

THE SECOND ENCOUNTER · 60-SECOND VIEW

Help before data; name a human owner before expansion

JING-ZHANG · THE SECOND ENCOUNTER

CONCEPTUAL PROPOSAL · PROVISIONAL GEOMETRY

01 FIRST ENCOUNTER

Declare purpose, data boundary, and human fallback.

02 CONSEQUENCE

Record outcomes after service, not personal identity.

03 SECOND ENCOUNTER

Return to compare, question, and add evidence.

04 REPAIR

Publish changes, ownership, stop and exit conditions.

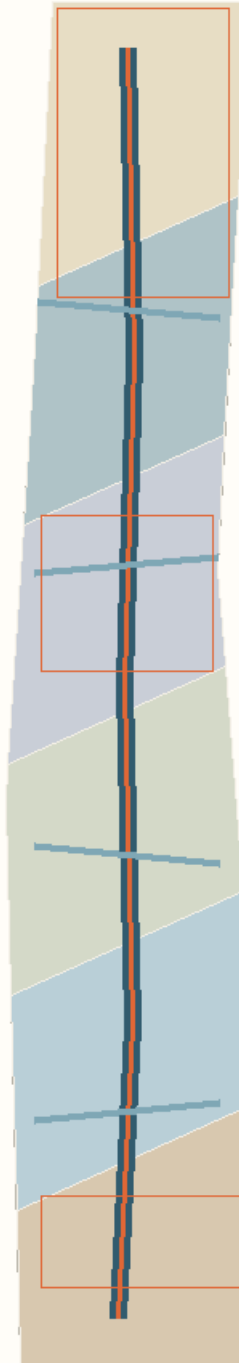

Not an official plan. Provisional geometry for discussion and review.

OVERALL STRUCTURE AND PROVISIONAL LAND USE

One spine · four cross-links · six stations · nine public nodes

ONE MEMORY SPINE · THREE TIME ROLES · SIX RETURN STATIONS

CONCEPTUAL PROPOSAL · PROVISIONAL GEOMETRY

The land-use model is a complete, topology-safe conceptual partition. The Memory Spine crosses every band so return is a civic route, not a specialist office.

- MEMORY SPINE
- RETURN CROSS-LINKS
- STAFFED NODES
- PROVISIONAL EDGE

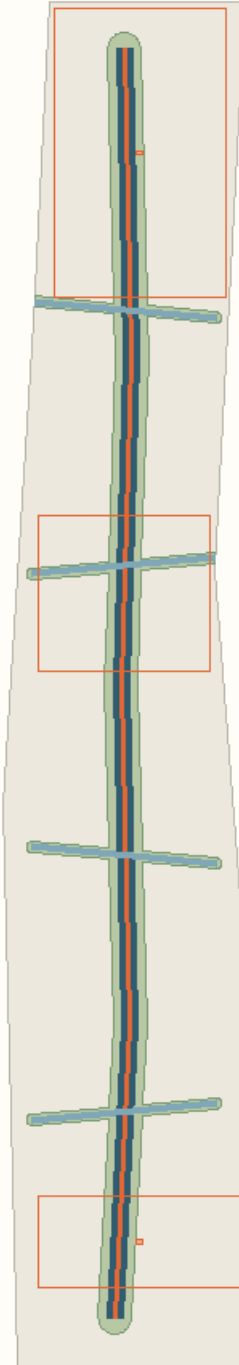

Not an official plan. Provisional geometry for discussion and review.

THREE AREAS · THREE MOMENTS

Before creation · during use · after use

THREE AREAS AS THREE MOMENTS OF A RELATIONSHIP

CONCEPTUAL PROPOSAL · PROVISIONAL GEOMETRY

ZHONGZHIYUAN · CREATE

First Promise Platform: declare purpose, owner, and exit before launch.

AI ORIGIN · ENCOUNTER

Second Encounter Commons: residents return with consequences for a staffed review.

