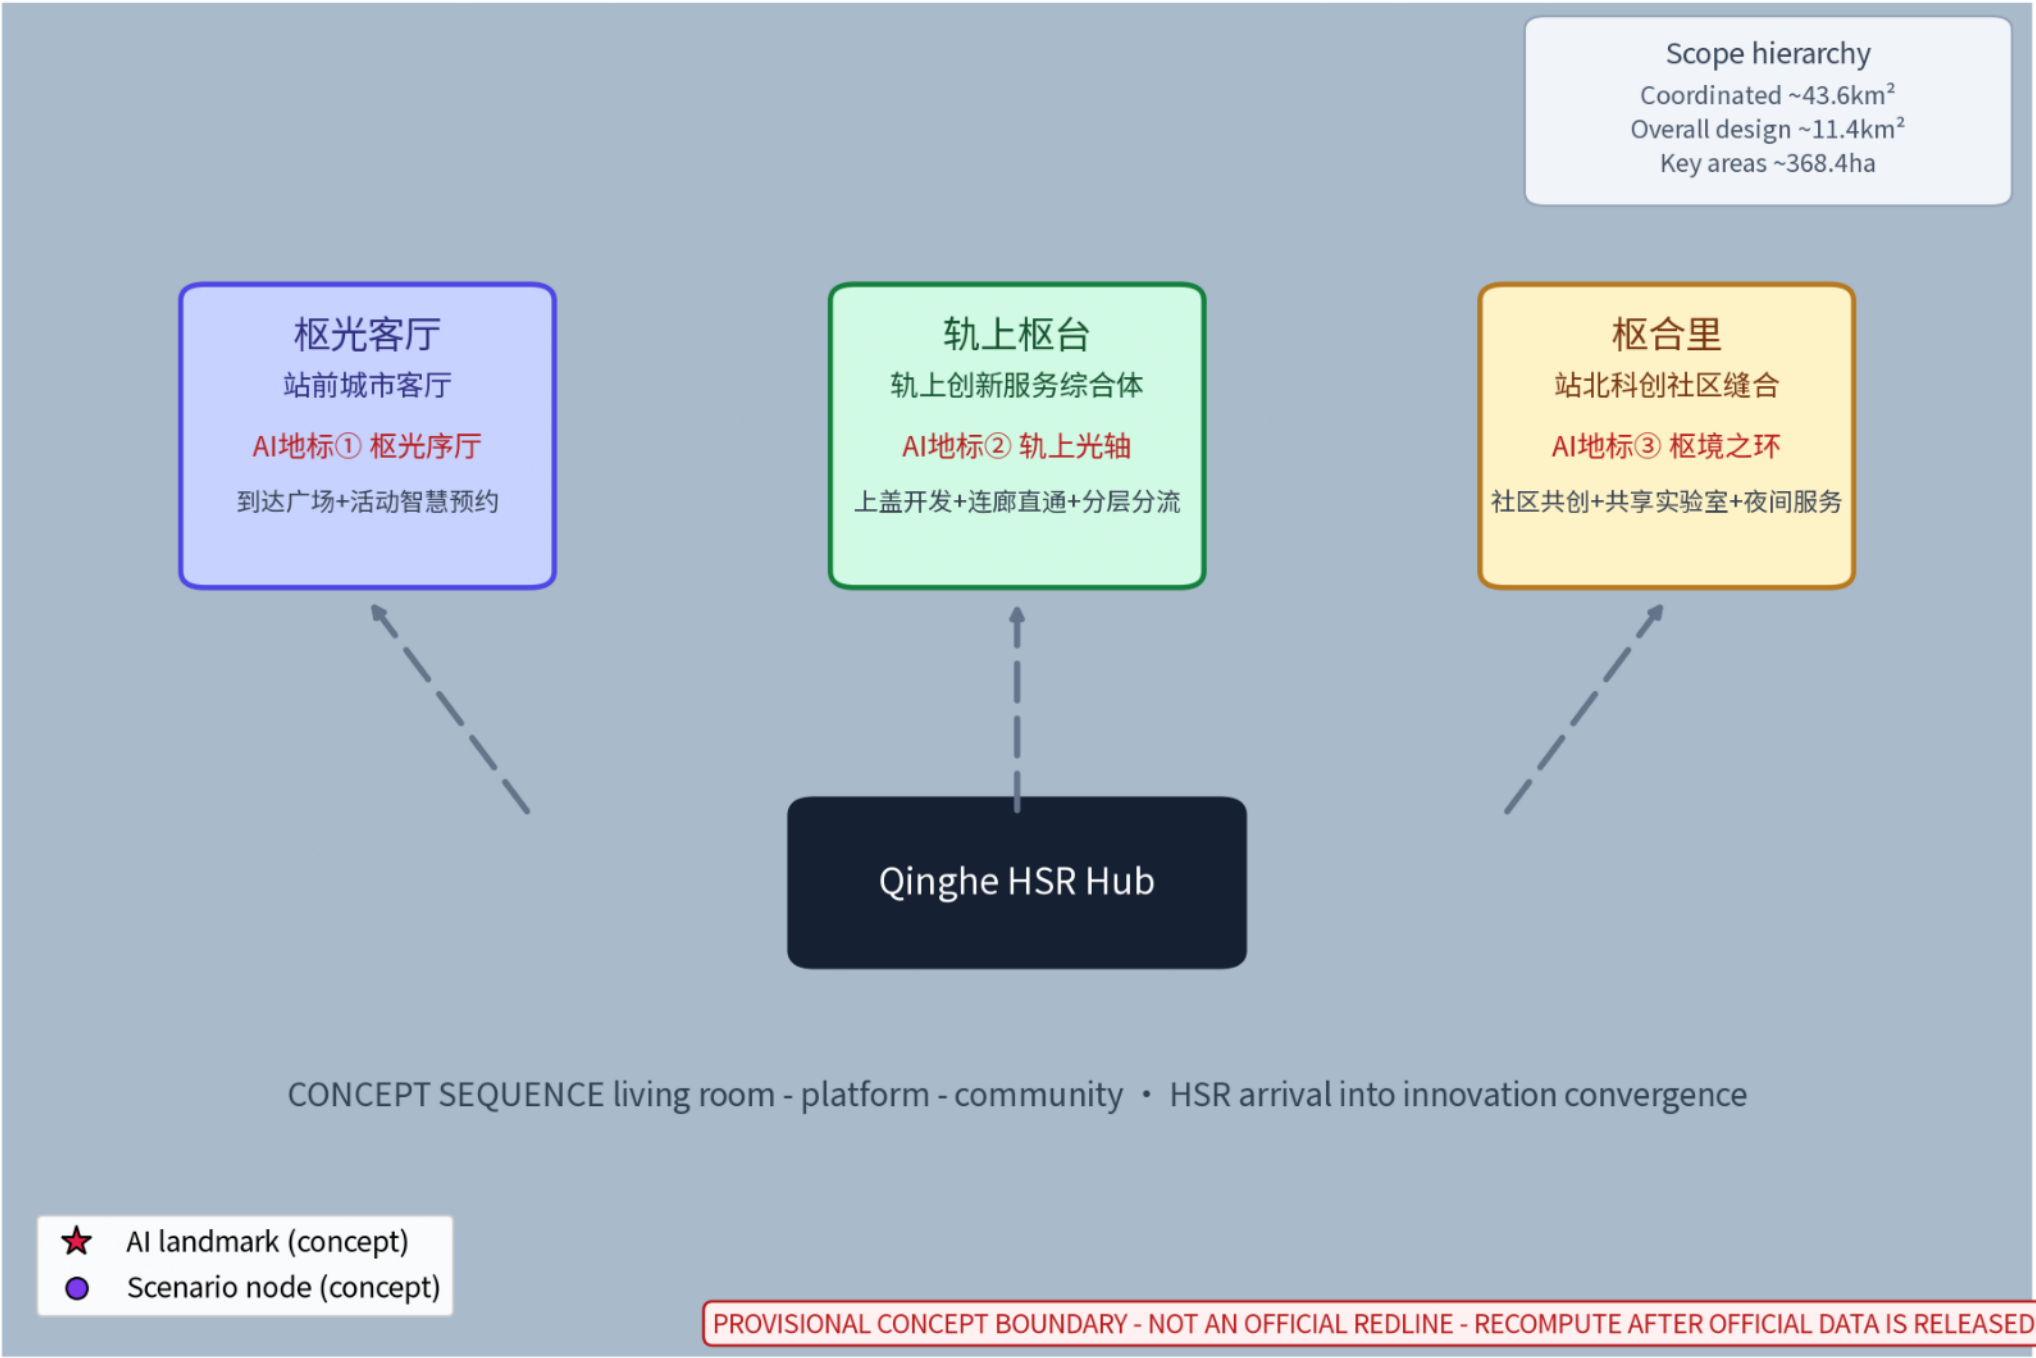

Three official text scopes: Coordinated Research ~43.6km² • Overall Design ~11.4km² • Key Areas ~368.4ha

Gateway concept land-use structure (provisional)