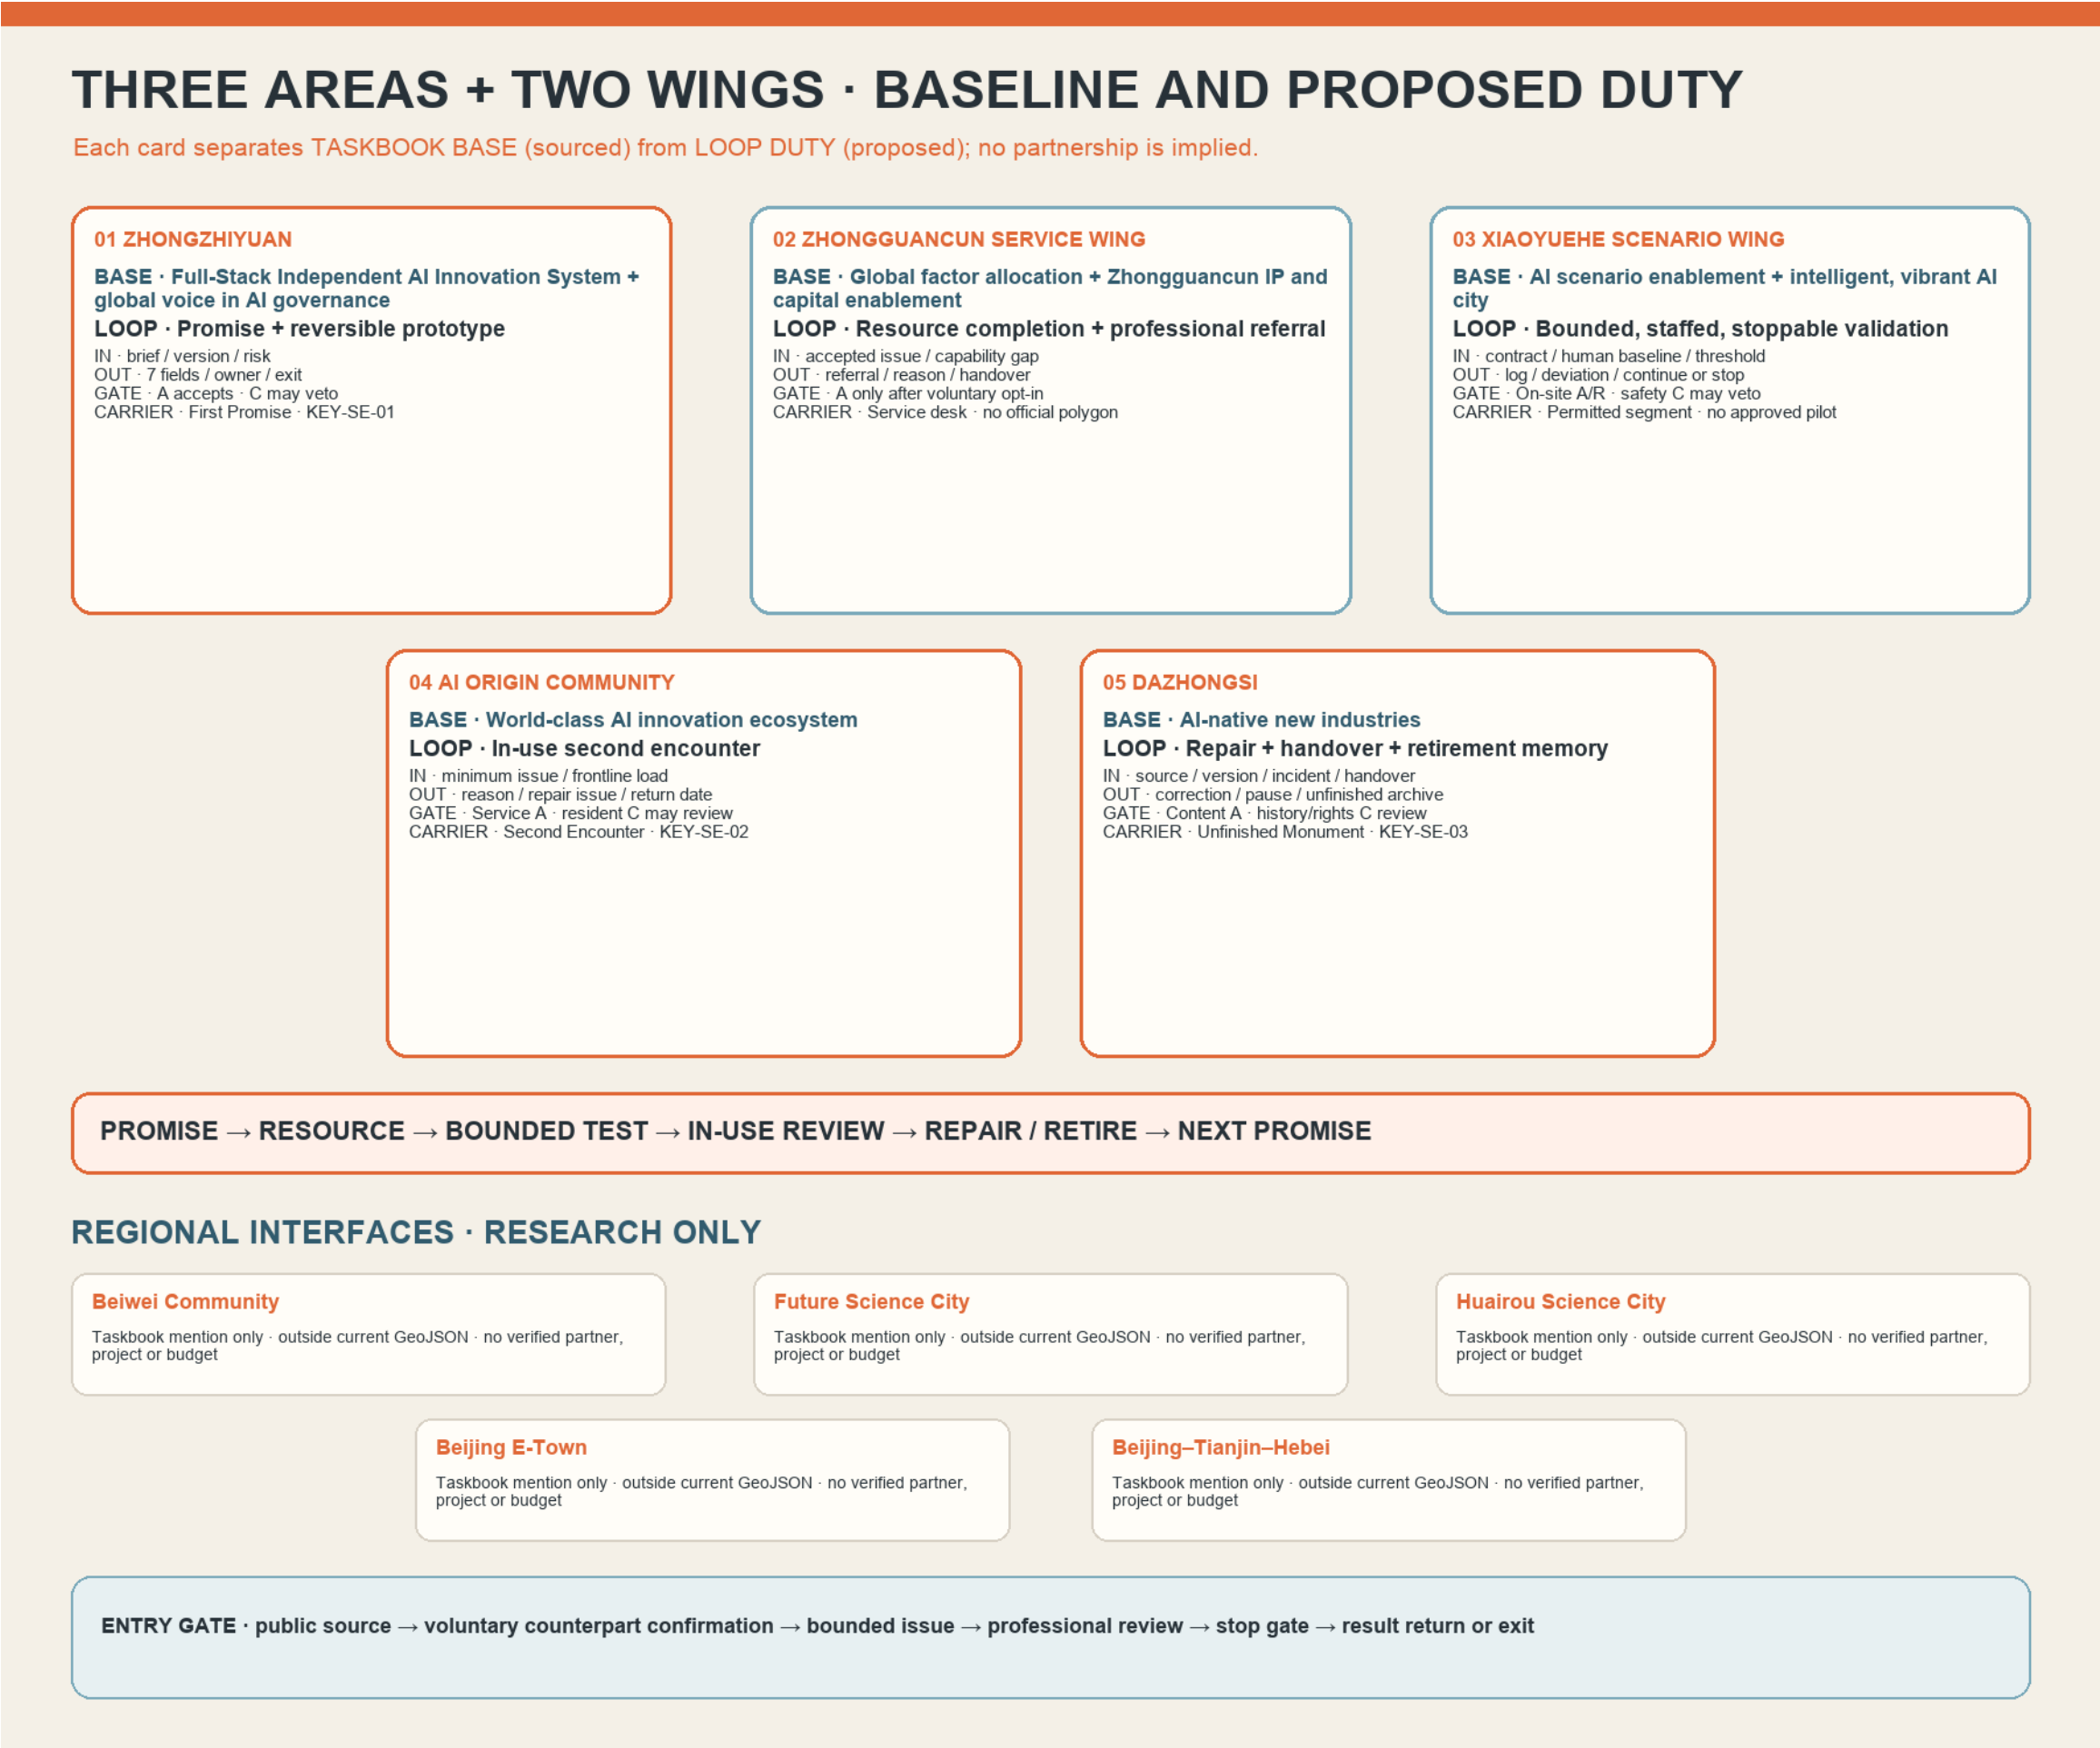

DAZHONGSI · CARE

Monument to the Unfinished: display repair, pause, and retirement—not success alone.

Not an official plan. Provisional geometry for discussion and review.