4. key-areas

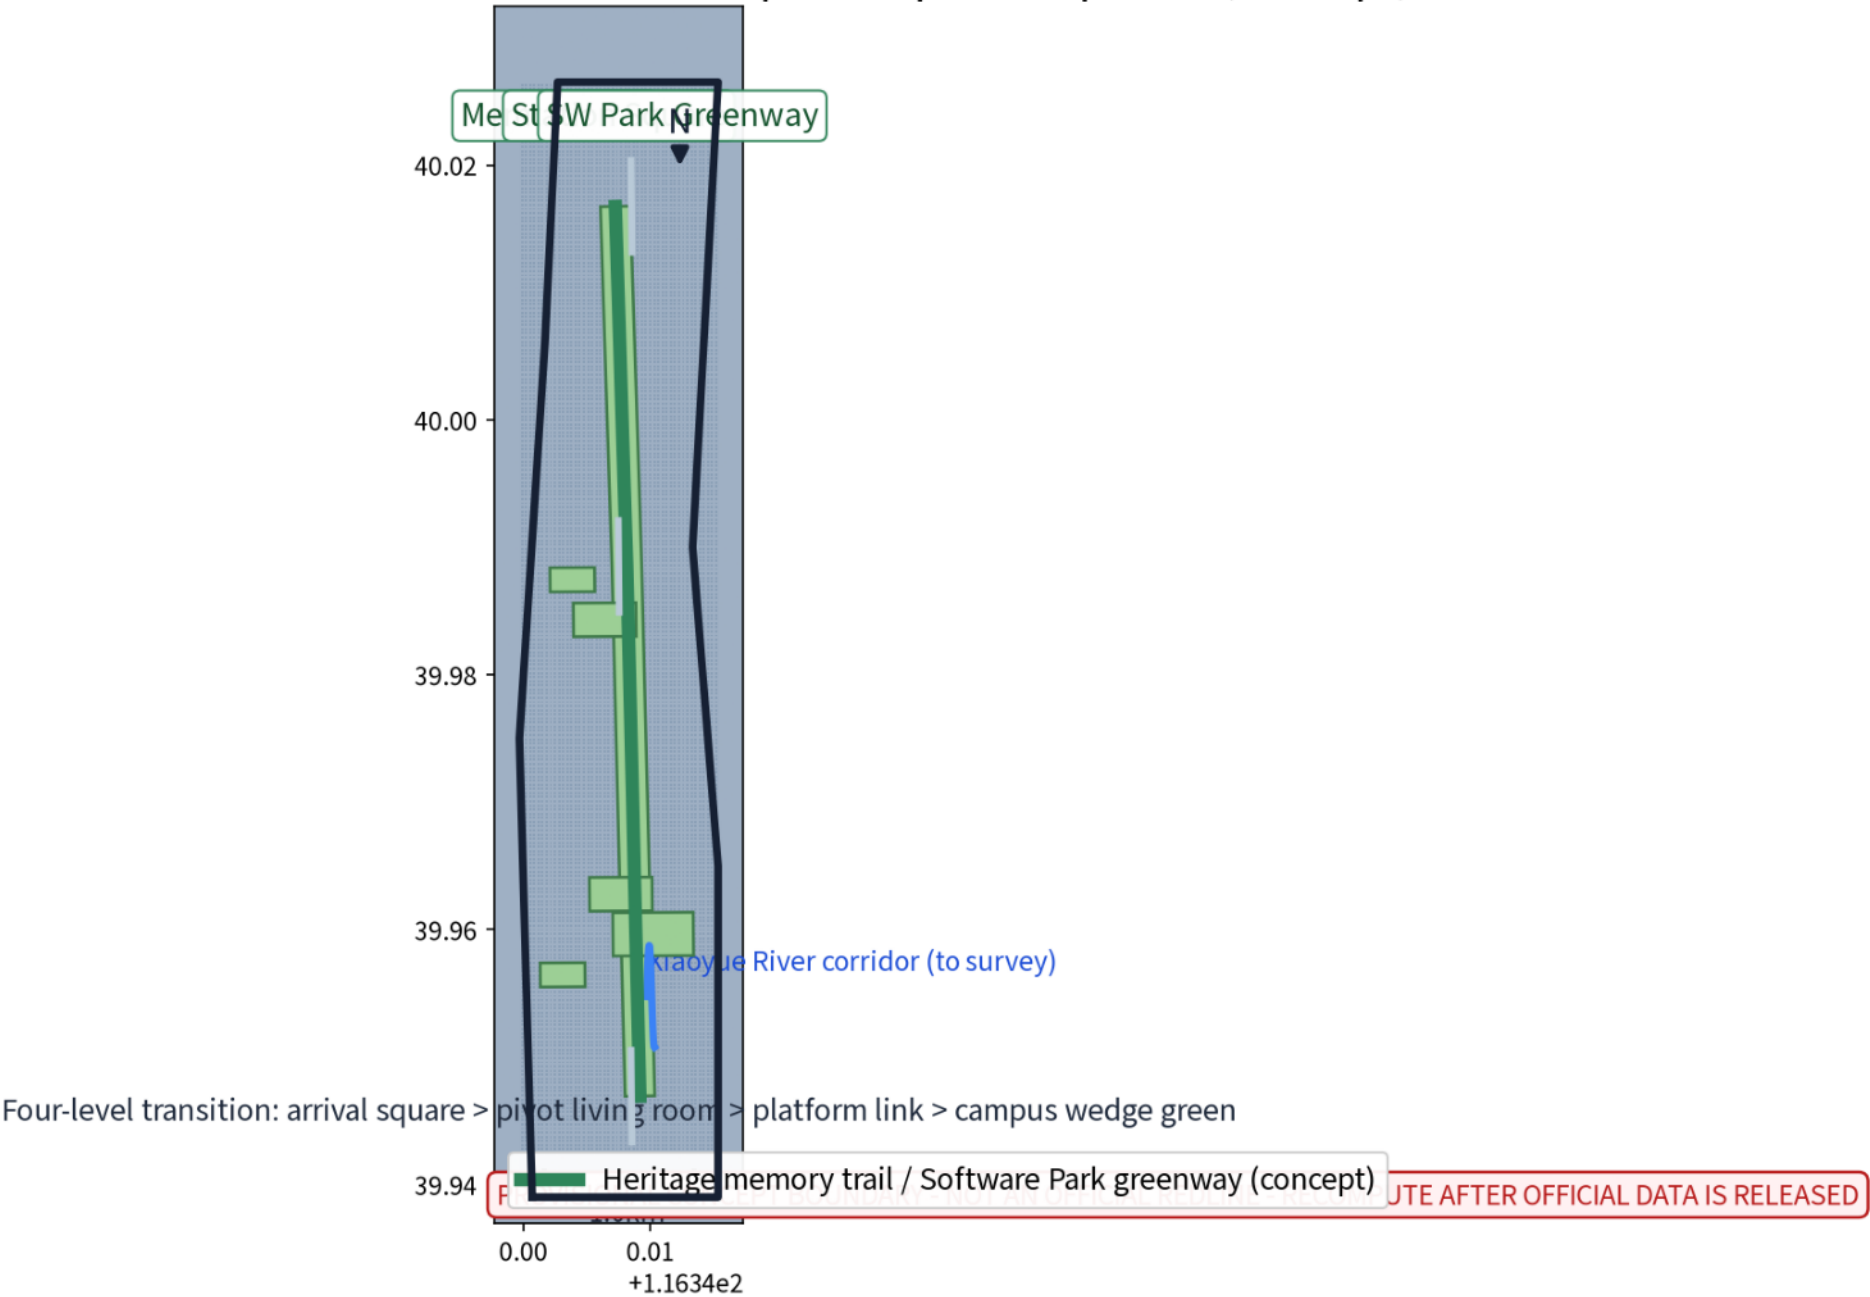

A ONE STATION • ONE PIVOT, THREE-NODE NETWORK - Node & AI Landmark Index (concept) BASED

5. mobility-bluegreen

ALL CONTENT IS CONCEPTUAL - PROVISIONAL CONCEPT BOUNDARY - NOT AN OFFICIAL REDLINE - RECOMPUTE AFTER OFFICIAL DATA IS RELEASED

Blue-green slow-traffic network and four-level public space sequence (concept)

6. metrics-evidence

ALL CONTENT IS CONCEPTUAL - PROVISIONAL CONCEPT BOUNDARY - NOT AN OFFICIAL REDLINE - RECOMPUTE AFTER OFFICIAL DATA IS RELEASED

Key metrics evidence (reduced precision; formula & recompute trigger in metrics.json)

场地面积(provisional)	约1140万 m ²	低
绿地率	约17%	低
公共空间率	约0.3%	低
概念建筑留改区	12个建筑单元	中
AI地标/场景节点	3 / 8 处	中
产业测试场景	3 项	高
人才画像	5 类	高
全球案例	6 个	高
年度活动	3 项	高
分期	3 期(1-3/3-5/5-10年)	中

PROVISIONAL CONCEPT BOUNDARY - NOT AN OFFICIAL REDLINE - RECOMPUTE AFTER OFFICIAL DATA

 geometry estimates (recompute when official data released)

Metrics / Area Recalculation / Compliance Summary

材料与图件	proposal.md(+en)、geometry、metrics.json、矩阵、图件中文版、A0/A3 PDF(+en)、HTML(+en)
指标	约定：绿地率约17%、公共空间率约0.3%、建筑单元12、AI地标3、场景节点8、测试场景3、
拆改留	留改拆并举：铁路与工业遗存登记建档、能留尽留；拆除仅限无价值临建（概念口径）
风险	边界未发布/法定控制缺位/隐私与AI边界/实施落地/品牌在先权利，均设应对与复算触发