THREE AREAS, TWO WINGS AND REGIONAL BOUNDARIES

Taskbook baseline roles and proposed loop duties shown separately; five external counterparts stay research-only

EIGHT GLOBAL CASES

Transfer a mechanism and state the boundary

EIGHT CASES · EIGHT MECHANISMS

Spatial ecosystem + public accountability, each with a transfer limit

SIX PEOPLE AND THE RIGHT TO REFUSE

Composite test lenses, never interviews

SIX PEOPLE · SIX RIGHTS TO REFUSE

Composite design lenses, not interviews or evidence of consent

P1 Older resident without a smartphone

- GOAL** Complete today's trip and learn whether the earlier issue was owned
- BARRIER** QR-only access, jargon, repeating the story
- RIGHT** Paper, phone, face-to-face; query code only is enough
- REFUSE** Refuses if an account is required, human help is absent, or the place is unsafe

P2 Low-mobility or low-vision commuter

- GOAL** Use a continuous, verified and reasonably direct accessible route
- BARRIER** Roadworks, missing tactile/audio information, stale maps
- RIGHT** Human escort, large-print paper, phone and audio explanation
- REFUSE** Refuses when no field check exists, disability labels would be exposed, or the detour is less safe

P3 Community or campus frontline worker

- GOAL** Help the person first, then route repeated issues to someone able to change the service
- BARRIER** Responsibility dumping, inter-department silence, extra forms
- RIGHT** Referral within one staffed shift and the right to reject out-of-scope work
- REFUSE** Pauses when no service owner exists, workload is unsafe, or uncertainty must be hidden

P4 Student or open-source developer

- GOAL** Improve a tool with real but de-identified problems and see whether a fix works
- BARRIER** Missing context, launch-only rewards, no withdrawal record
- RIGHT** Sandbox data, version log, public issue and mentor review
- REFUSE** Refuses access to raw personal records, missing licences, or testing without stop authority

P5 Shop owner or start-up

- GOAL** Understand policy and service routes without mistaking explanation for approval
- BARRIER** Opaque exclusion, repeated documents, recommendation confused with eligibility
- RIGHT** Human review, checklist explanation and offline enterprise-service desk
- REFUSE** Refuses automated approval, irrelevant business-data collection, or no appeal path

P6 International visitor or new resident

- GOAL** Find places, rules and human help without already knowing local institutions
- BARRIER** Literal translation, missing context, fear of asking wrongly
- RIGHT** Plain bilingual copy, icons, paper map and a steward
- REFUSE** Refuses when critical copy lacks bilingual review or machine translation is treated as legal advice

TWELVE SCENARIO CONTRACTS

Only SC01, SC05 and SC09 enter the first pilot

12 SCENARIO CONTRACTS · THREE PILOTS

Every card names a human route, accountable role, data boundary, stop and restart gate

SC01 Accessible-route correction

PILOT

T1 / T0 when immediate harm

HUMAN | A steward verifies a route usable today and can escort; paper, phone, face-to-face and QR are equal

STOP | Stop on physical danger, two failed field checks or missing human access; restart after verified access and owner sign-off

SC02 Walking-navigation follow-up

T1

HUMAN | Paper directions, junction signs and human wayfinding coexist; live location is not required

STOP | Take a segment offline after two errors, lighting/flooding danger or conflicting signs; restore after two-person verification

SC03 Low-speed robot crossing

T0 high-risk controlled test

HUMAN | An on-site commander holds a physical emergency stop; people can bypass the test

STOP | Stop on near collision, lost link, failed e-stop or excess crowd; restart after reproduction tests, reduced risk and authority sign-off

SC04 Public-space comfort suggestion

T2

HUMAN | Human observation, paper feedback and scheduled inspection lead; AI only proposes options and controls nothing

STOP | Withdraw on minority harm, concentrated complaints or sensor drift; restart after seasonal and multi-user review

SC05 Public-service navigation and

PILOT

T1 / sensitive cases private

HUMAN | A steward explains scope and provides phone/physical desks; the resident decides whether a minimum summary is transferred

STOP | Stop transfer when jurisdiction is unclear, consent is withdrawn or sensitive data reaches a public surface; restart after deletion/correction and review

SC06 Health-information navigation (no diagnosis)

T0/T1 sensitive

HUMAN | Provide sources, booking and emergency routes only; no diagnosis or triage; emergencies go directly to human hotlines/emergency care

STOP | Stop on diagnostic output, failed emergency escalation or inadequate privacy; restart after professional review, script repair and drill

SC07 Education-resource suggestion (teacher)

T1/T2

HUMAN | Teacher/counsellor makes the final choice; paper resource list and library access remain equal

STOP | Stop on stigma, unexplained exclusion or missing human choice; restart after material/bias review and teacher sign-off

SC08 SME service explanation and matching

T1/T2

HUMAN | AI explains documents and routes only; existing accountable bodies make all eligibility, approval and funding decisions

STOP | Stop on automated eligibility, differential treatment or stale source; restart after rule update, sampling and owner sign-off

SC09 Railway and neighbourhood g

PILOT

T2

HUMAN | Critical claims show source and version; paper guide/human guide are equal; disputed content can be hidden

STOP | Stop on unverifiable claims, material mistranslation or rights complaint; restart after two-source and copyright checks

SC10 Open-source release and version transparency

T2

HUMAN | Publish model card, data boundary, licence, owner, version, known failures and retirement date; offer an offline summary

STOP | Stop on leakage, licence conflict, missing maintainer or failed rollback; restart after fix, rota and rollback drill

SC11 Event-flow support (on-site commander lead)

T0/T1

HUMAN | The on-site commander has sole action authority; public address, signs, staff and accessible evacuation lead

STOP | Stop on threshold breach, unstable communication or blocked exit; restore after drill and site verification

SC12 Edge-compute and energy disclosure

T2

HUMAN | Publish service-level energy band, processing location, retention and degraded mode; provide readable paper copy

STOP | Stop on unknown provenance, expired retention, abnormal energy or unexplained processing location; restart after audit and configuration repair

Sensitive health, education, legal, child and enterprise cases never enter the public wall.

SIX STATIONS · THREE LANDMARKS · ONE KIT

16.2 sqm per station; 219 sqm per landmark; borrow before building

ONE ORDINARY PERSON'S RETURN

Help today and do not make her tell the story five times

ONE ORDINARY PERSON'S RETURN · HELP TODAY FIRST

CONCEPTUAL PROPOSAL · PROVISIONAL GEOMETRY

01 ROAD CLOSED

An accessible route ends at roadworks.

02 HELP NOW

A steward draws a route that works today.

03 QUERY CODE

Name and phone stay blank; no account required.

04 RETURN

3/14/30 days to own, explain, repair, or stop.

Composite journey · pilot target, not a real interview or government commitment

Not an official plan. Provisional geometry for discussion and review.

ACCEPTANCE AND STOP GATES

Eight-role RACI · risk-tiered T0–T3 rhythm

WHO ACCEPTS · WHO STOPS · WHO RESTARTS

Eight-role RACI and a risk-tiered T0–T3 response rhythm

A Public accountable body Accept/refer/refuse jurisdiction with reason; stop expansion	R Station steward Help first, record minimally; pause unsafe or out-of-scope work	R Case coordinator De-duplicate and route; freeze unclear transfer	A/R Service owner Investigate, repair or explain extension; take scenario offline
R Technical maintainer Version, permission, rollback; emergency stop, no solo restart	C Independent reviewer Accessibility/privacy/safety check; veto high-risk restart	C Resident/frontline reps Test real improvement and trigger review	R/I Public-record editor Publish de-identified facts; remove wrong/sensitive content

RESPONSE GATES

T0 Stop now+ human takeover harm/leak/near miss	T1 Help in shift; own in3 workdays intake/jurisdiction	T2 Status by day 14 finding+ next date	T3 Repair/observe/extend/stop by day 30 never fake completion
--	---	---	--

TWO STATIONS FIRST · 8+12+4 WEEKS

Expand only after staffing, human access and ownership pass

TWO STATIONS FIRST · DECIDE AFTER 8+12+4 WEEKS

Test staffing, human access, and ownership before expanding space or technology

8 WEEKS · PREPARE

Borrow two existing spaces
Name the steward, service owner, and technical rotation

12 WEEKS · PILOT

Accessible routing, public-service navigation, heritage correction only
Paper, phone, face-to-face, and QR remain equivalent

4 WEEKS · OPEN REVIEW

Publish unanswered cases, repeated problems, and frontline workload
Repair, observe, or stop

STOP EXPANSION: no owner · human route repeatedly unavailable · new safety risk

All timings are co-design targets for a pilot, not confirmed government commitments.

PILOT SHIFT

StewardR+ coordinatorR
Accountable bodyA must be reachable

PILOT DATA

Paper/phone/face-to-face/QR are equal
No sensitive case on public wall

PILOT RESTART

Human access, accepted ownership, safety, and rollback drill all pass

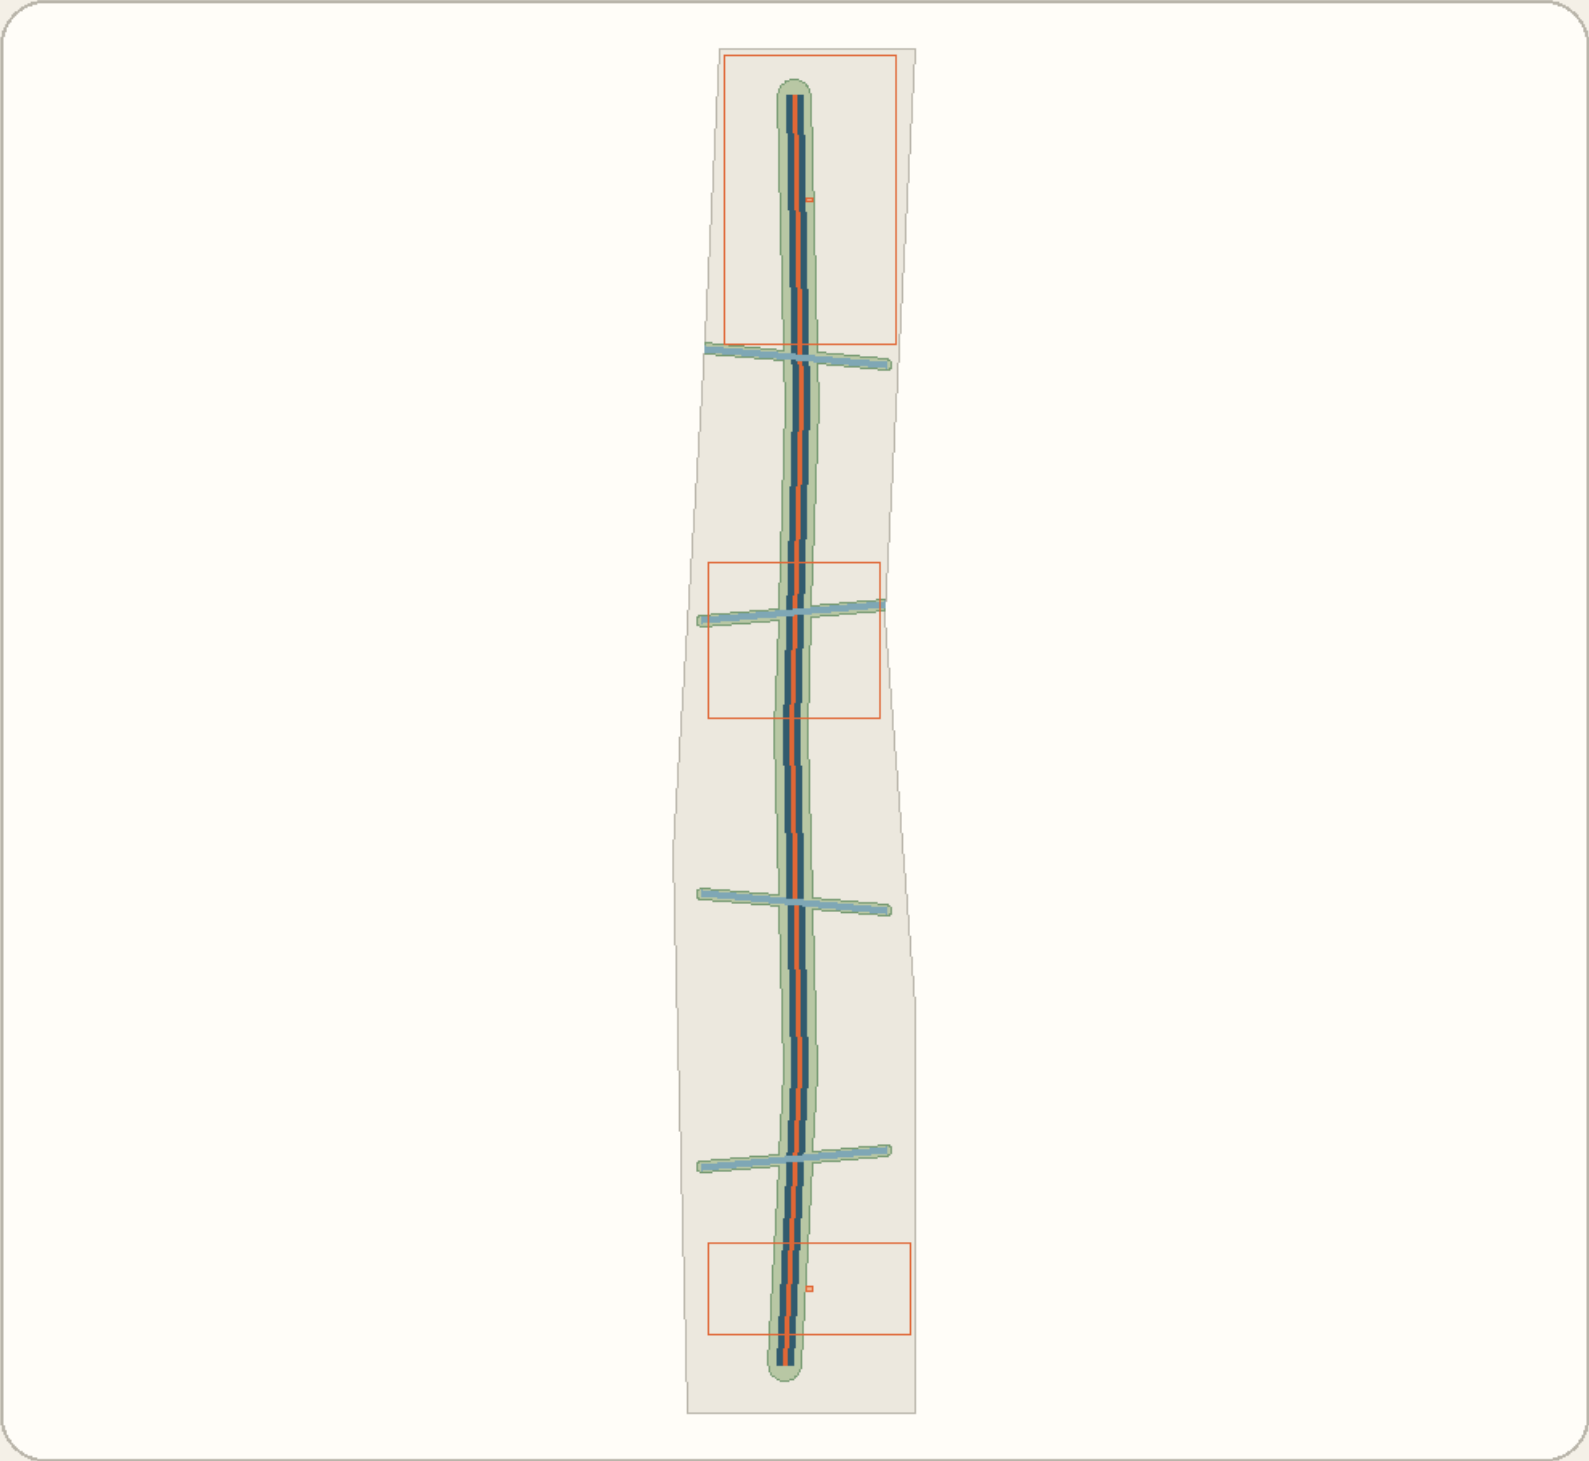

FIXED PILOT: SC01 accessible routes · SC05 public-service referral · SC09 heritage-source correction

METRICS, EVIDENCE AND UNKNOWN

Design counts are checkable; outcomes are not pre-filled
